AMERICAN STATE PAPERS.

MISCELLANEOUS.

11th Congress.] No. 264. [1st Session.

CONTESTED ELECTION OF WILLIAM BAYLIES, A REPRESENTATIVE FROM MASSACHUSETTS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JUNE 8, 1809.

Mr. FINDLEY, from the Committee of Elections, to whom was committed the petitions of certain inhabitants of Plymouth district, in the State of Massachusetts, praying that William Baylies may not be considered as entitled to a seat in this House, and that Charles Turner may be considered as entitled to a seat as a member of this House, made the following report:

That they have, according to order, examined the petitions and the documents which accompany them. The petitions, signed by one thousand two hundred and thirty-one inhabitants of the district, state that, at an election held for a member of Congress for the district of Plymouth, in the State of Massachusetts, agreeable to the law of that State, directing the time, place, and manner of electing members of Congress, on the first Monday of November, 1808. The whole number of votes given were 3,719, of which, agreeable to the laws of that State, 1,860 were necessary to make a choice; of these there were given for Charles Turner, Jun. Esq., 1,443 votes, and for Charles Turner, Esq., 430 votes, amounting, if for the same candidate, to 1,873, which being a majority of the whole number of votes decided the election in favor of Mr. Turner, the candidate for whom the petitioners claim the seat, if he was the same person intended to be voted for by the name and additions of Charles Turner, Jun. Esq. and Charles Turner, Esq. The petitioners assert that Charles Turner, in whose behalf they claim the seat, is the same person for whom the votes were given with the addition of Esq. and Jun. Esq.; and, in proof of this, they assert that the laws of Massachusetts direct that the candidates voted for must be inhabitants of the district for which they may be elected; and that there was no other person legally qualified to be a candidate for a seat in Congress, inhabiting that district at the time of the election, but the same Charles Turner for whom the petitioners claim the seat in Congress.

These assertions of the petitioners are proposed to be supported by testimony taken after due notice given to the sitting members, which have been admitted by the committee as correctly taken, but not acted on with respect to the merits of the case.

It appears that, by the law of Massachusetts, the Executive of that State decides on the election of members of Congress, and certifies the return, and that in this instance the selectmen, who appear by the laws and customs of that State, to be official election officers in their respective towns or districts, has set down the votes received for Charles Turner, Jun. Esq., and for Charles Turner, Esq., separate from each other, and that the Executive, in deciding on the election, had considered the votes as given for different candidates, and on this supposition none of the candidates had a majority of the whole number of votes given, and, therefore, directed that another election should be held in Plymouth district on the 19th of January, 1809, at which the sitting member had the majority of votes, and, in consequence of which, he was returned to Congress by a certificate signed by the Governor.

Before the committee examined maturely the documents, or deliberated on the merits of the case, the sitting member requested a postponement of the decision till the next session of Congress, in support of which he alleged, that it is necessary to a full and fair investigation of the case, and to acquaint himself with the facts, and to be able to produce all the evidence material to a correct decision of the question; that he was notified that his election would be contested but a short time previous to the meeting of Congress, and that he considered depositions taken without the direction of the House, or their committee, as taken without the authority of law; that these circumstances prevented him from preparing himself in such a manner as to be able at this time to do justice to the cause or to those who had honored him with their suffrages.

Without examining the merits of the case, the question was taken in the committee, on the request of the sitting member, to have the decision postponed, for the reasons herein before stated, and carried in the affirmative.

[NOTE.—See further report, No. 266.

11th Congress.] No. 265. [1st Session.

PROTEST OF PENNSYLVANIA AGAINST THE DECISION OF THE SUPREME COURT IN THE CASE OF GIDEON OLMSTEAD.

COMMUNICATED TO THE SENATE, JUNE 11, 1809.

To the Senate of the United States: JUNE 4, 1809.

In compliance with the request of the Legislature of Pennsylvania, I transmit to Congress a copy of certain of its proceedings communicated for the purpose by the Governor of that State.

JAMES MADISON.

Resolutions of the Pennsylvania Assembly.

Whereas, the Governor, in a communication to the Legislature, has represented that the Supreme Court of the United States had ordered a peremptory mandamus to be issued in the suit of Gideon Olmstead and others *versus* Elizabeth Sergeant and Esther Waters, executrixes of the late Mr. Rittenhouse; and that immediate application will be made to Richard Peters, judge of the district court of Pennsylvania, for an execution against the persons and effects of the said Elizabeth Sergeant and Esther Waters; or that, rather an attachment against their persons will be the compulsory process adopted on this occasion; and that, in conformity to the provisions of an act of assembly passed the 2d of April, 1803, it becomes the duty of the Executive to protect the property and persons of the said executrixes against such process: and whereas the causes and reasons which have produced this conflict between the General and State Governments, should be made known, not only that the State may be justified to her sister States, who are equally interested in the preservation of the State rights, but to evince to the Government of the United States, that the Legislature, in resisting encroachments on their rights, are not acting in a spirit of hostility to the legitimate powers of the United States court, but are actuated by a disposition to compromise, and to guard against future collisions of power, by an amendment to the constitution; and that, whilst they are contending for the rights of the State, it will be attributed to a desire of preserving the Federal Government itself, the best features of which must depend upon keeping up a just balance between the General and State Governments, as guarantied by the constitution.

Be it therefore known, That the present unhappy dispute has arisen out of the following circumstances:

That, in the night of the 6th of September, 1778, Gideon Olmstead, being a prisoner on board the armed sloop Active, bound to New York, on the passage prevailed on three of the seamen to assist him in endeavoring to take the said sloop from the captain and the rest of the crew, and to carry her into an American port. In pursuance of this bold and hazardous design, they secured the captain and crew under deck, and contemplated running the sloop into Egg Harbour: a considerable contest then arose between those under, and those on deck, for the command of the vessel.

On the 8th of September they were boarded by the brigantine *Convention*, fitted out by the State of Pennsylvania, commanded by Captain Thomas Houston, and, in a very short time after, the sloop Active was thus seized by the Convention the privateer sloop *Le Gerard*, of Philadelphia, commanded by Captain James Josiah, hove in sight.

The prize was brought into the port of Philadelphia, and was libelled in the court of admiralty of the State, on the 14th of September. Captain Thomas Houston for the State, himself and crew, claimed *one-half;* Captain James Josiah, commander of the privateer sloop Le Gerard, for himself, crew, and owners, as consort of the Convention, and as in sight at the time of capture, claimed *one-fourth*, allowing *one-fourth* for the four persons who first rose upon the crew of the sloop Active: Gideon Olmstead and his companions claimed the whole, alleging that they had risen on the captain and crew, had confined them in the cabin, had assumed the sole command and direction of the sloop, and were proceeding towards Egg Harbor with the captain and crew, *subjected and reduced*, when the said sloop was seized by the brigantine Convention. And the great question for decision was, whether Gideon Olmstead had subdued the captain and crew of the Active, *or whether hostilities had ceased*, when the Convention and Le Gerard came up with her?

The court of admiralty is the appropriate court for the trial and decision of all cases of prize. But how that court shall be constituted, must depend upon the will of the nation or State to which it belongs. The Legislature are, however, inclined to believe, that the interposition of a jury in admiralty causes was peculiar to some of the American States, and a remarkable instance of a departure from the usage of nations. It was, however, bottomed on the following resolution of Congress, of November 25, 1775: that it be recommended to the several Legislatures in the United Colonies, as soon as possible, to erect courts of justice, or give jurisdiction to the courts now in being, for the purpose of determining concerning the captures to be made as aforesaid, and to provide that *all trials in such case be had by a jury, under such qualifications as to the respective Legislatures shall seem expedient.* That, *in all cases*, an appeal shall be allowed to the Congress, or such person or persons as they shall appoint for the trial of appeals, &c.

By an act of Assembly of Pennsylvania, passed September 9, 1778, a court of admiralty was established. The trial was to be by jury, who were to be sworn or affirmed, "to return and give a true verdict according to evidence; and the finding of the said jury *shall establish the facts without re-examination or appeal.*"

In all cases of captures, an appeal from the decree of the judge of admiralty of this State shall be allowed to the continental Congress, or such person or persons as they may from time to time appoint for hearing and trying appeals, &c.

On the 4th of November, 1778, the cause came on to be tried before a struck jury, who, after hearing all the exhibits, and the arguments of the respective advocates thereon, and taken time to consider thereof, on the following day returned their verdict, finding one-fourth part of the net proceeds of the sloop Active and her cargo to the first claimants, (Gideon Olmstead and others,) and three-fourth parts of the net proceeds of the said sloop and her cargo to the libellant, (Captain Houston,) and the second claimant, (Captain Josiah,) as per agreement between them. The jury thus decided the great and important fact "that hostilities had not ceased on board the sloop Active at the time the brigantine Convention came up with her; in other words, that the captain and crew had not been *then* subdued." The judge made his decree accordingly, and the same day Gideon Olmstead and the three seamen appealed from the verdict, decree, and sentence.

At this period no *court* of appeals had been *established* under the authority of Congress, or in pursuance of the articles of confederation of the 9th of July, 1778. But committees of appeals had been from time to time appointed, consisting of *members of Congress.* By the 9th article of confederation, Congress was vested with power of "appointing courts for the trial of piracies and felonies committed on the high seas, and establishing courts for receiving and determining finally appeals in all cases of captures, provided that *no member of Congress shall be appointed a judge of any of the said courts.*"

The time when Pennsylvania acceded to the confederation is, perhaps, immaterial. It was not finally adopted by all the States, and ratified, until the 1st of March, 1781. It is, therefore, to be presumed that the Committee of Appeals, as appointed by Congress, was competent as to authority, even under the provision of our own law, as no objection appears ever to have been suggested on this head.

But as to the authority or extent of the jurisdiction of the Committee of Appeals, a difference of opinion has arisen among the wisest and best informed of our citizens; and this question, of mighty moment, indeed, has agitated all Pennsylvania for thirty years.

If the Committee of Appeals had authority to revise facts which had been already established by the verdict of a jury, there was an end of the question. Thier decree was conclusive and final; it could not be opened or reviewed; and it ought to have been carried into effect.

But Pennsylvania has uniformly, by all her public acts, denied the authority of the court of appeals to re-examine or control the verdict of the jury. The decision of a State is always important, and of infinite weight in comparison with mere private opinion. An assertion of her right was an obvious consequence; and an attempt to interfere with that right *ex parte* cannot fail to call forth, on her part, feelings of the deepest regret.

It is true that Congress, with the approbation and acquiescence of the people, exercised the power of war and peace; and, however imperfect their sovereignty might have been, they administered it with glory and advantage to the United States. It is equally true they commissioned privateers to cruise against the enemy; and to this high power, it is said, the question of prize is incidental. And if it would result from this that they had power to establish courts of admiralty, yet it is equally clear they did not exercise this power; and, by the articles of confederation, it was not vested in them, but merely the power to establish a court of appeals in cases of captures, although, by the same instrument, they had power "to establish courts for the trial of piracies and felonies upon the high seas, and the right of establishing rules for deciding, in all cases, what captures on land or water shall be legal, and in what manner prizes taken by naval or land forces, in the service of the United States, shall be divided or appropriated." And whatever construction might have been had, if the decree of reversal had been in the court established after the confederation, yet in 1778 it had no binding force, nor did they profess to act under it. Courts of admiralty for the trial of captures, or the prize courts, could then be established only by the respective States.

Congress recommended to the several States to establish courts of admiralty, and to provide that all trials in such case be had by a jury, under such qualifications as to the respective Legislatures shall seem most expedient, reserving, in all cases, an appeal to Congress, &c.

However incidental the question of prize, or cases of captures, may be to sovereign power, the principle cannot apply in its full extent to the imperfect sovereignty exercised by the United States. Their authority was gradually acquired, by the consent and acquiescence of the States; and, where it was thus acquired, the exigencies of the new formed Union required that it should be deemed legitimate, though never expressly assented to. The power of establishing courts of admiralty they never assumed. The inference, therefore, is forcible, that they had not the power; or why recommend to the States to establish courts of admiralty, if, by virtue of their newly acquired sovereignty, they could themselves have established them? If they could not erect courts of admiralty jurisdiction, in the first instance, they could not, without the consent of the State, erect the appellate court. The State which established the admiralty court must likewise possess the power to regulate the appellate jurisdiction from its decrees; and, by the assent of the State, the appellate jurisdiction was, at their own requisition, given to Congress, where the interest and safety of the Union required it should be deposited, but under certain restrictions.

The admiralty court, being the court of all nations, has, by the usage of nations, been governed by the rules and principles of the civil law. It has always proceeded without a jury; and from its decrees on an appeal, the facts, as well as the law, have always been subject to a re-examination. But when Congress recommended the decision of facts in that court by a jury, strangely departing from the usage of nations, the consequence inevitably followed that the facts established by the jury could never be re-examined on an appeal. The party dissatisfied might have applied for a new trial; but there is no other way of reversing the facts determined by a jury. When, therefore, Congress recommended that the trial in such cases should be by jury, from the uniform course of proceeding in such trials, it is at least presumable they did not intend, by reserving an appeal, that the facts should be re-examined; and the only fair or consistent construction would be, that there should be an appeal on the points of law appearing on the record. That such was the intention of the Legislature of Pennsylvania is beyond doubt, when they declared "that the finding of the jury shall establish the facts, without re-examination or appeal;" and although, by the same act, they gave an appeal to Congress, it cannot be absurdly supposed that they meant to contradict and destroy the principle they had at the same instant so solemnly declared and adopted. The question itself to be tried was a mere fact, "Who captured the sloop Active?" The jury decided that fact. They could judge of the circumstances, as well as the credit or credibility of the witnesses. If their decision, therefore, was not to be conclusive, but to be open to a re-examination, on an appeal, before a committee of Congress, in the shape of a court of appeals, the jury trial was a solemn mockery, calculated for expense and trouble, but productive of no good. In the case of Ross and Rittenhouse, the chief justice declared "that the genius and spirit of the common law will not suffer a sentence of the lowest court, founded on a general verdict, to be controlled or reversed by the highest jurisdiction, unless for error in matter of law, apparent upon the face of the record." And the same chief justice was also of opinion that the principle was forfeited by the resolution of Congress of January 15, 1780, "that the trials in the court of appeals should be according to the usage of nations, and not by jury." And on the 31st of the same month, accordant with this resolution, the Legislature of Pennsylvania appear to have been willing, for the future, to change the practice; for they resolved, "that, if the mode of trial by jury, (in cases of captures,) as recommended by Congress, is found inconvenient to the circumstances of the United States, as being a mode unknown to most of the civilized States of Europe, this House is desirous of conforming to the customary practice."

But, notwithstanding this mode of reasoning, the committee of appeals undertook to re-examine the whole case; they set aside the verdict of the jury, reversed the sentence of the judge of the admiralty, and decreed the whole proceeds of the prize to the appellants, with costs. The judge of the admiralty refused to carry this decree into effect; and, on the 28th of December, further decreed "that, although the court of appeals have full power to alter or set aside the decree of the judge of this court, yet that the finding of the jury in the cause does establish the facts in the cause without re-examination or appeal, and, therefore, the verdict of the jury still standing, and being in full force, the court cannot issue any process, or proceed in any manner whatsoever contradictory to the finding of the said jury;" and he ordered the money to be brought into court, there to remain ready to abide the further order of the court therein.

Here, then, began the great contest for jurisdiction. On the 4th of January, 1779, the committee of appeals issued their injunction to the marshal to detain the money in his custody, to wait the further orders of the court. The marshal, notwithstanding, paid the money to the judge of the admiralty, in obedience to the decree of that court. The committee of appeals would proceed no further, but ordered to be entered on record "that, as the judge and marshal of the court of admiralty, for the State of Pennsylvania, had absolutely and respectively refused obedience to the decree and writ regularly made in, and issued from, this court, to which they, and each of them, were and was bound to pay obedience; the court being unwilling to enter into any proceedings for contempt, lest consequences might ensue, at this juncture, dangerous to the public peace of the United States, will not proceed further in this affair, nor hear any appeal, until the authority of this court shall be so settled as to give full efficacy to their decrees and process;" and they ordered a state of the proceedings to be prepared that they might lay it before Congress. On the 21st of January a committee was appointed by Congress to examine into the principles of the powers of the committee of appeals, and the causes of the refusal of the judge of the court of admiralty, in the State of Pennsylvania, to execute their decree; which committee, on the 6th of March following, reported specially, the finding of the jury, and decree thereon, the reversal thereof, the reasons of the judge, and act of Assembly of Pennsylvania, as they are before stated. Whereupon, it was resolved, "that Congress, or such person or persons as they appoint to hear and determine appeals from the courts of admiralty, have, necessarily, the power to examine as well into decisions on facts, as decisions on the law, and to decree finally thereon; and that no finding of a jury in any court of admiralty, or court for determining the legality of captures on the high seas, can, or ought to destroy the right of appeal, and the re-examination of the facts reserved to Congress.

"That no act of any one State can or ought to destroy the right of appeal to Congress in the sense above declared.

"That Congress is, by these United States, invested with the sovereign supreme power of war and peace.

"That the power of executing the law of nations is essential to the sovereign supreme power of war and peace.

"That the legality of all captures on the high seas must be determined by the law of nations.

"That the authority, ultimately and finally, to decide on all matters and questions, touching the law of nations, does reside, and is vested in the sovereign supreme power of war and peace.

"That a control by appeal is necessary in order to compel a just and uniform execution of the law of nations.

"That the said control must extend as well over the decisions of juries as judges, in courts for determining the legality of captures on the sea; otherwise the juries would be possessed of the ultimate supreme power of executing the law of nations in all cases of captures; and might, at any time, exercise the same in such manner as to prevent a possibility of being controlled; a construction which involves many inconveniences and absurdities, destroys an essential part of the power of war and peace entrusted to Congress, and would disable the Congress of the United States from giving satisfaction to foreign nations complaining of a violation of neutralities, of treaties, or other breaches of the law of nations, and would enable a jury, in any one State to involve the United States in hostilities; a construction which, for these and many other reasons, is inadmissible.

"That this power of controlling by appeal the several admiralty jurisdictions of the States has hitherto been exercised by Congress, by the medium of a committee of their own members.

"*Resolved*, That the committee, before whom was determined the appeal from the court of admiralty, for the State of Pennsylvania, in the case of the sloop Active, was duly constituted and authorized to determine the same.

"*Resolved*, That the said committee had competent jurisdiction to make thereon a final decree, and therefore their decree ought to be carried into execution:" And they thereupon requested the Assembly of Pennsylvania to appoint a committee to confer with a committee of Congress on the subject.

If the reasoning in the foregoing resolutions establishes the propriety of proceeding, in cases of admiralty jurisdiction, according to the law and usage of nations, and which is now the law of the land, it could not change the law as it then stood; therefore, could have no effect upon Pennsylvania, tenacious of her own rights, resting upon her own laws, and understanding as well as any other State the extent of the power of Congress, and the authority she had consented to vest in that body. Committees were appointed to confer with a committee of Congress, but every conference was ineffectual; and on the 31st January, 1780, by a unanimous vote of the General Assembly, the following decisive instructions were transmitted to the Pennsylvania delegation in Congress:

"GENTLEMEN:

"The House being informed that it has been proposed in the honorable Congress that an order be drawn on the Treasury of the United States, for the amount of three-fourths of the net proceeds of the sloop Active and her cargo, and to pay the same to Gideon Olmstead and others, appellants in that case, in order to satisfy the decree of the court of appeals for prizes made at sea, and that the same be charged to the State of Pennsylvania, referring said State for indemnification to the three-fourths in the hands of the judge of the admiralty of Pennsylvania,

"The House, in consequence of the above, have taken the premises into their most serious consideration, and adopted the instructions given by the last House of Assembly, (March 10, 1779,) to a committee of the said House, who had been appointed to confer with a committee of Congress in the case of the sloop Active; which instructions are in the following words:

"*Resolved*, 1st. That the power of establishing courts for receiving and determining finally, appeals in all cases of captures, is reserved in Congress by the articles of confederation; and as the State of Pennsylvania has acceded to these articles, this House esteem it their duty to adopt such regulations, consistent with the principles of the confederation, as Congress may judge necessary for the due exercise of the said power.

"*Resolved*, 2d. That, by an act of this commonwealth for establishing a court of admiralty, it is declared and enacted that the finding of the jury shall establish the facts without re-examination or appeal, and that the act *is not repugnant to, but consistent with the resolutions of Congress of the 25th of November*, 1775.

"*Resolved*, 3d. That the proceedings in the court of admiralty, in the case of the sloop Active, were founded upon the aforesaid act of Assembly, which, together with the said resolve, form the true ground whereupon the decision of the contested point should be made, without involving a consideration of the necessity or propriety of future alterations.

"The House likewise instruct you immediately to inform the honorable body, of which you are members, that this House will consider any application of the money of this State, by Congress, to the purpose aforesaid, as a high infringement on the honor and rights of the commonwealth of Pennsylvania; and in this view will complain, in an especial manner, of those delegations which shall concur in any vote for that purpose, to the several legislative bodies from whom they respectively derive their powers.

"And you are further instructed to enter a protest, in behalf of this State, that we will pay no part of the sum which Congress shall award, out of the Treasury of the United States, in consequence of the decree of the court of appeals.

"We also instruct you to inform Congress that the manifest right of the citizens of this State to the benefit of its laws has, some time since, obtained from the authority thereof, an order for the distribution of the three-fourths, given by the verdict of the jury in this case, to the captains and crews of the brigantine Convention and her consort.

"The House views with astonishment the perseverance and decision of Congress, in rolling upon this State an embarrassment created by the court of appeals.

"Congress recommended a trial by jury to be introduced into the court of admiralty. The Assembly of Pennsylvania adopted the measure. A jury, in the case of the sloop Active, founded their verdict upon the facts. It is the proper business, and the strict right of juries to establish facts; yet the court of appeals took upon them to violate this essential part of jury trial, and to reduce, in effect, this mode of jurisprudence to the course of the civil law; *a proceeding to which the State of Pennsylvania cannot yield.*

"If the mode of trial by jury, (in cases of captures,) as recommended by Congress, is found inconvenient to the circumstances of the United States, as being a mode unknown to most of the civilized States in Europe, this House is desirous of conforming to the customary practice.

"The House finally remind you of the laws, which, they understand, have been passed in some of the States of the Union, denying all appeal in law, as well as fact, to the court of appeals established by Congress for prize causes, except the claimants be foreigners, or captors in the pay of Congress; by the operation of one of which laws, Mr. Hugh McCulloch, a citizen of Pennsylvania, was debarred from removing the case of a ship and cargo condemned in New England, into the said court of appeals, *and that little notice appears to be taken of these laws*, whilst Pennsylvania, conforming to the *recommendation* of Congress, concerning admiralty jurisdiction, in the most *legal* and *usual* construction of the *expression*, has not, in our opinion, been treated by that honorable body with sufficient respect and attention:"

Such, then, has been the decisive stand which Pennsylvania has uniformly made against the decree of the committee of appeals. Can we undertake to say, from a view of the case, that our predecessors, for thirty years, have been wrong? Yet the opinions of public men have been various. Chief Justice McKean, in the case of Ross and Rittenhouse, judicially declares "that the decree of the committee of appeals was contrary to the provisions of the act of Congress, and of the General Assembly, *extra judicial, erroneous, and void.*" Two of the judges, who sat in the same cause, although they do not expressly negative this opinion, appear not to concur in it. The Supreme Court of the United States, in the case of Pennhallow and Doane, unanimously affirm the authority of the court of appeals; and, upon the decision of this case, it would appear this contest has been revived, after it had slumbered for twenty-three years; and, as it would seem, even after Congress had abandoned the right.

But the Legislature cannot relinquish this part of the case without once more referring to the proceedings of Congress on this long litigated point.

Mr. Ellery, Mr. Hand, Mr. Spaight, Mr. Jefferson, and Mr. Lee, a committee of Congress, to whom was referred the proceedings and sentence of the court of appeals, in cases of capture, on the case of the ship Susanna, reported; and, after stating that the resolution of the 25th of November, 1775, had been complied with by the several States, some of them *ceding* appeals to Congress on a larger, and some on a more contracted scale; that the court of appeals had reversed the sentence passed by the inferior and superior courts of New Hampshire, in the case of the ship Susanna; that all these proceedings *were prior* to the completion of the confederation, which took place on the 1st day of March, 1781. They *resolved*, That the said capture having been made by citizens of New Hampshire, carried in, and submitted to the jurisdiction of that State, *before the completion of the confederation*, while appeals to Congress were absolutely refused by their Legislature, neither Congress, nor any persons deriving authority from them, had jurisdiction in the said case." On the 30th of March, 1784, the report was taken up, and on the question of agreement, on the yeas and nays, six States voted for the resolution, two States, and Mr. Read from South Carolina, voted against it, and two States were divided; and, in numbers, the yeas were 15, the nays 9; but there not being a majority of States in the affirmative, the question was lost. It may not be unworthy of remark, that, on the above resolution, Mr. Jefferson voted in the affirmative; as also did Mr. Ellery, who was one of the court of appeals, which reversed the decree of the Pennsylvania court of admiralty; and as Pennsylvania allowed an appeal only on a contracted scale that could no more be exceeded than it could in the case of the New Hampshire, who allowed no appeal at all.

There is no reason, therefore, for departing from the principles and opinions of our predecessors, unequivocally declared in their public votes and laws, respecting the case of the sloop Active, without a single exception from the first moment of the contest.

The second part of the case exhibits facts and circumstances of the deepest interest and concern to Pennsylvania. An attempt has been made by the district court, deriving its authority from the constitution of the United States, to enforce the decree of the Committee of Appeals; the jurisdiction of which, to reverse the facts established by a jury, Pennsylvania had so long resisted; and which even Congress, under the confederation, had so long abandoned; not only to enforce it, but to enforce it *ex parte;* without power to examine the merits or to control its errors; without notice to the State, or consulting its interests; not only thus to enforce it, but to convert the treasurer and agent of the State, acting under its immediate authority, into a *stake holder,* as a mean to reach the funds of the State, and to affect its rights.

If this can be done, the amendment to the constitution would be a dead letter. The State can act under its laws only by its agents. Its moneys remain in the hands of its treasurers. If its officers can be converted, by the decree of a judge, into *stake holders*, there can, perhaps, be no possible case in which the constitution may not be evaded.

It sufficiently appeared, in answer to the libel, that Mr. Rittenhouse received the money as treasurer of the State, for *the use of the State.* It appeared decisively on the public records of the commonwealth. But it is alleged, "that the amendment to the constitution simply provides that no suit shall be commenced or prosecuted against the State. That in this case the suit was not instituted against the State or its treasurer, *but against the executors of David Rittenhouse.* That if the proceeds had been the actual property of Pennsylvania, however *wrongfully* acquired, the disclosure of that fact would have presented a case on which it is unnecessary to give an opinion.

Such is the language of the Supreme Court of the United States. If the process and jurisdiction of the admiralty court will reach and extend over the proceeds of prizes found within the district; and individuals, no party to the original decree, can be libelled against, is all investigation to be foreclosed? or, if it be not in the nature of an original suit, but merely a proceeding to *enforce a decree* of a former court, in which Captain Josiah and Captain Houston were parties, why are Captain Josiah and the representatives of Captain Houston unheard in this strange proceeding?

It is further alleged, and is made a ground of decision by the federal courts, "that the property which represented the Active and her cargo was in possession, not of the State of Pennsylvania, but of David Rittenhouse as an *individual*, after whose death it passed, like other property, to his representatives."

It is, however, clear that David Rittenhouse could not have received a farthing of the money, as David Rittenhouse, but *as treasurer of the State only*, and by order of the State. Although David Rittenhouse gave a bond to indemnify George Ross, yet that instant the State became bound to indemnify David Rittenhouse, and the real party then interested was the commonwealth of Pennsylvania. A treasurer or other officer, retaining the public moneys upon any pretence whatever, cannot, upon any principle, change the nature of the question.

Notwithstanding, by the highest judicial authority the question is declared to be at rest. " That, by the decree of reversal, the interest of the State of Pennsylvania in the Active and her cargo was extinguished; that, although Mr. Rittenhouse was treasurer of the State of Pennsylvania, and the bond of indemnity which he executed states the money to have been paid to him for the use of the State, it is apparent he held in his own right until he should be completely indemnified by the State, and that the evidence to this point was *conclusive;* that it did not appear that the original certificates were deposited in the State treasury, or in any manner designated as the property of the State, or delivered over to his successor; and, when funded, were funded in his own name, and the interest drawn by him. That the *memorandum* made by him, at the foot of the list of certificates, in these words, " The above certificates will be the property of the State of Pennsylvania when the State releases me from the bond I gave in 1778 to indemnify George Ross, Esq., judge of the admiralty, for paying the fifty original certificates into the treasury, as the State's share of the prize," demonstrates that he held the certificates as security against the bond he had executed, and that bond was obligatory not on the State of Pennsylvania, but of David Rittenhouse, in his private capacity.

This statement by the court, as part of the broad ground on which they decided, may be plausible, may give color to the decision, yet it by no means appears that he receives it as a *stake holder*, or upon a contingency, but for the use of the State, as its share of the prize. And even upon his own *memorandum*, so much relied on, it is stated that the certificates were paid into the treasury as the State's share of the prize; and, as the State was bound to indemnify him when he acted under its orders, the State would have of course been the real party interested in any suit which might have been commenced upon it. It would seem that the court was not possessed of the whole state of the case, as will appear from the authority under which the treasurer acted; which proves explicitly how and in what character he acted. In the minutes of the supreme executive council is the following resolution:

" PHILADELPHIA, *April* 21, 1779.

" *Resolved*, That David Rittenhouse, the treasurer, be directed to find sufficient security to be approved of by the judge of the admiralty for the share adjudged to the State of the prize sloop Active, taken by the brigantine Convention and Gerard privateer; and take up the money, which will exceed eleven thousand pounds, for the use of the State, one-half of the sum allotted to the Convention coming to the State."

It here incontrovertibly appears that he did not receive the money as a private individual, but for the use of the State, by the orders of the Executive authority, and the bond which he executed was executed by him by the like authority, as agent and security for the State. Having thus received the money, previously the property of the State, by the decree of the admiralty court, as treasurer, no detention of it when he went out of office ought in reason or principle to be considered as changing the nature of the original transaction. The Legislature, at their session, November 23d following, passed a resolution similar to that of the Executive Council; and the act of February 26, 1801, still further corroborates all the former proceedings of the State.

The Legislature are also of opinion that, as the brigantine Convention was the property of the State, as soon as judgment was pronounced upon the verdict of the jury, its interest attached upon its proportion of the prize, and as soon as it was received by the State treasurer, it was so much belonging to the State actually in the treasury.

When it is said that the State of Pennsylvania forbore to assert its title while the suit was depending, let it be forever remembered that the State of Pennsylvania had no notice. And if notice had been given, to what purpose could she have asserted her title, when by the high authority of the court it is declared that the court had nothing to do with the question decided by the court of appeals, which must be enforced without an examination of its merits.

Although the Legislature reverence the constitution of the United States and its lawful authorities, yet there is a respect due to the solemn and public acts, and to the honor and dignity of our own State, and the unvarying assertion of her right for a period of thirty years, which right ought not to be relinquished; therefore,

Resolved by the Senate and House of Representatives of the Commonwealth of Pennsylvania, &c., That as a member of the Federal Union, the Legislature of Pennsylvania acknowledges the supremacy, and will cheerfully submit to the authority of the General Government as far as that authority is delegated by the constitution of the United States. But whilst they yield to this authority, when exercised within constitutional limits, they trust they will not be considered as acting hostile to the General Government, when, as the *guardians of the State rights*, they cannot permit an infringement of those rights by an unconstitutional exercise of power in the United States' courts.

Resolved, That, in a Government like that of the United States, where there are powers granted to the General Government, and rights reserved to the States, it is impossible, from the imperfection of language, so to define the limits of each, that difficulties should not sometimes arise from a collision of powers; and it is to be lamented, that no provision is made in the constitution for determining disputes between the General and State Governments by an impartial tribunal, when such cases occur.

Resolved, That, from the construction the United States' courts give to their powers, the harmony of the States, if they resist encroachments on their rights, will frequently be interrupted; and, if to prevent this evil, they should, on all occasions, yield to stretches of power, the reserved rights of the States will depend on the arbitrary power of the courts.

Resolved, That should the independence of the States, as secured by the constitution, be destroyed, the liberties of the people in so extensive a country cannot long survive. To suffer the United States' courts to decide on *States rights* will, from a bias *in favor of power*, necessarily destroy the *federal part* of our Government, and whenever the Government of the United States becomes consolidated, we may learn from the history of nations what will be the event.

To prevent the balance between the General and State Governments from being destroyed, and the harmony of the States from being interrupted,

Resolved, That our Senators in Congress be instructed, and our Representatives requested, to use their influence to procure amendment to the constitution of the United States, that an impartial tribunal may be established to determine disputes between the General and State Governments; and that they be further instructed to use their endeavors, that in the meanwhile such arrangements may be made between the Governments of the Union and of this State as will put an end to existing difficulties.

Resolved, That the Governor be requested to transmit a copy of these resolutions, together with the foregoing statement, to the Executive of the United States, to be laid before Congress at their next session. And that he

be authorized and directed to correspond with the President on the subject in controversy, and to agree to such arrangements as may be in the power of the Executive to make, or that Congress may make, either by the appointment of commissioners or otherwise, for settling the difficulties between the two Governments.

Resolved, That the Governor be also requested to transmit a copy to the Executive of the several States in the Union, with a request that they may be laid before their respective Legislatures.

JAMES ENGLE,
Speaker of the House of Representatives.
P. C. LANE,
Speaker of the Senate.

Approved, April 3, 1809.

SIMON SNYDER,
Governor of the Commonwealth of Pennsylvania.

[NOTE.—See No. 268.]

11th CONGRESS.] No. 266. [1st SESSION.

CONTESTED ELECTION OF WILLIAM BAYLIES, A REPRESENTATIVE FROM MASSACHUSETTS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JUNE 21, 1809.

Mr. FINDLEY, from the Committee of Elections, to whom were recommitted the petitions of Charles Turner, Jun., and certain inhabitants of Plymouth district, in the State of Massachusetts, praying that William Baylies may not be considered as entitled to a seat in this House, and that Charles Turner may be considered as entitled to a seat, as a member of this House, made the following report:

That they have, according to order, examined the petitions and documents which accompany them. The petitions, signed by 1,231 inhabitants of the district, state, that at an election held on the first Monday of November, 1808, for choosing a member of Congress for the district of Plymouth, in the State of Massachusetts, agreeable to the law of that State, directing the time, place, and manner of electing members of Congress, the whole number of votes returned were 3,719, of which, agreeable to the laws of that State, 1,860 were necessary to make a choice. Of these, there were returned for Charles Turner, Jun. Esq., 1,443 votes; and for Charles Turner, Esq., 430 votes, amounting, if for the same person, to 1,873, which being a majority of the whole number of votes, decided the election in favor of Mr. Turner.

The petitioners assert that Charles Turner, of Scituate, in whose behalf they claim the seat, is the same person for whom the votes were given, with the addition of Esquire and of Junior Esquire; and, in proof of this, they assert that the laws of Massachusetts direct that the candidates voted for must be inhabitants of the district for which they may be elected; and that there was no other person by the name of Charles Turner, constitutionally qualified to be a candidate for a seat in Congress, inhabiting that district, at the time of the election, but the same Charles Turner, for whom the petitioners claim the seat in Congress; that Charles Turner, of Scituate, had for a long time been known throughout said district by the several descriptions of Colonel Charles Turner, Charles Turner, Esq., and Charles Turner, Jun. Esq.; that there was not in said district any other Charles Turner entitled to the addition of esquire; and that, for many years, there had not been any Charles Turner in said district older than Charles Turner, of Scituate, although he had continued to add junior to his signature, since the removal of his father into the district of Maine, several years ago.

In support of these facts, stated by the petitioners, Charles Turner, who claims a seat in this House, produced a law of Massachusetts, passed June 27, 1794, and another law passed March 10, 1802, prescribing the time, place, and manner of electing Representatives to Congress. In both of which laws it is enacted and required, that the persons voted for should be inhabitants of the district, and no instance of any practice contrary to these laws has been produced to the committee. He also produced one of the precepts issued by Lieutenant Governor Lincoln, for calling the meeting in Plymouth district, on the 19th day of January last, in which precept the Lieutenant Governor had inserted the words of the law; also, an attested copy of the schedule of the votes returned by the selectmen of the several towns in Plymouth district in November last; by which it appears that the statement made by the petitioners as to the number of votes, and in what manner they were returned, is correct.

And in support of the preceding statements and allegations, he produced the deposition of Augustus Clapp, who testifies that he has kept the post office in Scituate for six years last past, and that he had examined more than seventy letters received at that office, which, as appeared by the post mark, came from various towns, in and out of the district of Plymouth, having all the various directions of Colonel Charles Turner, Jun. Esq., Colonel Charles Turner, Esq., Colonel Charles Turner, Charles Turner, Jun. Esq., Charles Turner, Esq., and Mr. Charles Turner; that he had sent or delivered them to Colonel Turner, of Scituate, not doubting they were intended for him; that he had examined three letters from the Hon. Ephraim Spooner, one of the council, directed to Charles Turner, Jun. Esq., and Charles Turner, Esq.

The deposition of Nahum Mitchell, who testifies that he has been acquainted with Charles Turner, Esq., of Scituate, about twenty years; also knows his father, the honorable Charles Turner, who more than twelve years ago removed into the district of Maine; he has known his son add junior to his signature, but never supposed it strictly or legally necessary; that he has, in his own correspondence with him, omitted the junior.

The deposition of Noah Fearing, who testifies that he considered Colonel Charles Turner and Charles Turner, Esq., as applying to the same person, and that he has known Colonel Charles Turner to add junior to his name.

The depositions of Benjamin White, Samuel Williamson, Zacheus Rogers, third, Constant F. Oakman, and Prince Rogers, all of Marshfield, who testify that they put in votes or ballots written Charles Turner, Esq., meaning to vote for Colonel Charles Turner of Scituate.

The depositions of Chandler Sampson and Joseph Clift, Jun. Esq., selectmen of Marshfield, who testify that they consider the votes given in Marshfield for Charles Turner, Esq., and for Charles Turner, Jun. Esq., as de-

signed for the same person, viz: for Charles Turner of Scituate, and should have returned them all in one column, but for some objections made in the meeting.

The depositions of Seth Sprague and Phineas Sprague, of Duxbury, who testify that they wrote and distributed votes for Charles Turner, Jun. Esq., and each put in one of said votes. P. Sprague says he meant said votes for Charles Turner, Esq. of Scituate; S. Sprague says, he saw the ballots when read by the selectmen, and knew several of them to be in his own hand-writing, for Charles Turner, Jun. Esq.

The deposition of William Loring, Jun. Esq., of said Duxbury, states that, previous to the meeting in November last, he wrote ballots for Charles Turner, by which he intended Colonel Charles Turner, of Scituate; that he put in one of said ballots in voting; that, previous to said meeting, he noticed that Charles Turner, Jun. Esq. was proposed in the newspapers as a candidate, but not knowing any older Charles Turner in the district, he supposed the junior to have been added through mistake, and that he heard nothing said at the time by the selectmen about the votes being given in differently.

The depositions of Ezekiel Saul and Reuben Delano, selectmen of Duxbury, state that, at the town meeting in November last, some votes were given in for Charles Turner, Jun. Esq., and some for Charles Turner, Esq., that when they made the return they omitted the junior, considering Charles Turner, Jun. Esq., and Charles Turner, Esq., meant the same person, to wit: Charles Turner, of Scituate: Ezekiel Saul adds that, at the time of receiving the votes, he asked whether any person meant to vote for any Charles Turner other than Charles Turner, of Scituate, and received no answer.

The depositions of Edwin Howard and Howard Carey, Esq., of Bridgewater, state that they knew votes to be put in for Charles Turner, Jun. Esq: Howard Carey says, he saw a number of votes distributed in the town meeting for Charles Turner, Jun. Esq. Edwin Howard testifies that he examined the ballots, some days after the meeting, and found some written Charles Turner, Jun. Esq., and some Charles Turner, Esq.

The deposition of Abel Kingman, one of the selectmen of Bridgewater, states that, at the town meeting on the first Monday of November last, some votes were given in for Charles Turner, Esq., and some for Charles Turner, Jun. Esq., and some for Colonel Charles Turner; that he signed the return, in which the junior was omitted, because he considered there was no other Charles Turner in the district than Charles Turner, of Scituate; and that Charles Turner Esq., and Charles Turner, Jun. Esq., must mean the same person.

The depositions of Solomon Hayward and John Willis, selectmen, and Eliakim Howard, town clerk of Bridgewater, state, that they did not notice whether ballots given in for Charles Turner had junior on them or not; but that they knew of only one Charles Turner in the district, eligible as a representative. S. Hayward adds, that he heard no consultation nor conversation that excited attention, respecting the votes given in for Charles Turner.

Seventeen of the aforesaid deponents testify that they had no knowledge of any Charles Turner in Plymouth district eligible as a Representative to Congress, other than Charles Turner, of Scituate; fifteen of them testify that they had no knowledge of any Charles Turner, not an inhabitant of the district, having been proposed as a candidate; and fifteen of them testify that they had no knowledge of any Charles Turner in the district, entitled to the addition of esquire other than Charles Turner, of Scituate.

It appears that the testimony is certified to have been given before Nathan Willis, Esq., who appears, by the certificate of the Governor, and of the Secretary of the Commonwealth of Massachusetts, to be a justice of the peace, and an associate justice of the court of sessions, within and for the county of Plymouth, in the said State. It also appears that the said Willis, at the request of said Turner, issued citations, dated March 25 last, to William Baylies, Esq., the sitting member, requiring him to be present, if he saw cause, by himself, or his agent, duly authorized, when and where the testimony of the witnesses was to be taken respecting the election, which the claiming candidate proposed to contest. In which citations, the names of the persons to be examined, and the times and places where the examinations were to take place, were inserted, allowing a competent length of time to be prepared.

The committee admitted the testimony above recited to have been correctly taken, notwithstanding the sitting member declined being present himself, or by his agent, he having been duly notified.

The aforesaid depositions are accompanied with official certificates of the decisions of the Senate of Massachusetts, in two cases, supposed by the claiming candidate to be similar to his case, and made under similar constitutional provisions. The sitting member also laid before the committee a certified return of the election held on the first Monday of November last, agreeing with the certificate accompanying the petitions; and likewise a certificate or schedule of the votes returned on the 19th day of January last, in which schedule it appears that the sitting member had 2,168 votes, (being a majority of the whole number,) and the claiming candidate had 1,812 votes. He also exhibited the credentials of William Baylies, having been appointed and sworn into office, as justice of the peace for the county of Plymouth, and of his having been admitted an attorney by the supreme judicial court; in neither of which is junior added to his name. These are accompanied with a certified statement of the votes given in the second middle district of Massachusetts in the year 1794, which he suggests to be similar to the case now before the committee.

The committee gave deliberate attention to the allegations and arguments of both parties, and received from the sitting member, in writing, his reasons for requesting the decision to be postponed till the next session of Congress, contained in the papers marked A, which accompany this report. And they also received from the claiming candidate his observations on the reasons offered by the sitting member, contained in the papers marked B, which also accompany this report; and the sitting member also protested against the committees going into the investigation of the evidence adduced by the petitioner.

Having diligently attended to the allegations and arguments of both parties, and carefully examined the testimony produced, on mature deliberation, the committee submit the following resolutions to the decision of the House:

Resolved, That the election held in Plymouth district in November last, was legal and proper.

Resolved, That William Baylies is not entitled to a seat in this House.

Resolved, That Charles Turner, Jun. is entitled to a seat in this House.

No. 1.

In the case of CHARLES TURNER, Jun. and others, petitioners,
vs.
WILLIAM BAYLIES.

The said William Baylies did, before the Committee of Elections proceeded to take into their consideration the subject matter of said petitions, object to the admission in evidence of the depositions produced by said Turner in support of the allegations in said petitions, for the following reasons:

1st. The said depositions were taken without any authority of law, there being no act of the United States or of the Commonwealth of Massachusetts in force or existence on the subject.

2d. The said depositions were, for the most part, reduced to writing, and all of them certified by Nathan Willis, Esq., who is also, as appears by the documents in said case, a petitioner against the said Baylies, and, therefore, interested to prove by said depositions the allegations in his petition.

WM. BAYLIES.

No. 2.

In the case of CHARLES TURNER, Jun. and others, petitioners,
vs.
WILLIAM BAYLIES.

The said William Baylies did, previous to the Committee of Elections proceeding to take into consideration the subject matter of said petitions, state to said committee, in substance, as follows:

1st. That he believed he could prove, to the satisfaction of the committee and of the House, that the Governor and Council of said commonwealth, in their decision that no choice had been made by the electors of said Plymouth district, on the first Monday of November last past, and in directing the electors of said district again to be convened on the 19th of January last past; in their decision that said Baylies was duly elected on the said 19th day of January; and in all their proceedings in reference to said election, did act correctly, in strict conformity with precedent and usage.

2d. And the said Baylies further stated, that he could prove, as he had reason to believe, that several of the ballots given on the first Monday of November last past, for Charles Turner, or Charles Turner, Esq., were returned by the selectmen for Charles Turner, Jun., Esq.; and, though he protested against going behind the said returns, without some suggestion of fraud or corruption, for the purpose of explaining or contradicting them by parol testimony, yet, in case the said committee, or the House, should think proper to indulge the petitioner in this species of evidence, the same permission would undoubtedly be extended to the said Baylies.

3d. And the said Baylies further stated, that he believed he could prove, as far as such facts were susceptible of proof, that there was a perfect acquiescence on the part of the electors of said district of the petitioner (who, as said Baylies had understood, was actively engaged in endeavoring to promote and secure his own election, on the said 19th of January) in the decision of the Governor and Council that no choice had been made by the said electors on the first Monday of November; and that no elector withheld his vote on the said 19th of January, from a belief that a choice had been made on the said first Monday of November, or with an intention to avail himself of any supposed or pretended choice on that day, or to claim any.

4th. The said Baylies stated also his wish to lay before the committee copies of the records or journals of the Legislature of Massachusetts, in some cases of contested elections, which might be of importance, if the committee or the House should think proper to inquire into the practice of that State in regard to elections.

For the purpose of obtaining this evidence, (and the causes which prevented him from obtaining it were explained to the committee,) and evidence of other facts which might exist material to the decision of the case, but with which he had not an opportunity to acquaint himself, or not sufficiently acquaint himself to justify him in making a formal specification of them, and pledging his belief that he could prove them. The said Baylies prayed that the further consideration of the subject of Plymouth election be referred to the next session of Congress, or postponed to some future day; and, as a further reason for postponement, he stated that he had not possessed himself of any evidence that might be derived from the testimony of witnesses, as he conceived no law existed by the authority of which he could compel their attendance, or regularly take their depositions; and that it was his intention to apply to the House or to the committee for directions or instructions for that purpose.

WM. BAYLIES.

No. 3.

JUNE 20, 1809.

I would at this time call the attention of the committee to the following statement of what I have reason to believe are facts, but with some of the most material of which I was unacquainted when before the committee on Saturday. The statement is made on information derived from gentlemen of the most unquestionable veracity.

Charles Turner, Esq., the father of the petitioner, was formerly a settled minister in the town of Duxbury, in the district of Plymouth, and well known in that district as a preacher. After the ministerial relation between him and the people of Duxbury was dissolved, he still continued a preacher, and preached occasionally in different parts of the State of Massachusetts, and often in the district of Plymouth. After his removal to Scituate, in said district, he was appointed to several important public offices. He was a member of the convention of Massachusetts which adopted the constitution, and was also repeatedly elected by the district of Plymouth a Senator in the Massachusetts Legislature. In the year 1804, he was on the general ticket for electors of President and Vice-President; that, although he removed into the district of Maine, in said State, several years ago, where he owns real estate, on which he resides when in that part of the country, yet he still owns a valuable farm in Scituate, in the district of Plymouth, where he has frequently been since said removal, and sometimes resided a considerable portion of the year; and that, for this reason, the petitioner has uniformly, in writing his name, retained the *Junior*.

That Charles Turner, Esq., the father, is more generally and extensively known in the district of Plymouth than the petitioner, who lives in an extreme part of it, and for whom the people at large in said district have not been accustomed to vote.

From these facts it may be inferred, and not unfairly, that many of the electors (at least a sufficient number to destroy the pretended choice on the first Monday of November) who voted for Charles Turner, Esq. intended the father of the petitioner.

This statement must offer to the committee additional and conclusive reasons in favor of granting that postponement of the further consideration of the subject which I have requested; for, although I consider the course pursued by the petitioner to ascertain the intentions of the electors as liable to great and well-founded objections, yet, as it has in some measure been sanctioned by the committee, justice requires that I should have a reasonable time for the purpose of ascertaining whether any evidence of that sort exists, of which I can avail myself.

WM. BAYLIES.

To the COMMITTEE OF ELECTIONS.

No. 4.

In the case of CHARLES TURNER, Jun. and others, petitioners,
vs.
WILLIAM BAYLIES, Esq.

The petitioner, in answer to the objections stated by Mr. Baylies to the admission in evidence of the depositions produced by the said Turner, in support of the allegations in said petitions, agrees that no law of the United States

now exists prescribing the mode of taking depositions in contested elections; and no law of the State of Massachusetts ever did exist for that express purpose. In the fifth Congress a law was passed prescribing the mode of taking depositions in cases of contested elections, which was temporary, and has expired; since the expiration of which law, the Committee of Elections, as the petitioner understands, have received evidence, taken conformably to the general laws of the States for taking depositions in ordinary cases, provided the evidence was taken by such a magistrate as was named in the law of the United States; proper notice was given to the adverse party, and affidavits of said notice; and, in other respects, in conformity to the laws of the States in which it was taken. The petitioner, therefore, submits to the consideration of the committee, whether the evidence by him taken does not come within the rules of the committee as admissible in this case.

In answer to the second reason stated by Mr. Baylies why the depositions should not be admitted, the petitioner agrees that Nathan Willis, Esq. reduced to writing the greater part of the depositions, and certified the whole of them. It appears, also, that a Nathan Willis has signed one of the printed petitions; whether it is the same man, or not, is to the petitioner unknown; but, if it be admitted to be the same man, the petitioner contends that his signing a petition, stating general principles, and containing statements of facts well known and established throughout the district, even if it should conclude with a prayer that Mr. Baylies should be declared not entitled to his seat, and that the petitioner should be declared regularly elected, and entitled to a seat, does not render him an improper person, as a magistrate, to reduce to writing the testimony of independent electors; for, if it was required to obtain a magistrate who was, on all accounts, perfectly indifferent to the success of one or the other of the candidates, such a one could not be found in Massachusetts. The petitioner, therefore, submits it to the decision of the committee whether the depositions reduced to writing by Nathan Willis, Esq. shall be considered inadmissible, because a Nathan Willis has signed the petition referred to in Mr. Baylies's second reason, even if it were certain that he was the same person.

CHARLES TURNER, Jun.

No. 5.

In the case of CHARLES TURNER, Jun. and others, petitioners,
vs.
WILLIAM BAYLIES, Esq.

In answer to reasons No. 2. offered by Mr. Baylies, for a postponement of the consideration of the subject until next session of Congress, the petitioner states,

1st. That he has not, in his petition, or any other document, directly or indirectly alleged, that the Governor and Council of Massachusetts have acted incorrectly, or contrary to precedent and usage, in any part of their proceedings relative to the attempts to elect a Representative in Plymouth district for the eleventh Congress; on the contrary, he conceives they considered themselves not the judges, but only the certifiers of the election or non-election, conformably to the returns of votes made to them by the selectmen of the several towns, (if properly made, and in reason,) and that the House of Representatives of the United States being, by the constitution, made the judges, were the proper and only tribunal having authority to look into all parts of the proceedings, and determine, ultimately, who was, or was not, elected. That they, in deciding on the votes returned to them in November last, acted in perfect conformity to the precedent and usage, as respects the election of Senators in Massachusetts, under constitutional provisions exactly similar to those in the constitution of the United States, and in cases bearing a very strong analogy to the present.

2d. The petitioner conceives it to be very probable that evidence may be obtained that ballots were given in in November last, written Charles Turner, or Charles Turner, Esq., and returned by the selectmen for Charles Turner, Jun. Esq.; and for the same reason that ballots given in for Charles Turner Jun. Esq., were returned for Charles Turner, Esq., without the Jun., because the selectmen conceived them designed for one and the same person, there being but one Charles Turner in the district eligible; and the laws of the State, ever since the first census was taken, requiring the electors to give their votes for a person who was an inhabitant of the district in which the electors resided; and the petitioner having, for several years, been known and addressed by the name of Charles Turner, with the various additions of Col., Mr., Jun., and Esq., and that promiscuously by the same persons.

If Mr. Baylies's protest against going behind the returns, except where fraud is suggested, is to prevail, then no unintentional errors can be corrected; the House of Representatives are deprived of their constitutional right of judging of the election of their own members, and the Governor and Council of Massachusetts, as in this instance, and others in Massachusetts under similar constitutional provisions, not undertaking to inquire behind the returns, because not made by the judges, no supposable error can ever be rectified.

In answer to Mr. Baylies's third reason for a postponement, the petitioner states, that the Governor and Council having examined the returns of votes given in in November, and not feeling themselves authorized to go behind the selectmen's returns, because not made the judges of the election, and having decided there was no choice, it was incumbent on the Governor to issue new writs of election, in conformity to the laws of that State, which he did.

As soon as it was known what was the state of the votes returned in November, the petitioner was urged by his friends to claim a seat in the House of Representatives if, on the second trial he should not be declared elected; previous to the meetings in January, a printed statement of the result of the votes in Plymouth district, and the decision of the Council thereon, was circulated in said district, in which it was alleged that the petitioner was duly elected in November, and ought to have been so declared, and calling on the electors to appear at the polls, and decide the question; a few of those printed statements fell into the hands of the petitioner. The result of the meeting in January was, Mr. Baylies was declared elected, and on or about the tenth of March following the petitioner was informed he had a certificate of his election. It is impossible Mr. Baylies should prove that no elector withheld his vote on the 19th of January, from a belief that a choice was made in November, because it is not a fact.

In answer to Mr. Baylies's fourth reason for a postponement, wishing to lay before the committee copies of the records or journals of the Legislature of Massachusetts, in some cases of contested elections, the petitioner states that there are no cases of contested elections, in which the Legislature of Massachusetts, as a Legislature, have any power of deciding, that are analogous to the present case. In gubernatorial elections, the two Houses of the Legislature are, by the constitution of that State, directed to *examine* the votes, with no express power of judging of them, yet they, or nobody, must judge of them, for no other tribunal can; and they have expressly decided that the constitution of that State will not justify their going behind the returns; the only case in Massachusetts, resting on principles similar to this, is in the choice of Senators, where the Governor and Council examine the votes, and the Senate are, by the constitution, made the final judges of the elections, &c.; the copies of decisions of the Senate of that State, among the papers, are not produced as precedents to govern the committee, but to show the

practice of that Senate, under constitutional provisions exactly corresponding with constitutional provisions under which the House of Representatives of the United States act in judging of elections; and so far as they are founded on correct principles, the committee will, undoubtedly, give them their due weight.

With these answers to the reasons offered by Mr. Baylies, for a postponement to the next session of Congress, the petitioner requests the committee to consider that it was about the 10th of March that he was first made acquainted that Mr. Baylies had obtained a certificate of his election, previous to which it was not in the petitioner's power to give him notice that his election would be contested. If, on the second trial the petitioner had been declared elected, or it had been decided that there was again no choice, the petitioner would have had no person to contend with; but he must have waited, in case of no choice, for the electors to decide, upon a third or fourth trial, as the case might have been; or, in case of an intervening session of Congress, have claimed a seat in consequence of the votes given in November, having no particular person, claim, or candidate to contend with or notify. It will also be noticed that Mr. Baylies was notified on the 8th day of April, of the times and places proposed for taking depositions, also of what the petitioner should attempt to prove; that that notice gave him more than six times the time prescribed by the laws of Massachusetts, and was given him more than thirty days before it was necessary for him to leave home to attend the present session of Congress; during all which time, Mr. Baylies has not made it appear that there were any witnesses whose testimony he could not obtain, and which, if obtained, would be material to a correct decision; nor has he stated a single point which, if proved, would, in the opinion of the petitioner, balance the evidence now before the committee.

The petitioner, therefore, prays the opinion of the committee, that he may now go into the consideration of the merits of the case upon the evidence now before them.

CHARLES TURNER, Jun.

[NOTE.—See Report No. 264.]

11th CONGRESS.] No. 267. [2d SESSION.

APPLICATION OF A COMMITTEE OF THE BAPTIST CHURCH AT SALEM, MISSISSIPPI, FOR THE LAND ON WHICH THE CHURCH STANDS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 6, 1808.

The Honorable the Congress of the United States: JANUARY 7, 1809.

Your petitioners, a committee appointed by the Baptist Church at Salem meeting-house, Mississippi Territory, respectfully showeth:

That about ten years ago, the society to which your petitioners belong, built a meeting-house on land belonging to the United States, it being a situation more eligible and convenient than any other in the neighborhood; and presuming that no difficulty would arise in procuring a title to the land, have since built again, on the same place, a house which cost about $800; but, finding no provision made by any law of Congress heretofore passed relative to this Territory, by which the land aforesaid could be secured, except by purchase at public sale, which might subject us to pay, not only the value of the land, but a considerable part of the value of the house, should any speculator appear who would be disposed to take such an advantage; and, also, a larger quantity of land may be annexed, and offered for sale together, than we would wish to purchase, it being a poor pine hill, and part of it very broken, running in a small point between two tracts of land held by Spanish patents.

We, therefore, pray your honorable body to take our case into consideration, and pass a law to secure us in so much land, and on such terms as you in your wisdom may think proper, and your petitioners, as in duty bound, shall ever pray.

WM. SNODGRASS.

11th CONGRESS.] No. 268. [2d SESSION.

FURTHER PROCEEDINGS OF PENNSYLVANIA IN RELATION TO THE DECISION OF THE SUPREME COURT, IN THE CASE OF GIDEON OLMSTEAD.

COMMUNICATED TO THE SENATE, DECMBER 19, 1809.

To the Senate of the United States: DECEMBER 16, 1809.

Agreeably to the request in the resolution of the 15th instant, I transmit a copy of the correspondence with the Governor of Pennsylvania, in the case of Gideon Olmstead.

JAMES MADISON.

SIR: LANCASTER, *April* 6, 1809.

In discharge of a legislative injunction, I transmit you the proceedings of the General Assembly, on the long litigated cause of Gideon Olmstead and others *versus* Elizabeth Sergeant and Esther Waters, executrixes of

David Rittenhouse, deceased, late Treasurer of Pennsylvania. Believing it will tend to a more perfect understanding of the subject, I take the liberty to add a copy of an act of the General Assembly relative thereto, passed the 4th instant, and also beg leave to refer you to two other acts, the one passed February 1st, 1801, and the other April 2d, 1803.

While I deeply deplore the circumstance which has led to this correspondence, I am consoled with the pleasing idea, that the Chief Magistracy of the Union is confided to a man who merits, and who possesses so great a portion of the esteem and the confidence of a vast majority of the citizens of the United States; who is so intimately acquainted with the principles of the federal constitution, and who is no less disposed to protect the sovereignty and independence of the several States, as guarantied to them, than to defend the rights and legitimate powers of the General Government; who will justly discriminate between opposition to the constitution and laws of the United States, and that of resisting the decree of a judge, founded, as it is conceived, in a usurpation of power and jurisdiction not delegated to him by either; and who is equally solicitous with myself, to preserve the Union of the States, and to adjust the present unhappy collision of the two Governments in such a manner as will be equally honorable to them both.

Permit me to add in addition to the act I have done as the Chief Magistrate of the State of Pennsylvania, to assure you, sir, as an individual, of my full confidence in the wisdom, justice, and integrity of the present administration of the General Government, and my fixed determination, in my public, as well as in my private capacity, to support it in all constitutional measures it may adopt.

With the highest consideration, I am, sir, your obedient servant,

SIMON SNYDER.

To His Excellency the PRESIDENT OF THE UNITED STATES.

AN ACT relative to certain proceedings in the case of the prize sloop Active.

Whereas, by an act of the General Assembly of this Commonwealth, passed the 2d day of April, in the year of our Lord 1803, entitled "An act relating to the claim of this Commonwealth against Elizabeth Sergeant and Esther Waters, surviving executrixes of David Rittenhouse, Esq., deceased," the right of this Commonwealth was asserted to certain moneys which the said executrixes of David Rittenhouse, heretofore Treasurer of the Commonwealth of Pennsylvania, admitted to have been received by them in the manner in the same act particularly set forth, as part of the proceeds of a certain prize called the "Active," captured during the revolutionary war, and provision was made among other things, that if, in pursuance of the requisition of the said act, (the decree of the district court of Pennsylvania, in the said act mentioned, to the contrary notwithstanding,) the said executrixes should pay the said moneys into the treasury of the Commonwealth without suit brought against them to compel such payment, they thould be indemnified for so doing. And whereas the Supreme Court of the United States have reviewed the proceedings of the said district court of Pennsylvania, and have adjudged that the decree thereof ought to be enforced, notwithstanding the claim of the Commonwealth, and the payment of the said moneys into the treasury thereof, as aforesaid: and whereas the good faith of this Commonwealth requires that the said engagement of indemnity should be effectually performed: and whereas sundry unforeseen difficulties may arise in protecting the just rights of the State, which ought to be provided for before the adjournment of the Legislature; and as the Legislature, by their resolutions during the present session, have enjoined certain duties on the Governor, touching the premises, and it is expedient to make such appropriations as shall meet every contingency; but, protesting that nothing in this act contained shall be deemed or taken as a dereliction of any right or principle heretofore asserted on behalf of the Commonwealth. And it is, moreover, the duty of the Legislature to protect all good citizens from losses or injury in their property or persons, by reason of their obedience to the laws and constituted authorities of the Commonwealth. Therefore,

SEC. 1. *Be it enacted by the Senate and House of Representatives of the Commonwealth of Pennsylvania in General Assembly met, and it is hereby enacted by the authority of the same*, That a sum not exceeding $18,000 be, and the same is hereby, appropriated and made subject to the orders of the Governor on the State Treasurer, to enable the Governor to carry into effect all and every engagement of this Commonwealth, touching the premises, in such manner as may appear to him to be advisable, just, and proper, and to meet all contingent expenses which may arise in the execution of any authority or power given to or enjoined on him by the resolutions of this Legislature, passed April the 3d, 1809, or by the act of Assembly of April the 2d, 1803. And also to protect all and every person or persons in any way concerned in the protection of the just rights of the Commonwealth, in obedience to the injunctions of any law or authority derived therefrom.

JAMES INGLE,
Speaker of the House of Representatives.
P. C. LANE,
Speaker of the Senate.

Approved, the 4th day of April, 1809.

SIMON SNYDER.

SIR: WASHINGTON, *April* 13, 1809.

I have received your letter of the 6th instant, accompanied by certain acts of the Legislature of Pennsylvania, which will be laid before Congress according to the desire expressed.

Considering our respective relations to the subject of these communications, it would be unnecessary, if not improper, to enter into any examination of some of the questions connected with it. It is sufficient, in the actual posture of the case, to remark, that the Executive of the United States is not only unauthorized to prevent the execution of a decree sanctioned by the Supreme Court of the United States, but is expressly enjoined, by statute, to carry into effect any such decree where opposition may be made to it.

It is a propitious circumstance, therefore, that whilst no legal discretion lies with the Executive of the United States to decline steps which might lead to a very painful issue, a provision has been made by the legislative act transmitted by you, adequate to a removal of the existing difficulty, and I feel great pleasure in assuring myself that the authority which it gives, will be exercised in a spirit corresponding with the patriotic character of the State over which you preside.

Be pleased, sir, to accept assurances of my respectful consideration.

JAMES MADISON.

His Excellency Governor SNYDER.

[NOTE.—See report, No. 265.]

10th CONGRESS.] No. 269. [2d SESSION.

VIOLATION OF THE ACT PROHIBITING THE IMPORTATION OF SLAVES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 22, 1809.

To the honorable the Congress of the United States: The petition of Harry Caldwell, of the town of Jersey, in the State of New Jersey, and Amasa Jackson, of the city of New York, merchants, trading under the firm of Harry Caldwell & Co. respectfully showeth:

That your petitioners are the owners of a brig or vessel called the Joseph Ricketson, now at the port of New Orleans; that the said vessel, after performing a voyage to Jamaica, proceeded from thence, on or about the 25th day of July last, for New Orleans; that while at Kingston, in Jamaica, she took on board, as your petitioners are informed and believe, three persons, called Madam Chazel, Madam Burreau, and Mr. Duvalles, with certain slaves or domestics belonging to them, and mentioned in the papers hereunto annexed, as passengers, bound for the port of New Orleans; that the said passengers and their said slaves or domestics were French subjects, who had been forcibly expelled from the island of Cuba by order of the Government thereof, and proceeded in said vessel for New Orleans, where they lately arrived; that Moses R. Smith, master of the said vessel, before his departure from Jamaica, not being well acquainted with the provisions of the law of the United States prohibiting the importation of slaves, and fearing that he might expose his vessel to some difficulty, applied to one of his consignees at Kingston for his opinion and advice, who conceived there could be no danger in taking the said passengers; but for the greater certainty, they also applied to Mr. Savage, the American consul residing there, who also advised that the said vessel could not thereby be exposed to any difficulty or danger, and added that he himself had a vessel up for New Orleans, and was desirous to take as many such passengsrs as he could; that, in consequence thereof, the said master did take and carry to New Orleans on board of the Joseph Ricketson the said passengers, with their said slaves or domestics, who are particularly mentioned in the document and papers hereunto annexed; that, in so doing, the master acted without the authority or knowledge of your petitioners, and, as your petitioners fully believe, without any intention to evade any of the provisions of any law of the United States, and was impelled thereto by the distressing situation of the said passengers, and the circumstances above mentioned; that, on arriving at New Orleans, the said vessel, as your petitioners are informed and believe, was seized, and is now there detained, for having on board or importing the said slaves or domestics in manner aforesaid; that a petition was presented on this subject in behalf of your petitioners by their consignees at New Orleans to Philip Grymes, Esquire, district attorney of the United States for the New Orleans district, and certain proofs offered to him substantiating the facts herein above set forth, which petition is hereunto annexed, with a certificate of the said attorney endorsed thereon, that the same, together with the said proofs, were so presented as contained in the documents marked A, B, C, also hereunto annexed. And your petitioners having presented a petition to his excellency the President of the United States, praying him to release the said vessel by virtue of the power vested in him by an act of Congress, entitled "An act for the remission of certain penalties and forfeitures, and for other purposes," passed June 28, 1809, when the President was of opinion that his power by the said act did not extend to the case of your petitioners.

Your petitioners, therefore, pray that the honorable the Congress of the United States would be pleased to pass a law to remit any penalty or forfeiture which the said vessel may have incurred by reason of the premises, and to release the said vessel and any effects on board of her during the said voyage to New Orleans, from all seizures and detention on account thereof, and that the same be restored to your petitioners or their consignees.

And your petitioners, &c.

HARRY CALDWELL,
AMASA JACKSON.

CITY OF JERSEY, *December* 1, 1809.

To Philip Grymes, Esq., district attorney of the United States for the Orleans district, respectfully show:

Your petitioners, Messrs. Fort and Giraud, merchants, trading under this firm in the city of New Orleans and district aforesaid; that your petitioners are the consignees of a certain vessel called the Joseph Ricketson, owned by Harry Caldwell & Co., and lately arrived here from the island of Jamaica; that the said vessel arrived in ballast, and brought in her some negro slaves, owned by, and the domestic servants of, three French passengers, who, together with the said passengers, had been forcibly expelled from the island of Cuba by order of the Government thereof, and arrived in the said vessel with their said domestics; that, previous to the departure of the said vessel with the said passengers and slaves from Jamaica aforesaid, application was made to the American consul residing at Kingston, to know whether she could proceed to this port with the said slaves without infringing any of the laws of the United States, or being exposed to seizure and detention; and upon being assured by the said consul that she might so proceed, the captain received the said passengers and domestics on board his vessel, and arrived with them in this city as aforesaid.

Wherefore your petitioners humbly pray, in behalf of the owners of the said vessel, that you will be pleased to state and certify to the President of the United States the testimony now offered by your petitioners in support of the facts above set forth, to the end that the President may in mercy, and by virtue of the act entitled "An act for the remission of certain penalties and forfeitures, and for other purposes," passed the 28th day of June, 1809, remit any penalty or forfeiture which the said vessel may have incurred by reason of the circumstances aforesaid, and order her to be forthwith cleared from all seizure and detention, and delivered up to your petitioners as consignees aforesaid.

And, as in duty bound, your petitioners will ever pray.

FORD & GIRAUD.

I hereby certify to the President of the United States that the several exhibits marked A, B, C, and hereunto annexed, were produced as evidence in support of the statement of facts contained in the petition of the other side written.

P. GRYMES,
United States Attorney for the Orleans district.

A.

District Court of the United States for the Orleans district.

The brig JOSEPH RICKETSON, *adsm.* THE UNITED STATES. } Affidavit.

NEW ORLEANS, *ss.*

Moses R. Smith, mariner, captain of the Joseph Ricketson, being duly sworn, deposeth, that he sailed from Kingston, in the island of Jamaica, some time on or about the 25th day of July last, having on board Madam Chazel with a black boy and girl, her domestic servants; Madam Burreau with one black girl, her domestic servant; and Mr. Duvalles with one black woman and her two children, his domestics, as passengers, and bound for the port of New Orleans; that when the above named passengers, who were refugees from the island of Cuba, applied to this deponent for the purpose of taking their passages on board of his vessel, having been informed of the law of the United States prohibiting the importation of slaves, but without having seen it, or understanding its particular provisions, this deponent apprehended that by having the domestics aforesaid, he might possibly expose his vessel to some difficulty, and therefore waited upon his consignee in Kingston, and requested his opinion; the consignee conceived that there could be no danger, but, in order to ascertain the point with certainty, called with this deponent, accompanied by Mr. Richard Tice, upon the American consul, Mr. Savage, and the consul being asked by Mr. Stuart whether any difficulty could arise to the vessel from conveying passengers with their domestics from Kingston to New Orleans? Mr. Savage replied "no, not the least;" upon which this deponent mentioned that he had been informed that she would be subject to seizure if she carried black domestics. The consul then assured him that there was not the smallest danger, and, to strengthen this assurance, added that he himself had a vessel up for New Orleans, and was willing to take as many as he could get. The conversation continued for some time longer, was of the same tendency, and left this deponent fully impressed with the idea that he was running no risk in giving an opportunity to these unfortunate refugees of transporting themselves with their domestics to New Orleans, where they were desirous of going; that there was no temptation in the very inconsiderable amount of passage money for so small a number of persons, to induce this deponent to attempt a violation of the law, nor could it in any way be done with impunity: and this deponent most solemnly declares that had it not been for the assurances so given to him as aforesaid, he would not have taken the said domestics on board the vessel. This deponent further adds that this vessel arrived here in ballast, and that there were no other slaves on board but those already enumerated.

MOSES R. SMITH.

The brig JOSEPH RICKETSON, *adsm.* THE UNITED STATES. } Affidavit.

NEW ORLEANS, *ss.*

Richard Tice, mariner, and captain of the schooner William, of Philadelphia, being duly sworn, deposeth, that some time prior to the departure of the Joseph Ricketson from the island of Jamaica in July last, he, this deponent, accompanied Moses R. Smith, the captain of the said brig, and Mr. Alexander Stuart to the house of Mr. Savage, the American consul in Kingston, and there heard Mr. Stuart ask the American consul whether any difficulty could arise to Captain Smith or his vessel from conveying passengers with their domestics from Kingston aforesaid to New Orleans? Upon which Mr. Savage replied "no, not in the least." Upon this Captain Smith observed that he had been informed that the vessel would be liable to seizure if she carried black domestics. The consul then assured him that there was not the smallest danger, and added, by way of confirmation, that he himself had a vessel up for New Orleans, and should be willing to receive as many as he could get. Some other conversation then took place, the particulars of which this deponent does not now recollect, but it was to this effect, that there could be no danger in taking passengers with their domestics. And this deponent is moreover firmly of opinion, from the circumspection manifested by Captain Smith on this occasion, that he would not have exposed his vessel to the hazard of seizure by receiving passengers with their black domestics on board, had it not been for the assurance so given to him by the American consul as aforesaid. And further this deponent sayeth not.

RICHARD TICE.

Sworn before me, the 22d day of August, 1809.

The brig JOSEPH RICKETSON, *adsm.* THE UNITED STATES. } Affidavit.

NEW ORLEANS, *ss.*

Mr. Duvalles, formerly of the island of Cuba, being duly sworn, deposeth, that he came to this city as a passenger on board the Joseph Ricketson, lately arrived here from Kingston, Jamaica; that he is one of those unfortunate persons who were forcibly compelled to leave the island of Cuba by the Government thereof; and had arrived about three weeks prior to embarking on board the said vessel in the island of Jamaica with his domestic servants, consisting of one black woman and her two children; that in bringing them here, he had no intention of infringing upon any of the laws of the United States, nor was he at that time acquainted with the act prohibiting the importation of slaves; but simply sought a shelter in New Orleans from the violence and persecution to which he had been so lately exposed; that for similar reasons there came passengers with him in the said vessel Madam Chazel, with a black boy and girl, her domestic servants, and Madam Burreau, with one negro girl, her domestic, and that there were no other slaves on board the said vessel.

11th Congress.] No. 270. [2d Session.

CONTESTED ELECTION OF JONATHAN JENNINGS, A DELEGATE FROM THE INDIANA TERRITORY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 22, 1809.

The Committee of Elections, to whom the memorial of Thomas Randolph, of the Indiana Territory, complaining of the election of Jonathan Jennings as a delegate to Congress for that Territory, and praying that his seat may be vacated, was committed on the 4th instant, and also the petition and resolution of the Legislature of that Territory, expressing a doubt of the authority under which they had been organized, and sundry other documents relating to said election, made the following report:

That they have maturely examined the documents committed to them by the House, and also the allegations of the petitioner, and of the sitting delegate. The documents are:

1st. The official certificate of the Governor of the Territory of Indiana, testifying that Jonathan Jennings was, on the 22d day of May, 1809, duly elected a delegate to Congress for that Territory.

2d. A memorial of Thomas Randolph praying that the seat of Jonathan Jennings may be vacated for the following reasons, viz: that though it does appear by the official return that Jonathan Jennings had a majority of thirty-nine votes, there ought, in the opinion of the petitioner, be deducted from the votes counted to the sitting member, ninety-one votes taken in the seventh district of the county of Dearborn, the returned copy of which was not certified by the two poll-keepers as the election law of the Territory directs; and, also, that two districts in the said county of Dearborn were prevented from voting through the omission or mistake of the sheriff, who did not appoint deputies to be judges of the election, or whose appointment was not attended to as it ought to have been, in which district the petitioner is of opinion that he would have had the majority of votes.

The petitioner further states, that it is not his intention on these grounds to claim a seat in this House, when in fact he had not a majority of votes, but that it is his wish that the voice of the people should be legally and truly heard, and in support of the prayer of his petition he refers to the memorial of the Legislature of the Territory, transmitted to the House, and referred to the Committee of Elections.

3d. A document purporting to be a petition of the legislative council, and members elected to serve in the House of Representatives, and not objected to by the parties, states that, from a deliberate view of the law of Congress dividing the Northwestern Territory, the ordinance for the Government of the Indiana Territory, the law of the Indiana Territory regulating the election, and the law of Congress extending the right of suffrage to the citizens of the Territory, they find that considerable doubt existed in the minds of the minority with respect to the constitutionality of the meeting of the General Assembly of the Territory; and they further state that, in the year 1805, there was a Legislature organized under the law dividing the Territory northwest of the river Ohio; that, in the year 1808, the Governor dissolved the said Legislature; that, on the 3d day of February, 1809, the law of Congress dividing the Indiana Territory, was enacted, and that, on the 4th day of April, 1809, the Governor issued his proclamation for the election of an additional number of members of the Legislature sufficient to supply the place of those struck off by the division of the Territory, corresponding with the law of 1805, on the authority of which the General Assembly was first organized, viz. eight Representatives; but the law passed 27th of February, 1809, extending the right of suffrage to the citizens of Indiana, declaring how the Legislature shall be formed after the passage of the said law, that is, that the General Assembly should apportion the members to the House of Representatives to consist of not less than nine or more than twelve members. That this law was evidently predicated on the principle that a Legislature was in existence at the time of its passage, or that a Legislature might be convened under the authority of the Governor's proclamation; but the fact was different, for the old Legislature was doubly dissolved, first by the Governor, as above stated, and again by the division of the Territory, which struck off three members of the House of Representatives and two of the legislative council; thus there was no Legislature in being to make the apportionment agreeably to the act of Congress.

The petitioner, after further consideration goes on to state that, after the General Assembly was convened, the minority of the Representatives not conceiving themselves authorized to go on in legislative business, the Legislature agreed to postpone doing any business except apportioning an additional member, to make the number nine, agreeably to the law of Congress extending the right of suffrage to the Territory.

The above petition is accompanied with a document purporting to be a resolution of the General Assembly, requesting the Governor to dissolve the Assembly, and to proceed as speedily as may be to organize another under the provisions of the act of Congress.

4th. In support of the irregularities in the election stated by the petitioner, he produced to the committee a certificate signed by the clerk of the court of Dearborn county, testifying that there were two districts in said county in which the citizens were prevented from voting through the omission or unintentional mistake of the sheriff. He also produced a return of the election held in the seventh district of Dearborn county, in which the signature of the poll-keepers, required by the law of that Territory, is wanting; but it is certified by the judges of election to be a true test of the votes taken under their inspection on the 22d of May, 1809, and certified by the Secretary of the Territory to be a true copy.

The petitioner also produced a certified notice given to Jonathan Jennings of his intention to contest his election, and that, for that purpose, he would apply on the first Tuesday of September next at the court house, in the town of Vincennes, where the sitting member might attend; and further adds, that there are other grounds upon which he shall contest his election, and says, that of this due notice shall be given, but these other grounds have not been stated to the committee, nor any further notice to the sitting member produced.

In reply to these objections to his election, the sitting delegate complains that he had neither notice, nor opportunity to have the alleged irregularities examined; he admits that two districts in Dearborn country were prevented from voting as stated by the petitioner; but says he could prove, if he had opportunity, that there did not more than fifteen attend at the places of election who had a right to a vote, who, if they had all voted for the petitioner, which he does not admit, would not have altered the state of the poll; he further alleges, that if opportunity had been allowed, he could have proved that the poll-keepers at the election held in the seventh district of Dearborn county, did their duty according to law, though their signatures does not appear along with that of the judges in the copy before the committee; he further says, that he is informed, that if he had opportunity he could prove that the election in the county of Knox, where the petitioner had all the votes, was not conducted according to law; this fact the petitioner admits, and the sitting member claims an opportunity to examine the facts alleged in opposition to his right to a seat in the House.

The petitioner does not ask the election to be declared void on the account of the want of legal authority vested in the Governor. He, before the committee, argued in support of the Governor's authority to order the election by proclamation, and rests his plea solely on the irregularities which he has specified.

The sitting delegate also advocated the legal authority of the Governor to organize the Legislature, and to direct the election of a delegate, in argument before the committee, and in a written paper reported along with the documents.

Besides the opinion of the General Assembly in their petition, expressing their doubt of the authority by which they were convened, the Governor himself, in what is submitted to the committee as the Governor's speech at the opening of the Assembly, convened by his own authority, he expresses a doubt of his authority, but goes on to support it by a liberal construction of the law of Congress for extending the right of suffrage to the Territory.

The committee, after a deliberate examination of the laws relating to the Indiana Territory, considered it to be their duty to investigate the authority under which the election for a delegate to represent that Territory was held, previous to an examination of the irregularities suggested, because, if the election was held without authority of law, it was void without regard to irregularities; and on this investigation they discovered that the Governor had, on October 26, 1808, dissolved the Legislature; but that, at that period, his power to organize it again remained unimpaired; they also found that, by the act of Congress erecting the Illinois into a separate Territory, five members of the representatives, with the district which they had represented, were taken away from the Indiana Territory, and two of the legislative council; by which act the Legislature of Indiana Territory was not only dissolved, but abolished, and no power vested in the Governor to revive it, because the power vested in the Governor, with relation to the Northwestern Territory, could not be applied to the Governor of Indiana Territory. The saving clause, viz: that nothing in the act dividing the Indiana Territory shall be construed in any manner to effect the Government, now in force in the Indiana Territory, cannot, by any reasonable construction be applied further than to protect the Executive and Judiciary of that Territory, because there was no Legislature in existence at the time at which the Territory was divided, and because the act of Congress, passed February 27, 1809, extending the right of suffrage to the citizens, directed a General Assembly that contained a greater number of members to be elected at the same time and places as the delegate to Congress directed by that act to be chosen by the freeholders.

The last mentioned act expressly provides that the apportionment on which such election shall be held, shall be made by the Legislature, and that that Legislature shall consist of not more than twelve nor less than nine members; and if no such Legislature or General Assembly existed in the Territory, the act of Congress gives no authority to the Governor, or any other person, to act with legislative authority.

That there was a defect in the act of Congress granting the extension of the right of suffrage is admitted; it did not provide for the organization of the General Assembly which it prescribed, and no reasonable construction could supply that defect; it required a supplementary act of Congress, which act has actually passed this session, and has been approved on —— instant.

If the Governor of the Indiana Territory, instead of exercising the legislative authority of Congress on what he supposed to be a liberal construction of the law, had represented the case to the last session of Congress, the defect would have been supplied, and the Territory now legally represented in Congress. It cannot be admitted that the Governor of a Territory may, by his own authority, supply a want or defect of a law of Congress, on his own opinion of liberal construction, expedience, or necessity; to sanction such assumption of power by a vote of this House, would set a dangerous precedent; on this view of the subject the committee submit the following resolution:

Resolved, That the election held for a delegate to Congress for the Indiana Territory on the 22d of May, 1809, being without authority of law, is void, and, consequently, the seat of Jonathan Jennings as a delegate for that Territory hereby declared to be vacant.

11th CONGRESS.] **No. 271.** [2d SESSION.

CITY OF WASHINGTON—PUBLIC BUILDINGS.

COMMUNICATED TO CONGRESS, DECEMBER 22, 1809.

DECEMBER 16, 1809.

To the Senate and House of Representatives of the United States:

I transmit to both Houses of Congress a report from the Surveyor of the Public Buildings, of the progress made on them during the last season, and of other explanations relative thereto.

JAMES MADISON.

The report of the Surveyor of the Public Buildings of the United States.

SIR: WASHINGTON, *December* 11, 1809.

During the past season, the appropriations made by law have been severally applied to the purposes for which they were designated, in the manner which I now beg leave to submit to you:

1.—*South wing of the Capitol.*

Agreeably to the intention of the last appropriation, further progress has been made in the sculpture of the capitals and cornices of the hall of Representatives. It will be observed that, on the east side of the house, two capitals are completely finished, and eight others, as well as the cornice, are in very considerable forwardness. The intermission of the work during the summer session, has prevented still greater progress. Chimney-pieces have been provided for the lobbies and Committee of Ways and Means, and in a variety of smaller details, the

accommodations of the house have been improved. The propriety of further considering the best mode of ventilating and warming the house has induced the postponement of any alteration in the fire-places of the hall itself.

A severe hail storm in the month of June broke almost all the glass on the south front of the house, and occasioned a very considerable expense of glass in addition to that contemplated by the appropriation.

2.—North wing of the Capitol.

At the beginning of the season, the wood work of the interior having been removed, progress had been made in rebuilding the chamber, and other apartments of the Senate, in solid brickwork. Many circumstances have since occurred to prevent the entire completion of this work before the commencement of this present session. The preparations for the session of last summer, the intermission of the principal part of the work during the presence of Congress, and especially the scarcity of workmen, and the difficulty of procuring materials, rendered the greatest and most expensive exertions necessary to complete the accommodations of the Senate, so far as that they may now, in a few days, be permanently occupied; some parts of the chamber itself still remain unfinished; but means have been taken that no inconvenience shall be thereby occasioned to the business of the house; and during the next recess, what is still deficient may be easily completed.

The court-room, the office of the Clerk of the Supreme Court, and the office and library of the judges have also been nearly completed, and may be occupied the approaching session of the court.

3.—President's House.

The appropriation made at the last session for the President's house has been expended towards the arrangement of the ground and garden within the enclosure; the copying of part of the surrounding wall; the construction of a carriage house, and the better arrangement of the interior for the accommodation of a family.

I now beg leave to lay before you a statement of the expenditures which the public buildings appear to require the next season.

1.—South wing of the Capitol.

To the perfect accommodation of the House of Representatives, nothing is so much wanted as a sufficient number of committee rooms. The standing committees of the House are eight, and it has been moved to increase their number to nine. When the House first occupied the south wing, the number of committees and committee rooms was only seven. The Committee of the District of Columbia has been since then created, and great inconvenience has been experienced for want of a room sufficiently spacious for their increasing business. At present their sittings are held in the small chamber fitted up for the use of the President whenever he comes to the Capitol; should the number of standing committees be increased, it will be impossible to find a room in which they can be accommodated.

For special committees there is no accommodation whatever; and it is well known to the members of the House that great inconvenience, interruption, and delay of business arises from this source. On these considerations, as well as on others, which I beg leave to lay before you, I must again point out the advantages that will arise from the erection of the northwest part of the south wing, and to refer to my reports of the two last sessions. This part of the building will contain several spacious committee rooms, and provide a proper situation for the water closets, which, in their present temporary situation, are a great annoyance to the lobbies and to the Hall of Representatives.

There is, however, another reason for the speedy erection of this work; the foundation of this corner of the house is naturally bad, and the cellars which have been dug there originally, collect a large quantity of water, which continues to injure them. This angle of the house was designed and built in full expectation that it would be supported by a mass of work in this place; the appropriation solicited for this purpose has been annually postponed, and the settlement of the wall, which has been the consequence, is now so considerable that I cannot help urging, with much solicitude, that the propriety of adding to the safety as well as to the accommodations of the building, may be taken anew into consideration. I beg leave to refer, for a more detailed representation of these and other motives for making the appropriation, to my report of the 23d March, 1808.

The terms on which the Italian sculptors employed on the Capitol are engaged, as well as the necessity of proceeding to finish the capitals of the columns of the interior of the Hall of Representatives, will require a moderate appropriation for that object.

The manner in which the House of Representatives is now warmed and ventilated requires further consideration, and considerable improvement. This subject was referred, at the session of June last, to a committee. It was not then acted upon to the extent suggested, but the expense of the improvement having been estimated, I have added it to the statement submitted.

2.—North wing of the Capitol.

The separate appropriation submitted in my last report, (December 1st, 1808,) for the library and judiciary having been postponed, the court room and those offices on the ground story, which support the Senate chamber, and other apartments of the Senate above, were necessarily constructed out of the general funds of the north wing, as otherwise the latter could not possibly have been built. This circumstance is taken into consideration in the estimate submitted below.

The whole east side and centre of the north wing being now permanently completed, excepting the parts deficient in the Senate chamber, the iron work of the staircase, and some minor details, I again beg leave to call your attention to the west side of this wing; it is intended to contain the library, and is in such a state of decay throughout, as to render it dangerous to postpone the work proposed. It is now the only part of the Capitol that remains to be solidly rebuilt.

But independently of this consideration, the increasing extent of the library of Congress induces me to represent to you the necessity of constructing the rooms intended permanently to contain it. Should the work be commenced in the approaching season, the books may be removed, and the library and reading rooms fitted up for use by the session after the next.

3.—President's House.

On the removal of the seat of Government to Washington, in the year 1800, the President's house was in a most unfinished state, and quite destitute of the conveniences required by a family. The roof and gutters leaked in such a manner as materially to injure the ceilings and furniture; the ground surrounding the house, barely enclosed by a rough fence, was covered with rubbish, with the ruins of old brick-kilns, and the remains of brickyards and stone cutters' sheds. During the Presidency of Mr. Jefferson, from the year 1804, annual appropriations have been made, by the aid of which several bed chambers were fitted up; the most necessary offices and cellars, which before were absolutely wanting, were constructed; a new covering to the roof was provided; a flight of stone steps

and a platform built on the north side of the house; the grounds were enclosed by a wall, and a commencement was made in levelling and clearing them in such parts as could be improved at the least expense. But notwithstanding the endeavors of the late President to effect as much as possible by these annual legislative grants, the building in its interior is still incomplete. It is, however, a duty which I owe to myself and to the public, not to conceal that the timbers of the President's house are in a state of very considerable decay, especially in the northern part of the building. The cause of decay, both in this house and in the capitol, is to be found, I presume, in the green state of the timber when first used, in its original bad quality, and in its long exposure to the weather before the buildings could be roofed. Further progress in the levelling and planting of the ground, in the coping of the wall, and in current repairs and minor improvements, are also included in the estimate submitted.

4.—*Highways round and between the public buildings.*

Until the year 1808, Congress have made an annual appropriation for the maintenance and repair of the public roads round and between the public buildings. These national grants, applied, in a great measure, to the immediate accommodation of the different branches of the General Government, as well as that of the citizens, have not been continued; and the roads, especially that south of the President's house, are already in a very bad state, and must certainly be thoroughly repaired next season. As they form part of the streets and avenues of the city, it might appear reasonable that they should be kept in repair at the expense of the city. But in proposing and making congressional grants for that purpose, it has always been considered that, by the very charter by which Congress has granted to the corporation the power to levy taxes on the city, it is expressly provided that no tax whatever shall be assessed on the national property, although if the national property were assessed in the same ratio in which the private property of the citizens is assessed, it would pay much more than is required to keep these roads in the most perfect order. I beg leave, therefore, again to submit an estimate for the purpose of repairing and draining the high roads around and connecting the public buildings, and for widening the bridge over the Tiber.

Estimate.

1. South wing, sculpture, warming and ventilating the house, - - -	$7,500
South wing, north west addition, - - - - -	25,000
2. North wing, defraying the expense of completing the court room and the offices of the judiciary on the east side, completing the Senate chamber, and for the library, - - -	40,000
North wing, for the platform and external access on the north side, - - -	5,000
3. President's house, offices, wall, and grounds, - - - - -	20,000
4. Highways, - - - - - - -	6,000
	$103,500

In submitting to you this report and estimate, I hope I may be permitted to add, that the late period of the session at which Congress have usually taken the subject of the public buildings into consideration most materially affects, not only the expense of the work, but the ability of those to whose direction they are entrusted to perform their duty in that manner which is most for the public interest. To explain how this happens, I will enter a little into detail. It is the general practice of all those who hire labor either for agricultural or other purposes, to engage their hands on the 1st of January; on that day all the best laborers are disposed of for the season. Those who are afterwards hired are few, expensive, and generally inferior hands. This circumstance must materially affect that part of our work which depends upon the quarries. No orders can be given till the legislative will is known, which has hitherto always been at the latter end of the session; the consequence is, that our best hands often leave us to search employment elsewhere; the quarriers being unprepared for labor, find it difficult to deliver stone before midsummer or the beginning of August, and that at a great expense; the mechanics are to be sought after in other places, often their travelling expenses to be paid, and, in fact, nothing effectual can be done till the latter part of the season, when the necessity of being prepared for the meeting of Congress requires exertions in which expense becomes only a secondary object; and, at last, the best endeavors are sometimes unsuccessful. In respect to common laborers, and to almost all the building artisans who have been brought up in this neighborhood, unless they can be engaged and employed during the winter, they cannot be depended upon until some time in July. In March the fishing season commences for shad and herrings, and lasts till the middle of May. Every man who has not profitable employment in hand, or who is not under engagements, then resorts to the shores. As soon as the fishing season is over the harvest commences, and until the end of the harvest, no great exertions, which depend upon these numerous classes of our people, can be made. During the last season, and that of the year 1807, when it was necessary to complete the Hall of Representatives, these causes have acted most materially to the public disadvantage; and I have thought it my duty to state the facts to you more particularly, in hopes that should they be laid by you before the National Legislature, they may have the weight which they merit.

All which is most respectfully submitted.

B. HENRY LATROBE,
Surveyor of the Public Buildings of the United States.

To the PRESIDENT OF THE UNITED STATES.

11th CONGRESS.] No. 272. [2d SESSION.

BREACH OF PRIVILEGES—ASSAULT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 29, 1809.

Mr. TAYLOR, from the committee appointed to inquire into the circumstances attending the occurrence alluded to in the letter of Mr. I. A. Coles to the Speaker of this House, made the following report:

That, according to order, they have taken into consideration the subject referred to them; that, in making the proposed inquiry, they have taken the depositions of the Hon. James Turner, a Senator of the United States, and of Mr. Samuel Sprigg, which depositions they beg leave to report to the House. From these depositions, it was

established, to the satisfactory belief of your committee, that Mr. I. A. Coles, without any immediate previous altercation or provocation, did assault and strike a member of this House, within the walls of the north wing of the Capitol; that this act was done on Monday, of the 27th ultimo, about one o'clock, P. M., and after this House had adjourned over to the following day.

That, from the assertions of Mr. Coles, and from the actual admission of the member assaulted, your committee were satisfied that the provocation, or supposed provocation, which occasioned the attack, did not arise from any thing said, or from any act done, by the member of this House, in the fulfilment of his duties as a Representative in the Congress of the United States.

Your committee are of opinion that this latter circumstance may be received in extenuation, but cannot be admitted in justification, of the act done by Mr. Coles; and, from all the circumstances of the case, they are of opinion that the said assault and violence offered to the member was a breach of the privileges of this House.

Your committee further report, that they have considered the letter of Mr. Coles to the Speaker of this House, together with another letter from Mr. Coles, addressed to the chairman of your committee, which they also beg leave to report to the House. That these two letters, in the opinion of your committee, do contain acknowledgments and apologies on the occasion, which ought to be admitted as satisfactory to the House. They, therefore, recommend the following resolution:

Resolved, That any further proceeding in the above case is unnecessary.

SIR: NOVEMBER 29, 1809.

An occurrence having recently taken place between a member of the House of Representatives and myself, produced by circumstances not at all connected with his official duties or opinions, which, from the time and place, may be considered disrespectful to the House of Representatives, I take the liberty of tendering, through you, my most respectful declarations that I am the last man who would wilfully manifest a deficiency of that reverence which is due to the Representatives of my country, or that sacred regard which is also due to their privileges.

To yourself, sir, personally, I tender the assurances of my very great respect.

I. A. COLES.

To the SPEAKER *of the House of Representatives.*

DISTRICT OF COLUMBIA, WASHINGTON COUNTY, *ss:*

This day came before me, a Justice of the Peace for said county, Mr. Samuel Sprigg, and made oath, that, on the 27th ultimo, about one o'clock, P. M., and after the House of Representatives had adjourned, (the Senate did not on that day form a quorum,) he, this deponent, and Captain Coles, were returning from the unfinished Senate chamber, and in the small room or lobby contiguous to said chamber, they met the Hon. James Turner, a Senator, who, after some salutations, passed them, when they met General Nelson, a Representative in Congress from the State of Maryland, who approached, holding out his hand to shake hands with Captain Coles, which Captain Coles repulsed by striking General Nelson on or near the face; he believes the blow was not a violent one. A contest immediately ensued, by both parties seizing hold of each other, but he, this deponent, did not see any other blow given.

As soon as this deponent could get over an intervening table, he, with the assistance of the Hon. James Turner, parted them. The deponent heard no immediate previous altercation between the parties, but believes the meeting between them was perfectly accidental and unexpected. After they were separated, Captain Coles said that he had taken that method of resenting the injury which General Nelson, at some time previous, had done to his character.

Sworn to, before me, this 20th December, 1809. DANIEL RAPINE.

COLUMBIA DISTRICT, WASHINGTON COUNTY, *ss:*

This day came before me, Daniel Rapine, a Justice of the Peace for said county, the Hon. James Turner, Senator of the United States, and made oath, that, on Monday, the 27th ultimo, being the first day of the present session of Congress, as he, this deponent, was going to the Senate chamber, at the head of the stairs or stone steps in the great area in the north wing of the Capitol, he fell in company with General Nelson, a member of the House of Representatives of the United States, who accompanied him till they reached the small room at the south side of the unfinished room designed for the Senate chamber, and there met Captain I. A. Coles, and a gentleman, whom he since has understood was a Mr. Sprigg. This deponent, after shaking hands with Captain Coles, passed on; but, hearing a noise behind him, he turned, and saw Captain Coles and General Nelson contending with each other, and in the act of striking at each other. This deponent and Mr. Sprigg immediately interfered and separated them. Before this could be effected, Captain Coles had with his left hand taken hold of General Nelson's collar, and struck him a blow with some violence on the forehead or temple. There might have been other blows given by each of the parties, but this deponent did not distinctly see but the one blow given. He did not hear any immediate previous altercation or provoking language between the parties.

After they were parted, Captain Coles said to General Nelson, "I am willing for this matter to end here; you attacked my character, and I have taken this method to take satisfaction or to chastise you." This deponent is not positive which of these expressions was used. Captain Coles and Mr. Sprigg then left the room. On their departure, this deponent said to General Nelson, "In the name of God what can this mean?" General Nelson replied, "I do not know; I never was so surprised in all my life, for I do not recollect ever to have said a word to the man's injury;" again asseverating that he never was so much astonished in his life.

Sworn to, before me, this 21st December, 1809. DANIEL RAPINE.

SIR: DECEMBER 28, 1809.

Understanding that the declaration which I had the honor this morning to make before the committee will be more acceptable if put in the written form, I hasten to comply with what I believe to be their wish, in tendering, through them, to the House of Representatives the renewed assurance "that if I could have supposed that the circumstance alluded to in my letter to the Speaker would have been construed into a breach of the privileges of the House, it would not have occurred at the time and in the place where it unfortunately happened."

With sentiments of great respect, I am your obedient, humble servant,

I. A. COLES.

The Hon. JOHN TAYLOR, *Chairman of the Committee, &c.*

11th Congress.] No. 273. [2d Session.

EXPENSES OF INTERCOURSE WITH THE BARBARY POWERS.

COMMUNICATED TO THE SENATE, JANUARY 22, 1810.

To the Senate of the United States: JANUARY 22, 1810.

I transmit to the Senate a report of the Secretary of the Treasury, complying with their resolution of the 27th of December, on the subject of disbursements in the intercourse with the Barbary Powers.

JAMES MADISON.

SIR: TREASURY DEPARTMENT, *January* 16, 1810.

In pursuance of the resolution of the Senate of the 27th ultimo, (herewith returned,) I have the honor to transmit a statement (marked A) of all the moneys disbursed from the Treasury of the United States for expenses of intercourse with the Barbary Powers, from the 4th day of June, 1805, being the date of the treaty with Tripoli, to the end of the year 1809. Notes have been added showing, as far as is ascertained at the Treasury, the agents who received the respective sums, and the particular purposes to which the same have been applied. As a considerable portion of the moneys thus disbursed were received by Mr. Lear, transcripts of his accounts to the end of the year 1808, being the latest period for which they have been received, are also enclosed.

I have the honor to be, with the highest respect, sir, your obedient servant,

ALBERT GALLATIN.

The PRESIDENT OF THE UNITED STATES.

A.

Statement of the moneys disbursed from the Treasury of the United States for expenses of intercourse with the Barbary Powers, from the 4th of June, 1805, *(the date of the signing of the treaty of peace with Tripoli,) to the end of the year* 1809.

Amount paid from June 4 to December 31, 1805,		134,172 13
In the year 1806,	155,263 99	
Repaid into the treasury,	8,764 78	
		146,499 21
In the year 1807,	162,571 86	
Repaid into the treasury,	500 00	
		162,071 86
In the year 1808,	89,963 41	
Repaid into the treasury,	3,294 97	
		86,668 44
In the year 1809,	108,060 15	
Repaid into the treasury,	18,672 23	
		89,387 92
		$618,799 56

Which was paid to the following persons, and for the following purposes, viz:

		(*b*) *To Richard O'Brien, late consul-general at Algiers.*
1805	1,500 00	Balance due him for his compensation, payments, and expenditures as consul-general aforesaid, from July 10, 1797, to September 10, 1804.
1806	33,159 00	
1808	1,204 00	Hire of the Pink O'Brien, in 1799, to carry despatches to Spain; cordage supplied Captain Geddes, of the brig Sophia; and rent of a house at Malta during the attack on, and negotiations with Tripoli.
1808	13,899 25	Sundry expenditures at Algiers, in 1799 and 1800, for the public service, as approved by the Secretary of State.
	$49,762 25	
		(*b*) *To William Eaton, late consul at Tunis.*
1807	$12,636 60	Balance paid him on settlement of his accounts pursuant to act of Congress of March 3, 1807.
		(*c*) *To James Leander Cathcart, late consul at Tripoli.*
1805	$4,708 62	For losses sustained by leaving bulky furniture at Tripoli on the breaking out of the war; and by a forced purchase of cloth made from him by the Bashaw; balance due him for his compensation and various expenses as consul at Tripoli; and for one-half of a bill drawn by Captain Robertson on the Secretary of State.
		(*b*) *To James Leander Cathcart, late consul at Tripoli.*
1806	17,500 00	Sundry expenditures in relation to the Tunisian ambassador in this country; presents purchased for the Bey of Tunis; and expenses on a journey from Washington to Boston and back, from May 12 to September 23, 1806.
1807	916 91	
	$18,416 91	
		(*b*) *To Daniel Brent.*
1805	2,000 00	Amount of his expenditures from December 14, 1805, to November 8, 1806, for the support of the Tunisian ambassador and suite, including house rent and various articles furnished for their accommodation, and the expense of keeping three Arabian horses imported by the said ambassador, to January 7, 1808; including a payment to John Stricker for certain expenses in relation to merchandise purchased for the said ambassador; and deducting the sum of $1,532 50 received on the sale of the aforesaid horses.
1806	6,930 20	
1807	4,316 13	
Re-		
paid in	13,246 33	
1808	1,612 91	
	$11,633 42	

STATEMENT—Continued.

		(*b*) *To Charles W. Peale.*
1806	$600 00	Cost of three polygraphs mounted with silver, for the Bey of Tunis.
		(*b*) *To Simeon Theus, collector of Charleston.*
1806	$719 75	Cost, charges, and freight of twenty-two whole, and six half, barrels of rice, intended as a present for the Bey of Tunis.
		(*b*) *To David Gelston, collector of New York.*
1806	$845 62	Paid for the passage of three Tunisians from New York to London, including the cost of mattresses, pillows, and blankets, and their board from September 6 to October 11, 1806.
		(*b*) *To John Stricker, navy agent, Baltimore.*
1805	3,500 00	This sum of $3,500, together with a further sum of $2,400, being the amount of a special grant made by Congress for the relief of Hamet Caramalli, ex-Bashaw of Tripoli, and which was not carried in the books of the treasury to the credit of the appropriations for Barbary intercourse, has been accounted for by Mr. Stricker by the purchase of two bills of exchange; one of which for 2,651 18 8 pezzos of Leghorn, equal to $2,400, was placed in the hands of Captain Hugh G. Campbell, and has been accounted for by him; and the other for £820 6*s.* 3*d.* sterling, equal to $3,645 83, but purchased for $3,500, was remitted to Messrs. McKenzie and Glennie, of London, who now stand charged on the books of the treasury for the amount.
1806	500 00	
Re-		
paid in	4,000 00	
1807	500 00	
	$3,500 00	
		(*c*) *To George Dyson, late navy agent at Syracuse.*
1808	$5,895 00	Expenses paid for the support of Hamet Caramalli, ex-Bashaw of Tripoli.
		(*b*) *To Captain Hugh G. Campbell, of the navy.*
1808	$176 27	Loss in exchange sustained by him on a bill remitted by John Stricker, navy agent at Baltimore, the amount whereof was applied to the relief of Hamet Caramalli, ex-Bashaw of Tripoli.
		(*b*) *To Joshua Wingate, Jun.*
1805	4,450 00	Cost and freight of a cargo of plank and spars, and the freight of five brass cannon, and sundry merchandise for the Dey of Algiers.
1806	3,053 23	
	$7,503 23	
		(*b*) *To Thomas Tingey, navy agent at Washington.*
1806	5,000 00	Expenses paid by him for outfit and supplies for brig Franklin, Lt. Wedentrandt, for Tunis, after deducting proceeds of eighty barrels of loaf sugar sold at auction, $2,112 22
1807	30,000 00	
1808	8,000 00	Cost of a cargo shipped by him May 23, 1808, on board of the ship Leonidas, R. McKenzie, master, consigned to T. Lear, consul at Algiers, including primage and part of freight, and his commission at two per cent. - - - 39,205 72
Re-		
paid in	43,000 00	
1808	1,682 06	
	$41,317 94	$41,317 94
		(*b*) *To Christopher S. Thom.*
1805	$8,764 99	Purchase and part of the transportation of five brass guns and their apparatus for the Dey of Algiers.
		(*b*) *To Lewis Deblois.*
1805	226 00	Premium of insurance on five brass cannon for the Dey of Algiers, shipped from Foxall's foundery to Boston, including his commission; and freight and charges on four brass cannon and their carriages, and ten tons of logwood, with sundry articles of furniture from Alexandria to Boston for the Tunisian ambassador.
1806	158 30	
	$384 30	
		(*b*) *To Samuel Brown, navy agent at Boston.*
1806	$222 27	Freight, insurance, and charges on five 18 pound cannon with their carriages from Philadelphia to Bath, Maine, intended for the Dey of Algiers.
		(*b*) *To Benjamin Lincoln, collector, Boston.*
1806	$213 40	Cost of seven boxes of confectionary, and one bag of coffee, forwarded to Bath, to be sent to the Dey of Algiers.
		(*c*) *To Henry Foxall.*
1805	$6,000 00	Advanced for brass cannon intended for the Dey of Algiers.
		(*c*) *To Ebenezer Stevens.*
1805	$3,705 04	Advanced for payment of freight for ship Anna Maria to Algiers; no account rendered.
		(*b*) *To Daniel Bedinger, navy agent at Norfolk.*
1805	$834 56	$832 52, part of this sum was a balance due him on sundry purchases and shipments of timber to Algiers; the remainder, $2 02, consists of errors in his accounts, for which he still stands charged on the books of the treasury.
		(*c*) *To Charles W. Goldsborough.*
1809	$44,950 00	Purchase of sundry supplies shipped to Algiers for the use of the Dey.

STATEMENT—Continued.

(c) *To Robert Montgomery, consul at Alicant.*

1808	$289 06	Postage and other expenses in transmitting letters and despatches to and from Algiers, Tunis, and Tripoli.

(c) *To John Ridgely, late consul at Tripoli.*

1808	1,927 60	Advanced as the balance due for his compensation, expenses, &c. as consul aforesaid.
1809	460 87	
	$2,388 47	

(c) *To Thomas Triplett, late physician at Algiers.*

1806	400 00	Advanced on account of his salary as physician aforesaid.
1809	600 00	
	$1,000 00	

(c) *To George Davis, consul at Tripoli.*

1806	$11,736 00	Advanced on account of his compensation and expenses as consul aforesaid.

(c) *To James Simpson, consul at Tangier.*

1805	4,960 69	Advanced on account of his compensation and expenses.
1806	6,800 00	
1807	8,800 00	
1808	1,400 00	
1809	3,200 00	
	$25,160 69	

(b) *To John Gavino, consul at Gibraltar.*

1808	18,172 23	This advance to Mr. Gavino was merely nominal. He had remitted to the Secretary of State bills of Tobias Lear, amounting to $25,000, on the credit of which his bills on the Secretary of State were drawn. As soon as he had drawn for the whole sum, the advances which had been charged to him on the books of the treasury were repaid, and Mr. Lear debited for the sum of $25,000.
1809	500 00	
	$18,672 23	
Re-paid in 1809	$18,672 23	

(b) *To Degen, Purviance, & Co., navy agents at Leghorn.*

1805	$23,000 00	Bills drawn by them to reimburse themselves for advances made to Col. Lear previous to June 4, 1805.

(c) *To Tobias Lear, consul-general at Algiers.*

		Paid for his bills drawn on the Secretary of State.	Paid for purchase of bills remitted to London for his account.	Total.	
1805	-	500 00	70,022 23	70,522 23

NOTE.—The accounts marked (*b*) have been adjusted and settled at the Treasury; those marked (*c*) remain unsettled.

B.

The United States of America in account with Tobias Lear, Consul General of the United States at Algiers, &c.

		Dr.	
1803. August	10,	To cash paid for bags and boxes, to pack the money received from the bank to carry to Algiers,	$4 00
August	10,	To cash paid carriage of do. on board the United States ship Constitution,	25
November	10,	To cash paid John Barnard, for board and expenses of myself and family in Gibraltar, while detained there on the service of the United States, at Tangier,	254 00
		N. B. I have made this charge because I was detained from the 12th of September to the 13th of November, on account of the situation of our affairs with the Emperor of Morocco; and went three times to Tangier, at the request of Commodore Preble, to assist in settling them.	
December	6,	To cash paid Bacri & Busnah, the balance due them on the settlement of their accounts on the 26th November, 1801, as stated and certified by Richard O'Brien, Esq., consul general of the United States, (see account and receipt of Bacri & Busnah,)	15,073 00
December	6,	To cash paid do. for sundry articles furnished by them for the biennial present given to the Dey and Regency of Algiers by Consul O'Brien, in September, 1803, as per account and certificate of Consul O'Brien, dated 25th October, 1803,	3,798 00
December	6,	To cash paid do. the amount of the consular present furnished by them on the reception of T. Lear, as consul general of the United States, in the Regency,	21,500 00
December	6,	To cash paid the Dey of Algiers, for the ransom of Captain Morris and crew, of the American brig Franklin, who had been taken by the Tripolines, and redeemed by the Dey,	6,800 00
December	6,	To Bacri & Busnah, for an elegant silver urn, burnished with gold, furnished by T. Lear for the consular present, and for which the United States have credit in their account with B. & B.,	400 00
December	6,	To cash paid for sundry stock and provision for the United States frigate Constitution, at the request of Commodore Preble, on the 20th of November,	473 89
December	12,	To cash remitted to G. Davis, Esq., chargé d' affaires of the United States in Tunis, for the use of the United States,	2,000 00
December	22,	To cash paid for a boat, to go off to the United States brig Syren, $8, steersman $2, (customary,)	10 00
December	28,	To cash paid the customary fee for the salute given to the United States brig Syren, on her anchoring,	76 00
December	28,	To cash paid for sundry stock and provision for the United States brig Syren, by desire of Captain Stewart,	53 16
December	28,	To cash paid boat hire for carrying off do.,	3 00
December	28,	To cash paid a man for procuring said stock, &c.	2 00
December	28,	To cash paid porterage of articles from the United States brig Syren,	2 00
1804. January	3,	To cash gave the customary fee on the feast of Ramadam, $72; dragoman, for do. $10,	82 00
January	20,	To cash remitted G. Davis, Esq. chargé d' affaires of the United States in Tunis, for the use of the American captives in Tripoli, as per receipt of the captain of a Spanish brig carrying the same, and a letter from Mr. Davis acknowledging the receipt,	2,000 00
March	14,	To cash paid the customary fee for the feast of Biram,	72 00
March	14,	To cash gave the dragoman for the same,	10 00
March	14,	To cash paid for a boat to go off to the United States schooner Vixen, $8; steersman of do. $2,	10 00
March	14,	To cash paid six months' rent of the consular house, $60; deduct two months, repaid me by Mr. O'Brien, $20,	40 00
March	14,	To cash paid for the salute given the United States schooner Vixen,	76 00
March	20,	To cash paid the customary annuity to the hospital for christian slaves,	50 00
March	23,	To cash paid for a boat to go off to the United States schooner Vixen on her return from Alicante, $8; steersman, $2,	10 00
March	24,	To cash paid Mr. O'Brien, late consul, for sundries paid by him on account of the United States, since my arrival here, as per his account and receipt,	530 00
March	24,	To cash paid do. for the rent of the consular country house, from this to the 7th of November next, which had been paid for by him,	130 00
March	25,	To cash paid on account of the annuities due from the United States to the Regency of Algiers, to the 5th instant,	10,131 00
March	25,	To cash paid the dragoman for his services in obtaining a cash payment of the annuities,	200 00
March	25,	To cash paid boat hire, carrying water, &c. to the United States schooner Vixen,	16 00
			63,806 28
May	1,	To balance due the United States, carried to new account,	6,367 72
			$70,174 00
		Cr.	
1803. August	3,	By cash received at the Branch Bank of the United States in Boston, for a check drawn by Thomas T. Tucker, Esq., treasurer of the United States, in favor of T. Lear, to be applied to the use of the United States in Algiers,	43,000 00
October	17,	By cash received from James Leander Cathcart, Esq., in Gibraltar, on account of the United States,	2,000 00
December	6,	By cash received from Richard O'Brien, Esq., in Algiers, on account of the United States,	13,000 00
December	22,	By cash received from James Leander Cathcart, Esq., from Leghorn, by the United States brig Syren, Lieutenant Commandant Stewart, commander,	12,070 00
			$70,174 00

Algiers, *May* 1, 1804.

Errors and omissions excepted. TOBIAS LEAR.

N. B. A copy of these accounts was transmitted to the honorable the Secretary of State of the United States, in my letter of the 7th of May, 1804.

The United States of America in account with Tobias Lear, Consul General of the United States at Algiers, &c.

1804.		Dr.	
May	1,	To cash paid the Regency of Algiers, on settlement of the annuities on the 25th March, - - - - - - -	$23,000 00
May	7,	To cash paid George Davis's bill on me from Tunis, in favor of Saul Levi Brahm, - - - - - - -	2,000 00
May	7,	To cash paid a courier for a letter brought me from Oran, - - -	4 00
May	30,	To cash gave the servants of the Casnagee, taking coffee with him on a visit of business, - - - - - - -	20 00
June	2,	To cash paid a courier express, who brought a letter to me from Mr. Davis, in Tunis, on public service, - - - - - - -	23 00
June	13,	To cash gave the servants of the Dey, taking coffee with him on the visit when the present was given on the circumcision of his son, - - -	20 00
June	22,	To George Davis, Esq., chargé d' affaires of the United States in Tunis, for a credit given him on Messrs. Degen, Purviance, & Co., of Leghorn, on account of the United States, - - - - - $2,000 N. B. This sum is carried short, as Messrs. Degen, Purviance, & Co. were desired to replace it by drawing on the United States.	
July	5,	To the amount of an entertainment given to the consular families and others, to celebrate the 4th of July, - - - - - - -	120 00
		N. B. I have made this charge to the United States, as it is a universal custom here for the consuls, when they give an entertainment to celebrate a national day, to charge the same to their Government.	
July	29,	To cash paid for a boat to go off to the United States frigate John Adams, $8; steersman, $2, - - - - - - -	10 00
July	30,	To cash paid for salute given to said frigate, - - - - -	76 00
July	30,	To cash paid boats carrying off sundries to said frigate, - - -	25 00
July	31,	To cash paid for sundry supplies furnished said frigate, - - -	82 35
September	15,	To cash paid for a boat to go off to the United States ship Congress, - -	10 00
September	16,	To cash paid for salute given to said ship, - - - - -	76 00
September	16,	To cash gave the choux who carried off the Dey's present to said ship, (customary,)	24 00
September	16,	To cash paid boats carrying off sundries bought for said ship, - -	10 00
September	16,	To cash gave the Dey's biscary, who brought me a letter from the Dey to the Bashaw of Tripoli, - - - - - - -	20 00
September	16,	To cash gave the servants of the Vichelhadge, taking coffee with him on my departure for Tripoli, - - - - - - -	20 00
September	16,	To cash gave the servants of the Casnagee, Aga, and Hogin de Cavalles, on the same occasion, - - - - - - -	60 00
October	15,	To cash paid six months' rent of the consular house, - - -	90 00
October	30,	To cash paid Commodore Preble, for money advanced by him to G. Davis, Esq., in Tunis, on account of the United States, in May last, - - $4,000 Premium for dollars, charged by William Higgins, Esq. - - 180	4,180 00
November	7,	To cash paid one year's rent in advance for the consular country house, -	202 00
November	7,	To cash paid a courier for a letter from Oran, - - - - -	4 00
December	1,	To cash remitted to G. Davis, Esq., at Tunis, from Malta, by William Higgins, Esq., by my order, for the use of the United States, - - $2,000 Premium for dollars, - - - - - 100	2,100 00
December	6,	To cash paid for a sparanaro, to go from Malta to Syracuse, to carry letters to Commodore Barron, in the service of the United States, - - -	70 80
December	9,	To cash paid (by T. Mountford, at Algiers) for a boat going on board the ship William and Mary, with annuities from the United States, - - -	8 00
December	12,	To cash paid (by T. Mountford) to the dragoman, for services in getting the William and Mary into the port, - - - - -	8 00
December	24,	To cash paid the fee on the feast of Ramadam, - - -	72 00
December	24,	To cash gave the dragoman, for the same, - - - -	15 00
December	25,	To cash gave the slaves, for Christmas, - - - -	25 00
December	27,	To cash paid for a sparanaro, to go from Malta to Syracuse, to carry letters to Commodore Barron, which I had received from Tripoli, - - -	70 80

Algiers, *December* 31, 1808.

Errors and omissions excepted.

TOBIAS LEAR.

EXPLANATORY NOTE MADE AT THE TREASURY.

Notes in relation to the accounts of Tobias Lear.

The sum of £28,881 2 7, placed in the hands of the bankers at London, subject to the drafts of Mr. Lear, together with a further sum of £1,617 3 7, which was in their hands on the 5th June, 1805, and amounting together to - - - - - - - - £30,498 6 2

Has been accounted for by the said bankers as follows:

Paid on drafts of Mr. Lear, drawn previous to 5th June, 1805, - -	£6,000 0 0	
Paid on drafts of Mr. Lear, drawn subsequently to 5th June, 1805, - -	23,604 10 6	
Charges of protest on Crousillat's bill, - - - -	11 10 7	
Charges on Mr. Lear's bill, - - - - -	1 0 0	
Balance in the banker's hands, December 31, 1808, - - -	881 5 1	
		30,498 6 2

The sums paid and charged to Mr. Lear directly at the Treasury, and the sums paid by the bankers in London, agree with the credits given by him in his accounts, with the following exceptions, viz:

1. In relation to the moneys paid at the Treasury.

The amount he credits from 5th June, 1805, to 31st December, 1808, for his bills drawn on the Secretary of State, is - - - - - - - - - $189,605 26

To which is to be added this sum, deducted by him for a discount or loss in exchange of 8 per cent. on certain bills, which, instead of being deducted, ought to have been charged as an item of expense, 2,052 63

$191,657 89

The amount charged at the Treasury for payments to the end of the year 1809, as above, is - 208,007 17

Difference, - - $16,349 28

Which is made up as follows:

Four years annuity paid to the attorney of Mr. Lear's mother, at $500 per annum, per his authority to that effect, - - - - - - -	$2,000 00	
A bill dated March 28, 1806, paid July 18, 1806, not credited by him, - -	2,500 00	
A bill dated March 28, 1806, paid August 14, 1806, not credited, - -	500 00	
And the following payments for bills drawn in the year 1809, for which year his accounts have not been received, viz:		
$500 00		
21,089 28		
1,000 00		
1,760 00		
	24,349 28	
	29,349 28	
From which deduct two bills credited by him in 1808, but which have not yet appeared at the Treasury for payment, one for $6,000, and one for $7,000, both dated April 2, 1808,	13,000 00	
		$16,349 28

2. In relation to the moneys paid by the bankers of the United States in London, a difference of ten shillings sterling in a bill dated October 11, 1806, it being credited by Mr. Lear at £1,500, and charged by the bankers, February 4, 1807, at £1,500 10.

A. G.

11th Congress.] No. 274. [2d Session.

DISTRICT OF COLUMBIA—BANKS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 2, 1810.

Mr. Love, from the Committee of the District of Columbia, to whom was referred the several petitions relative to the Banks of Alexandria, of Potomac, of Washington, and of the Union Bank of Georgetown, reported:

First: That the Bank of Alexandria was established by an act of the Legislature of Virginia, passed in the year 1792; allowing a capital to be raised to the amount of $150,000, and limiting the duration of the bank to the 1st day of January, 1803; that by an act of the same Legislature, passed the 5th day of December, in the year 1795, the capital of the said bank was allowed to be increased to $500,000, the whole of which has been subscribed for; and on the 21st day of January, in the year 1801, the Legislature of Virginia extended the duration of the charter to the 4th of March, 1811.

An increase of capital and an extension to the time last mentioned, it is presumed was decided on, from a knowledge of the beneficial effects the community had derived from the institution and the propriety with which it had been conducted; and also from an opinion, perhaps prevalent, (but how well founded your committee do not pretend to decide,) that the Congress of the United States had divested themselves of the power of granting a charter, even to a private bank, till the term of limitation for that of the United States had expired.

The useful and prosperous operations of the Bank of Alexandria, have continued to an equal degree and extent to that which they had been carried to when that institution last received the sanction of the State of Virginia, by the act of 1801. It has preserved a stability of credit, and there is every reason to induce a belief that the same prudence and circumspection has influenced the conduct of the directors of it since, as did before the State of Virginia ceased to have jurisdiction over the place of its establishment.

The circumstance of this incorporation having been created under the special sanction of the ceding State, and its therefore presumed consistency with the interests and wishes of that State, the citizens of which are principally affected by the circulation of its notes, affords considerations for a continuance of its charter, which are certainly entitled to particular respect. The average annual dividends of this bank have been equal to 8¾ per cent. on its capital, to the present time.

The provisions of its charter secure to the public, affected by the circulation it enjoys, the responsibility of each stockholder or member of the company, in their natural capacities, to an amount equal to the stock held by him in case of losses or deficiency of the capital stock, at the time such loss or deficiency shall take place, from whatsoever cause it may arise; and, also, in case the total amount of the debts, which the company shall at any time owe, shall exceed four times the amount of the capital stock over and above the moneys actually deposited in the bank for safe keeping, the directors, under whose administration it shall happen, shall, in their natural and private capacities, be liable for such excess to any creditor of the bank, except those directors who were absent, or being present, dissented to the act, which should produce such excess; and, in case such directors should not have property sufficient to pay, the stockholders are made liable, in their private capacities, for such excess.

It is also made necessary, by the provisions of its charter, that the president and directors shall, once in every year, lay before the Executive of Virginia an account truly stating the situation of the bank and its funds. A summary mode of recovery is also provided for the creditors of the bank.

2dly. The Bank of Potomac, next to that of Alexandria, has been longest in existence of any respecting which petitions have been referred to this committee. It is derived from an association of individuals, which took place for that purpose in the town of Alexandria, in the year 1804, who agreed to subscribe a capital, not exceeding 500,000 dollars, the whole amount of which has been paid according to the terms of the association. The petitioners assign, as a reason for not applying at that time for a charter, their impression that the National Legislature had been precluded by the terms on which that of the Bank for the United States had been granted from authorizing by law any other bank till the 4th of March, 1811, and the necessity of an increase of banking capital, in order to enable the traders in agricultural products to purchase the increased quantity of those articles brought to Alexandria for a market.

This banking association has established a solid credit. There is every reason to presume its operations have been prudently conducted. Its utility is tested by the constant demand for its capital, as evidenced by the rate of annual dividends or profits it has yielded the stockholders, averaging precisely seven per cent. to the period previous to the last half year, which, for that term, has been declared to be four per cent. on the capital.

3dly. The Bank of Washington and the Union Bank of Georgetown, are constituted by articles of association nearly similar to that of the Bank of Potomac, and have originated during the year 1809.

The Washington Bank is established in the city of Washington, contemplating a capital of $250,000 certain; for the amount of which a subscription has been obtained, and is capable of being augmented to $1,000,000. The operations of this bank have already commenced.

The Union Bank is contemplated to be established in Georgetown, with an immediate capital of $300,000, four-fifths of which the petitioners state is now subscribed for, and is capable, by the articles of association, of being enlarged to the amount of $1,000,000. Its operations have not yet commenced, but it is represented in the petition, that preparations are so progressing as to ensure their commencement early in the present month.

The probable utility and success of those banks must depend on a variety of circumstances, and cannot be deduced, as in the two first instances, from actual experience.

The Committee of the District of Columbia can, however, readily confide in the statement of the petitioners, that an increase of banking capital will be conducive to the growth of commerce and manufactures within the district. The committee will also observe, that the founding and erection of so extensive a city as the permanent seat of empire for the United States, must obviously require the aid of vast resources, and that that consideration offers additional inducements to give the most advantageous extension to the moneyed capital it may possess, and to attract a portion of that which may be to spare in other parts of the Union. The purposes of an increasing commerce, of manufacturing establishments, and more especially improvements for accommodation, now rapidly progressing, it is presumed, demand a sum of circulating medium perhaps not to be answered, even by the increase expected from the establishment of the banks petitioned for.

A fulfilment of the expectations of the founders of the national seat of Government appears, from the rapid increase of its growth and population, no longer to remain doubtful. It can no longer be doubted, that the District of Columbia is destined to an enviable, and perhaps unrivalled enjoyment of commerce and the useful arts, the essential concomitants of wealth, power, and magnificence. Its site at the head of the maritime navigation of a great river, deriving its sources from the regions which also give birth to the western waters of the United States; the facility of connexion with the trade of the latter; the natural and improved fertility of the country to which those advantages give a cheap access, with innumerable other existing causes of prosperity, seem at length to have attracted a considerable share of the notice of the enterprising. The opinion is, therefore, presumed to be warranted, that the necessary means of improvement would be greatly accelerated by an increase, at this time, of banking capital.

But, should this supposition not be founded in a correct estimate of the present demands for an increased quantity of currency in the district, no apparent evil can result to the public from the permission of an unnecessary investiture of capital in banks; provided, such banks are subjected to regulations, which may ensure the community against loss from attributing to them an unmerited credit. Under such a security, the only consequence which can result from an excess of capital, would be a want of employment for it, and a consequent loss to the stockholders. This part of the inquiry might then be left to rest with the petitioners themselves.

The committee, however, wish to be understood to entertain the opinion, that the unrestrained permission to individuals, by extensive associations to establish institutions of a moneyed kind, might be carried to pernicious lengths; they conceive it to be the duty of the Legislature, while they encourage those useful instruments of commerce and improvement, to guard the interest of the citizen from the dangers which an unlicensed extent of them might produce; and their attention has, therefore, been led to the examination of the principles on which those companies have erected themselves, which are now the particular subject of inquiry.

The different articles of association which constitute the three last noticed institutions, although undoubtedly the result of the most laudable intentions, are not discerned to possess in themselves any security to the public, against an abuse of the credit the community is in the habit of bestowing on bank notes. The members of the institution are in all cases, and under any circumstance of mismanagement, by express stipulation, exempted from personal liability, a quality which it is presumed ought not to be found, to the same extent, in any co-partnership whatever; it is certainly proper, however, to add, that no imposition can possibly be presumed to have been contemplated in these particular instances, as well from the high standing in society, which the framers and managers of those institutions enjoy, as from the evidence of candor and fairness exhibited by them, in having provided, that contractors with them should be specially notified of this quality in their contracts, and that the receivers of their bank currency should be apprized of it, from the language used on the face of their notes.

It is presumed to result from this view of the inquiry submitted to the committee, that the granting of charters to the several petitioners, and by law prohibiting future associations which have so important an effect upon the interests of society, unless under the restrictions and provisions of special laws, the safety and interests of the public

would be best protected. It only remains, then, for this committee to recommend the mode of such restrictions as will, in their opinion, best comport with the public safety, and not unnecessarily fetter the operations of these institutions.

Various means to secure this object may be suggested as proper to be introduced into the terms of their several incorporations:

1. Such as those provisions engrafted into the charter granted by the Legislature of Virginia to the bank of Alexandria, and which exist in most bank charters, and which are herein before referred to.

2. By subjecting those institutions to an examination into the state of their affairs from time to time, under such authority as Congress might appoint, with a correspondent power of removing or obviating abuses.

3. By authorizing the Executive of the United States, or providing for Congress to appoint, annually, a certain number of the directors of the several institutions.

4. By incorporating them, with such other funds as might be authorized, into a national bank, making them branches thereof, in order to accommodate the different sections of the district, or consolidating their several capitals into an integral institution, and thus, in either mode, establishing them on the most satisfactory responsibility.

The fourth alternative certainly involves important considerations, not more from its intrinsic moment, than from the time at which the subject has been presented for consideration.

In all Governments where any system of finance has been adopted, the instrumentality of banks has been found of great utility in its management. In one like that of the United States, where the revenues are collected throughout a vast extent of country, and the amounts from that circumstance rendered proportionally difficult in their transportation to the different scenes of expenditure, the safety and convenience of banks have been already appreciated by the department to which our fiscal operations are confided. The bank established for the United States by an act of Congress of 1791, has heretofore furnished that convenience, not, however, without a compensation entirely ample, from the advantages derived to it from the deposites of public money. Should objections be found to exist to a further continuation of that charter, which will expire in a very short period, the convenience and also the exigencies of Government will point out the policy and necessity of creating a new national bank, the place of establishment for which would most properly be at the seat of Government of the United States, under the immediate eye of the Government, with which a greater or less portion of its capital would control the operations of such branches as might be authorized by the proper powers.

To an establishment of this kind within the District of Columbia, where the United States have an exclusive jurisdiction constitutionally in all cases, one at least of the objections to a prolongation of the charter of the present United States Bank would not exist, nor to the branches of a new bank, when authorized by the State sovereignties. It would be, however, for the wisdom and justice of the Legislature to decide what portion of the stock of the present United States Bank might, with the approbation of its owners, be engrafted into the new national bank. To continue this inquiry would be carrying this committee beyond the limits assigned them in a report on the petitions referred to them. Nor would it be more certainly within the scope of their duty to point out the mode which, in their opinions, it would be most eligible to adopt in the creation of a national bank, or to observe upon defects they might presume to exist in the present one. They profess only the obvious right of deciding in their report on the propriety of rejecting or acceding to the prayers of the several petitions referred to them; and, in acceding to them, to endeavor to develop the means most eligible for individuals, and most advantageous and safe for the public, upon which the institutions prayed for may be established. They, therefore, report the following resolution:

Resolved, That the prayers of the several petitioners, to continue the charter of the bank of Alexandria, and to grant charters to the banks of Potomac, of Washington, and of the Union bank of Georgetown, are reasonable, and ought to be granted.

[NOTE.—See further report, No. 289.]

11th CONGRESS.] **No. 275.** [2d SESSION.

ACCOUNT OF BILLS OF CREDIT, AND OTHER PRINTING EXECUTED UNDER RESOLVES OF THE REVOLUTIONARY CONGRESS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 27, 1810.

To the honorable the Senate and House of Representatives of the United States of America in Congress assembled, the memorial of William Hall, surviving partner of Hall and Sellers, of the city of Philadelphia, printers, and Robert B. Sellers, administrator to the estate of William Sellers, deceased, respectfully showeth:

That the said Hall and Sellers were employed by the Congress of the United States of America, during the revolution, in the execution of a variety of printing work, viz: bills of credit, bills of exchange, loan office certificates, &c., for the performance of which a considerable balance remains due to them, their accounts having been refused acceptance at the proper offices when presented, on the ground of their being barred by the act of limitation; that the delay in presenting them was occasioned by circumstances out of their control; that their press was removed from place to place, viz: from Philadelphia to Baltimore, from Baltimore to Lancaster, from Lancaster to Yorktown, and from thence again to Philadelphia; and during these removals, the work was overseen by the inspectors of the press, assisted by the then treasurer of the United States, Michael Hillegas, Esq., in whose books the number of bills of credit printed, and the amount of the different emissions issued, were entered; that frequent applications were made to Mr. Hillegas for information, and extracts from his books, as to the numbers and emissions issued and printed, but owing to his public engagements, and absence from Philadelphia, the documents necessary to complete the accounts for presentment could not be obtained in time, and they were rejected, as stated above, by the officers of accounts.

Thus circumstanced, your memorialists pray your honorable body to take their case into consideration, and to grant them such relief as your wisdom and justice may deem proper. And your memorialists, &c.

WILLIAM HALL,
Surviving partner of Hall and Sellers.

ROBERT B. SELLERS,
Administrator to the estate of William Sellers, deceased.

PHILADELPHIA, *January* 10, 1809.

The United States of America in account with Hall and Sellers.

		Specie.

11th CONGRESS.] No. 276. [2d SESSION.

APPLICATION FOR THE ADMISSION OF THE TERRITORY OF ORLEANS INTO THE UNION AS A STATE.

COMMUNICATED TO THE SENATE, MARCH 12, 1810.

To the honorable the Senate and
House of Representatives of the United States in Congress assembled:

The inhabitants of the Territory of Orleans, become your countrymen by a combination of political events, but as satisfied with the title of citizens of the United States as if they had acquired it from choice, raise up to you, through the organ of their Representatives, their respectful remonstrances on the inconveniences which, no doubt against your intentions, have been the inevitable consequences of the system of government which you have given them. They appear before your honorable assembly full of confidence in your justice not to vent any complaints, but to claim their rights. They bring you not testimony of their discontent, but the expression of their wishes and of their hopes; and they pray you, before you listen to their representations, to accept the homage of the fidelity which they again swear to the constitution of the United States, and the tribute of admiration which they pay to that sacred charter where the true principles of liberty are recorded in indelible characters. After this solemn protestation of their sentiments, they entreat you to lend an attentive ear to the object which they are going to submit to your consideration. Its importance claims that it interests the fate of a great number of men, whose happiness you have contracted the obligation to procure when you adopted them for your fellow-citizens.

A considerable portion of the inhabitants of this Territory thought some years ago that they had a right to solicit the incorporation of this country into the Union. They founded their claims on the stipulations of the treaty of April, 1803, and demanded that this Territory should be erected into a State, not so much because of the utility of the measure, than because they considered it as secured by the treaty.

Things are now materially altered. The Legislature of this Territory came forward several years after to solicit that incorporation, not so much as a right than as a favor. Whatever may have been the political considerations which induced your honorable body to reject the application which was made to you in 1804, those reasons exist no longer. The loyalty of the whole population of this Territory has since then been put to the trial in circumstances sufficiently critical for you to be now convinced that the inhabitants of Lower Louisiana are not undeserving the confidence of the Federal Government. The devoted spirit of our militia, when war with Spain was on the eve of breaking out, our unshaken fidelity, in the midst of treasons and conspiracies, are irrefragable proofs of the incorruptibility of our honor, and of the sincerity of our affection to our common country.

But not only there is no longer any reason to oppose the wish of the citizens of this Territory, there exists powerful motives to induce your honorable assembly to see it in a favorable point of view. The system of government which you have given them, because you thought it would be convenient, does not suit either their physical nor their political situation. To use the expressions of the person who is at the head of our Executive, when speaking of a particular branch of our Government: "The ordinance of 1787, originally intended for a small agricultural society, was of hazardous experiment in a territory like ours, populous, wealthy, and commercial, where the landed property is holden by titles so various and complex, and where the principles of the common and civil law, the statutes of the United States, and the municipal regulations of France and of Spain," mingle together to render the administration of our affairs more complicated and more embarrassing. Since the introduction of that ordinance a sad experience has shown us its imperfection and its insufficiency. As we have been endeavoring to conciliate it with our wants and our localities, the difficulties multiplied themselves so much, that we now think it impossible to establish harmony amidst the incoherent materials of which our present Government is composed.

We live, however, at the distance of six hundred leagues from your honorable assembly, who gave us those laws, and who alone has the right of remedying the evils which they may have created. Convened, moreover, for the general good of the Union, occupied with great political subjects, on which depends the safety of the whole nation, you cannot, nay, you ought not, to stop to the details of our local administration; and although you should consent to enter into the examination of those details, you are not sufficiently acquainted with our situation to have it in your power to ameliorate it.

Such were undoubtedly the reasons which determined your honorable body to give us an elective Legislature. You thought that, by granting us the privilege of making our own laws, you furnished us with the means of securing our happiness. No doubt, legislators, such were your benevolent intentions. But how far that institution fell short of the end for which it was established! From the bosom of that ordinance, which you had given us as a favor, inconveniences and difficulties have sprung which made our situation worse than it was before.

In almost all the measures which we attempt to take for the amelioration of the government of the Territory, the provisions of the ordinance shackle our efforts. It would be preposterous to entertain your honorable assembly with the particulars that form the mass of our grievances, and to conduct you through the windings of the labyrinths of our administration. Higher objects call your attention, and bid us to spare the precious time which you are bound to employ for the general good of the nation. But without tiring your patience with useless details, if you will deign to cast an eye on the most striking inconveniences of our present situation, you will be forced to acknowledge the necessity of granting to us more extensive powers wherewith to clear our way amidst the innumerable difficulties which reiterated changes of government have heaped around us.

The absolute veto of the Executive; a judiciary placed above the authority of the Legislature; provisions only obscure, sometimes contradictory, which furnish individuals whose private interests is in opposition to the public welfare, with the means of creating doubts upon the most important subjects; powers and functions imperfectly defined; a complicated jurisprudence; an entangled chicane, in the vortex of which our business and fortunes are precipitated; public officers who often have no idea of our municipal laws, and do not understand the language of the great majority of our population; no voice in their election; no check on their conduct; no confidence, no harmony; such is, legislators, the present state of government in the Territory of Orleans. It would even be more grievous if the chief of our Executive, to whom we owe this public testimony of our acknowledgment, had not united his efforts to ours to better our situation.

But the palliative measures to which we recur offer little resistance to the torrent of disorder which flows from our constitution itself. The only efficacious means to employ is to drain the source of the evil, by changing entirely the actual system of our government.

That remedy, legislators, is in your hands. No constitutional obstacle prevents you from using it. The condition which you have put to our admission into the Union, that of waiting until the Territory should possess sixty thousand inhabitants, can be repealed by the same authority which has imposed it. It does not emanate from the constitution of the United States, it emanates from your will. If you think the emancipation of this Territory to be a necessary measure because of the physical and of the political situation of this country, because of its remoteness from the seat of the Federal Government, where we are now obliged to apply even for the details of our local administration, because of the confusion into which that administration has been plunged by the successive changes which it has experienced; if you think that emancipation to be a salutary measure, as tending to bind more closely to the interests of the Union a population already known by their loyalty; if you think that emancipation to be a just measure as the recompense of the irreproachable conduct which that population has pursued in critical and tempestuous times; nothing can, nay, nothing ought, to prevent you from pronouncing the decree which we solicit.

In vain would it be objected that our demand is premature; that our population does not yet amount to sixty thousand free inhabitants, as is required by the ordinance of 1787, originally made for the territory northwest of the Ohio. The articles of *compact*, which are included in that ordinance, cannot be considered as obligatory on us, since we stipulated, approved, accepted nothing; and the ordinance with regard to us, is a law like the others eminating solely from your will. If those articles are obligatory on your part, they can be so only as containing an engagement not to retard our incorporation into the Union beyond the epoch when our population shall amount to sixty thousand inhabitants; but by contracting the obligation, not to deprive us of certain advantages, you did not part with your right of granting to us further favors.

Such was your consideration of the subject, even with respect to those who were considered as contracting parties in the ordinance of 1787, when you erected in 1802 the Territory of Ohio into a State, long before it possessed the number of inhabitants required by the ordinance.

But although the law which you have established over us can be revoked by the same power that has dictated it, if through respect for ancient institutions, if through attachment for a plan of government which was successively applied to your several territories, you should persist in requiring, as a condition of our incorporation, that our population should amount to sixty thousand free inhabitants, then we might abandon the hope ever to see the change which is the object of our wishes. Our Territory, though vast, cannot admit of any large increase of population. Nearly all the lands conveniently situated are occupied; immense swamps cover a great proportion of the remaining part of the country, and such uninhabited lands as are cultivable are chiefly to be found towards the limits of our Territory. Such a situation threatens, therefore, at least, the present generation, never to see the epoch of their emancipation, if your honorable assembly should not yield to the powerful reasons which now make it convenient, or rather necessary.

Must we add to what has been above represented, that we are capable of appreciating the advantages of the Government which we pray you to extend to us? Do you suppose it possible that we should have enjoyed during several years a portion of that precious liberty which you alone have preserved, amidst the subjection of all the civilized nations, and that we should not wish to possess it entirely? Do you doubt that we would receive with transport the favor which we solicit from your liberality and your justice? And do you hesitate to believe that, once in possession of our independence, it shall not be wrested from us but with our lives? No, legislators, your reason must persuade you that the emancipation of the Territory of Orleans is ardently desired by its inhabitants; and your heart must tell you that, by extending independence to them, you will forever secure their friendship and their devotion.

THOMAS URQUHART,
Speaker of the House of Representatives.

J. D. DEGONTIN BELLECHASSE,
President of the Legislative Council.

Attest: E. FROMENTIN,
Clerk to the House of Representatives.

Attest: P. DERBIGNY,
Secretary to the Legislative Council.

11th Congress.] No. 277. [2d Session.

ESTABLISHMENT OF A FIRST MERIDIAN FOR THE UNITED STATES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 28, 1810.

Mr. Pitkin, from the committee to whom was referred the memorial and representation of William Lambert, made the following report:

That the memorialist states that, for the purpose of laying a foundation for the establishment of a first meridian for the United States of America, at the seat of Government, he has made calculations to determine the longitude of the capitol, in the city of Washington from Greenwich observatory, in England; and that he submits the same, together with the data and elements on which his calculations are made, to the consideration and patronage of the National Legislature.

The committee have deemed the subject worthy the attention of Congress, and would, therefore, beg leave to observe, that the necessity of the establishment of a first meridian, or a meridian which should pass through some particular place on the globe, from which geographers and navigators could compute or reckon longitude, is too obvious to need elucidation.

The ancient Greek geographers placed their first meridian to pass through one of the islands, which were by them called the Fortunate islands, since called the Canaries. Those islands were situated as far west as any lands that had then been discovered, or were known by ancient navigators in that part of the world.

They reckoned their longitude east, from Heria or Junonia, one of these islands, supposed to be the present island of Teneriffe.

The Arabians, it is said, fixed their first meridian at the most westerly part of the continent of Africa. In the fifteenth and sixteenth centuries, when Europe was emerging from the dark ages, and a spirit of enterprise and discovery had arisen in the south of Europe, and various plans were formed, and attempts made to find a new route to the East Indies, geographers and navigators continued to calculate longitude from Ferro, one of the same islands, though some of them extended their first meridian as far west as the Azores or Western islands.

In more modern times, however, most of the European nations, and particularly England and France, have established a first meridian to pass through the capital, or some place in their respective countries, and to which, they have lately adapted their maps, charts, and astronomical tables.

It would perhaps have been fortunate for the science of geography and navigation, that all nations had agreed upon a first meridian, from which all geographers and navigators might have calculated longitude; but as this has not been done, and in all probability never will take place, the committee are of opinion that, situated as we are in this Western hemisphere, more than three thousand miles from any fixed or known meridian, it would be proper, in a national point of view, to establish a first meridian for ourselves; and that measures should be taken for the eventual establishment of such a meridian in the United States.

In examining the maps and charts of the United States, and the particular States, or their seacoasts, which have been published in this country, the committee find that the publishers have assumed different places in the United States, as first meridians.

This creates confusion, and renders it difficult, without considerable calculation, to ascertain the relative situation of places in this country. This difficulty is also increased, by the circumstance that, in Louisiana, our newly acquired territory, longitude has heretofore been reckoned from Paris the capital of the French empire.

The exact longitude of any place in the United States, being ascertained from the meridian of the observatory at Greenwich, in England, a meridian with which we have been conversant, it would not be difficult to adapt all our maps, charts, and astronomical tables, to the meridian of such a place. And no place, perhaps, is more proper than the seat of Government.

It appears by the papers submitted to the consideration of the committee, that Mr. Lambert has calculated the longitude of the capitol in the city of Washington, from the royal observatory at Greenwich, by one of the most approved methods now in use for that purpose, viz: an occultation of a known fixed star by the moon.

His calculations are founded on an occultation of *n* pleiadum, *(alcyone)* one of the seven stars, on the night of the 20th of October, 1804. By these calculations it appears, that the longitude of the capitol, in the city of Washington, as reduced according to the true figure of the earth, (being that of an oblate spheroid,) is 76° 53′ 6″ 920 deg. west. The committee would observe, that Mr. Lambert appears to be well acquainted with astronomical calculations; and that, so far as the committee have had time to examine them, they appear to be correct. In a question, however, of so much nicety, the correct decision of which depends so much on the accuracy of the observations made, and the goodness of the instruments used, and when the smallest error in the data will necessarily produce an erroneous result, full reliance ought not to be placed on calculations made from a single observation.

Indeed, in order to be certain of a correct result, it may be proper that more than one of the various methods of ascertaining longitude should be used; that calculations should be made from observations of the eclipses of Jupiter's satellites, of solar eclipses, of the angular distances between the sun and moon, or the moon and a fixed star, and other methods, as well as from observations on occultations of fixed stars.

The committee are, therefore, of opinion that, in order to lay a foundation for the establishment of a first meridian in this Western hemisphere, the President of the United States should be authorized to cause the longitude of the city of Washington, from the observatory at Greenwich, in England, to be ascertained with the greatest possible degree of accuracy; and that he also be authorized, for that purpose, to procure the necessary astronomical instruments.

They, therefore, beg leave to submit to the consideration of the House, the following resolution:

Resolved, That it is expedient to make provision, by law, authorizing the President of the United States to cause the longitude of the city of Washington, from the observatory at Greenwich, in England, to be ascertained with the greatest degree of accuracy; and also authorizing him, for that purpose, to procure the necessary astronomical instruments.

City of Washington, *December* 15, 1809.

To the honorable the Senate and House of Representatives of the United States in Congress assembled: The memorial of William Lambert, of the State of Virginia, respectfully showeth:

That the establishment of a first meridian for the United States of America at the permanent seat of their Government, by which a further dependence on Great Britain, or any other foreign nation, for such a meridian, may be entirely removed, is deemed to be worthy the consideration and patronage of the National Legislature.

That your memorialist, having lately collected, and, in some instances, formed rules and series for a solution of useful cases in oblique angled spherical trigonometry, which may hereafter be offered to the American public, has also made the necessary calculations to determine the longitude of the capitol, in the city of Washington, from Greenwich observatory, in England, by one of the most approved methods of computation hitherto devised; an abstract of which, together with some explanatory remarks connected with the subject, are contained in the paper No. 2, accompanying this memorial. But, however correctly the data and elements afforded by a single observation may be ascertained, the result ought not to be depended upon as conclusive, without the aid of a sufficient number of observations, especially when a first meridian for any country is proposed to be established.

The moon's true place in longitude, latitude, right ascension, and declination, being of great use to the mariner, as well as to the geographer, some rules are given in the paper No. 3, to find all or any of those elements with great accuracy, by interpolation from successive differences, extended to the fourth order, for any intermediate time between 0 and 12 hours.

Your memorialist respectfully submits these papers to the Legislature of the Union for their consideration, with a request that such proceedings may be had therein as to their wisdom shall seem meet.

WILLIAM LAMBERT.

No. 2.

Abstract of calculations to determine the longitude of the capitol, in the city of Washington, from Greenwich observatory, in England; founded on an occultation of n. *Pleiadum* (*Alcyone*) *by the moon, which was observed near the President's house, on Saturday evening, October* 20, 1804.

The subject of this communication being of national concern, it is submitted without a tedious introduction to apologize for its nature or contents. Such explanations or information alone as have a tendency to show the progress and effect of a novel undertaking will be given as indispensably connected with its development.

In all branches of science which admit of mathematical demonstration, the principles and rules on which the operation is founded, should be clearly understood. These may be stated by a plain expression in words at length, or by symbolical characters or signs, often substituted in a work of this kind, under the denomination of algebraical formulæ; but as some of the elements necessary to produce an accurate result must be obtained by a needless waste of additional labor, without a competent knowledge of analytical process, the latter method will be adopted in all cases where a strict confinement to its use will not be attended with ambiguity.

By the plan of the city of Washington, in the Territory of Columbia, the capitol in that city is intended as a first meridian for the United States of America; but, in order to establish it as such, the distance between it and some known meridian in Europe, or elsewhere, measured or estimated on a parallel to the equator, and referred to the centre of the earth under the respective meridians for which the computation may be made, should be ascertained on correct principles, and with due precision. As many of our mariners and geographers are still in the habit of taking their departure, or reckoning their longitude from Greenwich observatory, in England, it will not, it is hoped, be considered as an instance of unpardonable presumption for attempting to extricate ourselves from a sort of degrading and unnecessary dependence on a foreign nation, by laying a foundation for fixing a first meridian of our own.

The geographical position of any place on the surface of the earth is determined from its latitude and longitude. The former is easily obtained with sufficient accuracy, by the help of a good sextant or quadrant in the hands of a skilful observer, but the latter is attended with greater difficulty, and often with uncertainty. Of all the means hitherto discovered or devised for a satisfactory accomplishment of this desirable object, solar eclipses and occultations of known fixed stars by the moon afford the most to be depended on. In such cases, when the weather is favorable, the exact moment of time of the beginning and end of an eclipse of the sun, or of the immersion and emersion of a star, may be either observed or inferred without the hazard of error in any sensible degree. The frequent eclipses of Jupiter's satellites furnish us with a simple and easy method to find the longitude on land; but the immense distance of that planet from the earth renders it necessary that many observations should be made, a mean of which may be taken as a near approximation to the truth.

In several methods used for ascertaining the longitude on land, as well as at sea, it is customary to consider the form of the earth as a perfect sphere, whereas it has been proved to be that of an oblate spheroid, from the ingenious admeasurements and observations of certain French mathematicians at or near the equator, and in the northern parts of Europe, during the last century, who, by carefully determining the length of a degree of latitude, in toises, at the respective places to which they were sent by order of Louis XV, verified the hypothesis of the celebrated Sir Isaac Newton, concerning the real figure of the earth, contrary to the opinion of many, and even of scientific persons at that period, some of whom believed it to be an exact globe, and others a prolate instead of an oblate spheroid. The ratio of the equatorial diameter to the polar axis of the earth, as adopted by Sir Isaac Newton, is as 692 to 689, and that since used by Messrs. Vince, Mackay, and other British astronomers, 230 to 229, which is nearly the same; but, whether the shape of the earth is subject to a gradual change by an accumulation of the particles of matter towards and at the poles, a diminution of the equatorial diameter, or some other cause, which may at a future period be investigated and explained, it appears that, in consequence of new lunar equations discovered in France by M. de la Place, about the commencement of the present century, the proportion of the equatorial diameter to the polar axis of the earth is now assumed to be as 334 to 333, which, as it has been asserted, agrees better with actual observations than either of the ratios before mentioned. It will be readily discovered that a variance proportionate to the distance between any two meridians will be found by supposing the earth to be a perfect sphere, when compared with the result obtained by admitting it to be either a prolate or an oblate spheroid; and that difference will be shown in the course of this work, according to the ratios assumed for the computation.

The moon, being the only satellite which revolves around the earth as one of the primary planets, is so much nearer thereto than any other of the celestial bodies composing our solar system, that it is a fit object to be observed for ascertaining the longitude of a place with precision, especially when its correct position with respect to the sun or a known fixed star is obtained; but greater reliance may always be had on the data afforded by the apparent time at which those positions are determined than such as relate to the angular distance; because an error of only one minute of space will occasion a deviation in the result of twenty-seven minutes of longitude from the truth. The error arising from a single observation may, indeed, be lessened, if not entirely removed, by a sufficient number of them, taken with a good instrument, and by an accurate observer. This is usually done at sea, from the frequency to which the practice may be resorted, and the rules for clearing the observed distance of parallax and refraction having been rendered more simple from the introduction of natural co-sines and versed sines in the process, may be attended with advantage on land, as an auxiliary to some other methods better adapted to insure a correct result.

About the year 1770, the lunar tables constructed by Tobias Mayer, of Gottingen, in Germany, having been previously received, in manuscript, by the British Board of Longitude, with the curious and elaborate theory on which they were formed, furnished by M. Euler, after Mayer's decease, they were ordered to be printed under the inspection of Dr. Maskelyne. These tables, far superior in point of accuracy to any that had ever appeared before, were further improved by Mr. Charles Mason, some time after their original publication; and the discovery of the longitude from lunar observations, to any desirable degree of precision, which, for a series of ages, had been considered impracticable, was not only rendered certain, but comparatively easy of attainment, by the additional help of Hadley's (or rather Godfrey's) reflecting quadrant and sextant. It is said that M. Burg, of Vienna, in Germany, has constructed a new set of tables, still further improved; but very few copies, if any, are yet to be procured in this country.

The irregularities in the moon's motions, arising from the constant but unequal disturbing forces of the sun, the earth, and some of the other planets, particularly Jupiter and Venus, have produced that difficulty which was once thought insurmountable for a correct determination of the longitude by any computation founded on their observations. There are upwards of twenty equations necessary to reduce the moon's mean to her true place, besides those that have been discovered by M. de la Place. The motion in right ascension and longitude, as referred to the equator or the ecliptic, is progressively, though not uniformly accelerated from the apogeon to the perigeon, and retarded, in like manner, from the perigeon to the apogeon; and even the figure of the elliptical orbit in which this secondary planet moves around the earth is subject to change. Hence, great credit is due to the indefatigable labors of Mayer and other scientific characters in Europe, for the present state of perfection to which the theory has been brought. A tedious routine of calculation has been saved by the annual publication of the British Nautical Almanac, and the French *Connoissance des Temps;* the former, being printed in our own language, must, of course, be better understood, and more generally used in the United States, than the latter. It would be a valuable improvement of that useful production if all the elements contained in it, particularly such as relate to the moon, were extended to the fractional parts of a second in time as well as space.

To those who are not acquainted with practical astronomy it may be proper to remark:

That the apparent or visible place of the sun, moon, or any of the planets, is that seen by an observer, wherever he may be on the surface of the earth; and the true place, that which would be viewed by a spectator, if he could be fixed at the centre of the earth, under the same meridian, and no obstacle intervened to prevent the effect of his vision; the difference between these positions is called "parallax," and is generally applied to the altitude, longitude, and latitude of the observed object; but may, with equal propriety, be extended to its right ascension and declination, when referred to the equator instead of the ecliptic.

Aberration of a star is a small *apparent* motion, occasioned by a sensible proportion between the velocity of light, and that of the earth in its annual orbit. Nutation is also a small *apparent* motion, proceeding from the variable attraction of the sun and moon on the spheroidical figure of the earth; both of which should be computed and applied according to the signs + or −, to the *mean* right ascension and declination of the star, when great accuracy is required.

The ecliptic is a great circle, one-half of which is always above the horizon, and the middle of this part being 90° from their intersection, is called the *nonagesimal*, on the altitude of which, and the longitude from the equinoctial point Aries, the effects of parallax depend; for when the observed object is in the *nonagesimal*, it has no parallax in longitude, and the parallax in latitude is then equal to the parallax in altitude; because a great circle passing through the pole of the ecliptic and *nonagesimal*, passes also through the zenith.

The moon's parallaxes in longitude and latitude may be obtained by means of the parallax in altitude, and the angle formed between the vertical circle and a parallel to the ecliptic, divided by the co-sine of the moon's *apparent* latitude.

To find the longitude and latitude of the moon or a star, from its right ascension and declination, and the obliquity of the ecliptic.

Log. sine right ascension, + log. co-tangent lat. place, = log. co-tangent arch A, which call *north* or *south*, according as the declination is north or south.

Call the obliquity of the ecliptic *south*, in the first six signs of right ascension, and *north*, in the last six signs.

The sum of arch A, and the obliquity of the ecliptic, if they are of the same name, that is, both north or both south, or their difference, if of a contrary name, one north and the other south, = arch B.

Arith. comp. log. co-sine arch A, + log. co-sine arch B, + log. tangent right ascension, = log. tangent longitude.

Log. sine longitude, + log. tangent arch B, = log. tangent latitude, of the same title or denomination as arch B.

The right ascension and declination may be found from the longitude and latitude, by the same rule, calling the obliquity of the ecliptic north, in the first six signs of longitude, and south, in the six last signs. N. B. If the longitude or right ascension thus obtained, come out near 0,° or near 180,° substitute log. tangent + log. co-sine, for log. sine, to find the declination or latitude.

In all cases where the log. sine, or log. tangent of an arch or angle under five degrees, or the log. co-sine or co-tangent of an arch or angle above 85,° may be wanted, it will be proper to allow the equation arising from a *mean* of second differences, to ensure greater accuracy in the result.

To find a constant logarithm to reduce the latitude of a place, according to any assumed ratio of the equatorial to the polar diameter of the earth.

Let x represent the polar, and y the equatorial diameter; then

$$x \times x = l.$$

$$y \times y = m.$$

Log. l, + radius, − log. m. = constant log. for that ratio.

Constant log. + log. tangent lat. by observation, = log. tangent lat. reduced.

For reducing the moon's equatorial horizontal parallax.

Log. y, − log. x, = log. C. log. co-tangent lat. by observation, + log. C. = log. tangent arch D. log. co-sine lat. by observation, + radius, − log. sine arch D. = constant logarithm for that lat. and ratio.

Log. moon's equat. hor. parallax, in seconds, &c. + constant log. = log. moon's hor. parallax, reduced.

For greater exactness, use the log. sine moon's equat. hor. parallax, instead of the log. in seconds, &c.

It is always to be understood in the use of algebraical formulæ, that radius, or its double, triple, &c. must be rejected, when the nature of the operation requires it.

For the right ascension of medium cœli, or the mid-heaven.

Apparent time, + ☉'s right ascension, = right ascension, mid-heaven, if the sum be less than 24 hours or 360,° or the excess, if greater.

For the moon or a star's horary angle, or distance from the meridian.

If the object be $\left\{\begin{matrix}\text{East,}\\\text{West,}\end{matrix}\right\}$ of the meridian, $\left\{\begin{matrix}\text{R. A. moon or star, — R. A. mid-heaven,}\\\text{R. A. mid-heaven, — R. A. moon or star,}\end{matrix}\right.$
(Borrowing 24 hours, or 360° if necessary) = horary angle in time, or deg.

For the altitude and longitude of the nonagesimal.

There are several rules for obtaining these elements, three of the most approved of which will be given.

Rule 1.

When the place is in north latitude, subtract the right ascension of the mid-heaven from 270,° or in south latitude from 90,° (borrowing 360,° if necessary) and if the remainder be more than 180,° take it from 360,° for arch I.

Log. versed sine arch I, (— 3 from index, when seven places of figures are used) + log. co-sine lat. place, + log. sine obliq. ecliptic, = log. of natural number A.

Natural sine . . . } sum of lat. place and obliq. eclip. $\left\{\begin{matrix}-\\+\end{matrix}\right\}$ natural number A.
co-versed sine }
= natural co-sine } altitude of the nonagesimal.
versed sine }

Log. co-secant arch I, + log. secant lat. place, + log. sine alt. nonagesimal, = log. secant longitude of the nonagesimal.

N. B. The longitude of the nonagesimal will be generally in the same quadrant as the right ascension of the mid-heaven, but not always, as may be seen in the following computation, the *former* being in ♈, and the *latter* in ♐, both at the immersion and emersion.

Rule 2.

Find arch I, as directed in the first rule.

90,° — lat. place — obliq. ecl. = arch B.

90,° — do. + do. = arch C.

Ar. comp. log. sine ½ arch C, + log. sine arch B, + log. co-tangent ½ arch I, = log. tangent arch D.

Ar. comp. log. co-sine ½ arch C, + log. co-sine arch B, + log. co-tangent arch I, = log. tangent arch E.

Arith. comp. log. sine arch D, + log. sine arch E, + log. tangent ½ arch B, = log. tangent ½ arch F, which being doubled, gives the altitude of the nonagesimal.

In North Latitudes.

90,° $\pm$ D + E. = longitude of the nonagesimal. Sign +, when R. A. mid-heaven is between 90° and 270° otherwise —; in which case, if D + E is greater than 90,° the longitude of the nonag. will be = 450,° — D + E.

In South Latitudes.

270,° $\mp$ D + E. The sign —, when the right ascension of the mid-heaven is between 90° and 270,° and + if between 270° and 90,° and if it exceeds 360,° take its excess.

Rule 3.

Log. co-sine lat. place, + log. co-sine right ascension mid-heaven from ♈ or ♎, = log. co-sine arch I.

Log. cotangent lat. place, + log. sine R. A. mid-heaven, = log. cotangent arch II.

Arch II, $\left\{\begin{matrix}-\\+\end{matrix}\right\}$ obliq. eclip. when ♈ $\left\{\begin{matrix}\text{is past}\\\text{not past}\end{matrix}\right\}$ the meridian, = arch III.

Log. sine arch I, + log. sine arch III, = log. co-sine altitude nonagesimal.
tangent arch I, + log. co-sine arch III, = log. tangent long. nonagesimal.

[See directions contained in rule 2.]

For the moon's parallaxes in longitude and latitude.

Log. sine moon's hor. parallax, + log. sine altitude nonagesimal, + arith. comp. log. co-sine moon's true latitude, + log. sine moon's apparent distance from the nonagesimal, = log. sine parallax in longitude.

But as the moon's apparent distance from the nonagesimal is not given, it must be found by approximation from the moon's true distance; thus,

Log. sine moon's hor. parallax, + log. sine altitude nonagesimal, + arith. comp. log. co-sine moon's true latitude, = constant logarithm (*a*)

Log. sine moon's true distance from the nonagesimal (*b*)

a + *b*, = log. sine	(*c*) 1st approximation.
b + *c*, =	(*d*)
a + *d*, =	(*e*) 2d approximation.
b + *e*, =	(*f*)
a + *f*, =	(*g*) 3d approximation.
b + *g*, =	(*h*)
a + *h*, =	(*i*) 4th approximation.
b + *i*, =	(*k*)
a + *k*, =	(*l*) parallax in longitude.

(*k*) is the moon's apparent distance from the nonagesimal.

It is not customary to extend the approximated apparent distances and parallax in longitude beyond the 2d or 3d at farthest; but the fifth being found to be exactly, or very nearly the same as the fourth, may be considered as the correct parallax in longitude.

Log. sine moon's hor. parallax, + log. co-sine altitude nonagesimal, + arith. comp. log. sine moon's true distance from nonagesimal, + log. sine moon's apparent distance from nonagesimal, = log. sine first part of parallax in latitude.

Log. sine moon's true latitude, + arith. comp. log. sine, moon's true distance from nonagesimal + log. sine parallax in longitude, + log. co-sine moon's true distance from nonagesimal + $\frac{\text{par. in long.}}{2.}$, = log. sine second part parallax in latitude.

The second part of parallax in latitude becomes positive when the moon's latitude is south; but it is negative, when the moon's latitude is north, in a place of north latitude. The contrary in a place of south latitude. In this case it is to be subtracted from the first part, both at the immersion and emersion, for the correct parallax in latitude.

For the moon or star's true altitude.

This element may be found by several rules, some of which are as follows:

RULE 1.

Log. versed sine horary angle (— 3 from index) + log. sine polar distance, + log. co-sine lat. place, = log. of natural number A.

Moon or star's polar distance, — comp. lat. place, = arch B.

Natural co-sine arch B, — natural number A, = natural sine moon or star's true altitude.

RULE 2.

Log. cotangent lat. place, + log. co-sine horary angle, = log. tangent arch I.

Moon or star's polar distance, — I, = arch II.

Log. co-sine arch II. + log. sine lat. place, + log. secant arch I, = log. sine moon or star's true altitude.

RULE 3.

Find arch II, as directed in second rule.

Log. co-sine lat. place, + log. sine horary angle, = log. sine arch III. secant arch II. + log. secant arch III, = log. co-secant moon or star's true altitude.

For the angle of position at the moon or star.

RULE 1.

Arith. comp. co-sine true altitude, + log. sine horary angle, + log. co-sine lat. place, = long sine angle of position.

RULE 2.

Having the true azimuth from the north given or found.

Ar. comp. log. sine moon or star's polar distance, + log. sine azimuth from north (or its supplement) + log. co-sine lat. place = log. sine angle of position.

RULE 3.

Log. co-tangent latitude place, + log. cosine horary angle, = log. tangent arch I.

Moon or star's polar distance, — arch I. = arch II.

Log. sine arch I, + log. tangent horary angle + log. co-secant arch II, = log. tangent angle of position.

RULE 4.

Find the true altitude and arch III, by the third rule for obtaining the true altitude.

Log. sine arch III, + log. secant true altitude, = log. sine angle of position.

For the moon's parallax in altitude, and apparent altitude of her centre, exclusive of refraction.

Let y represent the moon's horizontal parallax, and z the true altitude.

Log. sine y, + log. co-sine z, = log. sine (a) - - 1st approximation.

z, — (a) = (b). Log. sine y. + log. co-sine (b) = log. sine (c) 2d approximation.

z, — (c) = (d). Log. sine y. + log. co-sine (d) = log. sine (e) 3d approximation.

z, — (e) = (f). Log. sine y. + log. co-sine (f) = log. sine (g) 4th approximation.

z, — (g) = (h). Log. sine y. + log. co-sine (h) = log. sine (i) parallax in altitude.

z, — (i), = (k) the moon's apparent altitude exclusive of refraction.

For the moon's augmented semi-diameter.

Arith. comp. log. cosine moon's true altitude, + log. co-sine apparent altitude, + log. moon's horizontal semi-diameter in seconds, &c. = log. moon's augmented semi-diameter, arising from a change in altitude.

For the inflexion of the moon's light.

The quantity of this element has been variously estimated by astronomical writers, as follows:

	"	dec.
Mr. Vince,	— 3	0
Mr. Mackay,	— 3	5
Mr. John Garnett, (American req. tables,)	— 2	977
Mr. Ferrer, (American req. tables,)	— 2	18
Mean inflexion of light,	— 2	914

To be subtracted, in all cases, from the augmented semi-diameter for the moon's *corrected* semi-diameter.

For the angle between the parallels to the ecliptic and the equator.

Arith. comp. log. co-sine moon or star's true latitude, + log. co-sine moon or star's right ascension, + log. sine obliq. eclip. = log. sine angle between the parallels.

From 9 to 3 signs (270° to 90°) of the moon or a star's right ascension, in a place of *north* latitude, the parallel to the ecliptic *ascends above* the parallel to the equator; but from 3 to 9 signs (90° to 270°) it *descends below* the same. The contrary for a place of *south* latitude.

If the parallel to the ecliptic *ascend above* the parallel to the equator, subtract the angle just found from 90°; but if it *descend below*, add it to 90°, for the angle between the meridian, passing through the centre of the moon or star, and a parallel to the ecliptic.

If the moon or star be *east* of the meridian, add the angle of position to the angle between the meridian passing through the centre of the moon or star and a parallel to the ecliptic; but, if *west* of the meridian, subtract the former from the latter, (borrowing 360°, if necessary,) for the angle between the vertical circle and a parallel to the ecliptic. This may be called the "parallactic angle."

To find the moon's parallaxes in longitude and latitude, by the last method.

Log. sine parallax in *altitude*, + log. sine angle between vertical circle and parallel to ecliptic, (or its supplement,) + arith. comp. log. co-sine moon's *true* latitude, = log. sine parallax in *latitude*, nearly approximated.

If the moon's true latitude be *north*, subtract the approximated parallax in latitude therefrom, for the moon's *apparent* latitude approximated; then,

Log. sine parallax in *altitude*, + log. sine angle between vertical circle and parallel to the ecliptic, + arith. comp. log. co-sine moon's *apparent* latitude approximated, = log. sine parallax in *latitude*, farther approximated, and very near the truth.

Repeat the process, using the moon's *apparent* latitude, last found, and the correct parallax in *latitude* will be obtained.

Log. sine parallax in *altitude*, + log. co-sine angle between vertical circle and parallel to ecliptic, + arith. comp. log. co-sine moon's correct *apparent* latitude, = log. sine parallax in *longitude*.

Having given rules for obtaining most of the elements necessary in the computation, we shall now proceed to collect and arrange them, as found by the first method proposed for ascertaining the parallaxes in longitude and latitude.

In occultations, the moon's motion in *apparent* longitude during the transit should be multiplied by the co-sine of the star's latitude, to reduce it to the same parallel to the ecliptic as the star, which being found, we have the moon's motion in *apparent* latitude, to find the angle of inclination of the moon's apparent orbit, from which, with the moon's corrected semidiameters, the chord of transit, segments of the base, angles of conjunction, and the central angles at the immersion and emersion, may be determined; also, the difference of *apparent* longitude of the star and moon's centre; and by applying the parallax in longitude to the last mentioned element, the *true* difference of longitude between the moon and star will be obtained: the apparent time of ecliptical conjunction of moon and star, as seen from the centre of the earth under the meridian of the capitol, in the city of Washington, will then be known, by having the hourly motion reduced to the ecliptic, or the moon's motion for twelve hours, at the times of immersion, respectively.

If the *apparent* longitude of the points of occultation (or those parts of the moon's eastern and western limb at which the star immerged and emerged) be *less* than the star's longitude, the estimated longitude is too little, or farther to the east than it should be; the contrary, if the points of occultation be found *east* of the star.

As it is desirable that the result should be obtained with precision, according to the principles adopted in the computation, it may be necessary to repeat the process, using the longitude found as a near approximation to the truth, instead of the estimated longitude.

Star's longitude,	57 16 35 925	57 16 35 925	57 16 35 925
Difference, point occult.,	0 0 0 000 agreeing with star.	0 0 0 002 east of star.	0 0 0 002 east of star.

The correction in time answering to the above differences, is = 0*s*. 004*dec*. which substracted, respectively, from 5*h*. 7*m*. 36*s*. 279*dec*. and 5*h*. 7*m*. 32*s*. 467*dec*. leaves 5*h*. 7*m*. 36*s*. 275*dec*. and 5*h*. 77*m*. 32*s*. 463*dec*.

For which the moon's true longitude being computed, it will be:—

	=	deg. m. sec. dec.	deg. m. sec. dec.
		56 26 10 415	56 26 8 023
Parallax in longitude,		+ 36 17 525	+ 36 20 030
Moon's apparent longitude,		57 2 27 940	57 2 28 053
Difference of apparent longitude,		+ 14 7 985	+ 14 7 872
Apparent longitude, point of occult.		57 16 35 925 agreeing with star.	57 16 35 925 agreeing with star.

By the emersion for the longitude as last corrected.

	deg. m. sec. dec.	deg. m. sec. dec.	deg. m. sec. dec.
Moon's true longitude,	57 0 32 279	57 0 26 948	57 0 24 557
Parallax in longitude,	+ 32 3 499	+ 32 8 772	+ 32 11 157
Moon's apparent longitude,	57 32 35 778	57 32 35 720	57 32 35 714
Difference of apparent longitude,	— 15 59 862	— 15 59 795	— 15 59 788
Apparent long. point occult.,	57 16 35 916	57 16 35 925	57 16 35 926
Star's longitude,	57 16 35 925	57 16 35 925	57 16 35 925
Point of occultation,	0 0 0 009 west of star.	0 0 0 000 agreeing with star.	0 0 0 001 east of star.

A mean of the result, as corrected at the immersion and emersion, will be

5*h*. 7*m*. 44*sec*. 780*dec*. 5*h*. 7*m*. 36*sec*. 275*dec*. 5*h*. 7*m*. 32*sec*. 462*dec*.

Supposing the error of the watch and the apparent times of the immersion and emersion, to have been exactly as they are herein stated, the longitude of the capitol, in the city of Washington, from Greenwich observatory, by accurate calculation, is determined as follows:

Without reduction of latitude or moon's hor. parallax.				Reduced, (334 to 333.)				Reduced, (230 to 229.)			
deg.	min.	sec.	dec.	deg.	min.	sec.	dec.	deg.	min.	sec.	dec.
76	56	11	700	76	54	4	125	76	53	6	930 west.

CITY OF WASHINGTON, *November* 3, 1809.

By the foregoing process and rules, the form of the earth is considered, in the first place, to be a perfect sphere, the length of whose polar is the same as its equatorial diameter; therefore, no reduction of the latitude by observation, or of the moon's horizontal parallax, has been made: in the second and third, it is admitted to be that of an *oblate spheroid*, the ratio of whose equatorial diameter to the polar axis is as 334 to 333, and 230 to 229, respectively. It is submitted, with great deference, to the opinions of such scientific persons as are familiar with the theory and practice of astronomy, whether an arithmetical mean between those ratios, = 282 to 281, would not be a proper one to be adopted, by which the longitude of the capitol, in Washington, at the same mean of rate,* will be 5*h*. 7*m*. 34*sec*. 368*dec*. in time, = 76*deg*. 53*m*. 35*sec*. 527*dec*.; but as the fractional parts of a second in space may, with propriety, be rejected, the result may be stated at 76*deg*. 53*m*. 35*sec*. as a very near approximation to the truth, and sufficiently accurate; according to that ratio, to establish a first meridian for the United States. When the foregoing result is sanctioned by the public sentiment, it will not be difficult to adapt a table or tables of the geographical positions of other places in the United States, and elsewhere, to a first meridian of our own, instead of depending for one on a foreign nation; and as we have long since extricated ourselves from the shackles of colonial subjection, in other respects, there is no good reason to be assigned, why a remaining incumbrance unworthy the freedom and sovereignty of the American people and their Government should not at some period or other be removed.

WILLIAM LAMBERT.

No. 3.

Rules and regulations for computing the moon's longitude, latitude, right ascension and declination, and its hourly velocity, at any intermediate time between 0 *and* 12 *hours, having the positions given as stated in the Nautical Almanac, or Connoissance des Temps.*

Among the rules essential for a correct determination of the longitude of a place either at sea or on land, the method of computing the moon's place by interpolation from successive differences at any intermediate time between noon and midnight, or midnight and noon, requires our attention: it may not be necessary in the nicest computation to extend the equations beyond the fourth order of differences, especially when the positions at every twelve hours are given as they are stated in the Nautical Almanac; and so much of algebraical process ought to be understood as relates to addition, subtraction, and multiplication.

It may be proper, in all cases, to take *three* positions next before, and *two* immediately following the intermediate time required, and set them down with their successive differences, to which the signs + or —, must be prefixed as follow:

The moon's longitude is required, November 27, 1809, at 4 hours 48 minutes, P. M: by the meridian of Greenwich.

	☽'s Longitude.	1st Difference.	2d Difference.	3d Difference.	4th Diff.
	s ° ′ ″	° ′ ″	′ ″	′ ″	″
Nov. 26. Noon,	3 21 30 10 A	+ 5 57 11 *a* 1	+ 1 19 *a* 2	+ 0 27 *a* 3	+ 3 *a* 4
Midnight,	3 27 27 21 B	+ 5 58 30 *b* 1	+ 1 46 *b* 2	+ 0 30 *b* 3	
27. Noon,	4 3 25 51 C	+ 6 0 16 *c* 1	+ 2 16 *c* 2		
Midnight,	4 9 26 7 D	+ 6 2 32 *d* 1			
28. Noon,	4 15 28 39 E				

The time required is between C and D.

Let x represent the intermediate time, and y 12 hours, or 720 minutes, then the series will be—

$$\text{C}, + \frac{x}{y} \times c\,1 + x \times \frac{x-1}{2y} \times c\,2 + x \times \frac{x-2}{3y} \times b\,3 + x \times \frac{x \times 1}{4y} \times a\,4$$

		S.	*deg.*	*min.*	*sec.*	*dec.*
C. Moon's longitude at noon,	- -	4	3	25	51	000
$\frac{x}{y} = \frac{2}{5} \times c\,1$	- - - +		2	24	6	400
$x \times \frac{x-1}{2y} = \frac{3}{25} \times c\,2$	- - -		0	0	16	320
$x \times \frac{x-1}{2y} + x \times \frac{x-2}{3y} \times b\,3$	- - +		0	0	1	920
$x \times \frac{x-1}{2y} + x \times \frac{x-2}{3y} + x \times \frac{x+1}{4y} \times a\,4$	- +		0	0	0	0672
Moon's longitude at 4 hours 48 minutes,	- =	4	5	49	43	0672

* This mean of rate, applied to the longitude, is not strictly correct; but the variance is so small, that it is scarcely worth the trouble of ascertaining by a more exact method of computation.

By Mr. Garnett's second theorem, (American impression of the Nautical Almanac,) the process will be—

					deg.	min.	sec.	dec.
$b\,1$	- - -	=		5	58	30	
$+\frac{1}{2}\,b\,2$	- - -	+			0	53	
$-a\,3+b\,3$	- - -	−			0	4	750
12		M.		5	59	18	250

			deg.	min.	sec.	dec.
M, $\times\frac{x}{y}$	- - -	=		2	23	43	300
$+\frac{1}{2}\,b\,2-\frac{1}{24}\,a\,4\times\frac{xx}{yy}$	- -	+			0	8	460
$+\frac{a\,3+b\,3}{12}\times\frac{xxx}{yyy}$	-	+			0	0	304
$+\frac{1}{24}\,a\,4\times\frac{xxxx}{yyyy}$	-	+			0	0	0032
C, = moon's position at noon,	-	+	4	3	25	51	—
Moon's longitude at 4 hours 48 minutes, as before,			4	5	49	43	0672

I have been favored by Mr. Garnett with another method, not published in his edition of the Nautical Ephemeris, as follows:

			deg.	min.	sec.	
$\frac{b\,1+c\,1}{2}$	- -	=	5	59	23	N.
N, $\times\frac{x}{y}$	- - -		2	23	45	200
$+\frac{xx}{2\,y\,y}\times b\,2$	- -	+		0	8	480
$-\frac{x-xxx}{6\,y\,y\,y}\times\frac{a\,3+b\,3}{2}$	- -	−		0	1	596
$-\frac{xx-xxxx}{24\,y\,y\,y\,y}\times a\,4$	- -	−		0	0	0168
C, = moon's position at noon,	-	+	4	3	25	51	
Moon's longitude at 4 hours 48 minutes, as before,			4	5	49	43	0672

But if *one* position at noon or midnight be taken next before, and *four* immediately following the intermediate time, the value of the equation arising from the fourth difference will not be the same; and the series, in that case, will be

$$\text{A},+\frac{x}{y}\times a\,1+x\times\frac{x-1}{2\,y}+x\times\frac{x-2}{3\,y}+x\times\frac{x-3}{4\,y}$$

And if we find the moon's longitude at 4 hours 48 minutes, between C and D, reckoned from the term A, we shall have, applied to the foregoing example, where the differences $a\,1$, $a\,2$, $a\,3$, and $a\,4$, are to be used,

$$\text{A},+\frac{12}{5}\times a\,1$$
$$+\frac{42}{25}\times a\,2$$
$$+\frac{28}{125}\times a\,3$$
$$-\frac{21}{625}\times a\,4$$

			S.	deg.	m.	sec.	dec.
Hence, - A, - - -	=	3	21	30	10	000
$+\frac{12}{5}\times a\,1$ - - - -	+		14	17	14	400
$+\frac{42}{25}\times a\,2$ - - -	+		0	2	12	720
$+\frac{28}{125}\times a\,3$ - - -	+		0	0	6	048
$-\frac{21}{625}\times a\,4$ - - -	−		0	0	0	1008
Moon's longitude at 4*h*. 48*m*. between C and D, the same as before,		4	5	49	43	0672

If we compute the same from the term B, we shall have—

				S.	deg.	m.	sec.	dec.
	B, - - -			3	27	27	31	000
B, + $\frac{7}{5}$ × b 1	b 1 × $\frac{7}{5}$ - - -		+		8	21	54	000
+ $\frac{7}{25}$ × b 2	b 2 × $\frac{7}{25}$ - - -		+		0	0	29	680
— $\frac{7}{125}$ × b 3	a 3 × $\frac{28}{125}$ - - -		—		0	0	1	680
+ $\frac{14}{625}$ × a 4	a 4 × $\frac{14}{625}$ - - -		+		0	0	0	0672
				4	5	49	43	0672

The result from the term C, having been already computed, we shall now show how it may be found from the terms D and E, subtractive.

From D, the differences will be c 1, b 2, a 3, and a 4, and the series, as follows:

— $\frac{3}{5}$ × c 1.

— $\frac{3}{25}$ × b 2.

— $\frac{7}{125}$ × a 3.

— $\frac{21}{625}$ × a 4.

			S.	deg.	m.	sec.	dec.
D, - - - - -		=	4	9	26	7	000
— $\frac{3}{5}$ × c 1 - - - -		—		3	36	9	600
— $\frac{3}{25}$ × b 2 - - - -		—		0	0	12	720
— $\frac{7}{125}$ × a 3 - - - -		—		0	0	1	512
— $\frac{21}{625}$ × a 4 - - - -		—		0	0	0	1008
Moon's longitude at 4h. 48m. between C and D, -			4	5	49	43	0672

From the term E,

			S.	deg.	m.	sec.	dec.
E, - - - - -			4	15	28	39	000
— $\frac{8}{5}$ × d 1 - - - -		—		9	40	3	200
+ $\frac{12}{25}$ × c 2 - - - -		+		0	1	5	280
+ $\frac{8}{125}$ × b 3 - - - -		+		0	0	1	920
+ $\frac{14}{625}$ × a 4 - - - -		+		0	0	0	0672
Moon's longitude at 4h. 48m. between C and D, -			4	5	49	43	0672

By Mr. Garnett's first theorem, (Naut. alm. American edition.)

From the term A,

		deg.	m.	sec.	dec.
a 1 - - - - -	-	5	57	11	000
— $\frac{1}{2}$ a 2 - - - - -	—		0	39	500
+ $\frac{1}{3}$ a 3 - - - -	+		0	9	000
— $\frac{1}{4}$ a 4 - - - - -	—		0	0	750
M, -	-	5	56	39	750

		Deg.	m.	sec.	dec.
M, $\times \frac{x}{y} = \frac{12}{5}$ - - - - -	-	14	15	59	400
$+ \frac{1}{2} a\,2 - \frac{1}{2} a\,3 + \frac{11}{24} a\,4 \times \frac{xx}{yy} = \frac{144}{25}$ -	+		2	37	680
$+ \frac{1}{6} a\,3 - \frac{1}{4} a\,4 \times \frac{xxx}{yyy} = \frac{1728}{125}$ -	+		0	51	840
$+ \frac{1}{24} a\,4 \times \frac{xxxx}{yyyy} = \frac{20736}{625}$ -	+			4	1472
A, - - - - -		3	21	30	10 —
Moon's longitude at 4*h*. 48*m*. between C and D, -		4	5	49	43 0672

For the moon's hourly velocity.

The hourly velocity at 1 hour is very nearly equal to the difference of the moon's place in longitude, latitude, &c., computed at 1*h*. 30*m*. and at 0*h*. 30*m*. from noon or midnight; at 1*h*. 30*m*. to the difference computed at 2*h*. and at 1*h*. &c. In addition to the theorems to find this element, published by Mr. Garnett, in the appendix to the Nautical Almanac, the following series may be adopted, where $\frac{1}{12}$ of $c\,1$ and the differences $c\,2$, $b\,3$, and $a\,4$, are to be used.

$- \frac{6 + x}{144} \times c\,2$ = equation of second difference.

$+ \frac{96 - 24\,x - xx}{3456} \times b\,3$ = equation of third difference.

$+ \frac{864 - 72\,x - 18\,xx + xxx}{124416} \times a\,4$ = equation of fourth difference.

In this series y is to be estimated as 1 hour instead of 12 hours.

The moon's hourly velocity in longitude, Nov. 27, 1809, at 4*h*. 48*m*. P. M. at Greenwich, is required.

		M.	sec.	dec.
$\frac{1}{12} c\,1$ - - - - -	=	30	1	333333
$- 6 + x = \frac{7}{5} \times \frac{1}{144} = \frac{7}{720} \times c\,2$ - - -	—		1	133333
$+ \frac{96 - 24\,x + xx}{3456} \times b\,3$ - - -	+		0	033333

Moon's velocity for 12 hours, at 4 hours 48 minutes, -	=	6	0	2	862
Moon's hourly velocity, the same as above, - -	$(\frac{1}{12})$		30	0	2385

The rules given by Mr. Garnett are peculiarly adapted to the use of logistic or proportional logarithms, computed for 12 and 3 hours; but, when great accuracy is required, those logarithms should be extended to seven places of figures, or six at least, besides the index. These logs. are thus found—

Log. of 12 hours, or 720 minutes, - - - -	2	8573325	
Log. of 1 hour, or 60 minutes, - - - -	1	7781513	
Proportional log. of 1 hour or 60 minutes, - - -	1	0791812	
Log. of 3 hours, or 180 minutes, - - - -	2	2552725	
Log. of 1 hour or 60 minutes, - - - -	1	7781513	
Proportional log. of one hour, - - - -	0	4771212	

In the first case the proportion is for twelve hours, and in the last, for three hours.

The American public are indebted to Mr. John Garnett, not only for the rules here noticed, but for his edition of requisite tables, which are, in many respects, a valuable improvement on the British impression, and are recommended to the attentive examination of scientific persons in the United States, who will find them both ingenious and useful.

If tables for computing the moon's longitude, &c., and hourly velocity at every three minutes of intermediate time between 0 and 12 hours, extended to differences as far as the fourth order, and to six or seven places in the decimal fractions, were constructed and published on the principles herein stated, they would be an acquisition to our geographers and mariners; the numbers for every minute might then be accurately obtained by an easy method of interpolation. Such tables I shall probably undertake, at no distant period, accompanied with a sufficient number of examples to explain their utility; also, the manner of finding, by interpolation, the decimal fractions at intermediate times not contained therein.

WILLIAM LAMBERT.

November 14, 1809.

No. 4.

The tables given by some writers in Europe to facilitate the computation of the most essential elements used in practical astronomy, seldom extend to the fractional parts of seconds. In cases affecting the latitude of a place only, it is generally thought sufficiently exact, even in the nicest calculations, to determine it to the nearest second by observation; but the improvement in the moon's theory, during the present century, from the discovery of new equations, seems to require a more scrupulous attention to precision in ascertaining the longitude, than heretofore. There is, undoubtedly, as much propriety in having the elements correct as the data, whether consisting of time or space; for errors, in both or either, may be expected to produce a proportionate deviation from the truth in the result.

As all objects appear greater or less, as they are at a less or greater distance from the eye of the observer, the moon being in the zenith of any place, will be nearer to a spectator there by a semi-diameter of the earth, than in the horizon; consequently, her apparent semi-diameter will increase from the horizon to the zenith, in the proportion of radius to sine of the apparent altitude of her centre. The Nautical Almanac states the moon's equatorial horizontal semi-diameter (which is the same as if viewed from the centre of the earth under the equator) for every noon and midnight throughout the year, by the meridian of Greenwich; and it may be found at any other time or place by an easy proportion. The augmentation arises both from a change of the apparent altitude and of the horizontal semi-diameter; and if we suppose the form of the earth to be that of a perfect sphere, the logarithms contained in the following table will show the increase of the moon's horizontal semi-diameter, according to its variation, from 14′ 36″ to 16′ 59″, inclusive, when the apparent altitude is 90°. For any other apparent altitude, the rule is—

As radius;

To the log. annexed to the horizontal semi-diameter;

So is log. sine of the given apparent altitude;

To the corresponding augmentation which, added to the horizontal semi-diameter, will give the increased semi-diameter arising from the apparent altitude, from which the inflexion of light, 2′ 914*dec.** being subtracted, will leave the moon's semi-diameter corrected.

But as the form of the earth is found, by accurate observations and admeasurements, not to be a perfect sphere, but an oblate spheroid, (except we deem the authority and reasoning of St. Pierre sufficient to overturn the Newtonian hypothesis,) a correction of the equatorial horizontal semi-diameter will arise from any assumed ratio of the equatorial diameter to the polar axis of the earth, and from the latitude of the place of observation; the apparent altitude of the object will also be affected in proportion to its true azimuth or bearing from the meridian, which, in nice calculations for determining the longitude of a place, ought to be taken into view. The ratio used by Vince, Mackay, and other European mathematicians, is as 230 to 229; but that of 334 to 333, appears now to be thought more correct. It is respectfully submitted to scientific persons in the United States of America and elsewhere, whether an arithmetical mean of the two, = 282 to 281, would not be proper to be adopted, unless an undeviating standard should be established, which, by a probable change arising from the centrifugal force, and the effect of other causes not so well understood, may not soon be agreed upon.

The proportion of the moon's horizontal parallax to her semi-diameter, is as 1 to .272495, (400 to 109, very nearly.) The radius of a circle containing 360° is found to be = 57° 17′ 44″ 8; as this is to be estimated from the earth's centre, it must be diminished by the moon's equatorial horizontal parallax, or the angle under which the earth's equatorial semi-diameter is viewed at the moon, to reduce it to the visible horizon.

° ′ ″ ° ′ ″

As 1 to .272495, so is 57 17 44 8 to 15 36 46, which call x.

Let y represent the moon's horizontal semi-diameter, and z the augmentation when the moon is in the zenith, or the apparent altitude of her centre = 90°; then,

$\frac{y^2}{x-y,} = z$; and $y + z$, = to the moon's augmented semi-diameter, when the apparent altitude is 90°, admitting the form of the earth to be a perfect sphere. To compute it for an oblate spheroid, the equatorial horizontal semi-diameter must be reduced according to the latitude of the place, and the assumed ratio of the equatorial diameter to the polar axis of the earth, in the following manner:

Find the difference between the latitude of the place by observation, and that which is referred to the earth's centre, and call it the reduction of latitude.

Compute the moon's reduced horizontal parallax, according to the latitude of the place and the ratio of the earth's diameters, and take the difference between it and the equatorial horizontal parallax, which call the reduction of horizontal parallax.

Compute, also, the moon's true azimuth or bearing from the meridian, at the time of observation, then—

As radius;

To the reduction of latitude, in seconds, &c.;

So is co-sine of true azimuth from the meridian;

To the correction of the moon's apparent altitude, which is to be added to it, if the true azimuth from the south be less than 90°, and subtracted, if greater, to find the reduced apparent altitude.

As 400 to 109, so is the reduction of horizontal parallax, in seconds, &c., to the corresponding reduction of the moon's equatorial horizontal semi-diameter, which, subtracted from it, will give the reduced horizontal semi-diameter.

* See abstract of calculations, No. 2.

To the logarithm in the following table, answering to the reduced horizontal semi-diameter, add the logarithm sine of the reduced apparent altitude, the sum (rejecting radius) will be the logarithm of the augmentation in seconds, &c, which, added to the reduced horizontal semi-diameter, will give the moon's augmented semi-diameter, allowing for the spheroidical figure of the earth.

Table of Logarithms corresponding with the augmentation in seconds, and decimal parts of the moon's horizontal semi-diameter, when the apparent altitude of her centre is ninety degrees.

Moon's hor. semid.	Log.	Diff. +	Moon's hor. semid.	Log.	Diff. +	Moon's hor. semid.	Log.	Diff. +

The moon's horizontal semi-diameter is never less than 14′ 36″, nor greater than 16′ 59″; therefore, the augmentation at any time or place (supposing the earth to be a sphere) is readily found, as follows:

To the log. annexed to the given horizontal semi-diameter, add the log. sine of the apparent altitude; the sum (rejecting radius) will be the log. of the augmentation in seconds, and decimal parts.

EXAMPLE.

Let the horizontal semi-diameter be 16′ 38″, and the apparent altitude of the moon's centre, 41° 58′; required the corrected semi-diameter?

16′ 38″	log. annexed,	-	-	1.2562589
41° 58′	log. sine,	-	-	9.8252301
		min. sec. dec.		
	Augment. log.	- 12 064	-	1.0814890
	Moon's hor. sem. +	- 16 38 —		
	Augmented sem.	- 16 50 064		
	Inflexion of light,	- — 2 914		
	Moon's semid. (corrected)	16 47 150		

If the horizontal semi-diameter be given to fractional parts of a second, add the proportional part to the next preceding logarithm.

EXAMPLE.

Let the horizontal semi-diameter be 15′ 57″ 78 dec., and the apparent altitude of the moon's centre, 58° 18′ 24″; required the corrected semi-diameter.

The difference is 9150, and the proportional part for $\frac{78}{100}$ = 7137, which, added to 1.2194994, makes 1.2202131

It has been shown that the process is easy, considering the form of the earth to be that of a perfect sphere; but if we admit it to be an oblate spheroid, the operation will be attended with more labor, as may be seen by the following

EXAMPLE.

Let the latitude of the place of observation be 38° 52′ 57″, N.; the moon's equatorial horizontal parallax, 61′ 1″; the horizontal semi-diameter, 16′ 38″; the apparent altitude of her centre, 41° 58′; and the true azimuth from the meridian or south point, 61° 24′ 36″; required the moon's corrected semi-diameter, admitting the ratios of the equatorial diameter to the polar axis of the earth to be 334 to 333, and 230 to 229, respectively?

When the longitude of a place is to be determined, having regard to the spheroidal figure of the earth, the moon's augmented semi-diameter should be found as above stated, according to the assumed ratio of the earth's diameters, and the latitude of the place of observation, from which the inflexion of light must be subtracted, to obtain the moon's corrected semi-diameter.

The reduction of latitude and of the moon's horizontal parallax may be found in tables computed by astronomical writers for the purpose, particularly Messrs. Vince, Mackay, and Garnett; but, if such tables are wanting, the following rules may be adopted to find those elements:

Let the number representing the polar diameter be x, and the equatorial y.

$x \times y = z$ / $y \times x = a$ then log. z + radius, — log. a = constant log. for the reduction of the latitude of a place, according to the assumed ratio.

Constant log. + log. tangent latitude, — radius, = log. tangent lat. reduced.

For the reduction of the moon's horizontal parallax.

From the log. of the number representing the equatorial diameter, subtract the log. of the number representing the polar diameter, and call the remainder log. A.

Log. A. + log. co-tangent lat. place, = log. tangent arch B.

Log. co-sine lat. place, + radius, — log. sine arch B, = constant log. for that latitude and ratio.

Constant log. + log. sine moon's equat. hor. parallax, — radius, = log. sine hor. parallax, reduced.

As the moon's hor. parallax never amounts to 1° 2′, the log. in seconds may be substituted for the log. sine.

CITY OF WASHINGTON, *March* 9, 1810. WILLIAM LAMBERT.

No. 5.

Concerning the spheroidal form of the earth, and a proper method of reducing the latitude of a place, by observation, and the moon's horizontal parallax, as referred to the earth's centre, according to any assumed ratio of the equatorial to the polar diameter.

It has been admitted by scientific persons, since the publication of Sir Isaac Newton's Principia, and other works, (with the exception of a very few), that the figure or shape of the earth is an *oblate spheroid*, or, in other words, that the equatorial is greater than the polar diameter; the proportion of the former to the latter, as used by Messrs. Vince, Mackay, and other British astronomers, is as 230 to 229; but from the discovery of new lunar equations by M. de la Place, and other circumstances, the ratio of 334 to 333 is now stated, in the Nautical Almanac, as more correct, and better agreeing with observations lately and carefully made. Among the number of writers who object to the Newtonian hypothesis is James Henry Bernardin de Saint Pierre, who has, in explanation of the plates in his first volume of the Studies of Nature, XXXII to XXXVI, asserted, and endeavored to prove, that the true form of the earth is a *prolate*, and not an *oblate spheroid*, or, that the polar axis is greater than the equatorial diameter. It is said that *Cassini* was of the same opinion: but the reasoning and authority of St. Pierre will not, probably, change the general belief that the earth is an *oblate spheroid*. The difference between the ratios of 334 to 333, and 230 to 229, is such, that it would be desirable to establish some *mean* proportion as an invariable standard: an arithmetical mean of the above ratios, = 282 to 281, is submitted to the consideration of mathematicians in the United States of America, and elsewhere, as proper to be adopted.

Having, in the abstract of calculations, No. 2, and the method of finding the moon's augmented semi-diameter, No. 4, given rules for computing the reduction of the latitude of a place, and of the moon's equatorial horizontal parallax, it is only necessary, in respect to the latitude, to state the constant logarithms by which it may be reduced, according to the following ratios:

	const. log.
334 to 333, - - - -	9. 9973955. 3.
282 to 281, - - - -	9. 9969144. 2.
230 to 229, - - - -	9. 9962152. 9.

If, to the above fixed logarithms, or either of them, the log. tangent of the latitude of any place, by observation, be added, the sum (rejecting radius) will be the log. tangent of the latitude reduced, according to the assumed ratio; and this rule is invariable for all latitudes north or south, from 0 to 90 degrees.

EXAMPLES.

Required the reduced latitude of the capitol, in the city of Washington.

The reduced latitude of a place being so easily found by the help of the constant logarithms, it is thought unnecessary to form a table for that purpose.

But the process for reducing the moon's equatorial horizontal parallax, founded upon a variation of latitude, as well as the different ratios of the earth's equatorial to the polar diameters which have been, or may be assumed, is more complicated, and, therefore, a greater necessity arises for an accurate table constructed for each degree of latitude, from 0° to 90°, according to the ratios now in use, viz: 334 to 333, and 230 to 229. Such a table, on a new plan, is herewith presented, by which the reduced horizontal parallax may, at all times, be found with great precision. By the first differences annexed to the logarithms, the log. corresponding to parts of a degree in minutes

and seconds, may be found by simple proportion, only; but if greater accuracy be required, take a *mean* of the second differences, to which prefix the proper sign + or —; then multiply that *mean*, according to algebraical process, for

the product applied to the proportional part of the first difference, by addition or subtraction, according as the signs direct, will give that part corrected, which is always to be deducted from the logarithm answering to the next preceding degree.

But, without the trouble of applying the equation arising from second differences, which, in no case, will amount to two units in the last place of the logarithm, the reduced horizontal parallax may be found with sufficient accuracy, by simple proportion of the first differences.

Table for reducing the moon's equatorial horizontal parallax for any latitude, from 0 *to* 89 *degrees, according to the ratios* 334 *to* 333, *and* 230 *to* 229.

Application and use of the foregoing table.

To the logarithm annexed to the latitude, by observation, add the log. sine of the moon's equatorial horizontal parallax, the sum (rejecting radius,) will be the log. sine of the horizontal parallax reduced for the latitude given, and either of the ratios for which the table has been constructed.

Or, as the moon's equatorial horizontal parallax never amounts to 1° 2′, its logarithm in seconds and decimal parts may be substituted for the log. sine, which added to the log. for the latitude, the sum (rejecting radius) will be the log. in seconds and decimal parts of the reduced horizontal parallax; but it is not quite so correct as the result by using the log. sine.

EXAMPLE.

Let the latitude of a place, by observation, be 38° 52′ 57″ north, and the moon's equatorial horizontal parallax, 1° 1′ 5″. Required the reduced horizontal parallax.

(334 to 333.)		(230 to 229.)	
Const. log. - - -	9. 9994878	Const. log. - - -	9. 9992563
For lat. 38° 52′ 57″ - -			
Moon's eq. hor. par. 1° 1′ 5″ -	8. 2496260	Log. sine, - - -	8. 2496260
Moon's log. sine, - -			
Log. sine 1° 1′ 0″ 680 *dec.* -	8. 2491138	Log. sine 1° 0′ 58″ 728 *dec.* -	8. 2488823
hor. par. reduced, - -		Hor. par. reduced, - -	

Const. log. - - -	9. 9994878	Const. log. - - -	9. 9992563
Moon's hor. par. in seconds, 3665″ log.	3. 5640740	- - - -	3. 5640740
Log. 3660″ 680 *dec.* - -	3. 5635618	Log. 3658″ 729 *dec.* - -	3. 5633303
= 1° 1′ 0″ 680 *dec.* - -		= 1° 0′ 58″ 799 *dec.* - -	
Hor. par. reduced, - -		Hor. par. reduced, - -	

It will be seen by the foregoing example that the log. of the moon's equatorial hor. parallax in seconds, &c. may be substituted for the log. sine, without sensible error, or such as will scarcely affect the nicest computations; and when the table of log. sines, tangents, &c. has not been extended to seconds of a degree, for every second of the quadrant, as it is in Taylor's, or as far as two degrees, as in Hutton's, the latter process will be preferable, unless the equations arising from second and third differences are computed and applied as corrections to the log. sine, when the table extends to minutes of a degree only.

WILLIAM LAMBERT.

CITY OF WASHINGTON, *April* 2, 1810.

11th CONGRESS.] No. 278. [2d SESSION.

APPLICATION FOR THE PUBLICATION OF THE LAWS IN THE MICHIGAN TERRITORY IN THE FRENCH LANGUAGE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, APRIL 18, 1810.

Mr. GARLAND, from the committee to whom was referred the petition of sundry French inhabitants of the Territory of Michigan, praying that certain laws of the United States may be translated and published in that Territory in the French language, reported:

That, although the measure prayed for might be attended with temporary advantage to the petitioners, this consideration is greatly outweighed by reasons of public policy operating against its adoption.

If Congress were to authorize the translation of the laws into the French language, they would thereby give to the translation a sanction which would entitle it to be received in the courts of that Territory as evidence of the laws of the land; and great inconvenience and confusion might result from having two separate texts for the same law, susceptible, as they necessarily would be from the imperfection of all languages, of different and perhaps opposite interpretations.

The policy of legalising any other than the prevailing language of the country is also objectionable, on the ground that it would tend to encourage and perpetuate the other dialects which partially prevail in different parts of the Union, and which, it is believed, ought rather to be discouraged.

In a republic where the operations of Government are the result of the combined opinions of its citizens, it is important that the people at large should possess, not only enlightened, but similar views of the public interest; and it is not, therefore, of more consequence that information should be generally disseminated, than that the avenues o it should be common.

The committee, therefore, beg leave to offer the following resolution:

Resolved, That it is inexpedient to grant the prayer of the petitioners.

11th Congress.] No. 279. [2d Session.

BOUNDARY BETWEEN GEORGIA AND NORTH CAROLINA.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, APRIL 26, 1810.

IN SENATE, *November* 18, 1809.

To the President and gentlemen of the Senate, and to the Speaker and gentlemen of the House of Representatives in Congress assembled.

The State of Georgia, by her convention with the United States bearing date the 24th day of April, which was in the year 1802, for the cession of her western Territory, having acquired a right to a certain tract of country, which was west of South Carolina, and separated the States of North Carolina and Georgia; and the commissioners on the part of the United States having held forth to the commissioners of Georgia on that occasion, this Territory, as a strong and valuable part of the consideration offered by the United States for the completion of that convention.

The State of Georgia sent her Surveyor General to ascertain the extent and quality of the Territory she had thus acquired; he ascertained the boundaries to be at points that had long been supposed by South Carolina, and all the precedent claims to this tract of country; Georgia then proceeded, under the solemn convention she had entered into with the United States, to extend her laws and Government over the people there resident, and she then, with astonishment, first heard that her claims were to be resisted by North Carolina, unless she would agree to sanction grants that had issued from the Government of that State, and which would swallow up the right of soil through the whole extent of country; the sanctioning of which would have overthrown her benevolent intentions to its resident inhabitants, and confirmed a system of speculation which it had been the effort of Georgia to weed out of the limits of her State.

The documents subjoined to this address (and marked No. 1) will confirm what is here advanced.

Georgia, disappointed in her application to North Carolina, then addressed herself to Congress on the subject; her Representatives abstained, however, from pressing the affair, on receiving assurances from the delegation of the State of North Carolina that they would represent to their own State the necessity of meeting on some other grounds the requisition of Georgia.

In consequence of this application North Carolina did appoint commissioners, who met commissioners from Georgia. Some observations were made of the latitude of places, supposed about the boundaries of the two States. But because those observations were contrary to all that had been made before them; because they were directly against the opinions of persons best informed upon the subject, from neighboring States; because they were not confided in by the citizens claimed of Georgia, resident in the country; and, above all, because the observations made were themselves so variant, (where a variation to such an extent was not to be expected,) as to demonstrate that there was an error in the men employed, or in the instruments used.

The Legislature of Georgia, from some or all of these resons, refused her assent to the boundaries that would have been fixed by these observations, and again requested North Carolina to appoint commissioners, that the doubts on the subject might be removed; that if Georgia had no just claim to a Territory for which, by her convention with the United States, she had allowed a valuable consideration, she might have satisfactory and conclusive testimony. This application, though reiterated, has been rejected; this requisition, though pressed by the Government of Georgia to a wearisome length, has met with nothing but denial from her sister State, as the documents annexed to this memorial (and marked No. 2.) will confirm.

The Legislature of Georgia now see but one mode of calming the irritations that have arisen between the two States on this subject; they, therefore, apply to the Government of the United States to appoint a proper person to run the dividing line between the two States, through the whole extent, either at the expense of the Union, as Georgia believes she has a right to demand, or, at the expense of the two States, if Congress should so insist.

Be it, therefore, resolved by the Senate and House of Representatives of the State of Georgia in General Assembly met, and by the authority of the same, That our Senators and Representatives in the Congress of the United States press upon the attention of the General Government the subject matter of the preceding memorial.

And be it further resolved, That His Excellency the Governor transmit to our delegation in Congress the preceding memorial and resolution.

Read and passed. HENRY MITCHELL, *President.*
Attest: WILL. ROBERTSON, *Secretary.*

In the House of Representatives, read, and concurred in.

B. WHITAKER, *Speaker.*
Attest: HINES HOLT, *Clerk.*

EXECUTIVE DEPARTMENT, GEORGIA, *December* 15, 1809.

Presented, read, and approved. D. B. MITCHELL, *Governor.*
Attest: ELEAZAR EARLY, *Secretary E. D.*

SECRETARY OF STATE'S OFFICE, MILLEDGEVILLE, *February* 7, 1810.

I certify that the foregoing is a true copy of the original deposited in this office, with the great seal of the State affixed thereto.

HOR. MARBURY, *Secretary of the State.*

SIR: EXECUTIVE DEPARTMENT, GEORGIA, LOUISVILLE, *December* 10, 1806.

Agreeably to a resolution of the General Assembly of this State, I do myself the honor to enclose to your excellency copies of sundry resolutions, passed at their last session, relative to ascertaining the limits of this State. In conformity with one of the resolutions, the Legislature did, on the 5th instant, proceed to elect commissioners on the part of this State, when it appeared that Thomas P. Carnes, Thomas Flournoy, and William Barnett, Esquires, were elected to ascertain the 35th degree of north latitude, and plainly to mark the dividing line between the States of North Carolina and Georgia.

I am, sir, very respectfully, your excellency's obedient servant,

JARED IRWIN.

His Excellency the GOVERNOR *of North Carolina.*

SIR: EXECUTIVE DEPARTMENT, NORTH CAROLINA, RALEIGH, *January* 1, 1807.

I have the honor to acknowledge the receipt of your excellency's favor, dated the 10th of December last, accompanied with certain resolutions entered into by the Legislature of the State of Georgia, relative to the boundary line.

It was with satisfaction I saw that measures had been adopted that may, and no doubt will, lead to an amicable adjustment of our territorial differences.

Enclosed you will receive the copy of a law passed by the Legislature of North Carolina at its last session; by adverting to it you will observe that the objectionable parts of the former law are removed; thus it is expected that no difficulty can result in determining the equitable claims of the two States by their conferers.

On inquiry, I find the country in the neighborhood of the boundary is thinly inhabited, and that it is hardly probable that the commissioners can be comfortably accommodated in its vicinity during their negotiations. Permit me, therefore, to propose Buncombe court-house, in this State, as a suitable place for the meeting of the commissioners, and that the same should take place on the 20th of April next. If, however, neither the time nor place should meet with your approbation, please to alter them so as to make it agreeable to the commissioners on the part of Georgia, as no difficulty shall arise on this head, as the commissioners on the part of this State are disposed to accede to any proposition in this respect that you should be pleased to make.

The commissioners appointed by this State on the subject of boundary are Messrs. John Steele, John Moore, and James Willborn.

You will please to inform me by the earliest opportunity what arrangement you have thought proper to make on this important business.

With high consideration and respect, I am, sir, your obedient servant,

NATH'L ALEXANDER.

His Excellency the GOVERNOR *of Georgia.*

SIR: EXECUTIVE DEPARTMENT, GEORGIA, LOUISVILLE, *March* 11, 1807.

Immediately upon the receipt of your letter of the 1st of January last, I wrote the commissioners, on the part of this State, and informed them of the time and place proposed by your excellency for the commissioners on the part of both States to meet at to adjust our differences respecting boundary; to which I received their answers on the 27th ultimo, wherein they informed me that they will be at the place appointed by you on the 15th of June next, of which you will please to notify the commissioners on the part of the State over which you preside.

I have the honor to be, with high consideration and respect, your excellency's most obedient servant,

JARED IRWIN.

His Excellency the GOVERNOR *of North Carolina.*

SIR: EXECUTIVE DEPARTMENT, RALEIGH, N. C. *March* 25, 1807.

It is with pleasure I acknowledge the receipt of your letter dated the 11th instant, in answer to mine dated the 1st of January last, on the subject of boundary. I do not hesitate to say that the time proposed will be considered agreeable to the commissioners of this State; I shall accordingly instruct them to proceed to Buncombe court-house, within this State, to be there on the 15th of June next, as proposed, prepared to enter upon the duties of their appointment. On the 14th of the present month I had the honor of addressing a letter to you, wherein I declined a meeting of the commissioners on the 28th of April next as proposed, for the want of time to make the necessary arrangements, as I had not heard from you, but your last communication has obviated all difficulty I hope.

I have the honor to be, with high respect and consideration, your most obedient,

NATHANIEL ALEXANDER.

His Excellency JARED IRWIN, *Governor of Georgia.*

JULY 25, 1807.

We, the undersigned, a majority of the commissioners appointed to ascertain the thirty-fifth degree of north latitude, and on that parallel to run and plainly mark the boundary line between the States of Georgia and North Carolina, respectfully report:

That, in pursuance of the power and authority in us vested, we proceeded to Buncombe court-house, in the State of North Carolina, and there, on the 15th day of June, (as previously agreed on,) we were met by Generals John Steele, John Moore, and James Willborn, accompanied by their artist, the Reverend Joseph Caldwell. The day after our meeting a board was formed, and the business of our mission was entered into, after exchanging and re-exchanging credentials, and being satisfied that the powers given to the commissioners by each State were sufficiently ample. It was then proposed by the commissioners, on the part of North Carolina, that some previous arrangements ought to take place relative to the claimants, under patents from the State of North Carolina, so far as they covered land which might be found to be within the limits of the State of Georgia, on our ascertaining the line; and that, so far as the commissioners were competent, an amnesty for all disorders and offences (under the degree of capital) heretofore committed within the county of Walton should be agreed on. On these subjects it was thought expedient to reduce to writing the sense of the commissioners, which was accordingly done in the form of articles, which is herewith transmitted, and distinguished by No. 1.

It will be perceived, by the tenor of this instrument, that the commissioners, on the part of North Carolina, entertained no manner of doubt but that the line of demarcation between the two States would be found in the neighborhood of the place where preceding astronomical observations had fixed it. It was then proposed and agreed to, that the commissioners should forthwith proceed to the house of a Mr. Justice, living on the route from Ashville to the Blue ridge, and about three miles from that part of the ridge where the Kentucky road from South Carolina crosses the same.

On our arrival at this place, an artificial horizon was prepared, under the direction and superintendence of Mr. Meigs, on the part of Georgia, and Mr. Caldwell, on the part of North Carolina. The result of their observations, as reported to the commissioners, will be found on the journal herewith transmitted, marked with the letter A. Taking the mean difference it is found that Justice's is on latitude, north, 35° 22′ 32″ 20‴. We take leave to state, that when the report of this first observation, made at Justice's, was received, our astonishment and disappointment were great in the extreme. We who had been taught to believe, from preceding calculations, and those

made under the authority of our Government, and by a person whose public station obliged us to believe that a scientific fault could not be attributed to him, had the most abundant reason to be astonished and mortified at the result of this first attempt, which made a difference, and varied from the preceding observations, twenty miles or upwards. The case was the more perplexing and unaccountable, when we reflected that all the observations, both by the Surveyor General of this State, and the present artists, were made by the same kind of instruments, and such as have become proverbial for their verity and accuracy. We were, however, accompanied by an artist appointed by the Government, whose talents and integrity we had no reason to doubt, and of course were under the necessity of suspending our astonishment, and proceeding on the duty assigned us. After his observation was made, and reported, which was on Sunday, the 21st of June, making the mean difference as above stated, we proceeded about fifteen miles west to a Mr. Lane's, near the mouths of Davidson's and Little rivers, where Mr. Sturges ascertained the thirty-fifth degree of north latitude to be. At this place, on the 22d June, great pains were taken to construct an artificial horizon, with which each of the astronomers expressed themselves satisfied. On taking the latitude of this place, the report stands thus:

	°	′	″	‴
North Carolina, - - - - - -	35	17	6	93
Georgia, - - - - - -	35	18	10	22

After finding, from the foregoing observation, that we were upwards of seventeen minutes north of the desired point, we agreed to proceed to Cæsar's head, a place on the Blue ridge, about twelve horizontal miles directly south, and in the vicinity of Dowthet's Gap. It was stated by those persons present, who were said to be best informed, that this was the most southern point to be found on the Blue ridge within the present boundary line, and that here a natural and smooth horizon might be commanded, which situation was stated by the attendant astronomers to be all important. On our arrival at this place, within one hundred yards of the summit of the Blue ridge, the astronomers, after having viewed the heights, verbally stated that an artificial horizon was again to be resorted to, alleging that the view of the natural horizon from the mountain was too distant and remote to be depended on: whether this was a sound reason for abandoning a natural, and resorting to an artificial horizon, we leave to others better skilled in this important science than ourselves, to determine. We can now only say, what we then said, that the reason offered for relinquishing a natural horizon, and embracing an artificial one, did not appear to us satisfactory. An artificial horizon was then constructed in view of our camp; on the 24th of June observations were taken and produced the following result:

	°	′	″	‴
Georgia, - - - - - - -	35	11	1	0
North Carolina, - - - - - -	35	9	15	21

On the 26th June (the 25th being cloudy) the observations were:

Georgia, - - - - - - -	35	6	20	24
North Carolina, - - - - - -	35	7	21	11

And on the 28th June, which was the last observation:

Georgia makes the latitude, - - - - -	35	02	57	56
North Carolina, - - - - - -	35	04	54	04

This last observation (on the 28th) was made under very unfavorable circumstances, as the clouds obscured the sun about the time he was on the meridian, in such a degree that only an imperfect glimpse could be obtained.

The commissioners on the part of each State believing, from the observations made and reported by the attendant artists, that the thirty-fifth degree of north latitude could not be found on the summit or to the north of the most southern point of the Blue ridge, agreed to and signed certain articles of agreement which are called articles supplementary to those entered into at Ashville, to which we beg leave to refer.

The reports of the astronomers, on the part of each State, are herewith transmitted.

Mr. Secretary Robinson is in the possession of the journal of our proceedings, from the time of our meeting at Greenville until the close of our mission, together with a statement of expenditures, and the necessary vouchers, all which he is directed to lay before your excellency on his return to the seat of Government.

We have the honor to be, with respectful esteem, your excellency's most obedient humble servants,

THOMAS P. CARNES,
WILLIAM BARNETT.

To His Excellency JARED IRWIN, *Governor of Georgia:*

The Commissioners, on the part of the State of Georgia and North Carolina, having freely exchanged ideas on the subject of their mission, and believing that every measure ought to be pursued which would bear the stamp of conciliation and good-will, have agreed to the following articles:

ARTICLE 1. It is mutually agreed and admitted that the territories of the said States of Georgia and North Carolina, as far as they adjoin each other, are, and of right ought to be, separated and bounded by the thirty-fifth degree of north latitude, and for the purpose of preventing in future all manner of dissensions concerning jurisdictions, the underwritten commissioners will proceed forthwith to ascertain the said thirty-fifth degree of north latitude, and to run and mark the line accordingly; which line, when ascertained and completed with joint concurrence, shall forever after be regarded as the line of separation and boundary between the two States.

ART. 2. The commissioners on the part of Georgia do not consider their powers competent to enter into any stipulations which would bind the Government of the said State to confirm entries or grants for land heretofore made or obtained under the authority of the State of North Carolina, which land, on the running of the line, may be found to be within the State of Georgia; but impressed with the justice of a certain proportion of the said claims, and the peculiar circumstances which entitle them to consideration, the said commissioners promise and agree to recommend them in a special manner to the liberality of their Government, not doubting but that the Legislature thereof will by law provide for the confirmation and establishment of the said titles in a manner which will afford a satisfactory and adequate relief; and to this end the said commissioners will recommend the establishment of an impartial tribunal for the special purpose of inquiring into, and ascertaining the various descriptions of such claims, and of determining on each according to their respective merits, and as reason and equity may require, which tribunal the said commissioners will also recommend to be composed of three persons, to be appointed and paid by each State; but they shall convene and hold their meetings in the State of Georgia, and their decisions shall be conclusive.

ART. 3. There having been great dissensions between the people resident in the neighboring counties of Buncombe and Walton, and the said dissensions having produced many riots, routs, affrays, assaults, batteries, trespasses, woundings, and imprisonments, as well on the one side as on the other, and it being of primary importance that peace and tranquillity should be restored, and all animosity and ill-will forever buried between people who, from their local situations, will in all probability be constrained to continue in the vicinity of each other; and as the several outrages committed on both sides proceeded more (as the undersigned are impressed) from a mistaken zeal to support the Government to which they thought themselves constitutionally bound, than from a wish to injure their neighbors, or disturb the public peace, the undersigned agree to recommend, in the most earnest manner, to the Legislatures of their respective States to pass laws of amnesty, forgiveness, and oblivion for all such offences (under the degree of capital) as may have been committed within the said counties of Buncombe and Walton respectively, subsequent to the 10th day of December, in the year 1803, and which shall have arisen from, and had relation to, the disputes which existed concerning the jurisdiction of the two States.

In testimony whereof, we have hereunto set our hands and affixed our seals, as commissioners of our respective States, at Buncombe court-house, in the State of North Carolina, the 18th day of June, in the year 1807.

Signed, sealed, and interchangeably delivered by the commissioners of the two States, in presence of us, who have hereunto subscribed as witnesses,

Witnesses:
JAMES CALL,
WM. ROBERTSON,
JOSEPH CALDWELL,
J. MEIGS.

JOHN STEELE, [L. S.]
THOMAS P. CARNES, [L. S.]
JOHN MOORE, [L. S.]
WM. BARNETT, [L. S.]
JAMES WILLBORN. [L. S.]

The commissioners of the States of Georgia and North Carolina having discovered, by repeated astronomical observations made on the Blue ridge and elsewhere, that the thirty-fifth degree of north latitude is not to be found on any part of the said ridge of mountains, east of the line established by the General Government, as the temporary boundary between the white people and the Indians, and having no authority to proceed over that boundary for the purpose of ascertaining the said thirty-fifth degree of north latitude, and of running and marking the line accordingly. And being desirous that all causes of collision or irritation between the jurisdictions and people of the two States, may be effectually and completely prevented, have agreed to the following articles in addition and supplementary to the convention agreed to, at Buncombe court house, on the 18th day of the present month, viz:

ART. 1. The commissioners of Georgia, for and on the part of their State, acknowledge and admit, which acknowledgment and admission are founded on the aforesaid astronomical observations, that the State of Georgia hath no claim to the soil or jurisdiction of any part of the territory northwest of the ridge of mountains which divides the eastern from the western waters, commonly called the Blue ridge, and east or south of the present temporary boundary line between the white people and the Indians.

And that they will consequently recommend to the Legislature of the State of Georgia to repeal, at their next ensuing session, the act to establish the county of Walton, and to abrogate and to annul all Executive, ministerial, or other proceedings for the organization thereof.

ART. 2. The commissioners, on the part of the State of North Carolina, promise and agree to recommend to their Government, and particularly to the magistrates, sheriff, and other officers, civil and military, in the county of Buncombe, to execute the laws concerning forfeitures and penalties, and in every other respect where the State may be concerned, (under the degree of felony,) upon and towards the people who have adhered to the State of Georgia in the late dissensions concerning jurisdictions, with mildness and clemency, and if the said officers can do it consistently with their obligations of official duty, that they forbear to institute suits, and to distrain or execute for forfeitures and penalties incurred as aforesaid, between the 10th day of December, in the year 1803, and the date of this agreement, until the sense of the Legislature shall be had and known thereon.

In testimony whereof, we have hereunto set our hands and affixed our seals, as commissioners of our respective States, near Dowthet's Gap, on the summit of the Blue ridge, the twenty-seventh day of June, in the year one thousand eight hundred and seven.

Signed, sealed, and interchangeably delivered by the commissioners of the two States, in presence of us, who have subscribed hereunto as witnesses,

Witnesses:
J. MEIGS,
JOSEPH CALDWELL,
WM. ROBERTSON,
AMOS JUSTICE.

JOHN STEELE,
T. P. CARNES,
JOHN MOORE,
WILLIAM BARNETT,
JAMES WILLBORN.

A.

At Mr. JUSTICE'S, SATURDAY, *June* 20, 1807.

We have had but one satisfactory observation which we made this day. The result of an average or mean, is, that we are in the latitude of thirty-five degrees, twenty-two minutes, thirty-two seconds and twenty thirds, north, viz: 35° 22′ 32″ 20‴

We are confident that it will be advisable for the commissioners to proceed to a station further southward, that we may be able to perform with satisfaction to ourselves the duty assigned to us.

J. MEIGS,
J. CALDWELL.

To the gentlemen commissioners on the part of the States of North Carolina and Georgia.

GENTLEMEN: At Mr. LANE'S, MONDAY, *June* 22, 1807.

We agree that the circumstances attending our astronomical observation this day have been as favorable as we have a right to expect in any case where the principles of Hadley's quadrant, or the sextant, constitute the first object, and we find the latitude to be thus, viz:

The astronomer on the part of North Carolina makes the latitude to be thirty-five degrees, seventeen minutes, six seconds, and ninety-three thirds. And the astronomer on the part of Georgia makes the latitude thirty-five degrees, eighteen minutes, ten seconds, and twenty-two thirds.

	°	′	″	‴
North Carolina, - - - - -	35	17	6	93
Georgia, - - - - -	35	18	10	22

All which is respectfully submitted.

J. MEIGS,
J. CALDWELL.

To the gentlemen commissioners on the part of the States of North Carolina and Georgia.

GENTLEMEN: NEAR DOWTHET'S GAP OF THE BLUE RIDGE, *June* 24, 1807.

The circumstances attending our astronomical observation this day have not been so favorable as we wished; however, we had a glimpse of the sun at or very near his meridian altitude.

The result is as follows, viz:

Georgia gives the latitude to be thirty-five degrees, eleven minutes, one second north.

North Carolina gives the latitude thirty-five degrees, nine minutes, fifteen seconds, and twenty-one thirds, viz:

	°	′	″	‴
Georgia, - - - - -	35	11	1	0
North Carolina, - - - -	35	09	15	21

All which is respectfully submitted.

J. CALDWELL,
J. MEIGS.

To the gentlemen commissioners of the States of North Carolina and Georgia.

GENTLEMEN: NEAR DOWTHET'S GAP, *June* 26, 1807.

We had but a momentary view of the sun when on the meridian yesterday, as the result of which we state the latitude to be thus, viz:

Georgia makes it thirty-five degrees, six minutes, twenty seconds, and twenty-four thirds.

North Carolina makes it thirty-five degrees, seven minutes, twenty-one seconds, and eleven thirds.

	°	′	″	‴
Georgia, - - - - -	35	06	20	24
North Carolina, - - - -	35	07	21	11

All which is respectfully submitted.

J. MEIGS,
J. CALDWELL.

To the gentlemen commissioners of the States of North Carolina and Georgia.

DOWTHET'S GAP, *June* 28, 1807.

To the commissioners of North Carolina and Georgia, for ascertaining the boundary line between the two States.

The artists acting for them report:

That, by observation made this day which each pronounce to be exceedingly uncertain, on account of cloudy weather, the artist on the part of Georgia has found the latitude of this place to be thirty-five degrees, two minutes, fifty-seven seconds, and fifty-six thirds; and the artist, on the part of North Carolina, has found the latitude to be thirty-five degrees, four minutes, fifty-four seconds, and four-thirds.

	°	′	″	‴
Georgia, - - - - -	35	02	57	56
North Carolina, - - - -	35	04	54	04

All which is respectfully submitted.

J. MEIGS,
J. CALDWELL.

EXECUTIVE DEPARTMENT, GEORGIA,

SIR: MILLEDGEVILLE, *December* 28, 1808.

The Legislature of this State, at their last session, passed a resolution requesting me to write your excellency, and to urge the necessity of your appointing commissioners to meet those appointed last winter, on the part of this State, to ascertain the thirty-fifth degree of north latitude, and to mark the dividing line between the two States.

Permit me to request your excellency's attention to this business as early as possible.

I have the honor to be, sir, your excellency's most obedient servant,

JARED IRWIN.

His Excellency the GOVERNOR *of North Carolina.*

SIR: NORTH CAROLINA, RALEIGH, *March* 21, 1809.

I am sorry a temporary absence from this place has prevented my answering sooner your favor of the 28th of December last.

It would afford me real gratification to contribute to the friendly adjustment of those differences on the subject of boundary which have for some time unhappily subsisted between the two States.

As intimated by my predecessor, Governor Williams, in his letter of the 10th of July last, in answer to yours of the 17th of March, and 9th of June, 1808, your letters, with the resolutions of the State of Georgia, sent with the

first, were, by him, laid before our Legislature at their late session, who resolved to concur in the report of a committee thereon, of which I send you a copy, enclosed, as also copies of two acts passed at the session preceding upon the same subject. From them you will perceive that the Legislature of this State consider the subject of difference as solemnly adjusted. Indeed, it does not readily occur on what basis the adjustment is to rest if not upon that where it now stands.

The plighted faith of the two States to abide by the determination of commissioners, mutually chosen for the purpose of making the adjustment, and the adjustment of those commissioners actually made, I cannot, therefore, consistently with my sense of duty, make the appointments urged in your letter of December last.

I have the honor to be, with the highest consideration, your excellency's obedient servant,

DAVID STONE.

His Excellency the GOVERNOR *of the State of Georgia.*

EXECUTIVE DEPARTMENT, GEORGIA,

MILLEDGEVILLE, *March* 16, 1809.

SIR:

I wrote you on the 28th of December last, requesting your excellency to inform me whether you intended to send commissioners on the part of North Carolina, to meet those appointed on the part of this State, to ascertain the thirty-fifth degree of north latitude, and to mark the dividing line between the two States, to which I have not been favored with an answer. Permit me again to urge the necessity of having the line permanently fixed. The unhappy situation of the inhabitants of that tract of country, called Walton county, calls aloud for an adjustment of the existing difference between the two States relative to boundary.

I have the honor to be, sir, with great respect and esteem, your excellency's most obedient servant,

JARED IRWIN.

His Excellency the GOVERNOR *of North Carolina, Raleigh.*

SIR: STATE OF NORTH CAROLINA, RALEIGH, *April* 19, 1809.

Your excellency's letter of the 28th of December last was answered on the 21st of last month, and I regret very much it had not been in my power to pay earlier attention to the subject; presuming that my answer above-mentioned has been received, I shall at present beg leave to refer to that as an answer, also to your favor of the 16th of March,

And have the honor to be, with the highest consideration, your excellency's obedient servant,

DAVID STONE.

His Excellency the GOVERNOR *of Georgia.*

Whereas the States of Georgia and North Carolina, by their respective commissioners duly authorized for that purpose, did, on the 18th day of June, in the year of our Lord one thousand eight hundred and seven, at Buncombe court-house, enter into articles of conventional agreement, as follows:

ART. 1. It is mutually agreed and admitted, that the territories of the said States of Georgia and North Carolina, as far as they adjoin each other, are, and of right ought to be separated, and bounded by the thirty-fifth degree of north latitude, and, for the purpose of preventing in future all manner of dissensions concerning jurisdiction, the underwritten commissioners will proceed forthwith to ascertain the said thirty-fifth degree of north latitude, and to run and mark the line accordingly; which line, when ascertained and completed with joint concurrence, shall forever after be regarded as the line of separation and boundary between the two States.

ART. 2. The commissioners, on the part of Georgia, do not consider their powers competent to enter into any stipulations which would bind the Government of the said States to confirm entries or grants for land heretofore made or obtained under the authority of the State of North Carolina, which land, on the running of the line, may be found to be within the State of Georgia; but, impressed with the justice of a certain proportion of the said claims, and the peculiar circumstances which entitle them to consideration, the said commissioners promise and agree to recommend them in a special manner to the liberality of the Government, not doubting but that the Legislature thereof will, by law, provide for the confirmation and establishment of the said titles in a manner which will afford a satisfactory and adequate relief; and to this end the said commissioners will recommend the establishment of an impartial tribunal for the special purpose of inquiring into, and ascertaining the various descriptions of such claims, and of determining on each, according to their respective merits, and as reason and equity may require; which tribunal the said commissioners will also recommend to be composed of three persons, to be appointed and paid by each State; but they shall convene and hold their meetings in the State of Georgia, and their decisions shall be conclusive.

ART. 3. There having been great dissensions between the people resident in the neighboring counties of Buncombe and Walton, and the said dissensions having produced many riots, routs, affrays, assaults, batteries, trespasses, woundings, and imprisonments, as well on the one side as on the other, and it being of primary importance that peace and tranquillity should be restored, and all animosity and ill-will forever buried between the people who, from their local situation, will, in all probability, be constrained to continue in the vicinity of each other; and, as the several outrages committed on both sides proceeded more (as the undersigned are impressed) from a mistaken zeal to support the Government to which they thought themselves constitutionally bound, than from a wish to injure their neighbors or disturb the public peace, the undersigned agree to recommend, in the most earnest manner, to the Legislatures of their respective States to pass laws of amnesty, forgiveness, and oblivion for all such offences (under the degree of capital,) as may have been committed within the said counties of Buncombe and Walton, respectively, subsequent to the 10th day of December, 1803, and which shall have arisen from and had relation to the disputes which existed concerning the jurisdiction of the two States.

And whereas, the said commissioners, with like authority, did, on the 27th day of June, in the year aforesaid, at Dowthet's Gap, enter into articles in addition and supplementary to the convention agreed on between the commissioners of Georgia and North Carolina at Buncombe court-house, on the 18th day of June, in the year aforesaid, which articles are as follows:

The commissioners of the States of Georgia and North Carolina having discovered, by repeated astronomical observations made on the Blue ridge, and elsewhere, that the thirty-fifth degree of north latitude is not to be found

on any part of said ridge of mountains, east of the line established by the General Government as the temporary boundary between the white people and the Indians; and, having no authority to proceed over that boundary for the purpose of ascertaining the said thirty-fifth degree of north latitude, and of running and making the line accordingly; and being desirous that all causes of collision and irritation between the jurisdictions and people of the two States may be effectually and completely prevented, have agreed to the following articles in addition and supplementary to the convention agreed to at Buncombe court-house on the 18th day of the present month, viz:

ART. 1. The commissioners of Georgia, for and on the part of their State, acknowledge and admit, which acknowledgment and admission are founded on the aforesaid astronomical observations, that the State of Georgia hath no claim to the soil or jurisdiction of any part of the territory north or west of the ridge of mountains which divides the eastern from the western waters, commonly called the Blue ridge, and east or south of the present temporary boundary line between the white people and the Indians; and that they will consequently recommend to the Legislature of the State of Georgia to repeal, at their next ensuing session, the act to establish the county of Walton, and to abrogate and annul all executive and ministerial or other proceedings for the organization thereof.

ART. 2. The commissioners, on the part of the State of North Carolina, promise and agree to recommend to their Government, and particularly to the magistrates, sheriffs, and other officers, civil and military, in the county of Buncombe, to execute the laws concerning forfeitures and penalties; and in any other respect, where the State may be concerned, (under the degree of felony,) upon and towards the people who have adhered to the State of Georgia in the late dissensions concerning jurisdictions with mildness and clemency; and if the said officers can do it, consistently with their obligations of official duty, that they forbear to institute suits, and to distrain or execute for forfeitures and penalties incurred as aforesaid, between the 10th day of December, in the year 1803 and the date of this agreement, until the sense of the Legislature shall be had, and known thereon.

In order, therefore, that said conventional agreement and the articles additional and supplementary thereto, may be carried into full and complete effect,

Be it enacted by the General Assembly of the State of North Carolina, and it is hereby enacted by the authority of the same, That the said conventional agreement, and the articles in addition and supplementary thereto, and all and every article and clause thereof be, and the same are hereby, fully ratified and confirmed:

Read three times, and ratified in General Assembly, the 17th day of December, A. D. 1807.

JOSEPH RIDDICK, *S. S.*
JOSHUA G. WRIGHT, *S. H. C.*

STATE OF NORTH CAROLINA,

This certifies that the foregoing is a true copy, taken from the original in this office.
Given under my hand at Raleigh, the date aforesaid,

W. M. WHITE, *Secretary.*

AN ACT to pardon certain offences committed in that part of Buncombe county formerly claimed by the State of Georgia.

Be it enacted by the General Assembly of the State of North Carolina, and it is hereby enacted by the authority of the same, That all crimes and misdemeanors, the punishment whereof is not by law capital, which have been committed between the 10th day of December, in the year of our Lord, one thousand eight hundred and three, and the 27th of June last past, within that part of the county of Buncombe, which was formerly claimed by the State of Georgia, and called the county of Walton, be and the same are hereby pardoned, released, and put into total oblivion.

And be it further enacted, That this act shall be in force from and after the passage of an act by the Legislature of the State of Georgia, ratifying and confirming the conventions entered into by and between the commissioners on the part of that State, and the commissioners on the part of this State, on the 18th day of June and the 27th day of June, A. D. 1807.

Read three times, and ratified in General Assembly, the 18th day of December, A. D. 1807.

W. M. WHITE, *Secretary.*

STATE OF NORTH CAROLINA. *In the Senate, December* 7, 1808.

Mr. SMITH delivered in the following report, to wit:

The Committee on the Governor's message, taking into consideration that part thereof respecting the boundary between this State and Georgia, report:

That they do not perceive the necessity or propriety of this State taking any further measures at present respecting a dispute which they consider settled, in a solemn convention signed on the 18th of June, 1807, at Buncombe court-house, by the commissioners of Georgia and North Carolina, duly authorized on the part of each State, and by certain articles entered into, agreed upon, and signed by said commissioners on the 27th of June, in the same year, at Dowthet's Gap.

Submitted,

BENJAMIN SMITH, *Ch.*

The foregoing report being read:
Resolved, That this House do concur therewith.

By order: J. RIDDICK, *S. S.*
M. STOKES, *Clerk.*

IN THE HOUSE OF COMMONS, *December* 8, 1808.

The foregoing report being read:
Resolved, That this House do concur therewith.

By order: JOSHUA G. WRIGHT, *S. H. C.*
P. HENDERSON, *Clerk H. C.*

This certifies that the aforegoing is a true copy, taken from the journals of the General Assembly of this State.

W. M. WHITE, *Secretary.*

11th CONGRESS.] No. 280. [2d SESSION.

BRIGADIER GENERAL JAMES WILKINSON.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MAY 1, 1810.

Mr. BUTLER, from the committee to whom was referred the resolution of the 4th instant, directing an inquiry into the conduct of Brigadier General James Wilkinson, in relation to his having at any time, whilst in the service of the United States, corruptly received money from the Government of Spain, or its agents; or in relation to his having, during the time aforesaid, been an accomplice, or in any way concerned with the agents of any foreign Power, or with Aaron Burr, in a project against the dominions of the King of Spain, or to dismember these United States; and to inquire generally into the conduct of the said James Wilkinson, as Brigadier General of the army of the United States, made the following report:

That they have had under consideration the several subjects of inquiry, and have investigated them to the utmost of their power, since the time of their appointment, but from the limited period in which they have acted, and from the extensive and complicated nature of the subjects, they are under the necessity of stating, that they have not been able to make a thorough and conclusive investigation of the objects of their inquiry.

Such testimony, however, as they have been able to procure, they beg leave to submit as part of their report, and which may be referred to under the following heads and order:

In relation to the first object of inquiry, to wit: "The receipt of money by General Wilkinson from the Spanish Government or its agents," refer—

In relation to the fourth object of inquiry, to wit: "The conduct of General Wilkinson as Brigadier General of the army of the United States," refer—

To the deposition of William Simmons, Esq., - - - - - letter S.
Deposition of Captain George Peter, - - - - - letter P.
Deposition of Captain William E. Williams, - - - - - letter W.
Deposition of John Smith, - - - - - - letter H.
Letter from William Simmons, Esq., enclosing extracts, - - - A, B, C, D.
Letter from General Wilkinson to Daniel Clark, - - - - - No. 71.

The committee think proper also to submit the following papers, relating to tobacco, and other commercial transactions, in which General Wilkinson was concerned, from the month of ————, in the year 1788, to the month of ————, in the year 1790, to wit:

General Wilkinson's account current with Clark and Rees, in the hand-writing of Philip Noland, dated the 8th of August, 1788, - - - - - - - No. 27
Philip Noland's account of sales of tobacco, dated September the 21st, 1790, - - No. 29
Wilkinson's account current with Clark and Rees, dated May the 1st, 1789, contained in the account book, - - - - - - - - page 30
Wilkinson's letter to Clark and Rees, dated May the 20th, 1790, - - - No. 30
Wilkinson's letter to Clark and Rees, dated June the 20th, 1790, - - - No. 31
Wilkinson and Dunn's account current with Clark and Rees, dated August the 29th, 1789, and 5th of September, 1789, with Wilkinson's order and Noland's receipt for balance, - - No. 32
Philip Noland's declaration, dated September the 10th, 1790.
Wilkinson's accountable receipt, - - - - - - No. 4
Articles of agreement between Wilkinson and Dunn, and Daniel Clark, Senior.
Letter from General Wilkinson to Daniel Clark, relative to the Plain Tale, - - No. 2.

In making the last preceding statement, the committee beg leave to remark that, from an examination of the sentence of the military court of inquiry, ordered at the request of General Wilkinson, and of which Colonel Burbeck was president, it appears that the tobacco transactions of General Wilkinson, at New Orleans, in 1789, and 1790, constituted a material part of that inquiry; and that a copy of an account current was laid before the said court by General Wilkinson, and designated by No. —, and several letters accompanying said account, supposed by the court to be in the hand-writing of Philip Noland, the agent of General Wilkinson.

The committee conceiving that the papers, which had been collected by the said court, would aid them in their investigation, made application for those papers to the Secretary of War, but were unable to obtain them, they having been taken from the office by General Wilkinson, as appears from the deposition of John Smith, chief clerk in the War Office.

The committee then directed a subpœna to General Wilkinson, requiring him to send or produce all the papers which had been used or collected by the said court. In obedience to which, General Wilkinson sent to the committee a packet of papers, which did not contain either the account and letters referred to in the sentence of the court, or the defence of General Wilkinson; nor have the committee been able to procure them, consequently have not had it in their power to compare the accounts herewith exhibited with those which were laid before the military court of inquiry; for the further elucidation refer to

Walter Jones' deposition, - - - - - - marked W. J.
The committee also submit the deposition of Daniel W. Cox, authenticating the papers to which it specially refers, - - - - - marked D. W. C.

PAPERS RELATIVE TO THE FIRST POINT OF INQUIRY.

No. 5.

Deposition of John Ballinger.

Personally appeared before me, the undersigned, one of the justices of the peace for the parish of New Orleans, Mr. John Ballinger, now resident in Cape Girardeau, Territory of Louisiana, late a member of the Kentucky Legislature, who being duly sworn on the Holy Evangelists of Almighty God, did depose and say:

That, in the forepart of the winter of the year 1789, as well as he recollects, his brother Joseph Ballinger brought two mules loaded with money, from New Orleans to the State of Kentucky, for General James Wilkinson; that, from the fatigue of the journey and indisposition, his said brother was unable to finish his journey, and got this deponent to conduct the said mules and money to General Wilkinson, at Frankfort, where he arrived on the 26th day of December, in the year aforesaid. The said money was in leather bags, and very heavy loads; and this

deponent further declares, that the General expressed much satisfaction at the receipt of the money, having been under some apprehensions on account of the delay which had taken place on the journey; which said mules and money General Wilkinson receipted for, which receipt is among this deponent's papers; and further this deponent saith not.

JOHN BALLINGER.

Sworn and subscribed to at the city of New Orleans, this 12th day of January, 1809, before me.

SAM. W. EARLE, *J. P.*

No. 6.

Letter from Evan Jones to Daniel Clarke, Esq.

SIR: NEW ORLEANS, *February* 16, 1809.

In answer to your letter of yesterday, I have to say that I remember General Wilkinson's having stopped at my plantation in the fall of 1789, (as I think,) when he was on his way to Kentucky, accompanied by Philip Nolan. As I live on the west side of the Mississippi, and the General went up on the east, he stopped at some plantation nearly opposite mine, and came over and spent a day or two with me.

In the course of our conversation he told me that he had left a sum of money under the care of Nolan, whom he spoke of as a man of great strength; saying he could take $2,000 with one hand from off a mule or horse, and carry them with the utmost ease into a house. I do not remember whether the General mentioned to me the amount he was taking up with him; but, to the best of my remembrance, he said he had two mules or horses for the purpose of carrying his money. This is all I can recollect of the transaction.

I am, sir, your most obedient servant,

EVAN JONES.

DANIEL CLARKE, Esq.

No. 7.

F. Langlois' evidence.

Ce vingt-neuvième jour de Décembre, de l'an mil huit cent huit, par devant moi soussigné, un des juges de paix du comté d'Orléans, est personnellement comparû Monsieur François Langlois, citoyen des Etats Unis, et résidant à la Nouvelle Orléans, lequel étant duement assermenté sur la Sainte Bible, a déclaré et dit, que dans l'année mil sept cents quatre-vingt quatorze, il étoit lieutenant de milice au service de sa Majesté Catholique, commandant la galeotte la Flèche, alors en station à la N'elle Madrid, ayant sous ses ordres la chaloupe canonnière le Taureau, et le bateau le Prince des Asturies: que pendant quil étoit là, un nommé Mr. Owens arriva de la N'elle Orléans avec une somme d'argent qui lui avoit été confiée par le Baron de Carondelet pour être remise au General Wilkinson, qui étoit alors sur l'Ohio, ou dans les environs, et que le déclarant avoit des instructions du Baron de Carondelet de prendre des mesures de concert avec Mr. Thomas Portell, commandant de la N'elle Madrid, et le susdit Owens, afin que la somme dont ce dernier étoit chargée put arriver surement à sa destination; en conséquence de quoi le déposant fut d'avis, dans un conseil tenu à la N'elle Madrid par Portell, Owens, et lui, de prendre des habitants établis dans le poste pour conduire Owens, mais que cette opinion fut combattue par Portell et Owens, qui furent d'avis qu'il seroit plus économique, et par conséquent plus agréable, au Gouvernement Espagnol de prendre des matelots de la galeotte du déclarant; ce qu'il exécuta. Et le déposant déclare de plus que la somme six mil gourdes, qui avoit été apportée par Owens de la N'elle Orleans à la N'elle Madrid, et délivrée à Don Thomas Portell, commandant du fort, fut embarquée par Portell à bord de la galeotte du déclarant pour être escortée jusqu'a l'embouchure de l'Ohio, où il fournit à Owens un patron nommée Pepillo, et six de ses rameurs, et qu'il embarqua dans son canot la susdite somme de six mil piastres pour être remise au Général Wilkinson; et il déclare que la somme fut mise par lui-même dans trois petits barils; mais que craignant que l'équipage qu'il avoit destiné à Owens n'eut quelque mauvais dessein, il reprit l'argent dans sa galeotte, et le garda vingt-quatre heures en sa possession, et le remit une seconde fois aux pressantes solicitations de Owens qui partit avec. Que peu de temps après il apprit que Owens avoit été assassiné par son équipage, et que l'argent avoit été volé par eux. Et le déposant déclare de plus, qu'il arrêta et envoya à la N'elle Orleans pour être jugé, un des matelots (nommé Vexerano) qui composoit l'équipage de Owens, et qui étoit complice du meurtre de Owens, et du vol de l'argent; et le déposant déclare de plus que quoi qu'il fut convenu entre le Gouvernement Espagnol et Owens, afin de sauver les apparences, que Owens auroit l'air d'être propriétaire de l'argent, il sait que cette somme étoit envoyée par le Baron de Carondelet pour le compte, et pour être remise au General Wilkinson; et que sachant l'intérêt que le Gouvernement Espagnol avoit dans cette affaire, il donna un avis officiel au Baron de Carondelet de la part qu'il avoit prise dans cette affaire, et de l'avis qu'il avoit donné sur la manière de conduire l'argent sûrement à sa destination, et en réponse le Baron lui témoigna le regret qu'il avoit que son avis n'eut pas été suivi en tout. Et le déposant déclare de plus que Owens n'avoit pas d'autre argent à bord que les six mil piastres susmentionnée. En foi de quoi il a signé.

F. LANGLOIS.

D. BOULIGNY, *Juge de Paix.*

No. 7.

[TRANSLATION.]

On this 29th day of December, in the year 1808, personally appeared before me, the undersigned, one of the justices of the peace for the county of Orleans, Monsieur François Langlois, a citizen of the United States, and resident of New Orleans, who, being duly sworn on the Holy Bible, did depose and say: That, in the year 1794, he was a lieutenant of militia, in the service of His Catholic Majesty, and commanded the galliot the Fleche, then on station at New Madrid, having under his orders the gun-boat the Taureau, and bateau the Prince of Asturia; that, whilst there, a Mr. Owens arrived from New Orleans, with a sum of money entrusted to him by the Baron de Carondelet, to be delivered to General Wilkinson, somewhere on the Ohio; and this deponent had directions from the said Baron de Carondelet to take measures, in concert with Don Thomas Portell, the commandant of New Madrid, and the aforesaid Owens, to have the sum intrusted to the charge of this latter conveyed in safety to its destination; in consequence thereof, this deponent, at a council held at New Madrid, by Portell, Owens, and himself, recommended that resident citizens of that place should be employed to accompany Owens; but his opinion was

overruled by Portell and Owens, who thought it would be more economical, and, consequently, more agreeable to the Spanish Government, to have a boat's crew furnished from the galliot of this deponent, which he furnished; and further, he deposes that the sum of $6,000, which had been brought by Owens from New Orleans to New Madrid, and by him delivered to Don Thomas Portell, the commandant of the fort, was, by Portell, embarked on board the galliot of this deponent, to be conveyed to the mouth of the Ohio, at which place he furnished Owens with a patron named Pepello, and six of his oarsmen, and shipped in his canoe the beforementioned sum of $6,000, to be delivered to General Wilkinson; and he declares that the sum was packed by himself in three small barrels; but, being apprehensive of some bad design on the part of Owens's crew, he took back the money into his galliot, and retained it twenty-four hours in his possession; when, at Owens's pressing solicitations, he re-delivered it to him, who then departed with it; and some short time afterwards he learned that Owens had been murdered by his crew, and the money made away with by them; and, further, he, this deponent, declares that he afterwards arrested, and sent to New Orleans for trial, one Vexerano, one of Owens's crew, who was concerned in the murder of said Owens, and plunder of the money; he further deposes that, although it was agreed between the Spanish Government and Owens, to save appearances, that the money should appear to belong to said Owens, yet he knows it was sent by the Baron de Carondelet for the use of, and to be delivered to, General Wilkinson, and that, knowing the interest which the Spanish Government had in this transaction, he wrote an official account to the Baron de Carondelet, of the part he had taken in it, and the advice he had given respecting the conveyance of the money safely to its destination: and, in reply, the Baron regretted that his advice had not been followed in every particular; and the deponent further declares, that Owens had no other money than the $6,000 above mentioned.

In testimony of which he has signed.

F. LANGLOIS.

D. Bouligny, *J. P.*

Nouvelle Orleans, *Janvier* 28, 1795.

J'ai apprit, Monsieur, avec bien de la peine, par votre lettre du 13 de 9bre, la mort de Mr. Owens; ce malheur est un de ces événemens que l'on ne sçauroit prevoir, et que la providence dispose a son gré, sans que toute la prudence humaine puisse l'éviter; je voudrois, et j'espère encore, que ce malheureux Vexerano sera arrêté, car cette action est trop infame pour qu'il puisse trouver un asile.

Je compte que vous verrez Mr. Rousseau a la fin d'Avril, que vous vous incorporerez avec l'escadre, prenant le commandement d'une galère, avec laquelle vous descendrez ici à la fin de Juin; à moins que vous ne preferiez de rester encore avec la même commission dans ces parages; il paroit que vous vous y êtes bien porté, ce qui n'est pas peu de chose dans des endroits aussi fièvreux.

A présent que le fleuve sera haut, vous devez redoubler de soin pour ne laisser introduire personne, ni aucun papier par l'Ohio, tendant a troubler la province; on est étonné en Europe de la tranquillité qui y régne, et ceux que j'en ai écarté au commencement de la guerre, ou qui en sont sorti pour leurs affaires, écrivent présentement qu'ils voudroient être encore à la Louisiane, et louent les soins que nous avons pris pour en écarter les esprits turbulens; de sorte que ces mêmes gens qui vituperoient autrefois nos dispositions, sont ceux qui les exaltent actuellement, et nous exhortent a les continuer.

Je recommande a Mr. Portell de bien traiter les François, Royalistes, Hollandois, Allemands, &c., qui se présenteront, et dont je vais former un bel établissement dans le Ouachita; je vous fais la même recommandation, mais vous ne leur laisserez aucun papier, livres, ou manuscrits, ayant rapport aux affaires du têms.

J'ai l'honneur, avac la plus parfaite considération, monsieur,

Votre très humble, et très obéissant serviteur,

LE BARON DE CARONDELET.

Monsieur Langlois.

Nouvelle Orleans, *Juin* 28, 1795.

J'ai reçu, monsieur, vos lettres du 25 Fevrier, 14 Avril, et 15 Maï, par lesquelles vous me parlez de Mr. de Vilemont, comme d'un commissionné de la cour, ce qu'il vous aura sans doute fait entendre, mais il n'en étoit rien. Don Louis de Vilemont étoit porteur d'un passeport de la cour, qui lui permet de voyager pendant quatre ans, et rien de plus; mais quand même il se seroit trouvé chargé d'une commission, vous devez sçavoir qu'elle n'est valable qu'autant que comme commandant général de la province, j'aurois expédié mes ordres aux commandans particuliers de lui en permettre l'exercise, et qu'aucun commissionné ne peut agir sans m'avoir fait part auparavant de ses ordres. Puisque la chose est faite il n'y faut plus penser, mais vous voyez combien Don Louis Vilemont étoit peu fondé dans ses discussions avec vous.

J'ai été enchanté de la prise que vous avez fait du scélerat Vexerano, à qui on a fait ici le procés, et qui sera probablement perdu: on prétend qu'il y en a un autre refugié dans la province qui étoit du même complot.

Je viens de recevoir par Mr. Valé votre dernière lettre. Je tacherai d'arranger avec Mr. l'Intendant le défaut de formalité de vos feuilles, mais je crains bien que si Don Thomas Portell ne consent a les intervenu vous ne vous trouviez embarrassé; car au tribunal de *cuentas* de la Havane, on ne les passera pas sans intervention. Je ne comprends pas comment Mr. Portell ne vous a pas instruit à ce sujet.

J'ai l'honneur d'être, très parfaitement, monsieur,

Votre très humble et très obéissant serviteur,

LE BARON DE CARONDELET.

Monsieur Langlois.

No. 13.

General Wilkinson's letter to John Adair.

My Friend: August 7, 1795.

I have this morning (now I intended to say,) received your favor by Mr. McDowell. He has ate with me, but will return twenty miles this evening, which obliges me to rise from cool Madeira to drop you a hasty line; it will be disordered, of course, for hurry produces confusion.

I send that which is handed about here, (and to me by Judge Turner,) as the bottom of another memorable treaty. From the mouth of Kentucky to the mouth of Ohio, we have a near neighborhood with our old friends. Will it be a good one? or will mutual aggressions soon throw open the temple of Janus once more? The Governor here, I am told, scouts this important production of our Solomon; it is my business to keep my peace, which, to a man of mercury, whose heart and tongue are in unison, is no easy thing. If my very damned and unparal-

leled crosses and misfortunes did not uncash me, I would be with you in flour. But as I have honor of $6,590 received for me in New Orleans, $1,740 only have reached my hand; this, independent of poor Owens's loss. The whole of this last sum is not lost, but it is not within my control, and will not be for six or nine months. I am sorry for old McAffod, for I think he was an honest man; but I am more sorry for his son, and if I can serve him respecting the property left behind, and you think him honorable, he may, on your recommendation, receive a letter to my friend. This is *entre nous*, because I have refused many.

I know that an emotion of friendship induced you to give me the mare, and when I am outdone in that commerce, may "perdition catch me;" yet I love the brute I must confess; if she runs she must run your property, or she will certainly break a leg or thigh—you understand me. I send you $50 by Mr. McDowell. What was I to pay for her? We must not misunderstand one another; if I lend the nag to you, and any misfortune ensues, I shall not be pleased, nor will you be happy; but if she is essential to your pleasure or pastime, although no other man should have the honor to cross her, she is yours at what she cost me. I make a single reserve; if you can make a match, and let me in for a bet of £100 cash, I will divide the risk of her safety with you. Old Tony, it is currently said, will go to Philadelphia so soon as he finishes the dependencies of his treaty; this is *entre nous* also; if this should be true, you will hear from me; in the mean time pardon this scrawl, which I have not time to examine, and believe me to the bottom,

Your friend and obedient servant,

JAMES WILKINSON.

Colonel ADAIR.

No. 8.

Deposition of D. Bouligny.

Ce seizième jour du mois de Janvier, de l'année mil huit cent neuf, par devant moi soussigné, juge de paix de la ville de la Nouvelle Orleans, est personnellement comparu Monsieur Dominique Bouligny, cidevant adjutant major au regiment de la Louisiane, au service de sa M. C. et actuellement membre de la Législature du Territoire d'Orleans, qui étant duement assermenté sur la Sainte Bible, a déclaré et dit, que dans l'année 1795, autant qu'il s'en rappelle, il exercoit les fonctions d'adjutant major au regiment de la Louisiane, et qu'il fut chargé par le Gouverneur le Baron de Carondelet, de faire le procès d'un nommé Pepillo, qui étoit accusé d'avoir été un des auteurs de la mort de Monsieur Henry Owens, (qui avoit été assassiné dans la Belle rivière sur le territoire Americain,) et du vol d'une somme d'argent dont ce Monsieur Owens étoit porteur pour le General Wilkinson, et qui lui avoit été remise par le Gouvernement Espagnol. Et il a de plus déclaré qu'il étoit public et notoire parmi les employés du Gouvernement Espagnol, que le General Wilkinson étoit pensionné du Gouvernement Espagnol, et que la plupart des employés croyoient qu'il ny avoit aucune confiance a faire sur les promesses que fesoient le Général au Gouvernement, parce qu'ils ne pouvoient se persuader que son influence pût attirer le peuple des états de l'ouest à se séparer de la confédération Americaine. Juré par devant moi le jour et an que dessus, *le mot Americain rayé.*

D. BOULIGNY.

Juré et affirmé devant moi.

F. DUTILLET, *Juge de Paix.*

[TRANSLATION.]

On this 16th day of the month of January, in the year 1809, personally appeared before me, the undersigned, a justice of the peace for the city of New Orleans, Monsieur Dominique Bouligny, formerly adjutant major of the regiment of Louisiana, in the service of His Catholic Majesty, and now a member of the Legislature of the Territory of Orleans, who, being duly sworn on the Holy Bible, did depose and say, that, in the year 1795, as well as he can remember, he exercised the functions of adjutant major in the regiment of Louisiana, and was commissioned by the Governor the Baron de Carondelet to conduct the trial of one Pepillo, who was accused of having been one of the authors of the death of Mr. Henry Owens, who had been assassinated in the Ohio on the American territory, and of the robbery of a sum of money, of which this Mr. Owens was the bearer to General Wilkinson, and which had been delivered to him by the Spanish Government; and he further declared, that it was public and well known among the officers under the Spanish Government, that General Wilkinson was a pensioner of the Spanish Government, and that the major part of the people in office believe that there was no reliance to be placed on the promises which the General made to the Government, because they could not persuade themselves that his influence could not induce the people of the Western States to separate from the American confederation.

D. BOULIGNY.

Sworn to, and affirmed before me.

No. 9.

Mr. Power's deposition respecting the murder of Henry Owens.

Personally appeared before me, the undersigned, one of the justices of the peace in and for the city of Orleans, Mr. Thomas Power, who, being duly sworn, doth depose: that, in the year 1794, Mr. Henry Owens arrived at New Madrid from New Orleans, with a sum of money to be delivered to General Wilkinson, as the deponent understands and believes, from the Spanish Government; that he left New Madrid in the royal galliot Fleche, commanded by Francis Langlois, accompanied by a King's pirogue; the galliot destined to the mouth of the Ohio, from whence the deponent understood Owens was to proceed up the Ohio in the pirogue. And this deponent further saith that, some time after the departure of the said Owens, one of the crew of the pirogue, in which he had embarked at the mouth of the Ohio, returned to New Madrid, and gave information that Owens had been robbed and murdered by the rest of the crew, who had proceeded up the Ohio with their booty. And this deponent saith that, some time in the year 1795, this deponent being at New Madrid, Lieutenant Aaron Gregg, of the American army, arrived there, accompanied by a Mr. Charles Smith, and bearing a letter from Major Doyle, who then commanded at Fort Massac, to the commandant of New Madrid. The letter stated the following circumstances, which were confirmed both by Smith and Doyle to the deponent: that three of the murderers of Owens, after a variety of adventures, were confined, under General Wilkinson's orders, at Fort Washington; that, by his directions they were put in irons, and placed on board a flat, under the direction of Mr. C. Smith, to be conveyed to New Madrid; that a letter was given to him from Wilkinson to the commandant of Madrid, containing an order to pay $500 on the delivery of the prisoners; that Smith was proceeding with them, and attempting to pass Fort Massac by night, was stopped by Major Doyle, who commanded there, who would not permit them to be sent out of the territory of the United States to be tried for a crime committed in it. The letter, after stating these circumstances,

requested Captain Portell to send an interpreter to examine the prisoners, who spoke no English. Captain Portell requested the deponent to go on this service, which he undertook, and returned with Lieutenant Gregg and Mr. Smith; the latter having presented his order for the $500, the payment of which was refused, as the prisoners were not delivered. On this deponent's arrival he found three of the boat's crew who had gone up with Owens. On the first examination they confessed the fact of having murdered and robbed him; and they gave to the deponent a circumstantial detail of their adventures afterwards. A few days afterwards the deponent went to Louisville with Lieutenant Gregg and Mr. Smith, for the purpose of interpreting for the prisoners, who were there delivered to a justice of the peace, Captain Harrison, who transmitted them to another at Bairdstown, Captain Frye; but the men denying the fact before the justices, they were detained for further evidence. And this deponent saith, that he did not divulge to the justices the confessions made by the prisoners to him, because he knew it was the wish of the Spanish officers to have the men delivered to them rather than tried in the Territory of the United States; and that such wish arose from a fear of divulging the secret of Owens's mission on a public trial. And this deponent saith, that he left the prisoners at Bairdstown, and afterwards understood they had been sent to Frankfort, where they were afterwards discharged for want of evidence: and further this deponent saith not.

THOMAS POWER.

Sworn and subscribed before me, in New Orleans, the 18th March, 1809.

No. 11.

Miller's deposition about Collins.

Personally appeared before me, the undersigned, one of the justices of the peace for the city of New Orleans, Mr. William Miller, of the county of Rapides, in the Territory of Orleans, who, being duly sworn on the Holy Evangelists of Almighty God, did depose and say, that, some time shortly after the hurricane which happened in this country, in the month of August, of the year 1794, he chartered and fitted out, in company with Mr. Robert Cochran, of Natchez, a small vessel in the bayou St. John, near this city, in which they both sailed for Pensacola and New Providence, and at that time he formed an acquaintance with Mr. Joseph Collins, who, shortly before, arrived in this city with a Mr. Owens, from the Ohio. The said Collins was then occupied in fitting out a small vessel in the bayou St. John, in which was shipped a sum of money, as Collins informed the deponent, amounting to upwards of six thousand dollars, which he, said Collins, had received from the Spanish Government, for account of General Wilkinson; and he also informed this deponent, that a sum of nearly equal amount had been delivered to Mr. Owens, for the same purpose, with which he returned by way of the river; and this deponent further declares, that this step occasioned, at the time, much surprise, as it was contrary to law to ship cash, and subject to seizure and confiscation when discovered; and this deponent further declares, that the said Joseph Collins set sail a short time before him, with the aforesaid money on board his vessel, as said Collins informed this deponent; and he afterwards learned that he had arrived therewith, in safety, at the port of Charleston.

WM. MILLER.

Juré par devant moi ce jour onzième du mois de Mars, mil huit cent neuf.

DU COURNAUX, *Juge de Paix.*

(A.)

Letter from Joseph Collins to Daniel Clarke, respecting the receipt of the money from Don Gilberto Leonard.

DEAR SIR: PASCAGOULA, *March* 10, 1809.

I returned yesterday from Mobile and Pensacola, and found your letter of the 19th of February last, requesting me to send you the date I received the money from Don Gilberto Leonard, in New Orleans; therefore, have had recourse to my journal round the Florida point. I find that we left bayou St. John on the 22d of August, 1794, and must have received the $6,334 about the 19th or 20th of August, the same month.

I am your very humble servant,

JOSEPH COLLINS.

Mr. DANIEL CLARKE.

THOMAS PORTELL.

No. 15.

T. Power to T. Portell.

NUEVA MADRID, 27 *de Junio*, 1796.

Haviendo recivido instrucciones verbales del Sr. Don Jayme Wilkinson, General Americano, de hacerme cargo del dinero, que, por una carta que recibió del secretario del gobierno Don Andrés de Lopés Armesto, con fecha: del siete ú ocho de Marzo ulto. de que fuí portador, tiene aviso de que está depositado en este puesto, y enterado por el oficio que vmd. ha recibido sobre este asunto del sr. Gober. Genl. de la provincia, de que me dará vmd. copia, que dicho dinero no se debe entregar sin orden expresa de dicho caballero Wilkinson, me veo precisado referir por menudo algunas particularidades, para allanar y remover la dificultad que presenta la falta de la orden por escrito de parte del citado Genl. Wilkinson. Aúnque esta relacion pueda parecer abuso de la confianza de que me han honrado el sr. Gober. Genl. de la provincia, el sr. Gober. de Natchez y particularmente el Genl. Wilkinson, estoy persuadido que la urgencia del caso que se ofrece me servira de disculpa y justificacion. Vmd. no ignora que estando el sor Don Manuel Gayoso de Lemos aquí en el mes de Setiembre del año po. po. me confió unos pliegos de la mayor importancia pa. el Genl. Wilkinson los que llevé à Cincinnati; y estúve de buelta con las respuestas en el mes de Noviembre: por orden del dicho sr. Don Manuel Gayoso, hize immediatamente otro viage en la Bella Rivera, y subí hasta Red Banks, en busca del caballero Sebastian quien víno con migo hasta la embocadura del Ohio, donde encontramos al sr. Gober. de Natchez. A fin de Deciembre fuí con este señor á Natchez y de allí pasé á la Nueva Orleans. El objeto principal de mi baxada á la capital, fue el hacerme cargo, por orden del Genl. Wilkinson, del dinero que vmd. en la actualidad tiene en deposito para él: lo que manifiestan las cartas que escrivió á los Srs. Gobernadores de esta provincia y de Natchez. Pero á mi llegada ya havia salido el dinero en una de las galeras de S. M. para este destino; lo que súpe del sr. Barón de Carondelet, el sr. Yntendente y Don Andrés de Armesto. Y repetidas veces traté sobre este asunto con los dos ultimos Srs. instando con fuerza sobre la necessidad de embiar azucar, cafe, y polvora á la Nueva Madrid, para componer una cargazon para llevar al Kentucky con el dinero de Wilkinson; ocultando de este modo la verdadera intencion del viage y dandole la apariencia de una especulacion comercial. Todo esto, ya lo havía representado Wilkinson, como indispensable pr. muchos motivos; particularmente para precaver una disgracia, semejante á la que ya havía ocurrido. Enfin el secretario me dixo que la barca en que subió el oficial Americano Don Aaron Gregg estaba destinada para este servicio; y que en quanto á la tripulacion, vmd: me permitiriá escoger entre los Criollos, vecinos de este Puesto, los que me parecíeran mas dignos de confianza. De modo que sali de la Nueva Orleáns con la certitud de que á mi buelta á este puesto hallariá todo dispuesto conforme á lo que acabo de referir. En llegando á Greenville, dì parte al Gen. Wilkinson de las providencias, que, no dudava, se havian tomado, de lo que ha resultado que ha quedado con la creencia, asi como yo, de que todas las disposiciones pa. desempeñar este servicio con felicidad, se habian executado. No puedo comunicar todos los motivos porque no me ha dado W. una orden por escrito; pero una de ellas era, que no sabiá la cantidad de dinero que vmd. tenía para entregar á su orden; los Srs. Gobernadores no haviendole escrito ni una palabra sobre el asunto; y solo el secretario le dice en su carta, que su dinero está depositado en el Nueva Madrid, sin expresar la cantidad. En las esquelas en cifra del Gen. W. para los Srs. Gobernadores, que van inclusas, les dice que me ha embiado á buscar el citado dinero, advertiendo á vmd. que la del numero 1 es pa. el sor. Gobernor Gen. de la provincia, y la de no. 3 pa. el Sr. Don Manuel Gayoso. Añadiré que el Gen. W. quando le representé que el presentarme sin orden suya por escrito, podria originar alguna dificultad, me autorizó, si lo exîgiera el caso de escribir una orden para que vmd: me entregára su dinero de èl, especificando la cantidad que hubiera, firmando en su nombre, y dandole á vmd. un recivo por lo expresado. No puedo omitir que el encargo del Gen. W. ha sido tan instante, tan urgente que se ha extendido hasta limitar mi buelta á mi destino al primero de Agosto: de loque le entero á vmd. para que procúre no dilatar este servicio. Los embarazos del Gen. W. creo que no los ignora el sr. Gober. Gen. ni tampoco puede ra ignorar que hai muchissimo tiempo que está esperando este dinero; cuyo atraso le ha causado mucho desabrimiento, enredandole en incomodidades grandes: y le puedo asegurar á vmd. confidentemente que quedará disgustadissimo con qualesquer dilacion en esta expedicion; lo que podrá acarrear un perjuicio grave. En quanto al mode de llevar el dinero es evidente que el llevarlo abiertamente seriá demasiado escandaloso; por no decir que seria demencia. El exito, funesto de la expedicion del desdichado Don Enrique Owens, nos debe servir de almenara para no perdernos sobre el mismo escollo, y para tomar otro rumbo menos peligroso. Quisiera meter un saco de mil pesos en un barril de café ó de azucar, de modo que, aúnque la diferencia dela gravedad respectiva de la plata á la del azucar ó café sea muy grande, la cantadid siendo tan corta, no se dexará facilmente conocer. Será tambien prudente llevar algunos barriles sin dinero, para poder venderlos antes de llegará Cincinnati, si se offreciere el caso, que se presente alguien que quiera comprar de estos efectos, porque no venderlos quando se pudiera hacer con ventaja, seria excitar sospechas, y para completar el disfraz, seria bueno llevar cierta cantidad de polvora y aguardiente de caña. Si estas disposiciones le parecieren á vmd. defectuosas, le suplico haga las alteraciones que sean de su agrado. Dios guarde á vmd. muchos años.

THOMAS POWER.

Sr. DON THOMAS PORTELL.

No. 15.

Translation of a letter from Thomas Power to Don Thomas Portell, commandant of New Madrid, dated June 27, 1796, at New Madrid.

Having received verbal instructions from Mr. James Wilkinson, the American General, to take charge of the money, which, by a letter he received from the Secretary of the Government, Don Andres Armesto, under date 7th or 8th March last, of which I was bearer, he has advice, is deposited in this post, and being informed by the official letter which you have received on this business from the Governor General of the province, of which you will be pleased to furnish me a copy, that said money is not to be delivered without an express order from the said Mr. Wilkinson, I find myself forced to relate circumstantially some particulars to smooth and remove the difficulty, which the want of a written order, on the part of the aforesaid General Wilkinson, presents. Although this relation may appear an abuse of the confidence with which the Governor General of the province and the Governor of Natchez, and particularly General Wilkinson, have honored me, I am persuaded that the urgency of the case which offers will serve me as an excuse and justification. You are not ignorant of the fact, that Don Manuel Gayoso de Lemos, being here in the month of September, of the year last past, intrusted to me some despatches of the greatest importance for General Wilkinson, which I carried to Cincinnati, and I returned with the answers in the month of November. By order of the said Don Manuel Gayoso, I made immediately another journey in the Ohio, and I ascended it to Red Banks, in search of Mr. Sebastian, who came with me to the mouth of the Ohio, where

we met with the Governor of Natchez. At the end of December I accompanied this gentleman to Natchez, and I went thence to New Orleans. The principal object of my going down was to take charge, by order of General Wilkinson, of the money which you have now in deposite for him, which is shown by the letters which he wrote to the Governors of this province and of Natchez; but, at my arrival, the money had been already sent off in one of his Majesty's galleys for this place, which I learned from the Baron de Carondelet, the Intendant, and Don Andres de Armesto. I repeatedly treated on this business with the two last of these persons, urging forcibly the necessity of sending sugar, coffee, and powder, to New Madrid, to form a cargo to take to Kentucky with Wilkinson's money, hiding by this means the true intention of the voyage, and giving it the appearance of a commercial speculation. All this Wilkinson had before represented as indispensable, for many reasons, particularly in order to avoid a misfortune similar to that which had already occurred. At last the Secretary told me that the barge in which Mr. Aaron Gregg, the American officer, was to go up, was destined for this service, and that as for the crew, he would permit me to choose among the Creoles, residents in this post, those who might appear to me most worthy of confidence; so that I left New Orleans, with the belief that, at my return to this post, I should find every thing disposed conformable to what I have just related. On arrival at Greenville, I informed General Wilkinson of the steps which I had no doubt had been taken, from whence has resulted that he, like myself, was impressed with the belief that all the measures for executing this service with success had been taken. I cannot communicate all the motives why Wilkinson has not given me an order in writing, but one of them was, that he did not know the sum of money which you had to deliver to his order, the Governors not having written a word to him on the subject, the Secretary only saying that his money was deposited in New Madrid, without expressing the sum. In the letters in cipher from General Wilkinson for the Governors, which are here enclosed, he tells them that he has sent me to bring the aforesaid money, informing you that the No. 1 is for the Governor General of the province, and the No. 2 for Don Manuel Gayoso. I will add that General Wilkinson, when I represented to him that on presenting myself without his order in writing, some difficulty might arise, authorized me, if the case required it, to write an order that you should deliver his money, specifying the sum there might be, signing it in his name, and giving you a receipt therefor. I cannot omit that the commission of General Wilkinson was so sudden, so urgent, that it was extended even to limiting my return to my destination by the first of August, of which I advise you that you may endeavor not to delay the service. I believe that the Governor General is not ignorant of the embarrassments of General Wilkinson, nor can he be ignorant that, for a long time past, he has been expecting this money, the delay of which has been the cause of much trouble to him, involving him in great difficulties; and I can assure you confidently, that he will be very much disgusted with any delays in the expedition, which might be productive of serious injury. As for the mode of carrying the money, it is evident, that to take it openly would be too scandalous a thing, if I were not to say that it would be madness. The unhappy result of the expedition of the unfortunate Henry Owens ought to serve us as a beacon, in order not to lose ourselves on the same rock, and to make us take another course less dangerous. I would wish to put a bag of one thousand dollars in a barrel of coffee or sugar, so that, although the difference of the respective gravity between silver, sugar, and coffee, be very great, the quantity being so small it will not be easily known. It will likewise be prudent to carry some barrels without money, in order to sell them before arriving at Cincinnati, if it should so happen that any one should offer to buy these goods; because, not to sell them, when it might be done to advantage, would excite suspicion; and to complete the disguise, it would be well to take a certain quantity of powder and rum. If these dispositions should appear defective, I beg you to make such changes as may be to your mind. God preserve you many years.

THOMAS POWER.

To Don Thomas Portell.

Thomas Portell to Thomas Power.

Nueva Madrid, 27 *de Junio*, 1796.

Bien examinado el contenido de su papel de vm. con fecha de oy, digo que me conformo en un todo à quantas reflexiones me pone vm. à la vista, y aunque al primer golpe de ojo paresca que devo esperar la desicion del Sr. Gobernador General, segun lo que me siñe en su oficio de 20 de Enero del corriente año, y de que incluio à vm. la copia que me pide, las circunstancias que vm. expone son tales que nada me dexan que hacer mas que decir à vm. me remita una nota del numero de libras de café, azucar, barriles, en que colocar la polvora, y aguardiente de caña que necesitaria vm. para su expedicion; pues luego que la reciva lo aprontarè segun vm. lo desea, adbertido que de los efectos me firmarà vm. conocimiento de haverlos recivido, y del dinero un recivo como apoderado del General Wilkinson.

Para que la bercha estè pronta y segun vm. la necesita, he pasado oficio al teniente Coronel Don Vincente Folch, para que la remita con la brevedad posible, pues como nada me adbirtieron de lo que vm. me dice sobre ella, me la pidio para un asunto de servicio Don Francisca Langlois, y cargada de mais la llevò al fuerte de San Fernando, la que no han debuelto aunque la solicite, creido que pudiera ofrecerse aqui, haviendome contextado Don Vincente Folch que si no tenia orden para retenerla no havia para que remitirmela.

Quedan en mi poder las dos esquelas en cifra, que en primera ocasion segura remitiré con la distincion que vm. me hace: la del No. 1, al Sr. Gobernador General y la del No. 2, al Sr. Gobernador de Natchez.

En quanto à la colocacion del dinero y arreglo de barriles, luego que estos esten prontos entre vm. y yò se podrà hacer todo sin que se dé conocimiento á otro alguno.

Dios guarde à vm. muchos años.

TOMAS PORTELL.

Sr. Don Tomas Power.

Translation of a letter from Don Thomas Portell to Mr. Thomas Power, dated

New Madrid, *June* 27, 1796.

Having well considered the contents of your letter of this day, I mention that I agree in every thing to the whole of the reflections you place before me, and, although at first sight it appears that I ought to await the decision of the Governor General, as he prescribes to me in his official letter of the 20th January of the present year, and of which I enclose you a copy, which you request of me, the circumstances which you expose are such, that they leave me nothing more to do than to tell you to forward me a memorandum of the number of pounds of coffee, sugar, barrels in which to fill the powder and rum, you desire for your expedition; because, so soon as I receive it, I will get it ready as you desire, informing you that for the merchandise you must sign me an acknowledgment of having received it, and for the money, a receipt as the attorney of General Wilkinson.

In order that the barge may be ready, and as you may want it, I have written an official letter to the Lieutenant Colonel Don Vincente Folch, that he may send it as soon as possible; because, as nothing was said to me of what you have now mentioned respecting it, Mr. Francis Langlois asked it of me, for an affair of service, and took it loaded with corn to the fort of San Fernando, and it has not been returned, although I have required it, thinking it might be wanted here; Don Vincente Folch having answered me, that if I had not orders to keep it, there were none to return it.

The two letters in cipher remain in my hands, which I shall forward by the first safe opportunity, with the distinction you point out, No. 1, to the Governor General, and No. 2, to the Governor of Natchez.

As for packing the money, and arranging the barrels, as soon as they are ready, between you and myself all this may be done without any one else acquiring a knowledge of it. God preserve you many years.

THOMAS PORTELL.

To Don Thomas Power.

No. 17.

Mr. Power's deposition respecting the payment of $9,640 to General Wilkinson.

Personally appeared before me, the undersigned, one of the justices of the peace in and for the city of New Orleans, Mr. Thomas Power, who, being duly sworn, saith: That some time in the month of June, in the year of our Lord, 1796, he arrived at New Madrid, after having had several conferences with General Wilkinson, by order of the Baron de Carondelet, on the subject of a proposed separation of the Western country from the United States, under the protection, and by the aid, of Spain; that he was sent to New Madrid by General Wilkinson, for the purpose of taking charge of a sum of money, which he had brought notice to the General was lying there for him, from the Baron de Carondelet; that, on his first demanding the same in the name of General Wilkinson, Captain Portell, the commandant, refused to deliver it without a written order; and that, as he had none, he was obliged to write a letter to Captain Portell, entering into all the details which were necessary to show him, that he, this deponent, was acquainted with the object of sending the said money; that the said Portell wrote him an answer, agreeing to deliver him the sum of money in question for General Wilkinson, and, at the same time, sent him a copy of the order from the Baron de Carondelet, which accompanied the delivery of the money to him, Portell; that the said letter and answer are dated the 27th June, 1796, and the said order from the Baron de Carondelet is dated the 20th January, in the same year, and are the documents which have been laid before Congress by John Randolph and Daniel Clarke, Esquires. And this deponent saith that, by virtue of the arrangement made by the said letters, he received from Don Thomas Portell the sum of $9,640, which he packed up in barrels of sugar and coffee, and was proceeding up the Ohio with the same, when he was stopped and searched by Lieutenant Steele; that, in consequence of this interruption, he landed his cargo at Louisville, and went on horseback to Cincinnati, where he met General Wilkinson, and informed him of the circumstances that had occurred, on which the General directed him to deliver the dollars to Philip Nolan, which the deponent did; that the said Nolan conveyed the barrels of sugar and coffee, in which the dollars were packed, to Frankfort, where the deponent saw them opened, in the store of Mr. Montgomery Brown; that the sum of $9,000 was given by General Wilkinson's direction to Philip Nolan, and the remainder, $640, was retained by the deponent, with the General's consent, for the purpose of paying expenses, but which he gave directions to secure for him from the Spanish Government, in the settlement of his account. And this deponent further saith, that he sold the sugar and the coffee, in which the dollars were packed, to Mr. Abijah Hunt, of Cincinnati. And this deponent further saith, that when he afterwards saw General Wilkinson, and informed him that he had delivered the money agreeably to his orders, he said it was well. And further this deponent saith not.

THOMAS POWER.

Sworn and subscribed before me, in New Orleans, the 18th March, 1809.

E. FITCH, *Justice of the Peace.*

Interrogatories for A. Ellicott.

General Washington.

1. Were General Washington's instructions to you to scrutinize my conduct, written or verbal?
2. In speaking of certain citizens of the United States, connecting themselves improperly with the Spanish Government, did General Washington state to you the grounds and nature of his suspicions, and the objects which such persons might have or had in view in such associations with the Spanish Government?
3. Do you recollect what other names besides General Wilkinson's were mentioned on that occasion, by General Washington?
4. Did you feel yourself bound by that engagement to act as a spy on General Wilkinson's conduct; and in what manner did you fulfil it? Did you ever report General Wilkinson for any illegal act, or any illicit connexion?
5. Did General Washington, by word or manner, express to you any serious apprehension of dangerous consequences to the Union, from the disaffection mentioned to you?
6. When and where did you become acquainted with Philip Nolan?
7. What was his general character, and did he not render you services on your route down the Mississippi, to Natchez, as a commissioner of limits?
8. Was he not zealously attached to the United States, and do you not think he would have supported the interest of the United States at every hazard of life and property, against any power whatever?
9. Did you ever converse with him respecting General Wilkinson's connexion and intercourse with the Spanish Government of Louisiana? State every thing concerning the same: whether the said Nolan did not explain to your satisfaction the nature of that intercourse to be commercial, and whether you have not expressed this circumstance to others?
10. Did not the said Nolan inform you that General Wilkinson had been playing a deceptive game with the Spaniards? and do you not know that a deceptive policy and fictitious appearances were necessary with the Spanish Government, to protect Nolan's political or commercial enterprises in Louisiana?
11. Did he ever communicate to you any plan he had projected, to save the district of Natchez, if it had been attacked by the Baron of Carondelet, by seizing that officer when on a reconnoitring party, and bearing him off to the people of the district?
12. Do you know Thomas Power, and what has been your opinion of his character?
13. Did he ever inform you that General Wilkinson held any illegal connexion with the Spanish Government?
14. Did he ever, by letter, attempt to prejudice you against General Wilkinson, and what was the effect?

15. From whom did you receive the minute information of Power's mission to the States of Kentucky and Tennessee, and the objects of that mission, and that he was instructed by the Baron of Carondelet not to return without seeing General Wilkinson?

16. Was Power apprised of your knowledge of his mission to Kentucky and Tennessee, and that he was to see General Wilkinson?

17. Have you not declared that you considered Thomas Power the enemy of General Wilkinson, and that he would leave nothing undone, to his injury, which art, duplicity, and intrigue, could effect?

18. Did you not also declare, in 1800, that you knew Power was not the friend of General Wilkinson, and that he was a man of duplicity?

19. Did you communicate to the Government all the particulars you had learned, respecting Power's mission to Kentucky and Tennessee, in June, 1797; and under what date was your communication made?

20. Did you understand the interview Power was ordered to seek with General Wilkinson was for any sinister purpose, or relative to the execution of the treaty of friendship, limits, and navigation?

21. Who were those confidential persons in Kentucky and Tennessee, to whom you exposed the objects of Power's mission, and what the particulars of those expositions?

22. Did you ever hear Power speak of General Wilkinson's tobacco concerns at New Orleans, or say that the Spanish Government was indebted to him on that score?

23. To whom was the letter of Gayoso, which fell into your hands in November, 1798, addressed; and by whom was it delivered to you, and what were the particular contents of it?

24. What other names besides General Wilkinson's were mentioned in that letter of Gayoso, and for what reasons do you presume it to be in the hands of D. Clarke and T. Power?

25. What effect did this letter of Gayoso then produce on your mind relative to the character and conduct of General Wilkinson?

26. Are you certain that it was Gayoso's letter that you saw? and did you not see another letter about the time that Gayoso's fell into your hands, which appeared to be designed to injure General Wilkinson?

27. How did your conversation respecting General Wilkinson commence with Mr. Portell? was it at your instance or at his, and for what purpose?

28. Who were the other gentlemen named by Captain Portell to have received money from the Government of Spain, by the same boat which carried money to General Wilkinson, and who were considered pensioners of that Government?

29. Did you understand how Captain Portell came to discover that the money sent to General Wilkinson was not on account of any commercial transaction?

30. Did you communicate the particulars of this information to the Government, and at what time, and in what manner? if not, through what motives did you withhold it from the Government?

31. Wherefore were you so particular in noting the precise sum of money which Portell informed you he had transmitted to General Wilkinson?

32. What impression did this information make on your mind respecting General Wilkinson? did it, at that time, affect your confidence in him?

33. Is not that Portell the same who gave up a military post to Bowles and a party of Indians, through treachery or cowardice? and has he not been dishonored for his conduct by the Spanish Government?

HUTCHINS.

34. Did not Daniel Clarke, Jun., of New Orleans, intercept a private letter from the late Colonel Anthony Hutchins to his agent in London, and furnish you a copy of the same?

35. Was not the said letter under seal, and was not the seal broken? Did not the said Clarke transmit the said letter, or a copy of it, to his uncle, Colonel Daniel Clarke, of the Mississippi Territory, and did he not afterwards publish the same, with a view to injure the writer?

36. Have you not declared that the interception of Colonel Hutchins's letter was to satisfy your "inquiries which were intended to serve your country," and had you no other motive?

37. Had not Hutchins represented you to be in the Spanish interest, and did not you desire to employ the intercepted letter to counteract his representations?

38. Were you not intimate with Hutchins when you first reached Natchez? Had you not afterwards a bitter animosity against him, and did not you report him to the Government as a British pensioner, and an enemy to the United States?

General questions.

39. Have you not declared, in New Orleans, that almost all of your own, and General Wilkinson's enemies, were becoming Spaniards?

40. Have you not declared a large proportion of the inhabitants of the Mississippi Territory to be a set of the most abandoned, malicious, deceitful, plundering, horse-thieving, rascals on the continent?

41. What was your opinion of General Wilkinson, as he descended the Mississippi, and before he reached Loftus Heights, the site of Fort Adams, in 1798?

42. What was your opinion of his official conduct, and his attachment to his country, after his arrival at Loftus Heights?

43. What were your ideas of his merits in the year 1800? and did not you express pleasure on seeing him restored at that time to the command of our armies?

44. Did not you confide to General Wilkinson, without reserve, your plans and movements, and give him information of high importance, public and personal, whilst engaged on the line of demarcation?

45. Did not you consider General Wilkinson's presence in command, at our Southern frontier in the Mississippi, necessary to the public service, in the years 1799 and 1800, and have you not expressed this sentiment?

46. From your correspondence with General Wilkinson, and observations on his conduct, did you not consider him attached to the interests of his country, and faithful to the trust reposed in him?

47. As far as your own knowledge and observation have extended, have you not considered General Wilkinson, as a military man, patriotic, zealous, active, and faithful in the discharge of his high duties?

48. Do you know, or have you heard of any specific act of General Wilkinson's, calculated to injure his country, or its Government?

49. Has any person, since the conspiracy of Colonel Burr was exposed, applied to you for information respecting General Wilkinson's intercourse or connexion with the Spanish Government? Be pleased to state what passed on these occasions.

50. Has no person applied to you, since Mr. Daniel Clarke's information to the House of Representatives criminating General Wilkinson, for such information as you might possess on the subject, and who was the person or persons?

51. Be pleased to state how it happened that you furnished Daniel Clarke a copy of your letter to General Wilkinson for publication, without the General's letter which produced it; and is your letter, as published, a faithful copy of that you wrote the General, and of that you transmitted to Mr. Clarke?

52. Did you expect that the publication of this letter would serve Mr. Clarke, or injure General Wilkinson?

53. From whom did you receive the information, to which you refer, in October, 1797?

54. At what time did Mr. Power advise you he had carried a sum of money and despatches to General Wilkinson up the Ohio?

JAMES WILKINSON.

J. YEATES,
ANDREW ELLICOTT.

No. 19.

A. Ellicott's deposition.

PENNSYLVANIA, BOROUGH OF LANCASTER, *ss.*

Before me, Jasper Yeates, one of the associate judges of the supreme court of the commonwealth of Pennsylvania, came Andrew Ellicott, of the borough of Lancaster, and, being duly affirmed according to law, saith: That, before he, this affirmant, left the city of Philadelphia, in the year 1796, as commissioner on behalf of the United States to carry into effect the Spanish treaty, President Washington communicated confidentially to this affirmant that suspicions had been signified to him of certain citizens of the United States improperly connecting themselves with the Spanish Government, among whom General Wilkinson was mentioned, and requested this affirmant to pay attention to that subject, but in as private a manner as possible, to prevent the increase of suspicions, perhaps ill-founded.

On this affirmant's arrival at Cincinnati, he was informed that General Wilkinson had had several interviews (some of them private) with a Spanish agent or spy, known by the name of Thomas Power, who, it was asserted, had taken a considerable sum of money into the State of Kentucky. This information appeared, at that time, to merit so little attention, that this affirmant made no communication of it to Government.

Immediately on the arrival of this affirmant at Natchez, he heard the common report in that district, from Green Hutchins and others, of General Wilkinson's being in Spanish pay, but those reports made no impression on the mind of this affirmant: the doubts and suspicions of Colonel Bruin and the late Daniel Clarke had some influence, but never so much as to be the subject of a communication.

About the latter end of May, or beginning of June, 1797, this affirmant was made acquainted with an intended and private mission of the before-mentioned Thomas Power to the States of Kentucky and Tennessee, to induce a separation from the Union; and that he was instructed by the Governor General, the Baron de Carondelet, not to return without having an interview with General Wilkinson. Mr. Power left Natchez, for the purpose above mentioned, on the 5th of June, 1797, which this affirmant believes is the date of his communication to the Department of State on that subject. The information respecting the mission of Mr. Power this affirmant suspects was had from some person employed about the office of the Baron de Carondelet.

In October, 1797, this affirmant received, and probably from the source before mentioned, the outlines of a plan for dismembering the United States, in which the name of General Wilkinson is mentioned as one of the principals. This affirmant was likewise informed that the correspondence between General Wilkinson and the officers of His Catholic Majesty was carried on by cipher, and deciphered by the aid of a pocket dictionary. This circumstance, the affirmant apprehends, is mentioned in his communication in cipher to the Department of State, on that subject, bearing date the 14th day of November, 1797.

In the beginning of November, 1798, a confidential letter of Governor Gayoso's fell into the hands of this affirmant. In that letter, General Wilkinson and several others are mentioned as having been in the pay and interest of Spain. The interesting parts of that letter were reduced by this affirmant to cipher, and accompanied his despatches of the 8th of the month above mentioned, to the Department of State.

About the 16th of October, 1799, Captain Portell, of the royal armies of Spain, who then commanded at Apalachy, informed this affirmant, that at New Madrid, in the year 1796, he put on board a boat, under the direction of Mr. Thomas Power, nine thousand six hundred and forty dollars, for the use of General Wilkinson. This affirmant questioned him whether this money was not on account of some mercantile transaction; he declared it was not. This affirmant entered the nine thousand six hundred and forty dollars on a paper, (now in the possession of this affirmant,) and handed it to Captain Portell, who told this affirmant it was correct.

The witness, being cross-examined by General Wilkinson, saith, on his affirmation, that the instructions of President Washington, before mentioned, to him, were verbal and not written.

To the second interrogatory he answers in the negative.

To the third interrogatory he answers, that the names of Mr. Sebastian and Mr. Brown (not Senator Brown) were also mentioned, on that occasion, by the President to him; and that he was required to examine into the conduct of La Chaise, Volney, and Collet, if he should happen to fall in with them, or either of them.

To the fourth interrogatory he answers in the negative; and that he made no other reports than, as before stated, from the information given to him.

To the fifth interrogatory he answers in the negative, according to the best of his recollection.

To the sixth interrogatory he answers, that he became acquainted with Philip Nolan about the beginning of January, 1797, at the confluence of the rivers Mississippi and Ohio.

To the seventh interrogatory he answers, that Nolan's general character was good, as far as he knew, and that he rendered essential services during the mission.

To the eighth interrogatory he answers in the affirmative.

To the ninth interrogatory he answers that he is strongly inclined to believe that Nolan mentioned to him that the intercourse and connexion of General Wilkinson with the Spanish Government was commercial; and that this made considerable impression on his mind; but he cannot recollect whether or not he has expressed this circumstance to others.

To the tenth interrogatory he answers in the negative, so far as respects General Wilkinson; but that Nolan told him that a deceptive policy and fictitious appearances were necessary, on his part, to protect his enterprises in Louisiana.

To the eleventh interrogatory he answers in the affirmative; and that he made a communication on that subject to the Department of State.

To the twelfth interrogatory he answers, that he knows Thomas Power, and that his general character is bad, so far as he knows, and verily believes.

To the thirteenth interrogatory he answers in the affirmative; and that Power told him when Lieutenant Steel took possession of his boat on the Ohio, that he had despatches and money on board for General Wilkinson, but that the witness paid so little regard thereto, that he did not deem it worthy of communication.

To the fourteenth interrogatory he answers in the negative; and that communications from him would have produced no effect whatever.

To the fifteenth interrogatory he answers, that he does not know from whom he received information of Power's mission; but if he be allowed to express his suspicions, he suspects it was forwarded by Daniel Clarke, who, however, never conversed with him on that head.

To the sixteenth interrogatory he answers in the negative.

To the seventeenth interrogatory he answers in the affirmative.

To the eighteenth interrogatory he answers, that he cannot particularly recollect, but thinks it highly probable.

To the nineteenth interrogatory he answers in the negative; that he neither had time nor deemed it material. The date of the communication was June 5, 1797.

To the twentieth interrogatory he answers in the negative.

To the twenty-first interrogatory he answers that, among others, he exposed the objects of Power's mission to Colonel Rankin, of Kentucky, and Colonel Henly, the agent of the board of war in Tennessee.

To the twenty-second interrogatory he answers in the negative.

To the twenty-third interrogatory he answers, that Gayoso's letter was addressed to Thomas Power, but cannot tell who delivered it to him; that the same was intercepted by means used by the witness, but he declines being more particular as to those means, as his answers may tend to criminate himself. He communicated the particular contents to the Department of State confidentially, and has no objection to the injunction of secrecy being taken off.

To the twenty-fourth interrogatory he answers, by referring to his communication; and that he presumes the letter to be in the hands of Power, from being addressed to him; and, from the connexion between Clarke and Power, the latter may have handed it to the former.

To the twenty-fifth interrogatory he answers that this letter produced more effect on his mind than all his previous information; but that whatever plan had been in contemplation it had been abandoned.

To the twenty-sixth interrogatory he answers, that he is certain it was Gayoso's letter, and saw no other.

To the twenty-seventh interrogatory he answers, that the conversation with Portell arose at the instance of witness.

To the twenty-eighth interrogatory he answers that Portell, among others, named Lackasang, Sebastian, and Brown, (not the Senator) as pensioners of the Spanish Government.

To the twenty-ninth and thirtieth interrogatories he answers in the negative; and he did not communicate the particulars to the Government, in consequence of a letter which he received from Timothy Pickering, the then Secretary of State, directing him not to forward it.

To the thirty-first interrogatory he answers, that he was particular in noting the precise sum of money transmitted to the General, because the precise sum had been mentioned to him.

To the thirty-second interrogatory he answers, that the information somewhat affected his confidence in General Wilkinson.

To the thirty-third interrogatory he answers, that this same Portell gave up a military post to Bowles: whether he was dishonored by the Spanish Government he knows not.

To the thirty-fourth interrogatory he answers, that he knows nothing of the intercepting the letter in question; but it was laid before him at the house of Daniel Clarke, where he lodged, either by Major Minor, Nolan, or Clarke.

To the thirty-fifth interrogatory he answers, that the seal of the letter was broken: as to the rest he knows not.

To the thirty-sixth, thirty-seventh, thirty-eighth, thirty-ninth, and fortieth interrogatories, he answers, severally, in the affirmative.

To the forty-first interrogatory he answers, that he did much business with General Wilkinson of a public nature, and as far as he saw or observed him, his conduct was that of a good citizen of the Union, a soldier, and a gentleman; and, in answer to the forty-second interrogatory, and also to the forty-third, he said his opinion of him continued favorable as above.

To the forty-fourth interrogatory, and also to the forty-fifth, forty-sixth, and forty-seventh, he answers in the affirmative.

To the forty-eighth interrogatory he answers in the negative, further than he has above declared.

To the forty-ninth and fiftieth interrogatories he answers, that no person applied to him for information on the subjects before mentioned, unless Mr. Daniel W. Coxe, of Philadelphia, who called on him in the month of January last, and told him the affair between General Wilkinson and Clarke was becoming very serious, and asked him if he was willing to take a trip to Washington, to which the witness answered in the negative: He inquired where Isaac Wayne, Esq., the son of General Wayne, lodged, and was told. The interview did not last above fifteen minutes; the room being full of company at the time.

To the fifty-first interrogatory he answers, that he can give no reason for his sending to Mr. Clarke the copy of his letter to General Wilkinson, without a copy of the letter from the General which produced it; that Mr. Clarke was informed, in the first instance, that it was not intended for publication, but, in a subsequent letter, he was told that it might be used before the court of inquiry if it could throw any light on the transactions: he had no intent to injure General Wilkinson thereby, in answer to the fifty-second interrogatory.

The fifty-third interrogatory is answered before, and as to the last, he saith, that it was at the time they were operating on the line in that country, and after General Wilkinson had come into that country.

ANDREW ELLICOTT.

The foregoing deposition, contained in eight pages, and subscribed by Andrew Ellicott and myself, together with the interrogatories therein referred to, was duly taken on the 22d May, 1808, before me,

J. YEATES.

Mr. Power's deposition respecting his correspondence with Gayoso, Carondelet, and Don Andres Armesto.

Personally appeared before me, the undersigned, one of the justices of the peace in and for the city of New Orleans, Mr. Thomas Power, who being duly sworn, doth depose: that the several papers hereunto annexed are the original draughts of letters written to the several persons whose addresses are thereto respectively annexed, and that copies of them were sent at, or immediately after, the times of their respective dates, to the persons to whom they were addressed, and that the facts contained in them are true.

To Governor Carondelet a letter, dated at New Madrid, June 27, 1796.

To Governor Gayoso a letter, dated at New Madrid, June 27, 1796.

To Governor Carondelet a letter, dated New Madrid, January 3, 1797.
To Governor Gayoso a letter, dated New Madrid, January 3, 1797.
To Governor Carondelet a letter, dated Natchez, June 4, 1797.
To Don Andres Armesto, Secretary of the Government of Louisiana, a letter, dated Natchez, June 4, 1797.
To Governor Gayoso a letter, dated at New Orleans, December 5, 1797.

And this deponent further states, that the last mentioned letter, written by him to Governor Gayoso, was his report concerning the mission on which he had been sent by the Baron de Carondelet to General Wilkinson and others, as stated in the Baron's letter to him, the deponent, dated May 26, 1797, which report was made to Governor Gayoso, as successor in the Government of Louisiana, to the Baron de Carondelet, who was appointed to, and departed for, the Government of Quito, in the absence of the deponent, whilst employed on the before-mentioned mission.

THOMAS POWER.

Sworn and subscribed before me, in New Orleans, March 18, 1809,

E. FITCH, *Justice of the Peace.*

No. 20.

MONSIEUR: NOUVELLE MADRID, 21 *Juin*, 1796.

Je me suis rendu à ce poste hier après-midi. Comme ce n'est pas le moment à présent d'entrer dans les détails rélatifs à mon voyage avec le sieur S., ni de vous communiquer les observations sur les sujets auxquels vous m'avez si fortement recommandé de porter mon attention, je me bornerai simplement à vous faire le récit de la situation où je me trouve par rapport à la commission que m'a donnée ——— de me charger de l'argent que vous avez fait passer au commandant de ce poste, pour lui être envoyé.

Je suis arrivé a Cincinnati le 19 de Mai; ——— se trouvait alors à Greenville. Pour ne pas faire naître des soupçons, j'ai cru qu'il était prudent de ne point partir pour le quartier général sans avoir préalablement obtenu permission d'y aller du Général Wilkinson qui y commandait; cette permission ne m'est parvenue que le 31. Le 2 de Juin je m'y suis rendu, et j'ai remis à ——— les dépêches dont le sieur S. s' était chargé, et qu'il lui a été impossible de lui faire tenir d'une autre manière sans les exposer à tomber entre les mains de ses ennemis. Je lui ai répété les conversations que j'avais eues avec le M. l'Intendant et M. Don Andres au sujet de l'argent dont il est à présent question, et des moyens dont nous nous étions avisés pour le lui faire passer sans courir des risques, qui étaient que sous prétexte de faire un voyage de commerce, je devais remonter l'Ohio jusqu'à la chûte ou Cincinnati, avec une cargaison de sucre, café, poudre, &c. le tout en barils, chacun desquels devaient contenir une certaine quantité de piastres. Ces précautions lui ont paru si sages, qu'il m' a détenu le moins qu'il a pu, sans donner de l'ombrage, et m' a expédié avec des ordres verbals de recevoir du commandant de la Nouvelle Madrid l'argent qui était déposé entre ses mains pour lui, et de lui en donner un reçu. Lorsque je lui ai suggéré qu'il serait peut être necessaire que je présentasse au dit commandant un ordre de sa part, il m' a observé que ne sachant pas combien de piastres le dit commandant avait reçu pour être livrées à son ordre, il lui était impossible de spécifier la somme que je devais recevoir, ajoutant qu'il était surpris que M. Don Andrés ne lui eut pas marqué dans sa lettre (qui était la seule de toutes celles qu'il avait reçues dans laquelle il était fait mention de cet argent,) qu'elle était la somme qui avait été envoyée à la Nouvelle Madrid. "D'ailleurs," m'a-t-il dit, "je me trouve dans une position si critique, et suis environné de tant d'ennemis, que vous donner un ordre par écrit, ce serait m'exposer à me perdre infailliblement, et à faire manquer un projet auquel nous travaillons depuis tant d'années." Il m' a même autorisé, puisqu'il n'osoit me donner l'ordre par écrit, que je lui demandais, et que le commandant ne l'aurait pas compris s'il me l'eut donné en chiffre, d'écrire moi-même un ordre en son nom, et de le présenter au commandant, s'il arrivait qu'il fit des difficultés.

Hier, comme j'ai déja eu l'honneur de vous le dire, je me suis rendu ici, et ce matin j'ai fait application a Mons. le Commandant pour l'argent de ———; pour toute réponse, il m' a fait voir votre lettre officielle en date du 20 Janvier, 1796, dans laquelle vous lui donnez ordre de ne livrer les 9640 piastres qu'a celui qui se présenterait avec un ordre du dit ——— à cet effet. Alors je lui ai fait part de ce qui s'était passé entre ——— et moi; et pour lui donner une satisfaction complette, et le convaincre que j'avais la confiance de ——— et son ordre pour recevoir l'argent en question, j'ai cru qu'il était indispensablement de mon devoir d'entrer vis-à-vis de lui dans certains détails que dans toute autre circonstance je ne me serai pas permis. Je présume que Mons. Portell vous communiquera tout ce qui a eu lieu entre nous, avec une copie de la lettre que j'ai cru ne pas pouvoir me dispenser de lui écrire. J'espére, monsieur, que vous ne laisserez pas que d'approuver la conduite que j'ai tenue dans cette circonstance épineuse et embarrassante; et je vous prie d'être persuadé qu'elle a été réglée uniquement par le zèle actif qui m'anime pour le service du Roi, lequel, j'ose me flatter, m'attirera de plus en plus votre confiance.

La délicatesse me défend de vous tracer le tableau de la position de ———; l'exposé que je pourrais vous en faire en même temps qu'il vous affligerait vous convaincrait de la necessité des démarches que j'ai faites, ainsi que de la pureté et du désintéressement de mes intentions. J'ai remis Mons. Don Thomas Portell pour qu'il vous le fasse parvenir un billet de ———; il m'a prié de vous marquer que la multiplicité de ses occupations ne lui permettait en ce moment de s'étendre davantage, mais qu'il vous écrira à mon retour d'une manière plus detaillée. J'ai également mis entre les mains de Mons. le Commandant un billet dans le même genre de ——— pour Mons. le Gouverneur de Natchez. Les motifs qui m'ont guidé dans toute cette affaire, qui sont le désir de ne pas perdre du tems á voler au sécours de ———, et la conviction dont je suis pénétré, que par ce moyen j'entre complettement dans vos vues, ne me permettent de vous écrire avec toute l'étendue que je m'étais proposée; mais je ne négligerai pas de le faire avant mon départ pour Cincinnati.

J'ai l'honneur d'être, monsieur, avec le plus profond respect, et le dévouement le plus parfait, votre très humble et très obéissant serviteur.

Al Sr. BARON DE CARONDELET, *Caballero de la Religion de St. Juan, Marèscal de Campo de los Exercitos de S. M., Gobernor Général, Vice-patrono de la Provincia de la Louisiana y Florida Occidental, è Inspector de sus tropas, Nueva Orleans.*

[TRANSLATION.]

No. 20.

SIR: NEW MADRID, *June* 21, 1796.

I arrived at this post yesterday afternoon. As this is not a proper time to enter into the details of my journey with Mr. S., nor to communicate to you the observations on the subject to which you have so strongly

recommended to me to apply my attention, I shall confine myself simply to relate to you the situation in which I am with respect to the commission which ——— gave me, to take charge of the money which you sent to the commandant of this post to be sent to him.

I arrived at Cincinnati the 19th of May. ——— was then at Greenville. Not to give rise to any suspicions, I thought it was prudent not to set out for head-quarters without having previously obtained permission to go there from General Wilkinson, who commanded there. This permission did not arrive until the 31st. The 2d of June I went there, and delivered to ——— the despatches of which Mr. S. had taken charge, and which he had found it impossible to send in any other manner, without exposing them to the risk of falling into the hands of his enemies. I repeated to him the conversation I had with the Intendant and Don Andres on the subject of the money in question, and of the means we had devised to send it him without running the risk, which were, that under pretext of making a commercial voyage, I should ascend the Ohio to the falls, or Cincinnati, with a cargo of sugar, coffee, powder, &c. all in barrels, each one of which should contain a certain quantity of dollars. These precautions appeared to him so wise, that he detained me as short a time as possible, without giving umbrage, and sent me off with verbal orders to receive from the commandant at New Madrid the money which was placed in his hands for him, and to give him a receipt for it. When I suggested to him that it would be necessary, perhaps, that I should present to the said commandant an order from him, he observed to me that, not knowing how many dollars the said commandant had received, to be delivered to his order, it was impossible for him to specify the sum which I ought to receive; adding that he was surprised that Don Andres had not designated in his letter (which was the only one of those which he had received in which the money was mentioned) what was the sum that had been sent to New Madrid; "besides," he added, "I find myself in so critical a position, and surrounded by so many enemies, that to give you an order in writing would be exposing myself to infallible ruin, and to the failure of a project which we have labored at so many years." He authorized me even, since he could not give me the order in writing, which I asked from him, and the commandant would not have understood it if he had given me one in cipher, to write an order myself in his name, and to present it to the commandant if it should happen that he made any difficulty. Yesterday, as I have already had the honor to inform you, I came here, and this morning I applied to the commandant for ———'s money. The only answer he gave was, to show me your official letter, dated the 20th January, 1796, in which you order him to deliver the $9,640 only to the person who should present an order from the said ——— to that effect; then I communicated to him what had passed between ——— and me, and to give him complete satisfaction, and convince him that I had the confidence of ———, and his order to receive the money in question, I thought it my indispensable duty to enter with him into certain details which, under any other circumstances, I should not have permitted myself to do. I presume that Mr. Portell will communicate to you all that took place between us, together with a copy of the letter which I thought I could not avoid writing to him. I hope, sir, that you will approve of the conduct which I have pursued in these difficult and embarrassing circumstances, and I beg you to be persuaded that it has been regulated solely by the active zeal which animates me for the service of the King, and which I dare flatter myself will more and more secure to me your confidence. Delicacy prevents my tracing to you the picture of the position of ———; the detail which I could make, at the same time that it would afflict you, would convince you of the necessity of the steps which I have taken, as well as the purity and disinterestedness of my intentions. I have delivered to Don T. Portell to be forwarded to you a note from ———. He begged me to inform you that the multiplicity of his occupations did not permit him at this moment to enlarge, but that he would write to you more in detail at my return. I have also put into the hands of the commandant a note of the same nature from ——— for the Governor of Natchez. The motives which have guided me in all this affair, which are the desire of not losing any time in flying to the relief of ———, and the perfect conviction I have that, in doing so, I enter completely into your views, do not permit me to write to you to the extent which I had proposed; but I will not neglect to do it before my departure for Cincinnati.

I have the honor to be, sir, with the most profound respect and the most perfect devotion, your most obedient servant, &c.

To the Baron de Carondelet, *Knight of the order of St. John, Mareschal de Camp of the armies of H. M., Governor General, Vice Patron of the Province of Louisiana and West Florida, and Inspector of the troops.*

No. 21.

Sir: New Madrid, *June* 27, 1796.

I arrived at this place yesterday afternoon. My return has been delayed nearly one month beyond the time I had calculated upon. Mr. S. and I parted at Cincinnati, the 19th of last month; he was then not perfectly in health, and a good deal worsted by his journey, which, owing to the uncommon severity of the weather, had been attended with more fatigue than we expected to encounter. At some future, and not distant period, I will do myself the honor of laying before you some of the particulars of our travels, and the reflections that occasionally pressed themselves on our minds. The situation into which I am thrown, by a concurrence of circumstances, originating in a want of foresight, is far from being pleasant. Indulge me with a few minutes patience, and I will acquaint you with it. S———, at Cincinnati, gave me charges of the letters he had received for ———; who was at that time at Greenville. The vigilance and activity of his enemies made it unsafe to trust them to any ordinary conveyance; I therefore resolved to carry them myself; but not to attract the eye of suspicion, and even to remove the shadow of it, I judged it necessary to remain at Cincinnati until I obtained permission from General Wilkinson to visit head-quarters, where he commanded. Having obtained it, I proceeded thither without delay, and arrived there the second of June, and delivered the letters. ——— asked me what arrangements had been made to have the money forwarded to him. I informed him that I had agreed with Don Andres, who appeared to have the management of that business, that I should proceed up the Ohio with the barge in which Lieutenant A. Gregg returned to Massac, with a cargo of sugar, coffee, &c. in barrels, and that, to elude the grasp even of conjecture, the money should be put by small quantities into the barrels; that I was to have the selection of the boat's crew, from among the Creoles and Canadians, living at this place, or on board the King's galleys; and that I understood the sugar and coffee had been sent up with the dollars. Pleased with these precautions, which to him appeared well calculated to lull suspicion, blind the inquisitive, avert danger, and ensure success, he gave me verbal orders to take charge of the money, proceed with all possible despatch to New Madrid, and return speedily to Cincinnati. The reason for his not giving me an order by writing is obvious: it might fall into the hands of his enemies, an event that was within the scope of possible contingencies, and which would inevitably have involved him, with perhaps some of his friends, in destruction, and, in one moment, have blasted a scheme, in the prosecution of which he had devoted his talents, labor, and time, and have crowned the best founded hopes with the bitterness of disappointment. This he thought was putting too much at stake; and to have given me an order in ciphers would undoubt-

edly have been useless, for it would have been unintelligible to the commandant. To obviate, as much as possible these difficulties, he authorized me, if necessary, to write an order myself, and sign his name. I cannot omit another cogent reason which would not allow ——— to give me such an order, was, that he knew not what sum of money had been sent for him to New Madrid, and could not, therefore, specify what I was to receive. He informed me, that neither you nor the Baron had mentioned in your letters a syllable about said money; and that Don Andres alone writes him, that the money had been conveyed to New Madrid, without specifying the sum. This he was not a little surprised at. I left Greenville on the 9th, and proceeded to this place. This morning I acquainted the commandant with my commission; on this he showed me a letter from the Governor of the province, ordering him to deliver the money only to the person who should present him an order from ———; assuring me, at the same time, that neither coffee nor sugar had been sent for the purpose already mentioned. I expostulated in vain with him. Mortified and shocked with the thoughts of what ——— would suffer by any further delay in this business, which, by a hostile combination of events, has been protracted so long, I thought it my duty to lay before the commandant certain circumstances, which the exigence of the case alone can warrant. This, however, had the desired effect, by prevailing upon him to accede to my proposals. Enclosed you will receive a copy of what I have written to him. My conduct on this occasion I hope will meet with your approbation. I can with confidence assert, that it has been dictated solely by my zeal for the service of the King, my attachment to ———, and a desire to serve him. As soon as the barge arrives from St. Fernando, and every thing got in readiness, I will proceed up the river without any loss of time. ——— expects me by the first of August. I assured him so positively that my absence should not extend beyond that period, that if he is disappointed he will be tormented with the most painful anxiety. I am informed that you have been appointed Governor of the province; permit me to congratulate you on the event, and assure you that I rank amongst the foremost who sincerely rejoice at it. Not to detain the boat that is going to St. Fernando, I am obliged to close this, and defer writing to you more at length to a more leisure hour.

I have the honor to be, sir, with respect and consideration, yours, &c.

Al Sr. Don Manuel Gayoso de Lemos, *brigadier delos Rs. exercitos y Gobernador de la plaza y distrito de Natchez.*

No. 22.

Monsieur: Nouvelle Madrid, *Janvier* 3, 1797.

Je suis arrivé en ce poste le premier du mois passé. Je comptais vous annoncer cette nouvelle en personne, mais les événemens les plus contrarians m'en ont empêché, et ne me permettent pas encore de partir pour la Nouvelle Orleans pour vous rendre compte de ma mission, de laquelle je me suis acquitté avec succés en dépit de l'opposition de Wayne. Je me serais déja rendu à la capitale si j'avais été moi-même porteur des lettres de ——— que j'ai reçues il y a quelques jours par Mr. Nolan. Les gazettes, que j'ai l'honneur de vous faire passer avec celle-ci, vous apprendront le motif par lequel ——— n'a pas osé m'en charger. Vous y verrez aussi la manière dont j'ai été traité par les ordres du Général Wayne. Il y a certains détails qu'il aurait été imprudent de mettre sous les yeux du public, mais que je vous communiquerai quand j'aurai l'honneur de voir votre excellence. Dans les instructions qui ont accompagné les lettres de ——— il me donne l'ordre le plus pressant de me rendre sans délai à la Nouvelle Orleans, et dela à Philadelphie, où ma présence est indispensable. En conséquence, j'ai fait application à Mons. le Commandant de Lassus pour la berge dans laquelle j'ai fait mon dernier voyage, laquelle il a laissé à ma disposition; et je serais parti le 22 Décembre, si une gelée la plus forte que l'on ait eprouvée en ce pays, ne fut survenue, ce qui a glacé le Mississippi à la distance de plusieurs toises de son bord. La rivière est encore dans le même état, et charie une quantité si prodigieuse de glaçons, que entreprendre de la déscendre dans quelque espèce d'embarcation que ce soit, hormis un petit canot, serait s'exposer à un naufrage inévitable. Aussitôt que le froid rigoureux qu'il fait en ce moment aura cessé, et que le fleuve sera assez débarrassé de glaçons pour qu'on puisse le naviguer, vous pouvez être persuadé que je ne rétarderai pas mon départ d'un instant. Si je ne vous fais point tenir les lettres de ——— c'est pour ne pas me départir de ses ordres, il m'a enjoint de la manière la plus urgente et la plus expresse, de ne m'en dessaisir que pour vous les livrer en personne. J'ose me flatter que lorsque je vous aurai fait part des motifs de ma conduite dans toute cette affaire si singulièrement épineuse et délicate, vous ne me refuserez pas votre approbation: au moins, je ne balancerai pas de vous assurer hardiment que mes intentions la méritent.

Je crois qu'il est essentiel de ne pas vous laisser ignorer que les soupçons dont je vous ai fait part sur le compte du Général Colot n'étoient que trop bien fondées. "Il est envoyé par Monsieur Adet pour remplir la mission *manquée* par le sieur Egron." La personne de qui je tiens ceci avait refusé de l' accepte. Vous dire que c'est en ce moment serait trop risquer. Lorsque je vous l'aurais nommé, vous ne douterez point de ce que j'avance. Cette même personne m'a promis qu' à mon retour à Philadelphie, elle me communiquera certains détails très intéressans pour cette province. Comme j'espère me rendre en ville presqu' aussitôt que ce courier, je ne me permettrai pas d' abuser plus long tems de votre patience, et d'envahir votre tems précieux.

J'ai l'honneur d'être, avec dévouement et respect, le très humble et très obéissant serviteur de votre excellence.

Le Baron de Carondelet.

[translation.]

No. 22.

Sir: New Madrid, *January* 3, 1797.

I arrived at this post the first of last month. I intended to announce to you this visit in person, but the most contrariant events have prevented me, and do not yet permit me to set out for New Orleans, to render you an account of my mission, in which I have succeeded in spite of the opposition of Wayne. I should have already returned to the capital, if I had myself been the bearer of the letters of ———, which I have received some days since by Mr. Nolan. The gazettes, which I have the honor to send you with this, will inform you of the motives which prevented ——— from putting them under my care. You will see there, also, the manner in which I have been treated by the orders of General Wayne. There are certain details which it would be imprudent to exhibit to the eyes of the public, but which I will communicate when I have the honor of seeing your excellency.

In the instructions which accompany the letters of ——, he gives me the most pressing orders to go without delay to New Orleans, and from thence to Philadelphia, where my presence is indispensable. In consequence

thereof, I have made an application to the Commandant Lassus for the barge in which I made my last voyage, which he has put at my disposition; and I should have set out the 22d of December if a frost had not happened, the hardest ever known in this country, which froze the Mississippi the distance of several toises from its banks. The river is still in the same State, and carries down so great a quantity of cakes of ice that, to undertake to descend it in any kind of vessel, except a little boat, would be exposing one's self to inevitable shipwreck. As soon as the rigorous cold, which yet prevails, shall have ceased, and the river shall be cleared of ice, so that it may be navigated, you may be persuaded that I shall not delay my departure an instant. If I do not send the letters of ———, it is because I do not wish to go beyond his orders. He enjoined me, in the most express and urgent manner, not to part with them until I could deliver them to you in person. I dare flatter myself, that when I shall have imparted to you the motives of my conduct in all this business, which is so very difficult and delicate, you will not refuse me your approbation; at least I do not hesitate to assure you that my intentions merit it.

I believe it is essential that you should know that the suspicions which I communicated to you, on the subject of General Collot, were but too well founded. He is sent by "Mr. Adet to fulfil the mission in which Mr. Egron failed." The person from whom I have this refused to accept it. To tell you who it is, at this time, would be risking too much. When I shall have named him, you will not doubt of what I advance. This same person has promised me that, at my return from Philadelphia, he would communicate certain details, very interesting for this province. As I hope to be in town almost as soon as this courier, I will no longer abuse your patience, and take up your precious time.

I have the honor to be, with devotion and respect, your most obedient servant.

BARON DE CARONDELET.

No 23.

SIR: NEW MADRID, *January* 3, 1797.

I arrived at this place on the first of last month, and have been detained here by a concurrence of unlucky circumstances. ——— had ordered me to stay here until Nolan should arrive with his letters. Mr. Nolan did not arrive before the 17th or 18th of December. I was ready to set off on the 22d, when the severest frost ever known in this country suddenly froze the river for a great distance from its banks. It still continues frozen, and such vast quantities of ice float down the part that is not frozen, that, to attempt to go down it in any thing but a small canoe, would be rushing into the jaws of death. I enclose you two newspapers, by which you will learn the manner in which I have been treated in the United States, and why ——— did not venture to trust me with any papers. I am happy, however, to acquaint you, that I delivered my charge in safety. I do not transmit you ———'s letters, not to depart from his orders, which are, not to let them out my hands upon any consideration, but to deliver them personally to you; and, besides, I expect to be with you almost as soon as the bearer of this. After I shall have explained to you, at Natchez, the motives of my conduct through the whole of this delicate and difficult business, I flatter myself it will meet with your approbation.

I have the honor to be, with respect, your excellency's most obedient and most humble servant,

His Excellency Governor GAYOSO.

W.

Deposition of Elisha Winters.

I, the undersigned, certify and declare, that I was an inhabitant of Kentucky in the years 1788, '89, and '90; that General Wilkinson was then engaged in commerce between Kentucky and New Orleans; that the general made a small shipment of tobacco, in the spring of 1791, not more than two boats, under the care of Captain Wilson, one of which sunk on the Ohio, and two or three hogsheads of tobacco landed on the bank; the other boat landed in New Orleans a few days before I arrived in that part, and if there were any more arrivals (the property of the general) it was unknown to me. I further state that, in the year 1791, I became a citizen of New Orleans, and that the general might have made a shipment to that part in 1792, but it was not probable, otherwise I should have had some knowledge of it. But this is improbable, because in the year 1790 I was in New Orleans. The residence of Governor Miro was then about two leagues from the city; a message came to me that the governor wished to see me at his house the next day. Accordingly I waited on his excellency. He made strict inquiry concerning the general, and whether there were any tobacco coming or not, or whether the general was coming himself. I answered that I knew nothing of the general's coming, nor of any tobacco on its way. He then said that the general had treated him very ill, and if he could not have complied with his contract, he ought to have sent a man in a canoe with information. He then repeated it again, with great warmth, saying, I will not write him, but you must tell him, from me, that he has behaved very improperly, and my disappointment is very great. This was expressed with much passion.

Governor Miro took his departure from New Orleans in the year of 1792. To my knowledge there was no tobacco received for the King's use, after the arrival of the Baron Carondelet. A proclamation was issued, before the departure of Governor Miro, that no more tobacco would be received in the King's stores for his Majesty's use.

I, the undersigned, further state, that, about the year 1796, I was on a visit at New Madrid, and, at the house of the commandant, heard him make some observations which I could not understand, and applied to the interpreter for an explanation; he answered that the commandant had in his chamber a Spanish lady going to General Wilkinson. This raised my curiosity. I made further inquiry, and found it to be a chest of dollars (as much as four or five men could handle) from the Spanish Government to General Wilkinson. This I thought strange indeed. On being fully satisfied, in a very short time after, I took my departure for the falls of Ohio. After having been about four or five days on my voyage, I met a certain Mr. Power (an old acquaintance) descending the Ohio, who informed me that he was from head-quarters, on his way to New Madrid, for a cargo of groceries. This convinced me that what I had learned at New Madrid was true, and that he was on his way to gallant the Spanish lady to head-quarters. I then determined to make all possible despatch to the falls in order to give information of the approach of so valuable a creature. Accordingly, on my arrival at the falls, I immediately gave information to General Wayne that I had discovered, at New Madrid, a royal chest on its way to the army of the United States, and that this chest, together with the despatches that accompanied it, would be important, and that if he would send to me in Lexington a confidential person, I would communicate to him the particulars. Accordingly, in a very short time, I was visited by a Major Swann, to whom I communicated the whole affair, and assured the major that if immediate and proper steps were taken to meet Mr. Power, on the Ohio, an important discovery would be made. The major immediately returned; and, as I have been informed, a certain Lieutenant Steel was

despatched on this business, and met the aforesaid Power on the Ohio, but did not search his boat, and permitted him to proceed on his voyage. I afterwards saw my letter of information to General Wayne, in the War Office in the city of Philadelphia, in the hands of Mr. McHenry, then Secretary of War.

The deponent further states that he was led to make particular inquiry of the Spanish interpreter at New Madrid, as aforesaid, from the circumstance of seeing a *post*, which appeared rough and newly made, apparently supporting the upper floor of the room in which the commandant then was.

ELISHA WINTERS.

WASHINGTON COUNTY, *ss.*

On this 16th April, 1810, before the subscriber, a justice of the peace for said county, appeared Elisha Winters, and made oath, in due form of law, that the above and foregoing facts are true to the best of his belief and recollection.

Sworn before

DANIEL RAPINE.

No. 25.

Bradford's affidavit.

Sometime between the 10th and 20th days of January, 1807, in conversation with General Wilkinson on the subject of publications in the Western World, I expressed a belief that some of the charges there brought against him (the general) were true; and remarked that they were generally credited in Kentucky. I noticed the immense sums of money he expended, as tending to impress a belief that he had some other resource than his pay and emoluments as commander-in-chief of the army. I informed him that I had heard it very confidently asserted that the money he paid to Mr. John McDonough for sugars, when the Americans took possession of this country, was received from the Marquis de Cassa Calvo. The general declared the report false, and raised to ruin him; that he had received the money from Lieutenant Taylor for extra services. Shortly after this conversation with General Wilkinson, I had one on the same subject with Governor Claiborne. He told me that when he first heard of the purchase of sugars by the general, he was inclined to believe that he had come by the money, with which he made the purchase, corruptly; but that he had an explanation of the affair with General Wilkinson, who had removed every suspicion from his mind, and added, that the general received the money from Lieutenant Taylor, then military agent, for extra services in running lines.

Since writing the above I have shown it to Governor Claiborne, who agrees to the facts stated with this correction: that, instead of saying he "was inclined to believe that he had come by the money, with which he made the purchase, corruptly," he "believed all was not right." And that instead of saying, "the general received the money from Lieutenant Taylor, then military agent, for extra services in running lines," he said, "the general received the money from Lieutenant Taylor for drafts on the United States;" and he "had heard that the drafts were for extra services in running lines and making Indian treaties;" that he held these conversations frequently, and recollects one on this subject with the undersigned in the winter of 1807.

JAMES M. BRADFORD.

Sworn and subscribed to, at the city of New Orleans, this 17th day of March, 1809, before me,

SAMUEL D. EARLE,

Justice of the peace in and for the parish of the city of New Orleans.

I. B.

Deposition of Isaac Briggs, April 14, 1810.

WASHINGTON CITY, 13*th of the* 4*th month*, 1810.

Shortly after I arrived in the Mississippi Territory as surveyor of the public lands of the United States, in the autumn of the year 1803, William C. C. Claiborne, then Governor of the said Territory, told me that Daniel Clarke had some time before made to him a proposition to put himself (Claiborne) at the head of all the force he could raise, march to New Orleans, and take forcible possession of that city. That $100,000 would be at his (Claiborne's) disposal; and that General Wilkinson, with all the power in his command, would co-operate in the enterprise; and that soon afterwards, Richard Reynold Keen showed him (Claiborne) a written but anonymous paper, which he believed to be in the hand-writing of General Wilkinson, and which contained an assurance that the general would co-operate in such an enterprise. This information the said Governor Claiborne repeated, and Hose Browse Trist, since deceased, confirmed to Robert Williams, late Governor of the Mississippi Territory and myself, in the city of New Orleans, in the second month of the year 1804.

About the beginning of the tenth month, in the year 1806, at the town of Washington, in the Mississippi Territory, I told General James Wilkinson I had been informed that he had received, previously to his leaving New Orleans in 1804, from the officers of the Spanish Government, about ten thousand dollars of a late Mexican coinage, in Campeachy bags. He replied it was fact; he had received about that sum, in the manner stated, and from the Spanish officers, but that it was due to him on account of former mercantile contracts with the Spanish Government.

Having never taken any notes or memorandums, the above statement is from memory.

ISAAC BRIGGS.

WASHINGTON COUNTY, *ss:*

On this 13th of April, 1810, before the subscriber, a justice of the peace for said county, appeared Isaac Briggs, and affirmed that the facts stated in the foregoing instrument of writing are just and true, to the best of his belief.

Affirmed before DANIEL RAPINE.

PAPERS RELATIVE TO THE SECOND POINT OF INQUIRY.

No. 34.

Mr. Power's narrative and deposition respecting his mission in 1795.

In the year 1795 Governor Gayoso ascended the river Mississippi, commanding the King's galleys and troops, destined to erect and garrison the fort of San Fernando de las Barancas, (Chickasaw Bluffs,) where he remained, I believe, about two months, or perhaps longer; and after having, by his presence, given spirit and activity to the works, proceeded to New Madrid. Immediately on his arrival, which was in the beginning of September, 1795, he informed Captain Don Thomas Portell, the commandant, that he had despatches of the greatest importance to forward to Kentucky, and desired him to procure a person on whom he could depend to take charge of them. Portell spoke to me on the subject. As travelling was then my ruling passion, I proposed, without hesitation, to undertake the journey. It may not be improper here to observe, that I had already been sent by said Portell to Kentucky on two occasions; the first, at the beginning of 1794, to keep an eye on the movements and progress of what is generally known by the name of Genet's expedition against Louisiana, headed by Clarke and La Chaise; and the second, to accompany the Spaniards that had murdered Mr. Henry Owens, the bearer of General Wilkinson's $6,000, concerning which I have given my affidavit under this date. As I had acquitted myself of my commissions much to his satisfaction, he had recommended me strongly to the Governor.

Without loss of time a pirogue, hands, and provisions were got ready; and I set off from New Madrid on the 6th of September, and reached the Red Banks on the sixth day. Here I was detained by a bilious fever until the 24th, on which day I set off by land and arrived at Cincinnati on the 3d of October, having delayed one day at Lexington. The day after my arrival I delivered my despatches to General Wilkinson, agreeably to my orders. When I left New Madrid, I was only half in the secret of the object of my mission; but the general disclosed the whole plot to me, which was a separation of the Western from the Eastern States, such as appears in Judge Sebastian's trial. After some days' stay at Cincinnati I proceeded up the Ohio as far as Gallipolis, in obedience to General Wilkinson's orders, which I had been instructed by Gayoso implicitly to follow. I returned to Cincinnati on the 8th of November, and left that place on the 14th with Wilkinson's answers, having occasionally dined with the general, and having had several nocturnal conferences with him in Fort Washington.

In his letter in cipher to Gayoso, September 22, 1796, he refers him to what I should verbally communicate to him, which was as follows: That I must immediately return to Red Banks, where I should meet the following gentlemen, or at least two of them, viz: Messrs. Benjamin Sebastian, Henry Innes, John Murray, and George Nicholas, whom I was to convey to the mouth of the Ohio, there to have an interview with Gayoso. I have already mentioned that the plan of separation was such as appears in Sebastian's trial; on which subject Wilkinson directed me to lay the following observations before Carondelet and Gayoso. However, before I proceed any further, it will not be improper to state that Wilkinson received a letter some time after from Gayoso expressive of much discontent and reproach for having imprudently communicated to me the whole extent of their plots. This I had from Wilkinson himself. [Here follow the observations.] In this I am confident that I am perfectly correct, as I committed them to paper at the time, and which I will literally copy: "The various channels through which the Western country is to receive foreign commodities. Which the most advantageous? 1st. by the river St. Lawrence and the lakes; 2d. By New York, Hudson, or North river, Mohawk river, and by Oswego into the lake; 3d. By Baltimore, up the Susquehannah, a portage to ———, that empties into the Allegany, down into the Ohio; 4th. By ———, up the Potomac, portage to Cheete river into the Monongahela, and down the Ohio; 5th. By New Orleans and the Mississippi, &c. An intelligent person ought to be sent to these different places, and obtain every possible information on the spot concerning the difficulty or facility attending their navigation, &c., and, by comparing them, see which merits the preference. It might, perhaps, also be the means of artificially giving the advantage to the Mississippi in case it does not possess it naturally. The free navigation of the Mississippi injurious to the future population of Louisiana; because numbers who would have emigrated to it for the sake of enjoying the privileges of Spanish subjects, and from which foreigners were excluded, would now possess those advantages without moving to it.

"To ascend the Ohio with a cargo, the profits on which must be a perquisite for the person entrusted with it. By these means the following advantages will be obtained: The money that it may be judged proper to introduce into the country will be kept out of sight, even of the crew, and the real object of the expedition kept secret. It may draw the confidence of the people, and point out the channel through which they must receive foreign commodities. The cargo ought to consist of gunpowder, sugar, coffee, brandy, wine, segars, &c. The mouth of the Ohio must be formidably fortified, and works erected of sufficient strength to arrest the progress of an army during a whole campaign, and thus gain one year. Kentuckians must be employed in raising these fortifications. This will help to do away all national distinctions and prejudices, and to conciliate and fraternise the two nations. The cannons wanted may be cast in Kentucky. A bank must be established in Kentucky, with a capital of one million of dollars; the directors to be chosen among the most distinguished and leading characters in the country. We shall thus secure a majority in the councils and assemblies of State. The Fort of San Fernando must not, upon any consideration, be given up; for this would lessen the power and importance of Spain, and the Americans would immediately take possession of it. As the seeds of an approaching rupture are already cast, it is proper that all the necessary preparations should be made in the province, by building forts on the frontiers, increasing the number of Spanish agents in Kentucky, and depositing funds in the country, to be enabled to face contingencies. General Clarke and his adherents, who are in the pay of the French republic, must be bought into the service of Spain. The French may hereafter be prevailed upon to take produce of Kentucky and the Western country, for the use of their colonies. It is absolutely necessary that military magazines should be formed at New Madrid, well provided with arms, ammunition, and other military stores. A watchful eye must be kept upon Daniel Clarke, Sen., and his nephew Daniel Clarke, Minor, Beauregard, Du Forêt, Morales, and their friends. They must never be trusted in any thing that relates to Wilkinson and ————.

"Pounds of sugar mean hard dollars; Campbell, Carondelet; McCullough, Gayoso; Marietta, New Orleans; Post Vincennes, Philadelphia; store, fortification; Monongahela, mouth of the Ohio; words, war; silence, peace; cash, Spain; corn, France; pork, England; whiskey, United States; pounds of coffee, arms; segars, men; bread, ammunition."

Immediately on my return to New Madrid, a large pirogue was purchased, and every thing provided that could contribute to the accommodation of the gentlemen; and I again set off for Red Banks towards the beginning of December. On my arrival at that place, I there found Mr. B. Sebastian, who had taken passage in a flat boat, bound to New Madrid. On my inquiring for the other gentlemen, he told me that, as Murray had for some time

past been in a habitual state of inebriation, it was not judged proper that he should be of the party; that Mr. H. Innis could not leave his home, owing to some family concerns, or to indisposition, I do not recollect which; and that the absence of Lawyer Nicholas would excite a degree of suspicion that might defeat the object they had in view; but said that he was fully authorized to treat with the Governor in their name. We accordingly proceeded to the mouth of the Ohio, he in the flat, myself in the periogue. We arrived in a short time on the Mississippi. There we found Gayoso encamped, opposite the mouth of the Ohio, where he had amused himself in building a small triangular stockade fort, with the view of impressing the public with the idea that he had no other object in contemplation. Here the bad weather detained us a few days; during which time we had the visit of Julian Poydras and Mr. Bernoudi, Jun., who were descending in a flat to New Orleans. We arrived at New Madrid, I think, on Christmas day, and remained there but a short time, and continued our route to Natchez; Sebastian, with the Governor, in his galliot, and myself with Mr. Vanden Bemden in a king's barge. After an ordinary passage we arrived at Natchez, where we were hospitably entertained in the Government house. I stayed there but a short time; then proceeded to New Orleans, leaving Sebastian at the Governor's. They both reached New Orleans together a few days after me.

Mr. Sebastian and myself left New Orleans, if I recollect right, in March, or the beginning of April, having taken passage for Philadelphia in the brig Gayoso, Captain Jared Arnold, where we arrived after nineteen days' passage. We remained but a few days in Philadelphia, and proceeded to Shippensburgh in the stage. Here we put our baggage in a wagon, and, for numerous reasons, unnecessary to expose, continued our journey to Red Stone on foot. At Red Stone we embarked in a flat, bound to Cincinnati, where we arrived on the 17th or 18th of May. The next day after our arrival Sebastian took passage in a flat for Louisville. I remained at Cincinnati. On the 20th I wrote to General Wilkinson, who then had the command of the army, owing to General Wayne's absence, soliciting permission to travel by the line of forts to Greenville, and pursue my route from thence to the Illinois, by Post Vincennes. The following is a copy of his answer:

[DUPLICATE.]

SIR: HEAD-QUARTERS, GREENVILLE, *May* 25, 1796.

The day before yesterday I had the honor to receive a letter from you, under date of the 20th instant, in which you request leave to visit this place, and to proceed by St. Vincennes and the Illinois to New Madrid. Permit me, sir, to observe, that this precaution was unnecessary, at a time when the United States of America are happily at peace with all the world. In this enviable situation the officers of the American army have no concealments to make, and, therefore, our camps and our forts are free to the ingress and egress of all persons who deport themselves with propriety. I beg you, sir, to believe that, upon an unpleasant occasion, to which you are pleased to refer, my conduct was directed more by the delicacy of my own situation than any sense of your demerit. Neither my sympathies nor my antipathies have ever gained such an ascendant over my reason as to incline me to condemn, upon hearsay, or to adopt the prejudices of any man. I thank you, sir, for the trouble you have given yourself in bringing forward the segars committed to your care by my very worthy friends, Governor Gayoso and Don Andres.

And have the honor to be, with due consideration, sir, your most obedient servant,

JAMES WILKINSON.

MR. THOMAS POWER.

Having obtained the general's permission to go to Greenville, Major Mills, Adjutant General, procured me a horse from the quartermaster to carry me to Greenville. There I stayed five or six days, quartered on Captain Prior and Lieutenant Charles Hyde. As soon as I had received the general's instructions, and answers to my despatches, I returned to Cincinnati; for my journey to the Illinois by Vincennes was a devise to avoid curiosity. I lost no time at Cincinnati, but proceeded with all possible haste to New Madrid, where I took charge of Wilkinson's 9,640 dollars. For the details of the rest of this expedition I refer to my deposition (No. 17) taken before Mr. Eliphalet Fitch.

THOMAS POWER.

NEW ORLEANS, *March* 18, 1809.

Personally appeared Thomas Power, and did solemnly swear that the preceding narrative is just and true.

E. FITCH, *Justice of the Peace.*

G. Y.

General Wilkinson's letter to Governor Gayoso.

FORT WASHINGTON, 7 *bre.* 22, 1796.

Ill health and many pressing engagements must be my apology for a short letter. I must refer you to my letter to the Baron for several particulars, and for a detail of my perils and abuses. I must beg leave to refer you to our friend Power, whom I find of youthful enterprise and fidelity; he certainly deserves well of the court, and I do not doubt that he will be rewarded.

What a political crisis is the present! and how deeply interesting in its probable results, in all its tendencies, and thereby must hope it may not be carried into execution. If it is, an entire reform in the police and the military establishments of Louisiana will be found immediately indispensable to the security of the Mexican provinces. I beg you to write me fully on this question, in cipher, by Power, whose presence in Philadelphia is necessary, as well to clear his own character, attacked by Wayne, as to support the fact of the outrage recently offered to the Spanish crown, in his person, and to bring me either the person or the deposition of a man now under your command, who had been suborned by Wayne to bear false witness against me, and afterwards, for fear he should recant, bribed him to leave Kentucky. Power will give you the perfect of this infamous transaction; and I conjure you, by all the ties of friendship and of policy, to assist him on this occasion. If Spain does not resent the outrage offered to Power, in the face of all Kentucky, my letter to the Baron will explain the motives which carry me to Philadelphia; from thence I will again write to you. Power will explain to you circumstances which justify the belief of the great treachery that has been practised with respect to the money lately sent to me. For the love of God, my friend, enjoin great secrecy and caution in all our concerns; never suffer my name to be written nor spo-

ken. The suspicion of Washington is wide awake. Beware of Bradford, the Fort Pitt refugee; he seeks to make peace; there are spies every where. We have a report here that you are appointed Governor of Louisiana; may God grant it, as I presume the Baron will be promoted.

I am ever your affectionate friend, W.

NATCHEZ, 6 *de Febrero*, 1797.

Es copia de una carta en ciphra que he recivido del General Wilkinson.

MANUEL GAYOSO DE LEMOS.

En un papilito a parte dice lo siguiente.

This will be delivered to you by Noland, whom you know is a child of my own raising, true to his profession, and firm in his attachments to Spain. I consider him a powerful instrument in our hands, should occasion offer. I will answer for his conduct; I am deeply interested in whatsoever concerns him, and I confidently recommend him to your warmest protection.

I am, evidently, your affectionate

WILKINSON.

Es copia: MANUEL GAYOSO DE LEMOS.

No. 35.

Instructions from General Wilkinson to Thomas Power, in the hand-writing of P. Nolan.

To proceed to Galliopolis to make application and propositions to the leading characters there, to induce them to remove to New Madrid with all the French of that settlement; to urge this point in such measure as to attract the attention of the public officers there, whose report to the Executive will immediately follow, and will account for his frequent missions to that place. To return as rapidly as possible, to load with flour, and proceed without a moment's delay to New Orleans. In the route, to see Newman, and to enter on the subject of his desertion; to inform him of the facts which have transpired, and the opinions prevalent; to urge his return, as the request of all his friends; to assure him of safety, and of such reward as he may demand; also, that being pardoned for the imputed offence, no further process can lay against him for the same; that the oath which he was suborned to take, being made while in duress, is in itself a nullity, and cannot be offered in crimination of him. It will be necessary that he should take down his examination, founded upon the interrogations furnished him, and if they prove material to the crimination of Wayne, and his associates, then he must embark N———n under a fictitious name at New Orleans for Philadelphia; and, having arrived there, must lodge him in some retired place, and call upon me, under cover of night, for further advice; you will hear of me at ———. If N———n cannot be prevailed upon to return under dispositions favorable to my views, then let his declaration, on oath, be circumstantially taken to all the points enumerated in the interrogatories, in the presence of Dr. Howers, Colonel Bruin, Daniel Clarke, or any three or four of the most notorious, and of the most respectable Americans of the Natchez district; let these gentlemen certify to two copies and to the original, and let them be transmitted to me through different channels. P. to take charge of the original. Mr. P. must take with him credentials from the Government of Louisiana, acquitting him of any political connexion or agency injurious or hostile to the interests of the United States. He must carry to Philadelphia testimonials of his family and character, addressed to as many of the native respectable merchants of that city as possible; these may be readily procured from New Orleans and the Havana.

It is indispensable that P. should meet me in Philadelphia; for the rest, let him rely on my friendship and address. To collect from Bradford every information respecting the Pittsburg insurrection, which may be employed, should it be found necessary, to disgrace certain persons; to bear no paper about him which carries my name upon it.

Employ the $640, avec le cargaison, to pay expenses, and lay in a cargo of best flour, pour la ville, where it will help to reimburse. In making your settlement, take care to secure me the $640 advanced, and bring them with you. I have urged peremptorily the necessity of your presence at the metropolis. Bring me N———n, if, upon examination, you find his presence of more consequence than his deposition, when taken as directed. I believe he was caused to desert by Ohara; probe him to that point. You are to bring me papers, but my name is not to be written or spoken. You must do the needful below, to expose and detect past treachery or indiscretion, and to prevent either in future. I have referred particularly on this head. I shall expect you impatiently. Should I continue where I am, I shall wish you near me; if I cross the water, you are to accompany; bring every credential of family and fortune, to repulse the insinuations of ———. Trust something to my address, and put faith in my honor and affections to the grave.

No. 36.

Thomas Power to Baron de Carondelet.

NATCHEZ, *Mayo* 9, 1797.

Inclusos recibira V. S. los documentos relativos á mi ultima expedicion reservada hecha por orden de V. S. en el Ohio; de la que ya le tengo dada una relacion, tanto verbal como por escrito. Los reparos que siguen, serviran para su elucidacion.

Salí del Nuevo Madrid con diez remeros y un patron. Los viveres que suministraron á dicha tripulacion eran,

Bizcocho por un mes.

Carne por idem.

Aguardiente por 15 dias.

Para disfrazar, en lo posible, el verdadero objeto de la expedicion, habiamos enganchado á la gente baxo las mismas condiciones que se acostumbran en los viages de comercio, de modo que las raciones mensuales señaladas por el rey, á cada marinero, no duraron ni aun quinze dias.

El motivo por que he consentido a la tripulacion dos filetes extraordinarios al dia, á contar del dia que salimos de Red Banks, hasta llegar á la cascada del Ohio, era para animarlos á remar con fuerza, para que no volviese á cogerme el teniente Steel, que creia me estaba persiguiendo; pues si hubiesse caido otra vez en sus manos, estaba perdido.

En quanto á los 150 ps. del caballo que compré para hacer el viage de Frankfort y Cincinnati, y los gastos que resultaron de este viage, V. S. no puede ignorar que eran indispensables, por el motivo doble de llevar mi quexa contra Steel por haber ofrecido un insulto tan grave á nuestra bandera, y para darle aviso de mi llegada al General Americano Don Jayme Wilkinson, para que tomase las correspondientes providencias.

Tengo que añadir que el motivo que me ha combidado deshacerme de las mercancias que recibi de I. & A. Hunt en cambio del café, azucar, &c., era para acreditar la opinion que yo mismo habia pretextado, de que habia venido para comprar caballos, para llevarlos á Natchez afin de desempeorar la raza de los de este distrito.

A mas de esto, como la occurrencia de Steel habia dispertado los rezelos, movido las aprehensiones, y llamado la atencion de los habitantes del pays del Oueste; todos tenian los ojos dirigidos sobre mi, de modo que me vi precisado hacer alguna cosa que les gustase—para que me serviesse como de salvo conducto para salir de esos parages; lo que mediante esto, felizmente logré.

La yegua de que hace mencion en el estado No. 4, á mi llegada en el Nuevo Madrid, se extravió en el monte, en donde se murió de sed; los frios excesivos habiendo helado totalmente las aguas. El caballo entero se lo entregué á mi baxada, al Sr. Don Manuel Gayoso de Lemos; pero me lo ha vuelto, poco ha, y lo estoi cuidando hasta que se sirva V. S. disponer de él.

De la cantidad de 9,640 ps. que debia entregar á Don Jayme Wilkinson, solamente le he entregado nueve mil, habiendome queda con los 640 para precaver al mal exito que me estaba amenezando, como tambien para proveer lo preciso para la tripulacion durante el viage.

Los siguientes son los documentos que van inclusos:

No. 1. Cuenta de venta de los efectos cargados, &c.
No. 2. Id. de los gastos para la tripulacion.
No. 3. Cuenta y razon de los 640 pesos.
No. 4. Estado que manifiesta en que se han empleado las mercancias, &c.
No. 5. Id. que manifiesta mis alcances, &c.
No. 6. Factura de I. & A. Hunt.

Los que van acompañados de la obligacion de Don N. Welsh por 105 pesos, y de los dos recivos de William Boyd, el uno por 466⅔ ps. importe del caballo, el otro de 200 ps. importe de la yegua. El balance que resulta en mi favor, segun los estados No. 3 y 4, como asi mismo el importe de mi sueldo mensual por 14 meses suplico se sirva V. S. disponga se me remita, ó se entrégue á Don Felipe Nolan, á quien se lo tengo prevenido.

Don J. Wilkinson en las instrucciones que me ha dado, me prescribe que presente á V. S. la cuenta de los gastos, á que se han aplicado los 640 ps. (y asi lo he hecho en el estado No. 3) para que le sea reembolsada la dicha cantidad. Dice la instruccion: "In making your settlement take care to secure me the $640 advanced, and bring them with you."

Aun que me haya encargado llevarse los en los E. U. soy de parecer que nadie mejor que Don Felipe Nolan, se los puede remitir, que V. S. ha resuelto que me quede en esta provincia.

Permita me V. S. ahora asegurarle, que en todo he procurado con el mas obrar con la honradez y entereza que corresponden a un hombre de bien, como asi mismo con el zelo y fidelidad que exige el servicio del rey, y con la vigilancia y la actividad, que pedia la empresa ardua en que me hallaba empeñado. Nada merezco, y nada mas espero, por haber satisfecho á las obligaciones de un buen vasallo de S. M. sino que se sirva V. S. proporcionarme las ocasiones de desplegar la disposicion que me siento de sacrificarme á la prosperidad de mi patria, y la gloria de mi Soberano.

Dios guarde V. S. muchos años.

THOMAS POWER.

No. 37.

Baron de Carondelet to Thomas Power.

NUEVA ORLEANS, 28 *de Mayo*, 1797.

Quedan en mi poder los seis documentos relativos a la quenta de la ultima expedicion que hizo vm. en el Ohio, y me incluye en oficio de 9 del corriente, y son los que siguen.

No. 1. Cuenta de venta de los efectos cargados en el Nueva Madrid.
No. 2. Otra de los gastos para la tripulacion.
No. 3. Cuenta y razon de los 640 ps.
No. 4. Estado que manifiesta en que se han empleado las mercancias, &c.
No. 5. Estado que manifiesta sus alcances de vm. y.
No. 6. Factura original de I. & A. Hunt.

A quenta de ello se entregaran a vm. mil ps. para que pueda facilitar su viage en la nueva comision, que fio a su cuidado.

Es menester ver como vm. puede deshacerse del caballo con la menor pérdida posible asi como recoger la deuda de Nicolas Welsh, ó hacerla recoger, a cuyo fin incluyo à vm. su obligacion: como igualmente el producto de las mercancias que por la suma de 343 ps. entregó vm. á Don Pedro Derbigny, á fin de poder dar parte á la corte sin estos que incommodan, y parecen negociaciones, quando no son mas que efecto de la necesidad, y apuro que producen estas comisiones en parages donde no hay recursos, teniendo que engañar la vigilancia de las espias.

Conforme fuese vm. evacuando estos puntos, cumplida su comision actual me dará aviso.

Dios guarde à vm. muchos años.

EL BARON DE CARONDELET.

DON TOMAS POWER.

No. 36.

[TRANSLATION.]

Letter from Thomas Power to the Baron de Carondelet, dated

NEW ORLEANS, *May* 9, 1797.

Enclosed your excellency will receive the documents relative to my last confidential expedition, made by your excellency's order in the Ohio, of which I have already given you a narrative as well verbal as in writing. The remarks which follow will serve for its elucidation.

I left New Madrid with ten oarsmen and a patron; the provisions which were delivered to the crew, were—

Biscuits for a month, meat for a month, rum for fifteen days.

To disguise, as far as possible, the true object of the expedition, we had hired the people, under the same conditions as are common in commercial voyages, so that the monthly rations allowed by the King did not even last

fifteen days. The reason why I issued to the crew two extraordinary allowances of liquor daily, counting from the day we left Red Bank until our arrival at the falls of Ohio, was to encourage them to row with vigor, that Lieutenant Steel, whom I thought in pursuit of me, might not again take me, because, had I fallen into his hands a second time, I was lost. As respects the one hundred and fifty dollars, for the horse which I bought to make the journey from Frankfort to Cincinnati, and the expenses which accrued on this journey, they were indispensable for a double motive: to carry my complaint against Steel, for having offered so great an insult to our flag, and to give advice of my arrival to the American general, Mr. James Wilkinson, that he might take the necessary measures. I have to add, that the motive which has induced me to dispose of the merchandise which I received of I. and A. Hunt, in exchange for the coffee and sugar, was to give credit to the opinion which I myself had raised, that I had come to purchase horses to take to Natchez, in order to better the breed in that district. Besides this, as the occurrence with Steel had awakened suspicions, excited apprehensions, and attracted the attention of the inhabitants of the Western country, all had their eyes directed on me, so that I found myself obliged to do something which should please them, that it might serve me as a safe conduct to quit those parts, which, by this means, I happily effected. The mare, of which the statement No. 1 makes mention, was lost on my arrival at New Madrid, in the woods, where she died of thirst, the excessive frosts having entirely frozen up the waters. The stud horse I delivered on going down to Don Manuel Gayoso de Lemos, but he returned him to me a short time since, and I have him carefully kept until your excellency is pleased to make some disposition respecting him. Of the sum of $9,640, which I was to deliver to Mr. James Wilkinson, I have only delivered him nine thousand, having retained the $640 to avoid the unfortunate result with which I was threatened, and likewise to provide what was necessary for the crew during the voyage. The following are the documents which are enclosed:

No. 1. The account sale of the merchandise laden, &c.
No. 2. Account of the expenses for the crew.
No. 3. Account and expenditure of the $640.
No. 4. Statement which shows in what manner the merchandise has been made use of.
No. 5. Statement which shows what is due to me.
No. 6. Invoice of I. and A. Hunt.

All which are accompanied with the obligation of Mr. N. Welch for $105, and the two receipts of Mr. Boyd, the one for $466⅔ for the value of a horse, the other for $200, for the value of a mare. The balance which appears in my favor, according to the statements Nos. 3 and 4, as well as the account of my monthly pay for fourteen months, I beg your excellency will be pleased to direct that it should be remitted to me, or delivered to Mr. Philip Nolan, to whom I have given advice on the subject.

Mr. James Wilkinson, in the instructions which he has given me, directs that I should present to your excellency the account of the expenses to which the $640 have been applied, (and I have done so in the statement No. 3,) that he may be reimbursed said amount. The instruction says, "in making your settlement take care to secure me the six hundred and forty dollars advanced, and bring them with you." Although he charged me to take them to him to the United States, I am of opinion that no one is better suited to remit them than Mr. Philip Nolan, as your excellency has now resolved that I should remain in this province; your excellency will please to suffer me to assure you that, in every particular, I have acted with prudence, with honor, and the disinterestedness of an honest man, as well as with the zeal and fidelity which the King's service requires, and with the vigilance and activity which the arduous enterprise I was engaged in demanded. I deserve nothing, and expect nothing, for having fulfilled the obligations of a good subject to His Majesty, unless your excellency will be pleased to procure me opportunities of displaying the inclination I feel of sacrificing myself for the prosperity of my country and glory of my sovereign.

God preserve your excellency many years.

THOMAS POWER.

No. 37.

Answer to the foregoing.

New Orleans, *May* 28, 1797.

There remain in my hands six documents relative to the account of the last expedition which you made in the Ohio, and which you enclosed me in your official letter of the 9th instant, and they are as follows:

No. 1. Account sales of the effects laden at New Madrid.
No. 2. Another of the expenses of the crew.
No. 3. Account of the expenditure of the $640.
No. 4. Statement which shows how the merchandise has been employed.
No. 5. Statement which shows the balances due to you; and
No. 6. Original invoice of I. and A. Hunt.

On account of it there will be delivered to you $1,000, that you may make preparations for your journey, in the new commission which I entrust to your care.

It is necessary to see how you can get rid of the horse, with the least possible loss, as well as to recover the debt of Nicholas Welsh, or have it recovered, for which purpose I enclose you his obligation; and likewise the proceeds of the merchandise, which, to the amount of $353, you delivered to Don Pedro Derbigny, in order to give an account to the court without these balances, which caused trouble; and appear speculations, when they are no more than the effect of necessity, and the difficulty which these commissions cause, in places where there are no resources, when you have to deceive the vigilance of spies.

As you finish these matters, and as soon as your present commission is fulfilled, you will give me advice.

God preserve you many years.

THE BARON DE CARONDELET.

To Mr. Thomas Power.

We, whose names are hereunto subscribed, do severally swear and declare, that we were well acquainted with the hand-writing of the Baron de Carondelet, late Governor General of the province of Louisiana, and that we have no doubt that the letters hereunto annexed, dated severally the 23d of April, 1797, and 26th of May, 1797, are in the proper hand-writing of the said Baron de Carondelet, as also the signature to the same. And we

do also declare in like manner, that we are acquainted with the hand-writing of Don Andres Armesto, late Secretary of the Government, and that the letter hereunto annexed, dated 28th May, 1797, is in the hand-writing of the said Don Andres, and the signature thereto affixed is in the proper hand-writing of the said Baron de Carondelet.

PIERRE PEDESCLAUX, *Not. Pub.*
STEPHEN DE QUINONES, *N. P.*
NARCISSUS BROUTIN, *N. P.*
J. J. BLACHE,
G. DUBUYS.

Signed in my presence, by Pierre Pedesclaux, Stephen de Quinones, Narcissus Broutin, J. J. Blache, and G. Dubuys, and duly sworn bofore me, this 17th March, 1809.

ELIPHALET FITCH,
Notary public and Justice of the Peace.

No. 38.

NOUVELLE ORLEANS, 26 *Mai*, 1797.

J'a reçu, monsieur, vos lettres du 5, 7, 12, 13 et 16 de Mai, et j'y réponds en deux mots en remplissant vos désirs, puisque je vous confie une commission de la plus grande conséquence, qui ne vous compromet en aucune façon, pourvu bien entendu que vous ne portiez aucuns papiers qui en fasse mention, et qu'elle vous procure de l'argent dont vous me dites avoir grand besoin; enfin elle vous rend independant et me procure l'occasion de vous recommander au ministre d' état; personne n'en sera instruit, pas même l'Intendant, il n'y aura que Don Andres et moi qui en sçauront le vrai motif.

Le Général Wilkinson ayant prévenu le commandant de la Nouvelle Madrid, qu'il prépare un détachement de l'armée qu'il a à ses ordres pour prendre possession des forts de Nachez et Nogales, en conformité de l'article 2 du traité d'amitié, limites, et navigation, conclu avec l'Espagne, espérant qu'il sera fidellement observé, et lui ayant paru à propos de passer cet avis, "in order to prevent any misapprehension of the motives which direct this movement of their troops, &c." il est tout naturel que je lui réponde que s'étant suscité en premier lieu quelques doutes sur la façon dont les dits postes devoient se retirer de la part de l'Espagne, c'est à dire s'ils devoient être remis avec leurs fortifications et édifices comme l'entendent les Etats Unis, ou simplement evacués, rasés, et abandonnés, comme je le comprends, évitans de cette façon de nous compromettre avec les nations qui nous ont cédées les terreins des Escors, de Nogales, et de la Confédération, sous la condition expresse que nous y batirions des forts pour empecher que leurs terres ne fussent envahis, j'avois résolus d'attendre la décision á cet égard de notre cour, ou de son ministre plenipotentiare auprès des dits états, ainsi que la leur; mais qu' instruit peu de tems après que le ministre susmentionné avoit informé le President qu'une expedition Angloise étant sorti de Montréal, dans l'intention d'attaquer les Illinois avoit inverné sur les lacs, et devoit traverser le territoire des Etas Unis pour se porter contre la Haute Louisiane, demandant qu'en vertu du dernier traité les dits Etats s' opposassent par des moyens efficaces à cette violation de leur territoire, j'avois déterminé de garder les forts de Natchez et Nogales pour mettre en sureté la Basse Louisiane jusqu' à ce que les mesures les plus efficaces de la part des Etats la missent à l' abris de ce danger, et qu'un corps de troupes suffisant, commandé par un officier d'un grade supérieur, se présenta pour prendre possession de Natchez, y maintenir le bon ordre, et contenir les vols et les vexations des nations sauvages, conformément à l'article 5 du traité cité par le dit général; qu'en conséquence je suis prêt a évacuer les postes de Natchez et de Nogales a l' arrivée du détachement, qu'il annonce par sa lettre, daté du Fort Washington, toute et quante fois le Congrès sera convenu avec le ministre plénipotentiare de Sa Majesté de la façon dont la dite évacuation doit avoir lieu; mais qu'en attendant cette décision je le prie de faire suspendre la marche du dit détachement dont la présence ne pourroit manquer de troubler la tranquillité de la province, et peut-être la bonne intelligence que je désire maintenir entre les sujets des deux puissances. Vous serez porteur de cette lettre, et si vous croyez pouvoir prevenir la descente du détachement Americain, vous en remettrez le double au commandant, en l'engageant à attendre de nouveaux ordres de son général.

Le second objet de votre commission, que personne ne doit pénétrer, et que pour cette raison vous devrez retenir dans votre mémoire, est de sonder et examiner les dispositions du peuple des Etats de l'Ouest dont on écrit que les milices ont reçu l'ordre d'être prêtes à marcher au premier avis; et au cas que cela soit vrai, vous en ferez part au commandant de la Nouvelle Madrid par la première occasion que vous trouverez; mais afin de ne pas vous rendre suspect, vous vous contenterez de mettre la date de votre lettre en bas et ne traiterez que de choses indifférentes. S'il se fait des préparatifs hostiles, vous mettrez avant votre signature une barre, comme celle dont use les framaçons, et que vous voirez au bas de cette lettre; le nombre des points audessus indiquera celui des mille hommes, et celui audessous celui des cent dont doit être composée la dite expedition; vous designerez celui des pièces d'artillerie par un nombre de points placé dans votre parafe, selon votre usage, dont les points de la gauche signifieront des dixaines, et ceux de la droite des unités. Cette lettre me sera envoiée sur le champ par le commandant de la Nouvelle Madrid d'après les ordres que je lui fais passer; vous pouvez même le lui marquer dans la votre en disant simplement qu'il convient que je sois informé sans délai de votre arrivée sur l'Ohio, et qu'il m' adresse votre lettre par un exprès. Dans votre route vous ferez adroitement entendre aux personnes avec qui vous aurez occasion de parler que la remise des postes que les Espagnols occupent sur le Mississippi, aux troupes des Etas Unis, est directement opposée aux intérêts de ceux de l'ouest, qui devant un jour se separer des Etats Atlantiques, se trouveroient sans aucune communication avec la Basse Louisiane, d'où ils doivent s'attendre à recevoir de puissans secours en artillerie, armes, munitions, et argent, soit publiquement soit secrètement, toute et quante fois les Etats de l'Ouest se decideront à une séparation, qui doit assurer leur prosperité et leur independance; que pour cette même raison le Congrès se décide à tout risquer pour enlever ces postes à l'Espagne; et que ce seroit se forger des fers que d'appuie sa prétention en lui fournissant des milices et des moyens, qu'il ne peut trouver que dans les Etats de l'Ouest. Ces mêmes raisons répandues dans les papiers publics pourroient faire la plus forte impression sur le peuple, et le porter à secouer le joug des Etats Atlantiques; mais tout au moins si nous parvenons a le dissuader de prendre part dans cette expédition, je doute que les Etats Unis nous fassent la loi, avec les seules troupes qu'ils ont sur pied.

Si une centaine de mille piastres répandues dans le Kentuckée pouvoit le soulever, je suis bien sure que le ministre, dans les circonstances actuelles les sacrifieroit avec plaisir, et vous pouvez sans trop vous hazarder les promettre à ceux qui jouissent de la confiance du peuple, avec une autre somme égale pour l'armée, en cas de necessité, et vingt pièces de campagne.

Vous vous rendrez sans danger, comme porteur d'une dépêche pour le général, jusqu' à l'armée, dont vous examinerez avec soin la force, la discipline, les dispositions, et vous tacherez de découvrir avec votre pénétration naturelle, les dispositions du général; je doute qu' une personne de son caractère préfére par vanité l' avantage de commander l'armeé des Etats Atlantiques à celui d'être le fondateur, le libérateur, enfin le Washington des Etats

de l'Ouest; son role est aussi brillant que facile; tous les yeux sont attachés sur lui; il posséde la confiance de ses concitoyens, et des volontaires du Kentuckée; au moindre mouvement le peuple le nommera le général de la Nouvelle République; sa reputation lui formera une armée, et l'Espagne, ainsi que la France, lui fourniront les moyens de la soudoier. En s'emparant du fort Massack, nous lui envoieront sur le champ des armes et de l'artillerie, et l'Espagne, se réduisant à la possession des forts de Natchez et de Nogales, jusqu' à la confédération, cédera aux Etats de l'Ouest toute la rive orientale jusqu' à l'Ohio, ce qui formera une république très étendue et très puissante, liée par sa situation et par son intérêt avec l'Espagne, qui, d'accord avec elle, forcera les sauvages à en faire partie, et à se confondre avec le tems avec ses citoyens. Le peuple est mécontent des nouvelles taxes, l'Espagne et la France sont outrées des liaisons des Etats Unis avec l'Angleterre; l'armée est foible, et devouée à Wilkinson; les menaces du Congrès me mettent à même de sécourir sur le champ et sans déguisement les Etats de l'Ouest; l'argent ne me manquera pas pour lors, car je dépêcherai sur le champ ma frégate à Vera Cruz pour en chercher, ainsi que des munitions; il ne faut par conséquent qu'un instant de fermeté et de résolution, pour rendre les peuples de l'ouest parfaitement heureux. S'ils laissent échapper cet instant, et que nous soions forcés à remettre les postes, le Kentuckae et le Tanesis, cernés par les dits postes, et sans communication avec la Basse Louisiane, resteront à jamais sous l'oppression des Etats Atlantiques.

Si vous représentez avec force ces raisons à Wilkinson, Sebastien, La Cassagne, &c., si vous répandez ces notions dans le peuple, en gagnant par des promesses, qui seront realisées fidellement, les meilleurs écrivains, comme Brackenridge et autres, vous pourrez causer la commotion la plus glorieuse et la plus heureuse, vous vous couvrirez de gloire, et vous devez vous attendre à la fortune la plus brillante; si, au contraire, vous échouez dans cette commission, je n'en aurai pas moins l'occasion de vous faire obtenir du ministre quelque traitement, qui vous rendra independant de la haine et de la jalousie.

Il faut que vous partiez sans délai, et par terre, vous dirigeant droit à Cumberland, tant pour éviter le fort Massack, comme pour tâcher de couper le détachement Americain, et l'engager à attendre la réponse ou de nouaveaux ordres du Général Wilkinson; car s'il arrive aux Natchez, il y a tout à croire qu'on en viendra aux mains, n'étant pas d'humeur de souffrir des insultes. L'Intendant envoie l'ordre de vous compter mille piastres.

Si vous pouvez engager le commissaire, Don Andrés Ellicott, à descendre à la capitale, je ferai sa connoissance avec le plus grand plaisir, et en lui montrant sans détour la copie des ordres que j'ai envoié à M. de Gayoso, depuis son arrivée à Natchez, il voira que ma conduite vis-à-vis des Etats Unis est franche, fondée sur la prudence et la bonne foi, et sans aucune idée de rompre, ni manquer aux articles du traité; qu' enfin le louche qu'il trouve dans la conduite du Gouverneur de Natchez ne provient que des changemens que de son chef il a fait à mes dispositions. Enfin, vous pouvez assurer Don Andrés Ellicott que je suis persuadé, que dans un mois ou deux toutes les difficultés seront arrangés par le Congrès et par le ministre plénipotentiaire de S. M. Don Carlos Marténez Yrujo, et que par conséquent il feroit très mal de se retirer; il peut, au contraire, descendre commodément dans ma chaloupe avec Mr. Guillemard qui désire passer ici un mois ou deux, en attendant la réponse du Congrès. Mr. Ferrusola a également l'ordre de venir en ville.

Je marque à Mr. Gayoso que vous êtes porteur de la réponse de la lettre qu'a écrit le Général Wilkinson au commandant de la Nouvelle Madrid, et que j'ai disposé qu'on vous compte mille piastres à compte de votre dernier voyage, et de celui que vous allez faire. Cela suffit. Le champ qui vous est ouvert est assez brillant, mais il faut autant de prudence que de capacité pour sa réussite.

J'ai 'honneur d'être, avec la plus parfaite considération,

Monsieur, votre très humble et très obéissant serviteur,

LE BARON DE CARONDELET.

M. Thomas Power.

Nueva Orleans, 28 *de Mayo*, 1797.

Segun la instruccion que tengo dado á vmd. luego que reciba del Sr. Brigadier Don Manuel Gayoso, los auxilios que le mando dar à vmd. para su comision, se pondrà en viage por tierra, para entregar al General Don Jayme Wilkinson, la respuesta de la carta, que derigiò al comandante de Nueva Madrid, acerca de tomar posesion con un destacamiento de tropas, de los Fuertes de Nogales y Natchez. Por si aun encontrare vmd. el destacamiento que no hubiere pasado de Masac, lleva vmd. simple copia, de la misma carta, para que se la entregue, y obre en consequencia, debiendo vmd. continuar su viage hasta el Fuerte Washington, ò al quartel general en que se hallaré el comandante en xefe, Don Jayme Wilkinson, cuya contestacion esperará vmd. y se regresará con ella immediatamente por agua, y con la mayor prontitud. Dios nuestro Señor guarde a vmd. muchos años.

EL BARON DE CARONDELET.

Sr. Don Thomas Power.

No. 38.

[TRANSLATION.]

New Orleans, *May* 26, 1797.

I have received, sir, your letters of the 5th, of the 7th, 12th, 13th, and 10th of May, and I briefly answer them in fulfilling your wishes, because I intrust to you a commission of the greatest consequence, which does not compromit you in any manner, it being, however, well understood that you carry with you no paper which may make mention of it, as it procures you a sum of money, which you state to me you are in great need of; in fine, it renders you independent, and procures me the opportunity of recommending you to the Minister of State. No one will be informed of it, not even the Intendant; there will be none but Don Andres and myself who will be acquainted with the true motive.

General Wilkinson having informed the commandant of New Madrid that he is getting ready a detachment of the army, which he has at his orders, to take possession of the forts of Natchez and Walnut Hills, in conformity to the second article of the treaty of friendship, limits, and navigation, concluded with Spain, hoping that it will be faithfully observed; and it having appeared proper in him to give this advice, in order to prevent any misapprehension of the motives which direct this movement of their troops, &c., it is very natural that I should answer him that, in the first place, some doubts have arisen respecting the manner in which the posts are to be withdrawn on the part of Spain; that is to say, if they ought to be delivered with their fortifications and edifices, as the United States understand it, or simply evacuated, razed, and abandoned, as I comprehend it, avoiding in this way to compromit us with the nations who have ceded to us the territories of the Bluffs, Walnut Hills, and Confederation, under the express condition that we should build forts there, to prevent their lands being taken from them. I had resolved, in regard to this point, to await the decision of the court, or the minister plenipotentiary near the United States, as well as theirs; but being informed shortly afterwards that the above mentioned minister had informed the

President that an English expedition had left Montreal with the intention of attacking the Illinois, had wintered on the lakes, and was to traverse the territory of the United States, in order to attack Upper Louisiana, and had demanded that, in virtue of the last treaty, the said States should oppose, by efficacious means, this violation of their Territory. I then determined to retain the forts of Natchez and Walnut Hills, to place Lower Louisiana in safety, until the most efficacious measures, on the part of the United States, should put it in safety from this danger, and until a sufficient corps of troops, commanded by an officer of superior rank, should present himself to take possession of Natchez, maintain good order there, and restrain the robberies and difficulties with the Indians, conformable to the fifth article of the treaty cited by the said general; that, in consequence, I am ready to evacuate the posts of Natchez and Walnut Hills, on the arrival of the detachment which he announces by his letter, dated from Fort Washington, as soon as ever the Congress shall have agreed with the minister plenipotentiary of His Majesty on the way in which the said evacuation is to take place; but until this decision is made, I request he will suspend the march of the said detachment, whose presence could not fail to disturb the tranquillity of the province, and perhaps the good intelligence which I wish to maintain between the subjects of the two powers. You will be the bearer of this letter, and if you believe you can prevent the American detachment from descending the river, you will deliver a duplicate of it to the commandant, requesting him to wait new orders from his general.

The second object of your commission, which no one must penetrate, and which for this reason you must retain in your memory, is to sound and examine the dispositions of the people of the Western States, whose militia it is reported to me has received orders to be ready to march on the first advice; and in case that should be true, you will inform the commandant of New Madrid of it by the first opportunity you find. But in order not to render yourself suspected, you will content yourself with putting the date of your letter at bottom, and will only treat of indifferent subjects. If hostile preparations are making, you will put before your signature a stroke (une barre) like that which freemasons use, and which you see at the bottom of this letter; the number of dots above will designate that of a thousand men, and that below the hundreds, of which this expedition is to be composed; you will point out the number of pieces of artillery, by a number of points placed in your flourish (parafe) according to your custom, the points on the left signifying tens, and those on the right units. This letter will be immediately sent me by the commandant of New Madrid, in consequence of the orders I shall give him. You may even mention it to him in yours, saying simply that it is proper that I should be informed, without delay, of your arrival on the Ohio, and that he should send me your letter by express. On your journey you will give to understand adroitly to those persons to whom you will have an opportunity of speaking, that the delivery of the posts, which the Spaniards occupy on the Mississippi, to the troops of the United States, is directly opposed to the interests of those of the West, who, as they must one day separate from the Atlantic States, would find themselves without any communication from Lower Louisiana, from whence they ought to expect to receive powerful succors in artillery, arms, ammunition, and money, either publicly or secretly, as soon as ever the Western States shall determine on a separation, which must ensure their prosperity and their independence; that for this same reason Congress is resolved on risking every thing to take these posts from Spain; and that it would be forging fetters for themselves to furnish it with militia and means which it can only find in the Western States. These same reasons, diffused abroad by means of the public papers, might make the strongest impression on the people, and induce them to throw off the yoke of the Atlantic States; but at the very least, if we are able to dissuade them from taking part in this expedition, I doubt whether the States could give law to us with such troops alone as they have now on foot.

If a hundred thousand dollars distributed in Kentucky, could cause it to rise in insurrection, I am very certain that the minister, in the present circumstances, would sacrifice them with pleasure, and you may, without exposing yourself too much, promise them to those who enjoy the confidence of the people, with an other equal sum to arm them, in case of necessity, and twenty pieces of field artillery.

You will arrive without danger, as bearer of a despatch for the general, where the army may be, whose force, discipline, and dispositions, you will examine with care; and you will endeavor to discover, with your natural penetration, the general's dispositions. I doubt that a person of his character would prefer, through vanity, the advantage of commanding the army of the Atlantic States, to that of being the founder, the liberator, in fine, the Washington of the Western States; his part is as brilliant as it is easy; all eyes are drawn towards him; he possesses the confidence of his fellow-citizens, and of the Kentucky volunteers; at the slightest movement, the people will name him the general of the new republic; his reputation will raise an army for him, and Spain, as well as France, will furnish him the means of paying it. On taking Fort Massac, we will send him instantly arms and artillery, and Spain, limiting herself to the possession of the forts of Natchez and Walnut Hills, as far as Fort Confederation, will cede to the Western States all the Eastern bank to the Ohio, which will form a very extensive and powerful republic, connected by its situation, and by its interest with Spain, which, in concert with it, will force the savages to become a party to it, and to confound themselves in time with its citizens. The public is discontented with the new taxes; Spain and France are enraged at the connexions of the United States with England; the army is weak, and devoted to Wilkinson; the threats of Congress authorize me to succor on the spot, and openly, the Western States; money will not then be wanting to me; for I shall send, without delay, a ship to Vera Cruz in search of it, as well as of ammunition; nothing more will consequently be required but an instant of firmness and resolution to make the people of the West perfectly happy. If they suffer this instant to escape them, and that we should be forced to deliver up the posts, Kentucky and Tennessee, surrounded by the said posts, and without communication with Lower Louisiana, will ever remain under the oppression of the Atlantic States.

If you represent forcibly these reasons to Wilkinson, Sebastian, La Cassagne, &c., and if you diffuse these notions among the people, gaining by promises, which shall be faithfully realized, the best writers, as Brackenridge and others, you will be able to effect the most fortunate and the most glorious commotion; you will cover yourself with glory, and you may expect the most brilliant fortune; if, on the contrary, you should fail in this commission, it will not deprive me of the opportunity of obtaining for you, from the minister, an appointment, which will render you independent of hatred and jealousy.

You must set off, without delay, and by land, going straight to Cumberland, as well to avoid Fort Massac, as to endeavor to fall in with the American detachment, and persuade it to wait the answer, or new orders from General Wilkinson; for, if it arrives at Natchez, there is every reason to believe that we may come to blows, not being of a humor to put up with insults. The intendant sends an order to pay you one thousand dollars.

If you could persuade the commissioner, Mr. Andrew Ellicott, to descend to the capital, I should, with the greatest pleasure, form an acquaintance with him; and by showing him, without disguise, the copy of the orders which I have sent to Mr. Gayoso, since his arrival at Natchez, he will perceive that my conduct towards the United States is frank, founded on prudence and good faith, and void of the idea of breaking or failing in the articles of the treaty; that, in fine, the unaccountable part of the conduct of the Governor of Natchez only proceeds from the alterations which he has made, of his own accord, in my arrangements. Lastly, you may assure Mr. Andrew Ellicott that I am persuaded that, in a month or two, all the difficulties will be settled by Congress, and by the minister plenipotentiary of His Majesty, Don Carlos Martinez de Yrujo, and that consequently he would do

very ill to withdraw; on the contrary, he may come down conveniently in my barge with Mr. Guillemard, who is desirous of spending a month or two here, whilst we are waiting the answer of Congress. Mr. Ferrezola has also orders to come to town.

I informed Mr. Gayoso that you are the bearer of the answer to the letter which General Wilkinson has written to the commandant of New Madrid, and that I have given directions to pay you a thousand dollars on account of your last journey, and that you are about to undertake. This suffices. The field which is opened is brilliant enough, but as much prudence as capacity is required, in order to succeed.

I have the honor to be, with the greatest consideration, sir, your very humble and very obedient servant,

LE BARON DE CARONDELET.

Mr. Thomas Power.

No. 40.

Natchez, *Juin* 4, 1797.

J'ai reçu hier la lettre du 26 Mai, que vous m'avez fait l'honneur de m'écrire; à laquelle les préparatifs de mon voyage ne me permettent de répondre que très succinctement. J'ai reçu de Mons. Gayoso la dépêche du Gen. W. et sa copie, afin de m'en servir selon que les circonstances pourront le demander. Quant au second objet de mon expédition, qui en est le plus intéressant, comme rien ne peut cadrer plus complettement avec mes inclinations, vous pouvez compter que je m'en acquitterai avec toute la fidélité et tout le zèle que vous me connaissez, et avec cette intelligence qui doit résulter d'une connaissance parfaite du local et des personnages avec qui nous avons à faire. Pour éviter la possibilité d'une méprise dans les communications que je serai dans le cas de faire au commandant de la N. M. je vais expliquer ce que je prétends vous faire comprendre par ma signature à celle-ci. Cette barre—·.·.·.·.·.— avec les points avant la signature signifie quatre mille six cent hommes. Dans le parage . . . | . . . . . les points à gauche de la petite raie sont des dixaines, ceux de la droite des unités, de sorte qu'ils indiquent trente-cinq pièces d'artillerie. La date mise en bas de ma lettre signifiera simplement que les milices sont sur pied, et prêtes à marcher.

Les reflexions que contient votre lettre sont parfaitement de nature à faire la sensation la plus forte dans le Kentucky, tant sur le peuple que sur le Gen. W. et d'autres caractères distingués: et je ne manquerai pas de les leur exposer sous le point de vue le plus frappant; et je les appuierai de celles que pourront me suggérer l'étude que j'ai faite de leurs intérêts, et l'ardeur avec laquelle je désire de voir leur scission. Cependant je mettrai de la sagesse et de la prudence dans mes démarches, pour ne pas me compromettre; et il faudra toutes les précautions imaginables de mon coté de ne rien laisser échapper qui puisse jetter du jour sur mon dessein; car toutes les fois qu'ils me voient entrer dans leur territoire, leur méfiance et leur jalousie leur font soupçonner que j'ai quelqu' objet secret en vue. Je dirai à W. que la difficulté et le danger de porter l'argent par terre ne vous ont pas permis de lui envoyer les 640 piastres. L'ambition et la politique de ce général me sont un garant certain qu'il appuiera nos plans (qui ont toujours été les siens) de toute son influence; et nous pouvons faire fonds sur Nicholas, Sebastian, Innis, Murray, Clarke, et, en un mot, sur tous ceux qui devaient composer l'armée de Clarke. Les principaux du pays tiennent à nous par l'ambition et l'intérêt; et une gallomanie forcenée, et un amour pour le changement, nous répondent de l'appui du peuple, qui donnera tête baissée dans votre projet. Si j'en croyais mes pressentimens, notre succès est immanquable. Il y a tant de motifs puissans qui devraient porter les Etats de l'Ouest a cette démarche, qu'il nous serait permis de croire qu'ils ont perdu la tête s'ils reculent: Quant à moi, je n'épargnerai ni peines, ni travail, pour faire réussir cette révolution importante; et j'ai à vous prier de daigner agréer l'expression de ma plus vive réconnaissance tant de m'avoir lancé dans une carrière aussi brillante et glorieuse, que de m'avoir soustrait à la haine et à la jalousie. J'ai vu Ellicott; je lui ai fait part de ce que vous m'avez communiqué à son sujet, et il en a été très satisfait. Il a parlé de vous dans les termes les plus flatteurs, et m'a prié de vous présenter ses respects, et de vous assurer que de quelque manière que les affaires se terminent, il n'abandonnera pas la province sans avoir eu le plaisir de vous voir. Les milles piastres m'ont été comptées, et je n'attends qu' un cheval pour partir. Ne cessez de compter sur mon zèle, ma vigilance, et mon courage.

J'ai l'honneur d'être, avec le plus profond respect, et la réconnaissance la mieux sentie,

Monsieur, &c.

—·.·.·.·.·.— THOS. POWER.

Mr. Le Baron de Carondelet.

No. 40.

[translation.]

Natchez, *June* 4, 1797.

I received yesterday the letter of the 26th of May, which you have done me the honor to write me, and which the preparations for my journey do not permit me to answer but very briefly. I have received of Mr. Gayoso, the despatch of General Wilkinson, together with the copy, in order to make use of it as circumstances may require. With respect to the second object of my expedition which is the most interesting, as nothing can coincide better with my inclination, you may depend that I will acquit myself of it with all the fidelity and zeal which you know me to possess, and with that good understanding, resulting from a perfect knowledge of the place and personages with whom we are concerned. To avoid the possibility of a mistake in the communication which I shall have to make to the commander of New Madrid, I will explain what I mean to give you to understand by my signature. This bar with the dots —·.·.·.·.·.— before the signature, signifies 4,600 men. . . . | . . . . . In the flourish, the dots to the left of the small stroke are tens, and those of the right are units; so that they mean thirty-five pieces of artillery. The date at the bottom of my letter will simply signify that the militia are on foot, and ready to march. The remarks which your letter contains, are well adapted to cause the strongest sensations in Kentucky, as much on the people as on General Wilkinson, and other distinguished characters; and I will not fail to represent them, in that point of view which is the most striking, and I will strengthen them with those, which the study I have made of their interests, and the ardor with which I desire to see their decision, may suggest. However, I will use wisdom and prudence in my measures, not to compromise myself, and all imaginable precautions will be necessary, on my part, in order not to let slip any thing which may give light to my design; for, whenever they see me enter their territory, their mistrust and their jealousy causes them to suspect that I have some secret object in view. I will tell Wilkinson that the difficulty and the danger of carrying money by land have prevented you from sending him the 640 piastres. The ambition and politics of this general are a certain warrant to me that he will support our plans (which have always been his) with all his influence; and we may rely upon Nicholas, Sebastian,

Innis, Murray, and Clarke; in a word, on all those who are attached to Wilkinson; and also those who were to compose the army of Clarke. The principal characters of the place are united to us by ambition and interest; and an excessive Gallicism, and a love of change, answer for the support of the people, who will willingly submit to your project. If I give credit to my presentiment, our success is infallible. There are so many powerful motives which should lead the Western States to take this step, that we should be permitted to believe that they had lost their senses if they flinch. As to myself I will spare neither pains nor labor for the success of this important revolution. And I have to request of you, that you will deign to accept of my most sincere acknowledgment, as well for having launched me out in a career so glorious and so brilliant, as for protecting me from jealousy and hatred. I have seen Ellicott. I told him what you communicated to me about him, and he was very well satisfied with it. He spoke of you in the most flattering terms, and requested me to present you his best respects, and to assure you that, however affairs may turn out, he will not leave the province without seeing you. The 1,000 piasters have been delivered to me, and I only wait a horse to set off. Do not cease to trust in my zeal, vigilance, and courage.

I have the honor to be, with most profound respect,
and most sincere acknowledgment, sir, &c.

THOMAS POWER.

Monsieur LE BARON DE CARONDELET.

. . . | . . . . .

No. 42.

From General Wilkinson to Mr. Power.

SIR: HEAD-QUARTERS, DETROIT, *September* 5, 1797.

I have the last moment received your letter of the day, which occasions me much surprise.

At our first interview, the night before last, I expressed to you the necessity of your speedy return, by the shortest route, to the Baron de Carondelet, with my answer to the letter which you bore me from him. You offered no objection to this proposition, except the incapacity of your horses for the journey, which I immediately agreed to remove by furnishing others.

You, at the same time, complained to me of violence and outrage, which you had experienced on your journey to this place, being at one time stopped, and at another time, pursued, seized, and examined, in every particular of person, baggage, and papers. It seems a little singular that you should incline to retrace a route in which you had suffered such abuse, when a secure and convenient one is proposed to you.

As no man can more highly appreciate the rights of treaties and of individuals than myself, and as I am well apprised of the obligations subsisting between the United States and His Catholic Majesty, I am among the last men on earth who would wantonly or capriciously question the compacted rights of the two sovereignties, their citizens, or subjects.

But as you have approached me in a public character, and on national business, which requires my speedy answer to the letter of the Governor of Louisiana, whose messenger you are, I cannot consider you so far a free agent as to elect the time or route for your return; but that you stand bound by motives of political import, as well to Spain as to the United States, to consummate the objects of your mission with all possible promptitude; and, of consequence, that all objects of a private or personal nature must yield to the obligations of public duty.

I, therefore, sir, cannot recede from my purpose, and will hope you may be prepared to take your departure early to-morrow morning, in the company of Captain Shaumburgh, who will be instructed to attend you to New Madrid, and who will receive and forward any letter you may wish to send to the falls of Ohio, from the most convenient point of your route.

With due consideration, I am, sir, your most obedient servant,

JAMES WILKINSON.

Mr. THOMAS POWER.

No. 43.

El dia 3 del mes de Junio proximo pasado recibí ta carta del Sr. Baron de Carondelet, con fecha: de 28 del mes anterior acompañado de la instruccion anunciada en ella, de que incluyo copias No. 1. y No. 2. En execucion de las ordenes é intencion que su premera se ha servido prevenirme en ellas, hize las prevenciones correspondients para el viage, y me puse marsha el 8 del mismo mes. Por haber perdido mis caballos el dia que salí del bayou Pierre, y por otros incidentes imprevistos é inevitables tardé en llegar a Nashville, capital de Cumberland, hasta el 5 de Julio, donde tuve que permanecer algunos dias, tanto para desempeñar con acierto mi comision reservada, y examinar con cuidado las disposiciones de sus habitantes en lo tocante á las desavenencias que entonces existian entre los E. U. y nosotros, y averiguar definitivamente el partido que intentan tomer en la actual crisis, como para allanar los impedimientos que me estaban suscitando, precaver, las dudas, y evitar los riesgos que no dexarian de resultar de las voces esparcidas en el publico, por lo respectivo al verdadero objeto de mi viage: me detuvo el magistrado, J Gordon, algunos dias.

Habiendome desenredado y vencido estos embarazos, proseguí mi viage para Louisville, donde me aboqué con Don Benjamin Sebastian, á quien, como previene la citada instruccion, communiqué el motivo aparente, como asi mismo la causa verdadera di mi mision. Adémas de las proposiciones expresadas en mis instruccions, para no perder el fruto de mi viage, me ví en la precision de añadir las seguientes, pues sin la primera adverti que ni el ni los demas sujetos interados é interesados en este asunto importante, no huvieran hecho los movimientos indispensables para su felix exito. En primero lugar he pactado, que siempre que alguno de los que favoreceren ó fomentaren el proyecto del Sr. Baron, viniera por este motivo á perder su empleo, reciberá del Rey una indemnizacion comensurada con los emolumentos de que gozaba.

2°. Que la linea divisoria septentrional, entre el territorio de S. M. y el de los Estados Nuevos del Oueste, ha de empezar á la embocadura del rio Yazou, y extenderse en tal direccion hacia el Tombecbé que el ultimo puesto, fuerte, ó establecimiento Español sobre dho rio quede seis millas dentro del territorio de S. M.

3°. Que el puesto de San Fernando de las Barrancas, con todo el terreno concedido á la España por la nacion Chicacha en el tratado hecho con ella por el Sr. Don M. G. de Lemos, ha de quedar en posesion de S. M.

4°. Que el Rey no ha de mezclarse, ni directa ni indirectamente, en la formacion del Gobierno ó de las leyes que ellos tuvieren por conveniente establecer.

Conseguiente á estos objetos, resolvimos que el los participaria á los Señrs. Nicholas, Innis, Todd, y otras personas de su confianza, practicas y zelozas del adelantaminento, prosperidad, é independencia del Kentucky, y rehu-

sando absolutamente se hablar sobre el asunto con Murray y Brackenridge, porque de ambos desconfiaba; pues el primero está entregado crapulosamente á bebidas, y la mala fé y perfidia del otro son notorias; para tener con ellos conferencias, dirigidas á verificar los deseos del Baron, y concertar las operaciones á este fin. Mientras yo continuaria mi viage hasta Detroit, en donde estaba el General Wilkinson; tanto para entregarle la carta del Señor Baron, como para ocultar el objeto principal de mi mision, y evitar lo que se estaba tramando contra mí en Louisville, cuyos habitantes estaban muy alborotados con mí llegada en el pays, y me estaban amenazando abiertamente. Quedamos tambien en que á mi regreso pasaria por Greenville, Cincinnati, Newport, Georgetown, Lexington, Frankfort, &c., para ver los Sñres ya citados, y enterarme de las resultas de sus conferencias, y que él (Sebastian) con otro deputado, me acompañaria hasta la Nueva Orleans. Sin embargo de que Don B. Sebastian está persuadido que por ahora todos los medios y conatos para estimular los habitantes de los Estados del Oueste á separarse de la federacion serán infructuosos, con todo no dexará de hacer todos sus esfuerzos para conseguir lo que con tanta ansia deseamos todos.

Volviendo pues á mi viage, salí de Louisville el dia ——— de Julio, para ponerme con la brevedad posible en Detroit, y el dia seguiente me aconteció lo que manifiestan los documentos No. ———. Nota, que 16 de Julio escribí al Captain Don Isaac Guyon, encaminandole la copia de la carta del Sñr. Baron de Carondelet al General Don James Wilkinson; incluyo copia de la mia al dho. Captain Guyon, No. ———. No se ofreció novedad alguna en el curso de mí viage, y llegué en la vecinidad de Detroit el 16 de Agosto. Noticioso de que el General Wilk . . . . . habia salido para Michilimakinak, no entré en el puesto hasta el 24, dia en que le estaban esperando; pero no regresó sino el 3 ó el 4 de Setiembre. Antes de su llegada, luego que súpó que yo estaba allí, me mandó quedar arrestado en el quartel de los oficiales. El dia 6 me entregó su respuesta á la carta del Sñr. Gobernador obligandome contra jus gentium a regresar al Nuevo Madrid por el Wabash baxo una guardia, mandada por el Capitan Don Bartolomé Shaumburgh; como lo evidencia no solamente mi correspondencia con él, sobre el asunto, la que está copiada en No. ———, y No. ———, sinó tambien la declaracion adjunta de Shaumburgh, No. ———. A mí llegada al puesto Vincennes despaché un proprio a Louisville, con una carta para Don Benjamin Sebastian, cuya copia va inclusa No. ———, dandole aviso de lo que me habia sucedido, enterandole de los motivos que no me dexaban cumplir con la palabra que le habia dado. El 10 de Octubre llegamos en el Nuevo Madrid sin otra particularidad alguna. Parmanecí en ese puesto 15 dias, aguardando á Mr. Sebastian. Por fin, viendo que no venia, y no recibiendo noticia alguna de él, me puse en deriva el 24 de Octubre; pero por motivo de las aguas baxas, los malos tiempos, y vientos del sud, no me restituí á esta capital antes del 30 del mes proximo pasado. El Captain Shaumburg, por orden del General Wilkinson, y por cuenta de los Estados Unidos, hizo todos los gastos de nuestro viage desde Detroit hasta el Nuevo Madrid. Pero volvamos al objeto de mí mision.

El General Wilkinson me recibió con bastante frialdad. En la primera conferencia que tuve con el, prorumpió con decirme amargamente, " somos perdidos, vmd. y yo, sin poder sacar provecho alguno de mí viage," y seguidamente me preguntó si le habia traido 640 pesos; añadio, " que el executivo le habia dado orden al Gobernador del Territorio del Nord Oueste para que me prendiese y me embiase á Philadelphia; que no me quedaba otro recurso para escaparme, que el dexarme conducir immediamente baxo una guardia al Fuerte Massac, y de allí al Nuevo Madrid." Y habiendole enterado de las proposiciones del Sñr. Baron, proseguió diciendome, que era un proyecto chimerico, que era imposible executar; que los habitantes de los Estados del Oueste, habiendo logrado por el tratado todo lo que deseaban, no querian formar otros enlaces politicos ó de comercio; y que ya no tenian motivo de separarse de los intereses de los otros Estados de la Union, aunque la Francia y la España los hagan las proposiciones las mas ventajosas; que la fermentacion que reynaba en el pueblo hace 4 años ya esta asosegada; que las depredaciones y las vexaciones que padecia el comercio de los Americanos de parte de los corsarios Franceses les habia infundido un odio implacable contra su nacion; que algunos del Kentucky le habian propuesto levantar 3,000 hombres, para invadir la Louisiana en caso que se declarase la guerra entre los Estados Unidos y la España. Esta no tenia otro rumbo que seguir en las circunstancias actuales, que dar cumplido efecto al tratado, el que ha trastornado todos sus planes, é inutilizado, el trabajo de mas de diez años, &c. &c. En quanto á el, dixo que habia hecho pedazos sus cifras, y toda su correspondencia con nuestro gobierno, y que su deber y su honra no le permitian continuarla; que con todo, el Sñr. Gobernador no debe tener rezelos de que el abùse de la confianza que ha hecho de él; enfin que en entregando la España á los Estados Unidos el territorio de Natchez, &c., puede que le nombren Gobernador de ello, y que entonces no le faltarán ocasiones para tomar medidas mas eficaces para efectuar sus proyectos politicos. Se quexa mucho de que el secreto de sus relaciones con nuestro gobierno se ha divulgado, por falta de prudencia y recato de nuestra parte; que súpo en el mes de Setiembre del año prox. pas. por uno de sus oficiales, que la España no tenia intencion de entregar los puestos; pues dicho official vió en el puesto Vincennes una carta, escrita por un oficial Español de los Ilinois, y derigida á un vecino del puesto, en que se lo dice; que M. Audrain tiene una correspondencia con Don Z. Trudeau (ó lo hace créer) y que este le comunica asuntos reservados de gobierno, de suerte que Audrain suele hacer correr noticia que á todo riesgo podran causar un rompimiento, en las fronteras de otro; que el M. Trudeau se ha comportado con muchissima imprudencia, habiendo enviado emisarios entre los Indios en el territorio de los Estados Unidos, combidando les a establecerse en el de la España, diciendoles, que su padre, el Español, estaba en guerra con los Ingleses, y que en breve la haria á los Americanos, &c. &c.

Por lo que toca á las disposiciones de los habitantes de Kentucky, el parecer de Mr. Sebastian discrepa mucho del del General Wilkinson. Dice, que aunque se declare la guerra entra la España y los Estados Unidos, no tendremos nada que temer de los Kentuckianos; y no ha omitido insinuar que seria uno de los medios los mas eficaces de empujarles á tomar un partido violento contra los Estados del Este. Sin embargo de las repetidas representaciones, que de palabra y por escrito que he hecho á V. S. y al Señor Baron de Carondelet, sobre esto asunto, recapitularé en pocas palabras las resultas de mis muchas observaciones, hechas con la atencion la mas escrupulosa.

Una gran porcion de los notables de Kentucky, Cumberland, y Northwest Territory, han sido motores de la expedicion de Genet y Clarke contra esta provincia, por conseguiente, enemigos de los que lo son de los Franceses; mas de la mitad de los demas son los, que toman el mayor interes en que los Estados del Oueste se enlacen mas intimamente con nosotros; y muchos de los que quedan, como no tiene gran ansia de hacer conquistas sobre la España, y si solo conservan los limites, y los privilegios señalados por el tratado, haran lo que cabe en ellos, para que no lleguen las cosas á hostilidades. La plebe se dexa gobernar implicitamente ó por los unos ó los otros de los referidos, de suerte, que attendidas estas circumstancias, podemos deponer todo rezelo en esta parte. Pero otras causas mas graves se oponen á que se declaren independientes de los Estados del Este. Me contentaré con exponer la mas importante:—Mientras estaran haciendo un tratado con el Gobierno de la Louisiana, que seguridad tendrán de que el gabinete de Madrid no esté haciendo al mismo tiempo otro muy opuesto á lo que habran pactado aquí? la experiencia los ha enseñado, desgraciadamente, que esto no es una mera conjetura. Solo tres motivos les podran impeler á romper la confederacion con los otros Estados, que son:

1°. La guerra con la republica de Francia.

2°. La prohibicion de navigar el Mississippi, y de establecerse en los dominios del Rey.

3º. El no poder pagar en plata lo que les toca de los derechos generales (28,000 pesos) ó ver que el Gobierno intente cobrarlo por fuerza.

Estos son los exes sobre que gira su politica. Me queda aun que decir algo de la fuerza militar de los Estados Unidos. Su exercito ascende á cerca de 3,000 hombres; consiste de 4 regimientos de infanteria, 1 regimiento doble de artilleria, y dos companias de caballeria; en cada regimento hay 8 companias, cada compania se compone de 65 hombres, inclusos un Capitan, Teniente, y un Alferez, pero no hay ni una que este completa. Se debe observar, que las dos de caballeria ascenden á 180 hombres, pero solo hay unos 60 de montados. Cada regimiento tiene un Coronel, y dos Sergentos Mayores. El primero regimiento, mandado por el Coronel Hamtramk, se halla en Fort Wayne, y los demas fuertos hacia Fort Washington; el segundo, mandado por el Coronel Strong, está en guarnicion en Detroit, Michilimakinac, Niagara, Presque Isle, Oswego, &c., el tercero, mandado por el Coronel Gathers, guarnece los Fuertes de Massac, las Barrancas, &c., una ó dos companias quedando en Georgia; el 4to. mandado por el Coronel Butler, está en el Tenesse; los artilleros estan repartidos en los fuertes, aunque la mayor parte no sale de Stony Point, en los Estados del Este; la caballeria esta parte en el Tenesse, parte en Detroit, y los demas en Fort Washington. Por lo respectivo á sus fuertes, como es un asunto de ninguna importancia para nostros, no quiero molestar á su Señoria con una descripcion enfadosa de ellos. Se observa en el exercito una disciplina muy rigorosa; los soldados son casí todos mozos de 16 a 26 años; executan algunas evoluciones militares con bastante precision. En quanto á los oficiales, desde el primer hasta el ultimo (exceptuando muy pocos) carecen de todas las calidades que deben adornar un buen militar, menos la braveza, y estan sumergidos en la ignorancia, y los vicios los mas vergonzosos.

La influencia del General Wilkinson en el Kentucky ha llegado á ser muy corta; y en el exercito, por querer reformar muchas abusos y establecer algunas innovaciones, pierde de dia en dia mucho de ella. Espero de lo que va dicho sobre el asunto di mí mision, que V. S. quedarà convencido, que si no ha tenido una salida mas feliz y ventajosa, no debe de ningunmodo atribuirle á indiscrecion ó otro defecto mio, pues es patente que ha dimanado de causas que ninguna penetracion humana podia alcanzar, y que ninguna prudencia podia precaver; y si he carecido de inteligencia y capacidad que pedia el desempeño de mí comision, no será atrevimiento en mí, el decir, que la prontitud y el zelo, el sigilo y fidelidad, que en otros ocasiones aun de mas entidad he manifestado en el servicio de S. M. no me han abandonado en esta. Dios guarde a V. S. mos. años, 5 de Deciembre, 1797.

P. D. Incluyo, con los otros documentos, la cuenta de los gastos del viage, No. 11. La de los 640, que pide con tanta instancia el General Wilkinson, y que me ha encargado de recebir por su cuenta, la remití al Señor Baron de Carondelet en el mes de Mayo del presente año, No. 3, acompañado de otros documentos, los que recibió, como consta por su oficio de 28 del mismo mes y año, de que tambien incluyo copia, No. 12.

Don MANUEL GAYOSO LEMOS.

No. 43.

[TRANSLATION.]

On the 3d of June last I received the Baron de Carondelet's letter, dated 28th of the preceding month, accompanied by the instructions there announced, of which I enclose copies, Nos. 1 and 2. In consequence of the orders and intention which His Excellency has deemed proper to advise me of in them, I took the necessary steps for the journey, and set out on the 8th of the same month. Having lost my horses the day I set out from bayou Pierre, and by other unforeseen and unavoidable accidents, my arrival at Nashville (capital of Cumberland) was retarded until the 5th of July, where I was compelled to remain some days, as well to execute with exactness my private instructions, carefully to examine the dispositions of its inhabitants, with respect to the difference then existing between the United States and us, and to ascertain, definitively, the part which they intend to take in the present crisis, as also to lessen the difficulties which were rising, to provide against doubts, and avoid the dangers which would not fail to result from the rumors spread among the public as to the true object of my journey. The magistrate, Mr. J. Gordon, detained me some days.

Having done away, and overcome these difficulties, I pursued my journey to Louisville, where I had an interview with Mr. Benjamin Sebastian, to whom, as the above letter mentions, I communicated the apparent motive, and likewise the true cause of my mission. Besides, the propositions expressed in my instructions, not to lose the fruit of my journey, I found myself compelled to add the following, since, without the first, I perceived that neither he nor the other persons interested in this important undertaking, would have taken the necessary measures for the happy issue of it. In the first place, I have agreed, that whenever one of those who favored the fomentation of the projects of the Baron should, by this means, lose his office, he shall receive from the King an indemnification, with the emoluments which he enjoyed.

2d. That the boundary line on the north, between the territory of His Majesty, and that of the new States of the east, must begin at the mouth of the river Yazoo, and extend in that direction as far as the Tombigbee; that the last strong post or Spanish settlement on said river be six miles within His Majesty's territories.

3d. That the place called St. Fernando de las Barrancas, with all the land granted to Spain by the Chicacha nation, in the treaty made with her by Mr. M. G. de Lemos, must remain in His Majesty's possession.

4th. That the King is not to interfere, neither directly or indirectly, in the formation of the government or laws which they may think proper to establish.

Consequent to these objects, we resolved that he should make them known to Messrs. Nicholas, Innis, Todd, and other persons in whom he confided, who were zealous for the improvement, prosperity, and independence of Kentucky, &c., absolutely refusing to speak to Murray or Brackenridge on the subject, as he mistrusted both. The first is given to drink, infidelity, and perfidy; the other is notorious to hold conferences with them, directed towards verifying the desires of the Baron, and concert measures to that effect. In the mean time I should continue my journey to Detroit, where General Wilkinson was, as well to deliver him the Baron's letter, as to conceal the object of my mission, and avoid what was plotting against me at Louisville, whose inhabitants were very mutinous at my arrival in the country, and were openly threatening me. We agreed also, that, on my return, I should pass through Greenville, Cincinnati, Newport, Georgetown, Lexington, Frankfort, &c., to see the gentlemen above mentioned, and inform myself thoroughly of the result of their conferences, and that he, (Sebastian,) with another appointed person, should accompany me as far as New Orleans. Notwithstanding, Don B. Sebastian is persuaded that, for the present, all the means and endeavors used to stimulate the inhabitants in the Eastern States to separate themselves from the confederation will be useless, still he will not fail to exert his utmost to obtain what we so anxiously desire.

To return to my journey. I sat out from Louisville the —— of July, to arrive at Detroit as soon as possible, and the following day I met with the accident manifested in the documents No. ——. Note, that on the 16th of July, I wrote to Captain Isaac Guyon, forwarding him the copy of the Baron de Carondelet's letter to General James

Wilkinson; I enclosed a copy of mine to said Captain Guyon, No. ——. Nothing new presented itself in the course of my journey, and I arrived in the neighborhood of Detroit on the 16th of August. I was informed that General Wilkinson had set out for Michilimakinac, in consequence of which I did not enter the post until the 24th, which was the day they expected him; but he did not return before the 3d or 4th of September. Before he arrived, as soon as he knew that I was there, he ordered me to remain arrested in the quarters of the officers. On the 6th he delivered me his answer to the Governor's letter, obliging me (*contra jus gentium*) to return to New Madrid, by Wabash, under a guard, commanded by Captain Bartholomew Shaumburg, as is proved, not only by my correspondence with him on the subject, which is copied in No. ——, No. ——, and No. ——, but also by the annexed declaration of Shamburg, No. ——. On my arrival at Post Vincennes, I despatched an express to Louisville, with a letter for Benjamin Sebastian, a copy of which goes enclosed, No. ——, advising him of what had occurred, and informing him minutely of the motives which prevented me from complying with my promise given him. On the 10th of October, we arrived at New Madrid, without any particular occurrence. I remained in that place fifteen days, waiting for Mr. Sebastian. Finally, seeing that he did not come, and not hearing from him, I departed on the 24th of October, but by low tides, bad weather, and winds from the southward, I did not arrive at this capital before the 30th of last month. Captain Shaumburg, by order of General Wilkinson, and on account of the United States, defrayed all the expenses of our voyage from Detroit to New Madrid. But let us return to the object of my mission.

General Wilkinson received me very coolly. During the first conference I had with him, he told me very bitterly, "we are both lost, without being able to derive any advantage from your journey," and asked me afterwards if I had brought him the $640; he added, that the Executive had given orders to the Governor of the Northwest Territory to take and send me to Philadelphia; that there was no other resource for me to escape, but by permitting myself to be conducted immediately under a guard to Fort Massac, and from there to New Madrid. Having informed him of the proposals of the Baron, he proceeded to tell me that it was a chimerical project, which it was impossible to execute; that the inhabitants of the Western States, having obtained by treaty all they desired, would not wish to form any other political or commercial alliances, and that they had no motive for separating themselves from the interests of the other States of the Union, even if France and Spain should make them the most advantageous offers; that the fermentation which existed four years back is now appeased; that the depredations and vexations which American commerce suffered from the French privateers had inspired them with an implacable hatred for their nation; that some of the Kentuckians had proposed to him to raise three thousand men to invade Louisiana, in case war should be declared between the United States and Spain; that the latter had no other course to pursue, under the present circumstances, but to comply fully with the treaty, which had overturned all his plans, &c., and rendered useless the labors of more than ten years; that as to him, he said he had destroyed his ciphers, and torn all his correspondence with our Government, and that his duty and his honor did not permit him to continue it; that, with all, the Governor ought not to be apprehensive of his abusing the confidence which he had placed in him; finally, that Spain, by delivering up to the United States the Territory of Natchez, &c., might perhaps name him Governor of it, and that then he would not want opportunities to take more effectual measures to comply with his political projects. He complains very much that the secret of his connexion with our Government had been divulged, for want of prudence on our part; that he knew in September, of the last year, by means of one of his officers, that Spain had no intention to give up the posts, since the above-mentioned officer saw a letter at Post Vincennes, written by a Spanish officer, of the Illinois, and directed to an inhabitant of that place, in which he tells him, that Mr. Audrain has a correspondence with Z. Trudeau, (or makes it to be believed,) and that he communicates to him private affairs of the Government, so that Audrain is accustomed to spread news that, at all events, may cause a rupture in the frontiers; that Mr. Trudeau has conducted himself with a great deal of imprudence, having sent emissaries among the Indians, in the territory of the United States, inviting them to come and establish themselves in that of Spain, telling them that his father, the Spaniard, was at war with the English, and that he would soon make it with the Americans, &c. &c.

With respect to the dispositions of the people of Kentucky, the opinion of Mr. Sebastian differs very much from that of General Wilkinson. He says, that even if war is declared between Spain and the United States, we will have nothing to fear from the Kentuckians; and he has not omitted to insinuate that it would be the most efficacious mode to spur them on to take a violent part against the Eastern States. Without considering the many representations, which, verbally and in writing, I have made to your excellency, and to the Baron de Carondelet, on this subject, I will recapitulate, in a few words, the result of my many observations, made with the most scrupulous attention.

A great portion of the principal characters in Kentucky, Cumberland, and the Northwest Territory, have been instigators of the expedition of Genet and Clarke against this province, consequently they are enemies of those who are of the French; more than one-half of the rest are those who take the greatest interest in a more intimate union of the Western States with us; and many of those who remain, as they are not very desirous of gaining conquests over Spain, but only to preserve the limits and privileges marked in the treaty, will do what they can, in order to avoid hostilities. The people permit themselves to be implicitly governed by one of the parties mentioned, so that, considering these circumstances, we may labor under no apprehensions on this account. But other more weighty reasons oppose to their declaring themselves independent of the Eastern States. I will content myself with relating the principal one: Whilst they will be making a treaty with the Government of Louisiana, what certainty will they have that the cabinet of New Madrid is not making a treaty at the same time, very different from what they may have agreed to here? Experience has taught them, to their misfortune, that this is not a mere conjecture. Three motives alone would be able to impel them to break the confederation with the other States, viz:

1st. War with the republic of France.

2d. A prohibition to navigate the Mississippi, and to establish themselves in the dominions of the King.

3d. Their incapacity to pay in cash their share of the common duties, ($28,000,) or to see the Government intent on recovering it by force.

These are the axes upon which their policy turns. It now remains for me to say something of the military forces of the United States. Their army amounts to near 3,000 men; they consist of four regiments of infantry, one double regiment of artillery, and two companies of cavalry. In each regiment there are eight companies; each company is composed of sixty-five men, including a captain, a lieutenant, and an ensign; but there is not one complete. It must be observed, that the two companies of cavalry amount to one hundred and eighty men; but there are only sixty mounted. Each regiment has a colonel, and two sergeant majors. The first regiment, commanded by Colonel Hamtramk, is at Fort Wayne, and the other forts towards Fort Washington; the second, commanded by Colonel Strong, is encamped at Detroit, Michilimakinac, Niagara, Presque Isle, Oswego, &c.; the third, commanded by Colonel Gaithers, fortifies the forts of Massac, Barrancas, &c., one or two companies remaining in Georgia; the fourth, by Colonel Butler, is in Tennessee; the artillery men are divided among the forts,

although the greatest part does not go from Stony Point, in the Eastern States; the cavalry is divided between Tennessee, Detroit, and Fort Washington. With regard to their forts, as it is a subject of little importance to us, I do not wish to trouble your excellency with a tedious description of them. There is a strict discipline observed in the army; the soldiers are almost all youths, from sixteen to twenty-six years of age; they go through some military evolutions with sufficient precision. With respect to the officers, from the lowest to the highest, (excepting very few,) they are deficient of those qualities which adorn a good soldier, except fierceness, and are overwhelmed in ignorance, and in the most base vices.

The influence of General Wilkinson in Kentucky has become very limited; and in the army, by wishing to establish some innovations, lessens it from day to day. I hope, from what is said on the subject of my mission, that you will be convinced, that if it has not had a more happy issue, it ought not to be attributed in any manner to indiscretion, or other deficiency on my part, since it is evident that it sprung from a cause which no human penetration could foresee, and no prudence prevent; and if I have been deficient in the intelligence and capacity which the discharge of my commission required, it will not be boldness in me to say, that the promptitude and zeal, silence and fidelity, which, on more important occasions, I have manifested in the service of His Majesty, have not been of any avail on the present. God preserve you many years.

DECEMBER 5, 1797.

P. S. I enclose you, with the other documents, the account of the expense of the journey, No. 11; that of the six hundred and forty dollars, which General Wilkinson so anxiously solicits, and which he has charged me to receive on his account, I remitted to the Baron de Carondelet in the month of May, of this year. No. 3, with the other documents, those which I received, as stated in his official letter of the 28th of the same month and year, of which I also enclose a copy, No. 12.

Mr. MANUEL GAYOSO DE LEMOS.

No. 70.

General Wilkinson to Thomas Power.

[DUPLICATE.]

SIR: HEAD-QUARTERS, GREENVILLE, *May* 25, 1796.

The day before yesterday I had the honor to receive a letter from you, under date of the 20th instant, in which you request leave to visit this place, and to proceed by St. Vincennes and the Illinois, to New Madrid. Permit me, sir, to observe, that this precaution was unnecessary, at a time when the United States of America are happily at peace with all the world. In this enviable situation, the officers of the American army have no concealments to make, and, therefore, our camps and our forts are free to the ingress and egress of all persons who deport themselves with propriety. I beg you, sir, to believe, that, upon an unpleasant occasion, to which you are pleased to refer, my conduct was directed more by the delicacy of my own situation than any sense of your demerit. Neither my sympathies, nor my antipathies, have ever gained such an ascendant over my reason, as to incline me to condemn upon hearsay, or to adopt the prejudices of any man. I thank you, sir, for the trouble you have given yourself, in bringing forward the segars committed to your charge by my very worthy friends, Governor Gayoso and Don Andres; and I have the honor to be,

With due consideration, sir, your most obedient servant,

JAMES WILKINSON.

Mr. THOMAS POWER.

No. 44.

NOUVELLE ORLEANS, 23 *Avril*, 1797.

J'ai reçu, monsieur, la lettre que vous m'avez fait l'honneur de m'écrire, et à laquelle je n'ai pu répondre plutot en ayant été empeché par un surcroît d'occupations que m'a donné la nouvelle que j'ai reçu de notre envoyé auprès des Etats Unis, que les Anglois vont attaquer les Illinois: ceci m'oblige à changer de nouveau les dispositions que j'avois prises pour commencer la démarcation des limites; car, si l'expédition est assez conséquente pour s'emparer de St. Louis, qui, comme vous ne l'ignorez pas, n'a qu'un très mauvais fort, propre uniquement à en imposer à des sauvages, il ne nous reste rien jusqu'à Nogales, pour arrêter l'ennemi, et couvrir la Basse Louisiane; en conséquence j'ai ordonné à M. de Gayoso de faire sçavoir à M. Elicot, et au commandant du détachement Americain, que je me trouve forcé de mettre Nogales en état de défense, et d'y transporter toute la troupe et l'artillerie existans à Natchez, où je ne laisserai que cinquante hommes, commandés par Don Manuel Lanzos, M. de Gayoso devant passer également à Nogales, avec Ms. Guillemard et Perchet, pour hâter les travaux. Enfin, je vais faire monter une compagnie de grenadiers en sus audit Nogales. Comme il convient qu'il y ait aux Natchez une personne intelligente, qui veille, et soit instruite, des démarches du commisaire et de l'officier commandant, j'ai disposé que vous serviriez d'interprète et secrétaire à M. Lanzos, qui ne manque pas de finesse; et que Vidal accompagne M. de Gayoso à Nogales, ou passe aux Illinois avec de l'argent et des dépêches que j'y envois. Vous me rendrez compte exactement de tout ce qui se passera digne d'être mandé, et tacherez de vous insinuer dans la confiance du commandant Américain, que vous ferez en sorte de mettre en opposition avec Elicot; quand il devroit en couter quelques cent piastres en present au Roy, que cela ne vous arrête, et je vous promets qu'ils seront satisfaits; par ce moyen nous reduirions Elicot à l'impuissance d'agir par lui même, et nous serions tranquilles de ce coté.

L'envoyé de S. M. a intimé au Ministre des Affaires Etrangères, que l'expédition Angloise ne pouvant parvenir à St. Louis d'Illinois, qu'en violant le territoire Américain, il espéroit que les Etats Unis s'opposeroient à son passage, et observeroient exactement le dernier traité conclu avec l'Espagne. S'il arrive le contraire, je ne doute pas qu'il sera annulé. On attend à la Havane douze mille hommes de troupes Epagnoles. La reception que vous avez reçu de M. Gayoso n'a rien qui m'étonne, mais je suis absolument du même avis que vous sur les suites qu'elle aura. Il est impossible que les habitans sensés des Natchez puissent se décider à une démarche, qui, en insultant une puissance jalouse de son pouvoir, les exposeroit à une ruine certaine, et à être desavoués par les Etats Unis, qui n'entreprendroient certainement pas une guerre contre l'Espagne et contre la France, pour soutenir une démarche faite contre les loix de l'équité et le droit des nations. Je crois la chose si peu possible, que je retire, comme je vous l'ai dit, les troupes, et n'y laisse qu'un détachement, pour y maintenir le bon ordre, et être à l'abris d'une insulte des sauvages. Quant à M. Elicot, dont la conduite à mon égard est des plus irregulière, il pourroit très bien être rappellé, ou tout au moins restraint à la seule commission des limites, car j'en ai écrit fortement à l'envoyé de S. M. et au Prince de la Paix.

Il paroit que le principe de la mésintelligence entre M. Gayoso et Elicot, d'après ce que m'en a dit M. Nolan, provient de ce que des sauvages Chactaws ayant bu avec excès, ont cherché dispute aux gens de la suite du dernier, qui s'est figuré que le Gouverneur les avoit enivré, pour les porter à faire main basse sur lui et sur ses gens; au point que Nolan a été obligé, pour le rassurer, de passer deux nuits dans son camp. Qu'elle petitesse dans un homme qui s'arroge le titre de représentant d'une nation!

C'est moi qui ai ordonné, qu'on laissa le détachement Américain s'établir auprès de M. Elicot, et j'ai désapprouvé, dès le premier instant, l'opposition qu'on y avoit mis. Si M. Elicot m'eut fait sçavoir d'office son entrée dans ma province, comme cela est d'usage, et se fut adressé à moi pour les motifs de plainte qu'il croioit avoir, j'aurois agis avec franchise à son égard, et rien de tout cela ne seroit arrivé, hors la suspension de l'évacuation des postes qui dépend de moi, ne me croyant pas autorisé à les remettre avec leurs fortifications et édifices, comme l'exigent le Général Wayne et Don Andrés Elicot.

J'ai trouvé étrange qu'on ait laissé arborer le pavillon Américain devant la porte d'Elicot. Mais je suis censé l'ignorer, et je n'ai pas crus devoir aigrir davantage les esprits en le faisant oter.

Je viens d'écrire à W. en remettant ma lettre à M. Nolan, garçon charmant, et dont je fais le plus grand cas. Il m'a dit qu'il avoit une occasion sûre pour la lui faire passer. Il y avoit très long tems que je ne lui avois écrit, faute d'occasions et crainte de le compromettre.

Portez vous bien; donnez moi de vos nouvelles, et disposez de celui, qui a l'honneur d'être, avec la plus parfaite considération,

Monsieur, votre très humble et très obéissant serviteur,

LE BARON DE CARONDELET.

P. S. L'envoyé de S. M. aux Etats Unis a fait passer aux Illinois l'ingénieur François, M. Finiels, pour le fortifier, si on en a le tems; mais il y aura trouvé Vandenbenden occupé au même objet. Connoissez vous le premier?

No. 44.

[TRANSLATION.]

SIR: NEW ORLEANS, *April* 23, 1797.

I have received the letter you honored me with, which I have not been enabled to answer sooner on account of a multiplicity of occupations. In consequence of the news which I have received from our envoy towards the United States, that the English are going to attack the Illinois, I am compelled to change anew the arrangements I had taken to begin the delineation of the limits; because, if the expedition is of sufficient consequence to take possession of St. Louis, which, as you know very well, has but a very bad fort, only calculated to silence the savages, we have nothing remaining as far as Nogales that could stop the enemy, and protect Lower Louisiana; in consequence of which, I have ordered Mr. Gayoso to make known to Mr. Ellicott, and to the commander of the American detachment, that I find myself compelled to put Nogales in a state of defence, and to forward there all the troops and artillery existing at Natchez, where I shall leave but fifty men, commanded by Don Manuel Lanzos, Mr. Gayoso being compelled to go with Messrs. Guillemard and Perchet to Nogales to hasten the preparations. Finally, I am going moreover to send up to Nogales a company of grenadiers. As it is requisite that at Natchez there should be an intelligent person who should watch, and be informed of, the steps taken by the commissary and commanding officer, I have ordained that you should serve Mr. Lanzos as secretary and interpreter, who is not deficient in finesse; and that Vidal shall accompany Mr. Gayoso to Nogales, or to the Illinois, with money and despatches which I send there. You must send me an exact information of all that passes worthy mentioning, and endeavor to insinuate yourself into the confidence of the American commander, whom you must endeavor to make opposed to Ellicott; even if it should cost you some hundred dollars in presents to the King, let that be no obstacle, and I assure you that they will be satisfied; by these means we will reduce Ellicott to be unable to act by himself, and we would be safe on that quarter.

The envoy of His Majesty has intimated to the Minister of Foreign Affairs that the English expedition could not arrive at St. Louis de Illinois without violating the American territory, and that he expected that the United States would be opposed to their passage, and observe exactly the last treaty concluded with Spain. If the contrary happens, I doubt not but it will be annulled. At the Havana are expected twelve thousand Spanish troops. The reception you met with from Mr. Gayoso does not astonish me; but I am exactly of your opinion relative to the consequences which will follow. It is impossible that the wise inhabitants of Natchez can agree to a step which, by insulting a Power jealous of its power, would expose them to certain ruin, and to be disavowed by the United States, who assuredly will not undertake a war against Spain and France to maintain a step taken against the law of equity, and of the rights of nations. I believe it so very improbable, that I cause to retire, as I told you, the troops, and I only leave a detachment to maintain good order, and to repel the insults of the savages. As to Mr. Ellicott, whose conduct towards me has been very unbecoming, can be very easily recalled, or at least restricted to the only commission of the limits, because I have strongly written to the envoy of His Majesty and to the Prince of Peace.

It appears that the beginning of this misunderstanding between Mr. Gayoso and Mr. Ellicott, as Mr. Nolan told me, proceeds from the following cause: that some Choctaw savage having drank to excess, got in dispute with some of the servants of the latter gentleman, who thought that the Governor had made them inebriated to cause them to put him and his people to the sword; so much so that Nolan has been compelled to remain two nights in his camp to tranquillize him. What lowness in a man who boasts of the title of the representant of a nation! It was I who ordered that the American detachment might remain near Mr. Ellicott, and I disapproved from the first moment the opposition which was made. If Mr. Ellicott had officially informed me of his entering my province, as it is customary, and had addressed himself to me on account of motives of complaint which he thought just, I should have acted with frankness towards him, and nothing of that kind would have happened, except the suspension of the evacuation of those posts which depend on me, not thinking myself authorized to deliver them up with their fortifications and edifices, as General Wayne and Don Andres Ellicott exacted.

I have thought it very strange that the American flag should be permitted to be hoisted before the door of Ellicott. I could not help observing it, although I do not wish to sour them by commanding them to be taken away.

I have just written to W. and sent my letter to Mr. Nolan, a fine young man, and of whom I think highly. He told me he had a secure conveyance to forward it to him. It had been a long time since I wrote him, not having an opportunity, and fearing to compromise.

Farewell; let me hear from you, and command him who has the honor to be, with the greatest consideration, sir, your very humble and obedient servant,

THE BARON DE CARONDELET.

P. S. The envoy of His Majesty towards the United States has sent to the Illinois the French engineer, Mr. Finiels, to fortify it if there is time; but he will have found there Vandenbenden occupied at the same thing. Do you know the former?

No. 45.

Deposition of Daniel Clarke.

WASHINGTON CITY, *January* 11, 1808.

In obedience to the direction of the House of Representatives, expressed in the resolution of Friday last, I submit the following statement:

I arrived from Europe at New Orleans in December, 1786, having been invited to the country by an uncle of considerable wealth and influence, who had been long resident in that city. Shortly after my arrival I was employed in the office of the Secretary of the Government. This office was the depository of all State papers. In 1787 General Wilkinson made his first visit to New Orleans, and was introduced by my uncle to the Governor, and other officers of the Spanish Government.

In the succeeding year, 1788, much sensation was excited by the report of his having entered into some arrangements with the Government of Louisiana to separate the Western country from the United States; and this report acquired great credit upon his second visit to New Orleans in 1789. About this time I saw a letter from the general to a person in New Orleans, giving an account of Colonel Connelly's mission to him from the British Government in Canada, and of proposals made to him, on the part of that Government, and mentioning his determination of adhering to his connexion with the Spaniards.

My intimacy with the officers of the Spanish Government, and my access to official information, disclosed to me shortly afterwards some of the plans the general had proposed to the Government for effecting the contemplated separation. The general project was, the severance of the Western country from the United States, and the establishment of a separate Government, in the alliance and under the protection of Spain. In effecting this, Spain was to furnish money and arms; and the minds of the Western people were to be seduced and brought over to the project, by liberal advantages resulting from it, to be held out by Spain. The trade of the Mississippi was to be rendered free, the port of New Orleans to be opened to them, and a free commerce allowed in the productions of the new Government with Spain, and her West India islands.

I remember about the same time to have seen a list of names of citizens of the Western country, which was in the hand-writing of the general, who were recommended for pensions, and the sums were stated proper to be paid to each, and I then distinctly understood that he and others were actually pensioners of the Spanish Government.

I had no personal knowledge of money being paid to General Wilkinson, or to any agent for him on account of his pension, previously to the year 1793 or 1794. In one of these years, and in which I cannot be certain until I can consult my books, a Mr. La Cassagne, who I understood was postmaster at the falls of Ohio, came to New Orleans, and, as one of the association with General Wilkinson in the project of dismemberment, received a sum of money, four thousand dollars of which, or thereabout, were embarked by a special permission, free of duty, on board a vessel which had been consigned to me, and which sailed for Philadelphia; in which vessel a Mr. La Cassagne went passenger. At and prior to this period, I had various opportunities of seeing the projects submitted to the Spanish Government, and of learning many of the details from the agents employed to carry them into execution.

In 1794, two gentlemen, of the names of Owens and Collins, friends and agents of General Wilkinson, came to New Orleans. To the first was intrusted, as I was particularly informed by the officers of the Spanish Government, the sum of six thousand dollars, to be delivered to General Wilkinson on account of his own pension, and that of others. On his way, in returning to Kentucky, Owens was murdered by his boat's crew, and the money, it was understood, was made away with by them. This occurrence occasioned a considerable noise in Kentucky, and contributed, with Mr. Power's visits at a subsequent period, to awaken the suspicion of General Wayne, who took measures to intercept the correspondence of General Wilkinson with the Spanish Government, which were not attended with success.

Collins, the co-agent with Owens, first attempted to fit out a small vessel in the port of New Orleans, in order to proceed to some port in the Atlantic States; but she was destroyed by the hurricane of the month of August, 1794. He then fitted out a small vessel in the bayou St. John, and shipped in her at least eleven thousand dollars, which he took round to Charleston.

This shipment was made under such peculiar circumstances that it became known to many, and the destination of it was afterwards fully disclosed to me by the officers of the Spanish Government, by Collins, and by General Wilkinson himself, who complained that Collins, instead of sending him the money on his arrival, had employed it in some wild speculations to the West Indies, by which he had lost a considerable sum, and that, in consequence of the mismanagement of his agents, he had derived but little advantage from the money paid on his account by the Spanish Government.

Mr. Power was a Spanish subject, resident in Louisiana, and the object of his visits to the Western country became known to me in 1796, when he embarked on board the brig Gayoso, at New Orleans, for Philadelphia, in company with Judge Sebastian, in which vessel, as she had been consigned to myself, I saw embarked, under a special permission, four thousand dollars or thereabout, which I was informed were for Sebastian's own account, as one of those concerned in the scheme of dismemberment of the Western country.

Mr. Power, as he afterwards informed me, on his tour through the Western country, saw General Wilkinson at Greenville, and was the bearer of a letter to him from the Secretary of the Government of Louisiana, dated 7th or 8th of March, 1796, advising that a sum of money had been sent to Don Thomas Portell, commandant of New Madrid, to be delivered to his order. This money Mr. Power delivered to Mr. Nolan by Wilkinson's directions. What concerned Mr. Nolan's agency in this business I learned from himself, when he afterwards visited New Orleans.

In 1797, Power was intrusted with another mission to Kentucky, and had directions to propose certain plans to effect the separation of the Western country from the United States. These plans were proposed and rejected, as he often solemnly assured me, through the means of a Mr. George Nicholas, to whom, among others, they were communicated, who spurned the idea of receiving foreign money. Power then proceeded to Detroit to see General Wilkinson, and was sent back by him under guard to New Madrid, from whence he returned to New Orleans. Power's secret instructions were known to me afterwards, and I am enabled to state that the plan then contemplated entirely failed.

At the periods spoken of, and for some time afterwards, I was resident in the Spanish territory, subject to the Spanish laws, and without any expectation of becoming a citizen of the United States. My obligations were then to conceal, and not to communicate to the Government of the United States the projects and enterprises which I have mentioned of General Wilkinson and the Spanish Government.

In the month of October of 1798, I visited General Wilkinson, by his particular request, at his camp at Loftus Heights, where he had shortly before arrived. The general had heard of remarks made by me, on the subject of his pension, which had rendered him uneasy, and he was desirous of making some arrangements with me on the subject. I passed three days and nights in the general's tent. The chief subjects of our conversation were the

views and enterprises of the Spanish Government in relation to the United States, and speculations as to the result of political affairs. In the course of our conversation, he stated that there was still a balance of ten thousand dollars due him by the Spanish Government, for which he would gladly take in exchange Governor Gayoso's plantation near Natchez, who might reimburse himself from the treasury at New Orleans. I asked the general whether this sum was due on the old business of the pension; he replied that it was, and intimated a wish that I should propose to Governor Gayoso a transfer of his plantation for the sum of money due him from the Spanish treasury. The whole affair had always been odious to me, and I declined any agency in it. I acknowledged to him that I had often spoken freely and publicly of his Spanish pension, but told him I had communicated nothing to his Government on the subject. I advised him to drop his Spanish connexion. He justified it heretofore from the peculiar situation of Kentucky; the disadvantages that country labored under at the period when he formed his connexion with the Spaniards; the doubtful and distracted state of the Union at that time, which he represented as bound together by nothing better than a rope of sand; and he assured me solemnly that he had terminated his connexions with the Spanish Government, and that they never should be renewed. I gave the general to understand that, as the affair stood, I should not in future say any thing about it. From that period until the present, I have heard one report only of the former connexion being renewed, and that was in 1804, shortly after the general's departure from New Orleans. I had been absent for two or three months, and returned to the city not long after General Wilkinson sailed from it. I was informed by the late mayor, that reports had reached the ears of the Governor, of a sum of ten thousand dollars having been received by the general of the Spanish Government, while he was one of the commissioners for taking possession of Louisiana. He wished me to inquire into the truth of them, which I agreed to do, on condition that I might be permitted to communicate the suspicion to the general, if the fact alleged against him could not be verified. This was assented to. I made the inquiry, and satisfied myself, by an inspection of the treasury book for 1804, that the ten thousand dollars had not been paid. I then communicated the circumstance to a friend of the general, Mr. Evan Jones, with a request that he would inform him of it. The report was revived at the last session of Congress, by a letter from Colonel Ferdinand Claiborne, of Natchez, to the delegate of the Mississippi Territory. A member of the House informed me that the money in question was acknowledged by General Smith to have been received at the time mentioned, but that it was in payment for tobacco. I knew that no tobacco had been delivered, and waited on General Smith for information as to the receipt of the money, who disavowed all knowledge of it, and I took the opportunity of assuring him, and as many others as mentioned the subject, that I believed it to be false, and gave them my reasons for the opinion.

This summary necessarily omits many details tending to corroborate and illustrate the facts and opinions I have stated. No allusion has been had to the public explanations of the transactions referred to, made by General Wilkinson and his friends. So far as they are resolved into commercial enterprises and speculations, I had the best opportunity of being acquainted with them, as I was, during the time referred to, the agent of the house who were consignees of the general at New Orleans, and who had an interest in his shipments, and whose books are in my possession.

DANIEL CLARKE.

DISTRICT OF COLUMBIA, *to wit:* JANUARY 11, 1808.

Personally appeared before me, William Cranch, chief judge of the circuit court of the District of Columbia, Daniel Clarke, Esquire, who, being solemnly sworn on the Holy Evangelists of Almighty God, doth depose and say that the foregoing statements made by him, under the order of the House of Representatives, so far as regards matters of his own knowledge is true; and so far as regards the matters whereof he was informed by others, he believes to be true.

Sworn to before me.

W. CRANCH.

PAPERS RELATIVE TO THE THIRD POINT OF INQUIRY.

No. 45.

[The deposition of Daniel Clarke, before referred to, see page 111.]

No. 78.

General Wilkinson to General Adair.

RAPIDS OF OHIO, *May* 28, 1805,
Eleven o'clock, A. M.

MY DEAR SIR:

I did not answer your letter by Taylor, but I did better; I procured him a pension of twenty dollars per month. I was to have introduced my friend Burr to you, but in this I failed by accident. He understands your merits, and *reckons* on you. Prepare to visit me, and I will tell you all. We must have a peep at the unknown world beyond me. I shall want a pair of strong carriage horses, at about one hundred and twenty dollars each, young and sound, substantial, but not flashy. I am in health, and, in spite of the neglect of friends, and the shameful omissions of attorneys, have this day given sir ——— a damper. Perdition overtake the Jew scoundrel; he had nearly destroyed me by a decree of which I have had no intimation, although it is almost seven years old. Enough for the present.

Thine ever.

JAMES WILKINSON.

General ADAIR.

P. S. I sail in an hour. Write me private.

[See evidence of General Wilkinson, as communicated to Congress, 23d November, 1807, page 539, of the President's message.]

[See evidence of General Wilkinson, President's message, page 539.]

X.

General Wilkinson's introduction of Colonel Burr to Daniel Clarke.

MY DEAR SIR: MASSAC, *June* 9, 1805.

This will be delivered to you by Colonel Burr, whose worth you know well how to estimate. If the persecutions of a great and honorable man can give title to generous attentions, he has claims to all your civilities, and all your services. You cannot oblige me more than by such conduct, and I pledge my life to you it will not be misapplied. To him I refer you for many things improper to letter, and which he will not say to any other. I shall be at St. Louis in two weeks, and, if you were there, we could open a mine, a commercial one at least. Let me hear from you. Farewell. Do well, and believe me always your friend.

JAMES WILKINSON.

DANIEL CLARKE, Esq.

PAPERS RELATIVE TO THE FOURTH POINT OF INQUIRY.

S.

Deposition of William Simmons, Esq.

GENTLEMEN: DEPARTMENT OF WAR, ACCOUNTANT'S OFFICE, *April* 13, 1810.

At the time I attended your honorable committee, in conformity to your summons of the 9th instant, when I was requested to detail any and every information that I possessed in relation to the conduct of Brigadier General James Wilkinson, in answer to the points expressed in the resolution from the House of Representatives, I will now proceed to give such testimony as has come to my own knowledge, and such corroborating information received from others, in my official capacity, on the investigation of the subject which, from the relative comparison, I have every reason to believe are also facts, viz:

In answer to the first part of the inquiry, relative to the Spanish agency, I know nothing about it. In relation to any concern that he might have had in the Burr business, the only information that has come to my knowledge, is in the disbursement of public moneys, drawn from the public agents at New Orleans, in the year 1807, for the freight of vessels chartered by him to transport prisoners and witnesses from New Orleans to the seat of Government, and sundry advances to witnesses, fees to lawyers, &c., said to be incurred by the conspiracy of Aaron Burr; which disbursements, as well as others to a considerable amount, paid by warrants immediately from this Department, drawn by the former Secretary of War, for sundry objects of the like nature, and for which there was no specific appropriation to which I could charge these expenditures; I was, therefore, unable to credit the agents, or enter the account to any head of expenditure, until the 29th of November, 1809, when the present Secretary of War, to enable me to enter the account, directed that, as the disbursements had been made by virtue of orders from the Department of War, in the years 1806 and 1807, that they were chargeable to the contingent fund of the War Department, there being no other head of expenditure to which they could be properly charged; I have accordingly entered the account, and can give no other information on this subject.

In answer to your inquiry to "state the amount of money received by General Wilkinson in the year 1804, from Josiah Taylor, assistant military agent at New Orleans for public service," I reply that the only money he appears to have received from Taylor, at any time, on public account, is a sum of three thousand dollars, received on the 24th April, 1804.

In answer to your inquiry relative to extra rations claimed by General Wilkinson, and how allowed, I reply that, in January, 1809, an account was presented to me, admitted by Henry Dearborn, Secretary of War, for extra rations claimed by General Wilkinson, as commanding officer at Natchitoches and New Orleans, from the 13th of September, 1806 to the 24th of May, 1807, at thirty-six rations per day, including a charge for quarters, stabling, &c., amounting to $2,033 16; which claim I rejected and refused to allow; first, because I considered that any allowance to General Wilkinson, other that what was fixed by the act of the 16th of March, 1802, was inadmissible, and that Colonel Cushing and Colonel Freeman, as commanding officers, having drawn extra rations at the same posts for the same time, and that no two officers could be entitled to extra rations at the same time for the same post. General Wilkinson, however, appealed from my decision to the accounting officers of the Treasury, to whom I stated my objections fully in a letter to the Comptroller, under date of the 10th of January, 1809, who, on the 11th of January 1809, returned me the account, and the opinion of the Attorney General, with directions to pass the amount to the credit of General Wilkinson on the books of my office; which I have accordingly done: On the 8th of June, 1809, General Wilkinson presented another account to Lieutenant S. Knight, district paymaster at New Orleans, and obtained payment from him for thirty-six rations per day, from 13th of March to the 30th of September, 1809, amounting to $1,454 40. This payment was made by Lieutenant Knight, on the authority of a letter from Henry Dearborn, Secretary of War, under date of the 4th of January, 1809, and exhibited to me for a credit to the paymaster, and a charge against the United States, which I have refused to admit, being paid contrary to law; and that General Wilkinson's account already stands charged with considerable sums of public money unaccounted for. This account I have reported to the Treasury, with my objections in a letter to the Comptroller, under date of the 16th of March, 1810, requiring a final decision at the Treasury, which has not yet been done. After the allowance had been made to General Wilkinson for extra rations for the period, and at the time for which they had been received by Colonel Cushing and Colonel Freeman, I called upon these gentlemen to refund for the period allowed to the general. They have both refused, contending that they were the only persons entitled to extra rations as commanding officers at these posts. I have, however, directed the paymaster to put them under stoppages, till the amount is refunded. Colonel Cushing, in his letter to me, under date of the 19th of June, 1809, after stating that he was the commanding officer entitled to the extra rations, a circumstance, he says, well known to the general, and every officer and soldier at the post, he then observes: "But I am assured by the general, that the subsistence allowed to him by the President was intended as a partial reimbursement for some 6 or $7000 which he had expended in the affair of Burr; and if this assurance be correct, it is impossible that my right to double rations at Natchitoches, and to triple rations at New Orleans, can, in any shape whatever, be affected by his allowance."

In answer to your inquiry relative to the charge against him for the freight of flour and apples from Baltimore to Charleston, thence by a public vessel to the Havana, &c., I observe that, on the examination of the accounts

exhibited against the United States, by the assistant military agent at Charleston, it appears that, in February, 1809, a payment was made upon the order of General James Wilkinson for the freight and charges of the schooner Wolf, from Baltimore to Charleston, amounting to $1,099, in full for the passages of General Wilkinson, Major Saunders, Major Robinson, Captain Williams, and Consul Anderson, and twenty-five non-commissioned officers, musicians, and privates, and waiters with their baggage, including fifty barrels of flour, and twelve barrels of apples for General Wilkinson, from Baltimore to Charleston, where, I have been informed, they embarked on board the brig Hornet for the Havana, on their way to New Orleans; and conceiving that the payment for the passage of General Wilkinson and Consul Anderson, and the freight of the flour and apples was an improper charge against the United States, I did accordingly charge the amount for these objects, being $425, to the personal account of General Wilkinson.

In answer to your inquiry of the amount of moneys paid by Captain Moses Hooke, as military agent at Pittsburg, to General Wilkinson, or upon his order, and for what purpose. On reference to the accounts of Moses Hooke, as assistant military agent, he has paid to sundry persons for a boat, and fitting her up, to transport the general and family to New Orleans, - - - - - $199 65

Paid to the general on account, for which he gave his receipt on the 14th of May, 1805, to be accountable to the Accountant of the War Department, for - - - 700 00

Paid to John Dickey, Samuel Thompson, John Frush, John Phillips, and James Cook, for wagoning from Washington city, Baltimore, and Philadelphia, to Pittsburg, on the order of General Wilkinson, under date of the 14th of May, 1805, amounting to - - 262 96

The whole amounting to - - - $1,162 61

All of which I have charged to the personal account of General Wilkinson, because the two first sums were for his own personal account, and Captain Peter was furnished with money to defray all proper transport of baggage to Pittsburg, in May, 1805.

It may here not be improper to observe, that Moses Hooke's account, as quarter-master general to the expedition to the Sabine, appointed by General Wilkinson, stands charged, on the books of my office, to warrants on the treasurer, with the sum of $16,883 12, being the amount of sundry bills drawn by him on the Secretary of War, in October and November, 1806, and January, 1807. No such appointment as quarter-master general is authorized by law, neither is there any particular appropriation, or head of expenditure to which such payments are chargeable. I have repeatedly called upon Captain Hooke to produce vouchers for the expenditure of the above sum, which he has never done. In a conversation with him, not long since, he observed, that a considerable sum of money had been drawn out of his hands by General Wilkinson, on account of secret services, and for which he only had the general's receipt. Captain Hooke is now out of service, and his account has been reported to the Treasury for a suit. It may also be proper to observe, that if General Wilkinson has received money from Mr. Hooke for secret services, that his account already stands charged on the books of my office, with a further sum of $2,500, received on the 10th of January, 1807, from Abraham D. Abrahams, the military agent at New Orleans, for the like purpose; and that, on the 10th of January, 1809, he obtained a certificate from the President of the United States for a warrant upon the Treasury, and received payment for the sum of $1,196; expressed as being for so much disbursed by him for objects in relation to the contingent expenses of intercourse between the United States and foreign nations. Why this amount was not directed to be passed to the credit of secret service money, charged to him on my books, I am at a loss to say.

In answer to your inquiry relative to the purchase of horses from Frederick Sandhagen, I observed, on the examination of the accounts of Abraham D. Abrahams, military agent at New Orleans, that in May, 1809, General Wilkinson directed to be purchased, and approved for payment to Frederick Sandhagen, the sum of $800, for five horses purchased from him, one of which is stated to be for the light artillery. This created some surprise, that more horses should be purchased at New Orleans, in addition to the artillery horses that were sent down the river with the light artillery, when hay was at seventy dollars per ton, and oats at one dollar per bushel. The charge for the horses was, therefore, suspended till Captain Peter arrived, who was inquired of respecting the horses purchased. He then stated that the five horses purchased from Sandhagen were part of eleven horses purchased by Major Morrison, of Kentucky, for General Wilkinson; that the general had ordered him, (Captain Peter,) when he was about to descend the Ohio, to stop in the river to take on board his boats the horses purchased for the general by Major Morrison. He accordingly received eleven horses; and that, by so doing, he was detained several days with three or four hundred men at a considerable expense to the United States; that, finally, they were taken on board the public boats, and, until their arrival at New Orleans, were supported out of the public forage, of which there was a deal laid in for the use of the horses belonging to the light artillery; that, upon reaching New Orleans, the horses were delivered up as the private property of the general; that the five sold to the United States were charged at an extravagant high price; and that Frederick Sandhagen was formerly an old hack driver in this city, and was, at the time of selling the horses, a servant to General Wilkinson, and not likely to be owner of horses.

I also found that the eleven horses, before any part had been sold to the United States, had been kept and shod at the public expense. All of which I communicated to Mr. Eustis, the Secretary of War, who immediately wrote on to New Orleans, and ordered all the horses sold that could be done without. There was accordingly upwards of twenty sold, and only four retained for the use of the army.

In answer to your inquiry relative to the manner of his drawing public moneys from the paymasters and agents; and if any was for objects unauthorized and improper, I observe, that he has generally drawn what he was legally entitled to by anticipation; and that he has been frequently in the habit, and does draw money from the paymasters and public agents, which are unauthorized by law. I have consequently been compelled to charge all such disbursements to his personal account; thereby considerably increasing the balance standing to his debit on the books of this office, which I have repeatedly urged him to account for, as may be seen by my letters of the 20th February, 23d March, and 16th November, 1808, copies of which have already been before the House of Representatives.

WM. SIMMONS.

WASHINGTON CITY, *District of Columbia, sct:*

Personally appeared before me, the subscriber, an assistant judge of the circuit court for the district, William Simmons, who subscribed the above statement, and made oath on the Holy Evangelists of Almighty God, that

what is contained therein, as far as is represented therein to be of his own knowledge, is true, and that which is stated to be from information of others and from documents, he believes to be true.

Given under my hand this 13th April, 1810.

B. THRUSTON.

P.

Captain Peter's deposition.

Captain George Peter, of Georgetown, appeared before the committee in the Capitol, on Thursday, the 12th of April, 1810, and made, on oath, the following statement:

Interrogatory 1st. What do you know relative to General Wilkinson's having directed and effected the payment of a sum of money, by Captain Moses Hooke, military agent for the United States, for the transportation of private property from Baltimore to Pittsburg, in the year 1805?

Answer. General Wilkinson, in April or May, 1805, directed me to pay to one or two wagoners, the transportation of property from Baltimore to Pittsburg. I informed the general that, as agent to the detachment, I had paid all the wagoners employed by me for the command. He then gave an order to Captain Moses Hooke, agent at Pittsburg, to pay the amount of the wagoners' claim, the general first paying the transportation of a few articles brought on in the same wagons for himself. I know that the goods thus transported and paid for by the said Captain Hooke, agreeable to the order of General Wilkinson, was private property, and no way appertaining to the public service. The amount may be ascertained by reference to the books of the accounting office. This payment was made to a man by the name of Frush. On our arrival at Massac, Captain McClelland was furnished with a tent, by the order of General Wilkinson, for storing the aforesaid merchandise. The said merchandise was also transported from Massac to St. Louis, in public boats, which occasioned the expense of an additional boat for the transportation of the public property.

Interrogatory 2d. What do you know relative to General Wilkinson's detaining the troops at Louisville, in the winter of 1809, for the purpose of receiving a quantity of horses belonging to General Wilkinson?

Answer. A detachment consisting of six companies, embarked on board of about twenty Kentucky boats, arrived at Louisville in the morning of the 27th of February, and continued there till the evening of the 28th, waiting the arrival of Major Morrison with General Wilkinson's horses, about nine or ten in number. This delay was by the order of General Wilkinson. These horses were the private property of General Wilkinson, and were fed and taken care of at public expense till our arrival at New Orleans, which was the latter part of March; also, that a public boat was provided for the accommodation of said horses, at an expense of not less than one hundred dollars. On our arrival at New Orleans the said horses were delivered to the order of Colonel Parker. About the month of May, of the same year, four of the same horses were purchased by Abraham D. Abrahams, military agent at New Orleans, for the use of the United States; that three of them were very indifferent.

DISTRICT OF COLUMBIA, *Washington county:* GEORGETOWN, *April* 28, 1810.

Came Captain George Peter before me, a justice of peace for the county aforesaid, and made oath on the Holy Evangelists of Almighty God to the truth of the foregoing statement.

Sworn to before THOMAS CORCORAN.

W.

Deposition of Captain Williams.

I left the port of Baltimore on the 24th of January, 1809, on board the schooner Wolf, in company with General Wilkinson; fifty barrels of flour having been put on board belonging to the general. On our arrival at Charleston, flour was taken from the schooner, and put on board the United States' brig Hornet, in which vessel we sailed for the Havana. Of the flour taken to the Havana, a few barrels were presented to the General of Marine, an officer of the Spanish Government, by General Wilkinson.

Question. What do you believe was the quantity of flour put on board the brig Hornet at Charleston, and taken to the Havana?

Answer. I do not know that all the flour shipped at Baltimore was taken to the Havana, but believe that more than one-half did arrive there: a few barrels may have been got rid of at Charleston.

WM. E. WILLIAMS, *Captain fifth infantry.*

WASHINGTON COUNTY, *ss:*

On this 24th April, 1810, before the subscriber, a justice of the peace for said county, appeared Wm. E. Williams, and made oath in due form, that the facts stated in the within writing are true to the best of his knowledge.

Sworn before and subscribed.

DANIEL RAPINE.

H.

Deposition of John Smith.

Personally appeared before the committee, John Smith, chief clerk in the Department of War, and, on oath, made the following statement:

That, in the summer of the year 1808, sometime after the determination of the military court of inquiry called for the investigation of the conduct of General Wilkinson, the papers relating to that trial were in the War Office, lying on the Secretary's table. In a few weeks after the papers were in that office, General Wilkinson came there, and after transacting some business, and as he was apparently about to leave the office, took up the said papers from the table, observing, at the time, that they belonged to him, or that they were promised to him; on which he took the papers out of the office; since which time I have not seen the said papers in the office, or heard of their being there.

Interrogatory 1st. Did you object to General Wilkinson's taking off the papers?

Answer. I do not recollect making any objection, as the transaction was sudden, and the general represented that they belonged to him, or had been promised to him, I do not remember which expression.

Interrogatory 2d. Did you inform the Secretary of War of the transaction?
Answer. I believe I did; and that he made no reply, to my recollection.

WASHINGTON COUNTY, *District of Columbia, ss:*

Personally appeared before me, one of the justices of the peace for the said county, John Smith, chief clerk in the Department of War, and made solemn oath on the Holy Evangelists of Almighty God, that the within and foregoing statement and answers to the foregoing interrogatories are true, to the best of his recollection and belief. Sworn, this 17th April, 1810, before

WILLIAM THORNTON.

Letter from the Accountant of the Department of War.

SIR: DEPARTMENT OF WAR, ACCOUNTANT'S OFFICE, *April* 19, 1810.

Agreeably to the request contained in your letter of yesterday, I have the honor to enclose you copies of the following accounts required by the committee appointed to inquire into the conduct of Brigadier General James Wilkinson, viz:

A. Copy of the account, payment of which was ordered by General Wilkinson, for freight of flour, &c. from Baltimore to Charleston.

B. Copies of accounts for cartage of baggage by Frush and others, to Pittsburg, in 1805.

C. Copy of the account of Frederick Sandhagen for horses sold the United States, and of General Wilkinson's order for payment.

D. Copy of vouchers Nos. 19, 23, and 24, for payments made by Lieutenant George Peter for expenses attending the march of a detachment of troops from Baltimore, Washington city, and Carlisle to Pittsburg, in 1805.

In reply to your request that I would furnish copies of any other documents or papers in my office, which I might think would aid in the inquiry, I beg leave to suggest that as the accounts of General Wilkinson, in relation to this Department, are of considerable extent, it would be impracticable to furnish copies of the whole, within any reasonable period, if they were required; this, however, it is presumable, is not necessary. Any particular part, or any vouchers in relation to any particular circumstance, which the committee may require, shall be furnished without delay.

I am, very respectfully, sir, your most obedient servant,

WM. SIMMONS, *Accountant Department of War.*

The Hon. WM. EUSTIS, *Secretary of War.*

A.

Copy of the account, payment of which was ordered by General Wilkinson, for freight of flour, &c. from Baltimore to Charleston.

No. 12.

The United States to Levin Jones, DR.

Feb. 28, 1809. For freight of the schooner Wolf, from Baltimore to Charleston, employed for the transportation of General James Wilkinson, Major Saunders, Major Robinson, Captain Williams, Consul Anderson, 25 non-commissioned officers, musicians, and privates, with their baggage, &c. &c. &c.	$1,000
For three days' demurrage at Norfolk, at $30 per day,	90
For three days' detention, pilot at Norfolk, at $3 per day,	9
	$1,099

NOTE.

General Wilkinson's baggage, including 50 barrels of flour, and 12 barrels apples,	$375
Major Saunders, Major Robinson, Captain Williams, and Consul Anderson, at $50 each,	200
Twenty-five non-commissioned officers, musicians, privates, and waiters, at $17 each,	425
	$1,000

Received at Charleston, February 28, 1809, of Lieutenant Samuel Champlain, assistant military agent for South Carolina, one thousand and ninety-nine dollars in full of the above account, having signed triplicates of same tenor and date.

$1,099. LEVIN JONES.

The within account is correct and just, and I hereby direct Lieutenant Samuel Champlain, assistant military agent for South Carolina, to discharge the same.

JAMES WILKINSON.

DEPARTMENT OF WAR, ACCOUNTANT'S OFFICE, *April* 19, 1810.

I certify that this paper contains a true copy of voucher No. 12, for payments made by Samuel Champlain, and charged in his account to the United States.

WM. SIMMONS, *Accountant Department of War.*

B.

COPIES OF ACCOUNTS FOR CARTAGE OF BAGGAGE BY FRUSH AND OTHERS, TO PITTSBURG, IN 1805.

PITTSBURG, *May* 14, 1805.

No. 7.

Abstract of disbursements made for the transportation of General James Wilkinson's baggage and stores, from Washington city, Baltimore, and Philadelphia, to Pittsburg.

1805. April 27.	This sum paid James Dickey, per voucher No. 1,	$72 12
–	This sum paid Samuel Thompson, per voucher No. 2,	85 44
May 7.	This sum paid John Frush, per voucher No. 3,	31 50
6.	This sum paid John Phillips, per voucher No. 4,	58 50
11.	This sum paid James Cook, per voucher No. 5,	15 40
		$262 96

The assistant military agent will discharge the above, and place to account of public transport for military service.

JAMES WILKINSON.

DEPARTMENT OF WAR, ACCOUNTANT'S OFFICE, *April* 19, 1810.

I certify that the above is a true copy of voucher No. 7, accompanied with the copies of the subordinate vouchers Nos. 1, 2, 3, 4 and 5, for payment made by Captain Moses Hooke, assistant military agent, at Pittsburg, and charged by him to the United States.

WM. SIMMONS, *Acct. Dep. War.*

W. SIMMONS, *Acct. Dep. War.*

No. 71.

It is a fact, that our fool has written to his contemptible fabricator, that you had declared if you had children, you would teach them to curse the United States as soon as they were able to lisp, and he gave the mayor and Gurly for authors. Cette bête is at present up to the chin in folly and vanity; he cannot be supported much longer; for Burr or no Burr, we shall have a revolt, if he is not removed speedily. The moment Bonaparte compromises with Great Britain will be the signal for a general rising of French and Spaniards, and if the Americans do not join, they will not oppose. Take care! suspicion is abroad; but you have a friend worth having. You will see Livingston's philippic to W**********; it is replete with falsehoods, and is laughed at here by every body. So much for the establishment of an impure character.

Yours, R. R.

Workman and Kerr have been discovered in an intrigue to corrupt the army, and to plunder the bank. It is said Lieutenant W. A. Murry has detected them.

D. C. Esq.

No. 30.

Lexington, Kentucky, *May* 20, 1790.

Gentlemen:

I lament that I should be obliged to address you at this late day, but the causes producing the delay have been insuperable.

This will be handed to you by my agent, Mr. Philip Nolan, who carries with him, and will exhibit to you for final settlement, the account of the unfortunate adventure by the Speedwell, he being specially authorized by me for that purpose. Amidst the embarrassments which result to me from this fatal expedition, it is with pleasure I reflect that whilst I am obliged to abide a dead loss on the sales, without remedy or consolation, you must feel yourselves indemnified by the advance you had upon the merchandise originally furnished from your store to the adventure, and for which you received cash. The proceeds of this adventure are vested in tobacco at a very low price, which will, I hope, get to a good market.

You will observe that I have consigned this cargo to Mr. Nolan, and authorized him to act for me in the storage, inspection, &c., because the quantity now shipped will overrun the claims of the owners of the Speedwell nearly two-thirds, and I have determined to make no discrimination in the cargo, for fear of accidents to the boats, which might be assigned to the account of the Speedwell, or lest I should subject myself to imputations of partiality to my private interest, and be charged with selecting the best tobacco. No difficulty can offer in the settlement; because, when the costs and charges, and the net profits of the whole cargo are ascertained, the proportion due to the owners of the Speedwell can be readily established. This is the principle of settlement which I have directed my agent to take for his guidance, and to which I shall invariably adhere.

I am sorry to inform you that one of our flats, after being loaded with 40 hhds., sprung a leak, and, in spite of our endeavors, sunk; the tobacco is wet, but I believe we shall be able to save the greatest part of it, though it will involve the inevitable detention of this tobacco until my next shipment, when it will go down on the same principles of the present cargo, of which it is indeed a part.

I have directed Mr. Nolan to require the original vouchers, on which the accounts rendered by you last year are founded, many of them being absolutely necessary to my own indemnity against the persons collaterally interested or connected in them.

I have the honor to be, gentlemen, your most obedient servant,

JAMES WILKINSON.

Messrs. CLARKE & REES, *Merchants, New Orleans.*

No. 31.

GENTLEMEN: LOUISVILLE, *June* 20, 1790.

Your surprise at hearing from me at this late date cannot exceed the mortification and regret I feel from the delay. My boats unfortunately grounded in Kentucky river, and were left by the flood. Mr. Nolan will give you the details, and will explain to you the personal hardships and risks I have been exposed to for three weeks past.

Events have justified the propriety of my making no distinction in the tobacco shipped at this time, or allotting any separate portion for the account of the Speedwell, as three of the fleet which sailed are still aground in Kentucky river, with 118 hhds. on board. The tobacco Mr. Nolan now takes down can be appropriated on the same equitable principles, and the same just scale of proportion set forth in my letter of the 20th of May. The drowned tobacco is, by this time, completely recovered, I expect, at a loss of 12 or 15,000 pounds. I shall ship it, and it will go down with the three boats which are aground, so soon as the flood offers, which I expect must take place in the course of the month.

The stoppage of the boats has been attended with some additional expense, which was unavoidable, in the measures necessary to get them out of Kentucky river, and secure the tobacco.

With due respect, I am, gentlemen, your most obedient servant,

JAMES WILKINSON.

Messrs. CLARKE & REES.

J. Wilkinson's order on D. Clarke, Sen.

Dear Sir: September 4, 1789.

Will you be so good as to answer to Mr. Nolan the balance in your hands, for your friend.

J. WILKINSON.

To Daniel Clarke, Esq.

Receipt.

New Orleans, *September* 5, 1789.

Received of Messrs. Clarke and Rees $48 5½rs., the balance due James Wilkinson, as stated in Messrs. Clarke and Rees's account current. For James Wilkinson,

PHIL. NOLAN.

No. 33.

Philip Nolan's Declaration.

New Orleans, *September* 10, 1790.

I, Philip Nolan, agent for James Wilkinson, Esq., being applied to by Daniel Clarke, Jun., attorney of Clarke & Rees, to investigate an account settled the 5th September, 1789, between Clarke & Rees, merchants of this place, and the aforesaid James Wilkinson, Esq., do declare that there is an error in said account, amounting to four hundred and seventy-three silver dollars two rials, to the prejudice of Clarke & Rees, occasioned by their giving him credit twice in their account for the aforesaid sum of four hundred and seventy-three silver dollars two rials, being my expenses on my journey from hence to Kentucky, in the year 1788.

PHILIP NOLAN.

No. 4.

James Wilkinson's accountable receipt for our part of the cargo, per Speedwell's proceeds, and for a debt due by Craig and Johnson, for £318 13*s.* 7*d.*

I do hereby acknowledge that I have not accounted with Daniel Clarke for his half of the adventure of merchandise, shipped per the bateau Speedwell, Jean Massey, patroon, from New Orleans to the falls of the Ohio, consigned to Wilkinson and Dunn; and that I will invest, and ship the proceeds of the said adventure, which still remains in our hands, in good and merchantable tobacco, to him in the month of December next.

I also acknowledge that I have a debt due to the said Clarke from Craig and Johnston, for three hundred and eighteen pounds, thirteen shillings, and seven pence, Virginia currency, under my direction; and that I will, or my heirs, in case of my death, ship tobacco to him to the amount thereof, as soon as I, or they, shall recover the same; and when these several obligations into which I now enter are fulfilled by me or my heirs, that the articles of wri-

ting, declaratory of a connexion with the said Clarke, by Wilkinson and Dunn, bearing date the 7th of August, 1788, shall be void, and of no effect; and, also, that the power of attorney which I have had from said Clarke shall be cancelled, and of no effect from this day.

As witness my hand, at New Orleans, this 18th day of September, in the year of our Lord one thousand seven hundred and eighty-nine.

JAMES WILKINSON.

No. 3.

Articles of agreement between Wilkinson and Dunn and Daniel Clarke, Sen.

To all persons to whom these presents shall come, GREETING:

Know ye, that James Wilkinson and Isaac B. Dunn, of the district of Kentucky, now in the State of Virginia, Esquires, of the one part, and Daniel Clarke, of the town of New Orleans, on the Mississippi, merchant, of the other part, do hereby consent and mutually agree to carry on a commerce between the said district of Kentucky and the town of New Orleans aforesaid; that is to say:

That the said James Wilkinson and Isaac B. Dunn shall purchase in the district of Kentucky, or any other of the settlements on the waters of the Ohio, within the State of Virginia aforesaid, to wit: tobacco, flour, butter, tallow, hogs-lard, beef, pork, bacon, and bacon-hams, on the joint account and risk of the said James Wilkinson, Isaac B. Dunn, and Daniel Clarke, and the same to be sent down in good order (dangers of the river excepted) to the town of New Orleans, addressed to the aforesaid Daniel Clarke, to be by him converted into cash, for the common benefit of the said James Wilkinson, Isaac B. Dunn, and Daniel Clarke, in the particular ratio hereafter written.

And likewise, that the said Daniel Clarke shall purchase and send to the falls of Ohio, on account and risk of the aforesaid James Wilkinson, Isaac B. Dunn, and Daniel Clarke, addressed to the said James Wilkinson and Isaac B. Dunn, such European and West India commodities as shall jointly be deemed necessary for the use and consumption of the aforesaid settlements on the Ohio, to be by them converted into cash, or such articles of produce as are herein named, for the joint benefit of the said James Wilkinson, Isaac B. Dunn, and Daniel Clarke, in the particular ratio hereafter mentioned.

Now, be it remembered, and it is hereby declared and made known, that the said parties are to be interested in the said commerce, in the following proportions, viz:

James Wilkinson to have and enjoy one-fourth part of the profits which shall appear to arise from the said trade, to be carried on agreeably to the letter and spirit of the contract, from Kentucky to this place, and from this place to Kentucky, and also to sustain one-fourth part of any loss that may happen to the parties in the said trade.

In like manner shall Isaac B. Dunn share and enjoy one-fourth part of the profits which shall arise from the aforesaid commerce, and in like proportion bear any loss that may happen to the parties in the course of the said connexion.

And likewise, that the said Daniel Clarke shall have and enjoy of the profits which shall arise from the said trade, one-half, or equal moiety of the whole, and bear in like proportion any loss that may be sustained by the parties in the course of their said connexion.

Further, it is agreed by the contracting parties, that this connexion shall take place on the 1st day of December next, and continue until dissolved by mutual consent of the said parties, or by prohibition of this Government: *Provided, always*, That no tobacco which shall be sent down by James Wilkinson, Esq., antecedeht to the 1st day of December next, shall be considered, in any wise, a property falling within the present connexion.

And whereas Daniel Clarke is now preparing to make a shipment of merchandise to the aforesaid falls of Ohio: Be it known, that the merchandise is for account and risk of the aforesaid James Wilkinson, Isaac B. Dunn, and Daniel Clarke, in the proportions aforesaid.

Lastly, be it remembered, that the said James Wilkinson and Isaac B. Dunn shall not charge commissions for what they buy or sell, at any part of the settlements of Kentucky, or on the waters of the Ohio, for account of the parties in this concern; nor shall the said Daniel Clarke charge any commission for all or any business he shall transact at New Orleans for account of said concern.

In witness whereof, the parties have hereunto interchangeably set their hands and seals, at New Orleans, this 7th day of August, 1788.

For James Wilkinson and self,

ISAAC B. DUNN. [L. S.]

DANIEL CLARKE. [L. S.]

Signed, sealed, and delivered, in presence of

A. HOOPS,

PHILIP NOLAN.

No. 2.

Wilkinson to Clarke.

DEAR SIR: RICHMOND, *October* 27, 1807.

A friend having proposed a publication relative to scenes of eighteen or twenty years' standing, I furnished him your extract from the memoir you transmitted Mr. Pickering in 1796–'7. Being a public document, I could see no impropriety in this, and I hope you may concur in the same opinion, seeing that it was an interesting paper to me, assailed as I am by the worst, the merest demons that ever infested the earth. So soon as I have adjusted a single point here, I shall be with you, and am,

With respect and esteem, yours,

JAMES WILKINSON.

The Hon. D. CLARKE.

DEPOSITIONS OF DANIEL W. COXE AND WALTER JONES.

Deposition of Walter Jones, Esquire.

The deposition of Walter Jones, Jun., who officiated as judge advocate and recorder to the military court of inquiry, instituted in the month of January, 1808, for the investigation of certain charges against Brigadier General

James Wilkinson; which deposition is taken before the committee of the House of Representatives appointed to inquire into the conduct of General Wilkinson.

The deponent, in answer to sundry inquiries of the committee, in relation to the evidence and documents produced before the court of inquiry, and filed among the records of its proceedings, the manner in which they were disposed of, and whether the papers, lately returned by General Wilkinson, do in fact constitute the whole of those properly belonging to the records of that court, deposes and swears as follows:

On the 16th February, 1808, after several meetings of the court of inquiry, and fruitless attempts to bring forward the evidence relied on to support the charge against General Wilkinson, he came before the court, and made his petition that the affidavit of Mr. Daniel Clarke, which had been laid on the table of the House of Representatives, and a certified copy of which had, with other papers, been transmitted by the President of the United States to the judge advocate, might be received by the court "at its intrinsic value," or, "for as much as it was worth;" he, General Wilkinson, waiving all objections as to form, and to the legal competency of the affidavit to be read in evidence, but reserving to himself the advantage of all objections on the score of credibility, and taking upon himself to discredit or to contradict the evidence of Mr. Clarke. The certified copy of the affidavit was accordingly read and filed as evidence; the judge advocate admitting, as a matter of course, that the accused was free to urge every objection, and to produce all competent evidence affecting the credit of the witness. The judge advocate, at the same time filed, *de bene esse*, certified copies of the documents laid on the table of the House of Representatives, by Mr. Randolph, which were reserved upon file for further proof.

At the subsequent sittings of the court, General Wilkinson produced and examined several witnesses in his defence. According to my recollection, and the minutes I have preserved of the course of those examinations, he undertook to discredit the evidence of Mr. Clarke upon three grounds:

1st. By imputing to the witness a particular motive for malice against the person accused, arising out of his, Mr. Clarke's, alleged connexion with Burr's conspiracy, and the vindictive passions of those conspirators, supposed to be directed against General Wilkinson on account of his active agency in their final suppression. To this point he produced the following witnesses, viz: Lieutenant William A. Murray, Lieutenant Robert T. Spence, John Graham, and Benjamin H. Latrobe, whose examinations were severally taken down in writing and filed.

2dly. By undertaking to prove prior declarations of Mr. Clarke, upon the subject-matter of his affidavit, inconsistent with the statement contained in it. To this point he produced the following witnesses, viz: Robert Wright, Governor of Maryland, General Samuel Smith, of the Senate, Willis Alston, of the House of Representatives, James Lowry Donaldson, of Baltimore, and Dr. Walter Jones, of the House of Representatives, whose examinations were severally taken down in writing and filed. To this point, he also produced the deposition of Colonel William Lowry, of Baltimore, and a memoir from the Secretary of State's office, entitled "History of the Trade of Louisiana," which is an exhibit referred to in Mr. John Graham's examination.

3dly. By attempting to disprove a circumstance mentioned in Mr. Clarke's affidavit, viz: his spending three days and nights in General Wilkinson's tent at Loftus Heights, in October, 1798; for that purpose the deposition of Dr. J. F. Carmichael was produced and filed.

General Wilkinson also took the deposition of Mr. Daniel W. Coxe, of Philadelphia, for the purpose of proving some circumstance to the disadvantage of Mr. Clarke. I have but an indistinct impression left upon my mind of the particulars sworn to by Mr. Cox, except that, after negativing the interrogatories of General Wilkinson, suggesting any thing to the disadvantage of Mr. Clarke, the witness proceeds voluntarily to disclose all the circumstances within his knowledge, corroborative of Mr. Clarke's evidence, or of the integrity of his motives.

The last witness produced by General Wilkinson, and the last evidence of any kind brought forward by him, prior to his delivering in his defence in writing, was Mr. Oliver Pollock, by whom he undertook to prove the innocence of his Spanish transactions and connexion, from circumstances within the personal knowledge of the witness; his examination was also taken down in writing and filed.

On the part of the prosecution, the following additional evidence was produced and filed, viz:

The deposition of Andrew Ellicott, who was required to state the whole of his knowledge and information relative to any transactions or connexion between General Wilkinson and the Spanish Government of Louisiana, or any of the officers or agents of that Government.

Also, the deposition of Robert Goodloe Harper, to corroborate Mr. Clarke's evidence, by proving prior conversations between them, in which the evidence relied upon by General Wilkinson, to fix upon Mr. Clarke inconsistent and contradictory declarations, was attempted to be rebutted or explained.

This, according to the best of my recollection, refreshed by the rough minutes, and loose papers relative to the proceedings of the court yet in my possession, was the whole of the evidence before the court when General Wilkinson rose to deliver his defence.

The court of inquiry had stood adjourned for some considerable time, when it met in June, 1808, for the purpose of bringing the case to a conclusion. During that month I was particularly, and almost constantly engaged in attending to my professional duties at the circuit court of this district then in session. I did, with some difficulty, contrive to attend the court of inquiry for the two days taken up by General Wilkinson, in delivering his defence, which was commenced on Friday, the 24th, and concluded on Saturday, the 25th June, 1808. In the course of reading his defence, he produced a great number of papers, referred to as exhibits, consisting of documents and affidavits which had never before been submitted to the court. Captain Fenwick, of the marines, sat by with these papers, arranged in regular order, and handed them over as they were called for in the progress of the defence. Every exhibit so referred to, and called for, was successively handed over to me as judge advocate and recorder, and carefully filed among the records of the court. I kept a rough minute, or numerical list of the new papers and documents quoted and produced by General Wilkinson upon that occasion, by reference to which I find that he produced fifty-five new exhibits, many of them comprising sundry enclosures not particularly noted. This list, or a fair copy, I am ready to produce to the committee, if required. The instant that the defence was concluded, I collected together, in the best order I could, all the papers belonging to the records of the court, and left them, with the three members, for their examination, in order to the making up, and forming their opinion in private. It was agreed between us that, while they were engaged in this investigation, my presence might be dispensed with until the members should have definitively made up their decision. In the morning of the 28th of June, I was called upon to meet the court of inquiry, and found that the definitive opinion of the court was ready drawn up in writing; it was then signed by the members in my presence; and together with all the papers, delivered up to me for the purpose of making up a record of the proceedings in due form, and transmitting the whole to the War Department. The court, at the same time, communicated to me their request that, in making up the record, I should prefix to their opinion a methodical statement or summary of all the evidence in the case, as well oral as documentary. The completion of the duties thus remaining to be executed by me as judge advocate, would, under the pressure of other business, then upon my hands, have required from ten days to a fortnight. General Wilkinson was, as I understood, very urgent to have his fate finally decided and promulgated prior to the then ensuing anni-

versary of independence; and I received either a note or a verbal message (I cannot now say with certainty which) from the Secretary of War, requesting me immediately to transmit the opinion of the court, and all the requisite evidence and documents to be returned to me as soon as the President of the United States should have considered them. I immediately set about making the best arrangement, in my power, of the papers; distributing them into several bundles in such order as might enable the President to go through the examination of them with the least labor, and to the best advantage; for easily understanding the relation of each to the points of the case, each bundle having a label, on which its general contents were noted in my hand-writing. I recollect that General Wilkinson's defence constituted one of the bundles, and the new exhibits referred to in it another. On the same, or the next day, after the court had delivered their opinion, the papers were sent, in the state I have described, to the War Department, accompanied by a letter from me to the Secretary, stating to him the informal condition in which the record was transmitted, according to his request, and the necessity of having the papers returned to me, as soon as the President should have done with them, for the purpose of completing the record. It is proper to mention that, upon looking over the loose papers and minutes, relative to the proceedings of the court of inquiry, yet in my possession, I find that, from some cause which I cannot now with certainty account for, but, it is probable, from casual inadvertence, I omitted sending one original document, properly belonging to the evidence in the case, and which I now produce to the committee, and that is the memoir entitled "History of the Trade of Louisiana," referred to in Mr. John Graham's examination.

I heard nothing further on the subject till I saw, in the National Intelligencer, of the 4th July, 1808, the opinion of the court of inquiry, approved by the President of the United States. My professional engagements continued to occupy me, without intermission, for a considerable time afterwards; and when I did find myself at leisure to undertake the completion of the record, I learned that Colonel Burbeck, the president of the court, whose signature was necessary, in addition to my own, in order to authenticate the record, had been, in the mean time, detached to some distant post. As the President of the United States had already acted upon the case, and there was no immediate necessity for a more complete record, I thought it as well to postpone the matter in expectation of Colonel Burbeck's return in some reasonable time. It was not till some time late in September, or early in October last, soon after my return from the country, that I heard of Colonel Burbeck's being in town, and it immediately occurred to me that it was a good opportunity to finish my long postponed task. For that pu[illegible]ose I requested one of the clerks in the War Department, with whom I accidentally met, to send me the papers. After some time, and upon further application, I was informed they were missing, but it was some time before it could be distinctly understood what had become of them. It was sometime during this winter that I was informed that it was certainly ascertained General Wilkinson had taken possession of them. I do, with the utmost certainty, aver that, until the information came to me in the time and manner I have just described, I had all along remained in the most assured security that the papers were safely deposited, and carefully preserved in the War Office, ready for me to act upon, whensoever the proper opportunity should occur for making up the record in due form; and that I had never the least suspicion or knowledge of the fact that they were in the custody of General Wilkinson, nor of any circumstance that could render the supposition of such a fact in the least degree probable. I do recollect that, on the day I transmitted the papers to the War Department, General Wilkinson requested that, when they came again into my possession, he might have the loan of his defence, in order to correct or retouch the language, preparatory to a publication of it; that, I informed him, was an indulgence I had always thought it reasonable to allow persons in his situation, reserving to myself, however, the privilege of seeing that no material statement contained in the defence should be substantially varied. I do further recollect that he expressed a desire to have a full copy of the whole record and documents, which I informed him he would, as I conceived, be entitled to request from the War Department.

I have, at the request of the committee, looked over (without making, however, any particular examination of their respective contents) the bundle of papers said to have been returned by General Wilkinson, as all the documents in his possession, relative to the court of inquiry, and I am not enabled to say, either from my own recollection, or from any written memoranda in my possession, that there is now any deficit among those papers which constituted the evidence of witnesses, and the documentary evidence produced and filed prior to the time of General Wilkinson's delivering in his defence. Of the other papers transmitted by me to the War Department, together with those last mentioned, and as a parcel of the same proceeding, there are missing the whole of General Wilkinson's written defence, and all those 55 exhibits, produced for the first time, in the course of delivering that defence, except that I perceive in the bundle certain papers which I believe to be four of those exhibits, viz: the affidavits of Silas Dinsmore, Dr. G. E. Pendegrast and Captain John Bowyer, and certain extracts from the correspondence of the Louisiana commissioners with the Secretary of State. I perceive in the bundle, one paper, viz: John Brown's affidavit, of which I have no recollection, nor any written memorandum; it may, however, have been among those upon the file of the court, and may have been overlooked or forgotten.

The circumstances attending the original production of the papers now missing, and the transient manner in which they passed through my hands, must satisfactorily account for the imperfect answer I am obliged to make to the inquiries of the committee into the contents of a certain part of them; it was for the purpose of accounting for this, that I have dwelt so minutely upon certain points that might otherwise appear to be frivolous.

As to the account current between General Wilkinson and Governor Miro, mentioned in the opinion of the court, the following is all that I can at present recollect concerning it, either from my own memory or any written memorandum in my possession.

It was emphatically commented on by General Wilkinson, as having been fortunately preserved though the many casualties and hazards to which his papers had been exposed, and by which many of them had been destroyed, and as furnishing demonstrative evidence of the innocence of his transactions with the Spanish Governor. It was introduced from among a number of letters and papers stated to be either in the hand-writing of, or to have been transmitted by, General Wilkinson's deceased agent, Philip Nolan, and it was stated to be an account current signed by an agent of Governor Miro, and rendered to Philip Nolan, and by him transmitted to General Wilkinson; it was handed round among the members of the court, and when it came to me to be filed, I ran my eye hastily over it. I cannot recollect, with any precision, either the date, the items, the gross amount, or the balance; nor can I recollect the name or quality of the Spanish agent by whom it was signed and rendered; it was either enclosed in a letter from Philip Nolan to General Wilkinson, or tied up with letters, or other papers of Nolan, so that the account, together with a certain number of those papers, formed one exhibit. I do not find, upon recurrence to my list, that the account is specifically mentioned in it; but I feel morally certain in my own mind, that it was comprised in one of two exhibits mentioned and described in that list, as follows: "No. 6. Papers of Nolan." "No. 9. Nolan's letters." And further this deponent saith not.

W. JONES, Jun.

WASHINGTON COUNTY, *ss.*

On this 1st day of May, 1810, before the subscriber, a justice of the peace for said county, appeared Walter Jones, Jr. and made oath in due form, that the foregoing facts, as stated, are true to the best of his knowledge.

DANL. RAPINE.

D. W. C.

Personally appeared before me, Daniel Rapine, Daniel Wm. Coxe, of the city of Philadelphia, merchant, who, being duly sworn according to law, doth declare and say, that the following documents and papers,

No. 2. A letter from James Wilkinson to Daniel Clarke, dated 27th October, 1807;

No. 3. An agreement between James Wilkinson and Daniel Clarke, dated 7th August, 1788, in Philip Nolan's hand-writing;

No. 4. James Wilkinson's accountable receipt to Daniel Clarke, dated September 18th, 1789;

No. 5. An affidavit of John Ballinger, dated January 12th, 1789;

No. 6. A letter from Evan Jones to Daniel Clarke, dated February 16th, 1809;

No. 7. An affidavit of F. Langlois, dated the 29th December, 1808, containing two original letters to himself from the Baron de Carondelet, dated 28th January and 28th June, 1795;

No. 8. An affidavit from Dominique Bouligny, dated January 16th, 1809;

No. 9. An affidivit of Thomas Power, dated March 18th, 1809;

No. 11. An affidivit of William Miller, dated March 11th, 1809;

No. 13. James Wilkinson's letter to Colonel John Adair, dated August 7th, 1795;

No. 14. Thomas Portell's certified copy, in his own hand-writing, of the Baron de Carondelet's instructions to him, dated January 20th, 1796, with translation thereof, from the Spanish;

No. 15. Thomas Power's letter to Don Thomas Portell, in Spanish, in the hand-writing of Power, dated June 27th, 1796, with a translation thereof;

No. 16. Thomas Portell's letter to Thomas Power, in Spanish, in the hand-writing of Portell, dated 27th June, 1896, with a translation thereof;

No. 17. Thomas Power's affidavit, dated March 18th, 1809;

No. 20. Thomas Power's draught, in his own hand-writing, of his letter, dated 27th June, 1796, in the French language, to the Baron de Carondelet, with a translation thereof;

No. 21. Thomas Power's draught of his letter in English, in his own hand-writing, and dated 27th June, 1796, to Governor Gayoso;

No. 22. Thomas Power' draught of his letter, in French, in his own hand-writing, and dated 3d January, 1797, to the Baron de Carondelet, with a translation thereof;

No. 23. Thomas Power's draught of his letter in English, dated January 3, 1797, to Governor Gayoso. Accompanying these last four numbers, and Nos. 40 and 43, is Thomas Power's affidavit, dated March 18, 1809, in relation thereto;

No. 25. James M. Bradford's affidavit, dated March 17, 1809;

No. 27. James Wilkinson's account current (in Philip Nolan's hand-writing) with Clarke & Rees, dated August 8, 1788;

No. 28. James Wilkinson's account current with Clarke & Rees, dated May 1, 1789. N. B. This is contained in account book, page 30;

No. 29. Philip Nolan's account of sales of tobacco, in his own hand-writing, dated September 21, 1790;

No. 30. James Wilkinson's letter to Clarke & Rees, dated May 20, 1790;

No. 31. James Wilkinson's letter to Clarke & Rees, dated June 20, 1790;

No. 32. Wilkinson & Dunn's account current with Clarke & Rees, dated August 29, 1789, and September 5, 1789, with James Wilkinson's order and Philip Nolan's receipt for balance;

No. 33. Philip Nolan's declaration, dated September 10, 1790;

No. 34. Thomas Power's affidavit, dated March 18, 1809;

No. 35. Secret instructions from James Wilkinson to Thomas Power, in P. Nolan's hand-writing;

No. 36. Thomas Power's letter in Spanish, dated May 9, 1797, in his own hand-writing, to the Baron de Carondelet, with translation;

No. 37. Baron de Carondelet's letter in Spanish, to Thomas Power, dated May 28, 1797, with translation thereof;

No. 38 Baron de Carondelet's letter to Thomas Power, in French, dated May 26, 1797, with postscript of May 28, and translation;

No. 40. Thomas Power's draught of his letter in French, in his own hand-writing, to Baron de Carondelet, dated June 4, 1797, with translation thereof;

No. 42. James Wilkinson's letter to Thomas Power, dated September 5, 1797;

No. 43. Thomas Power's draught of his letter, in his own hand-writing in Spanish, to Governor Gayoso, dated December 5, 1797, with a translation thereof;

No. 44. Baron de Carondelet's letter in French, to Thomas Power, dated April 23, 1797, with translation thereof;

No. 70. James Wilkinson's letter to Thomas Power, dated Greenville, May 25, 1796;

No. 71. A letter in James Wilkinson's hand-writing, though without his signature, to Daniel Clarke;

X. A letter from James Wilkinson to Daniel Clarke, dated June 9, 1805, introducing Colonel Burr;

No. 78. James Wilkinson's letter to General John Adair, dated May 28, 1805, alluding to Colonel Burr;

G. Y. A certified copy of a letter from James Wilkinson to Governor Gayoso, in the hand-writing of Gayoso, and dated September 22, 1796;

A. A letter from Joseph Collins to Daniel Clarke, dated March 10, 1809;

have been delivered by this deponent to the committee of the House of Representatives of the United States, appointed to inquire into the conduct of Brigadier General James Wilkinson, by a resolution of the 4th of April instant, and that the said papers are genuine, to the best of his knowledge and belief, and in the hand-writing of the persons therein respectively designated.

DAN. WM. COXE.

WASHINGTON COUNTY, DISTRICT OF COLUMBIA, *ss:*

On this 30th April, 1810, before the subscriber, a justice of the peace for said county, appeared Daniel William Coxe, and made oath, in due form, that the facts stated above are true to the best of his knowledge.

DANL. RAPINE.

11th Congress.] No. 281. [3d Session.

APPROVAL OF PENNSYLVANIA OF THE MEASURES OF THE FEDERAL GOVERNMENT ON FOREIGN AFFAIRS.

COMMUNICATED TO THE SENATE, DECEMBER 10, 1810.

In the General Assembly of the Commonwealth of Pennsylvania.

Whereas the Legislature of Pennsylvania, at their last session, made so explicit an avowal of their sentiments respecting the foreign relations of the United States, gave so firm a pledge of support to the General Government, that uncommon events alone could have rendered correspondent declarations, by their successors, useful or necessary; but the conduct of Great Britain, and the insolence of her minister plenipotentiary has produced a crisis that has excited public feeling and anxiety to such an unexampled height, that the General Assembly of this Commonwealth cannot hesitate to renew the solemn expression of devotion to their country, and of resentment against the Governments under whose order the rights, dignity, and honor of the United States have been violated and insulted. Therefore,

Resolved by the Senate and House of Representatives of the Commonwealth of Pennsylvania, That they unequivocally approve the pacific and liberal measures which the administration of the United States has so zealously pursued, for obtaining an adjustment of the existing differences between this country and the Governments of Great Britain and France.

Resolved, That whilst, with sincere pleasure they thus bear testimony to the upright and honorable conduct of their own Government, they view the refusal on the part of France to accommodate the differences between the two nations, as a flagrant disregard of our national rights; and they cannot hesitate to pronounce the violation, on the part of Great Britain, of a solemn and reciprocal engagement, and her subsequent failure to clothe her minister with adequate powers to adjust with our Government the disputes that had arisen prior to that event, as well as those thereby produced, to be such a manifestation of determined hostility, as must arouse the spirit, and nerve the arm of every American to resent the insults, and to resist the outrages thus wantonly heaped upon an unoffending nation.

Resolved, That when, in the opinion of our national councils, an appeal to the patriotism and force of the American people becomes necessary, the General Assembly of this Commonwealth pledge themselves to co-operate with the General Government to sustain the rights, honor, and reputation, and to avenge the wrongs and insults of their country.

Resolved, That the Governor of this Commonwealth be requested to transmit a copy of these resolutions to the President of the United States, and a copy to each of the Senators and Representatives from Pennsylvania, in the Congress of the United States.

JOHN WEBER,
Speaker of the House of Representatives.
P. C. LANE,
Speaker of the Senate.

Approved, the 19th day of March, 1810.

SIMON SNYDER.

11th Congress.] No. 282. [3d Session.

PROVISION FOR MAKING THE ROADS DESIGNATED BY THE TREATY OF BROWNSTOWN, AND DISPOSING OF THE LANDS ACQUIRED BY SAID TREATY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 7, 1811.

Mr. Morrow, from the Committee on the Public Lands, having been instructed to consider and report on the expediency of laying out and making the roads designated, and a provision for the disposal of the lands acquired by the treaty of Brownstown, made the following report:

The roads contemplated by the said treaty have, for their object, the opening a communication by land between the Territory of Michigan and the adjacent settlements in the State of Ohio, and generally with the other parts of the United States; a view of the geographical position of Michigan Territory, situated as it is, bordering for a considerable extent on the British province of Upper Canada, bounded on the east, north, and west by water, and on the south by an extensive tract of country to which the Indian title remains unextinguished, convinces the committee of the utility and necessity of the proposed roads. They would subserve the convenience of the citizens in their ordinary intercourse, of the Government in the transportation of the public mail, and especially, in an emergency, would be necessary for military operations. The distance from the rapids of the Miami of the Lakes to the western boundary of the Connecticut Reserve is about thirty-five miles; and from the Lower Sandusky, in a southwardly direction, to the Indian boundary line is about seventy miles, proper allowance for windings in the roads, so as that they may be made on good ground; the aggregate length of road, proposed to be made, may be estimated at one hundred and twenty miles, and the expense may be computed at four thousand dollars. Unless funds are provided by the United States for laying out, and making these roads, it is not probable that the object will be accomplished for many years to come; for, however great the advantage, and immediate the necessity of these roads to the inhabitants of Michigan, they are destitute of the means, and the proposed roads are without the limits of her territorial jurisdiction.

The State of Ohio, with limited public resources, and multiplied demands for extensive improvements on the roads within and for connecting her settlements, it is not to be expected that she will afford the funds for making roads without the limits of her settlements. The committee are also of opinion that it would be proper to make provision for the disposal of the lands acquired by the aforesaid treaty; the public lands, when they become private property, will be improved, and accommodation made for travellers on the road. The committee respectfully submit the following resolution:

Resolved, That provision ought to be made, by law, for laying out and making the roads designated by the treaty of Brownstown, and that provision be made for the disposal of the public lands acquired by the said treaty.

[NOTE.—See further report, No. 298.]

11th CONGRESS.] No. 283. [3d SESSION.

ADMISSION OF THE MISSISSIPPI TERRITORY INTO THE UNION.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 9, 1811.

Mr. POINDEXTER made the following report:

The committee, to whom was referred a resolution of the House of Representatives to inquire into the expediency of admitting the Mississippi Territory into the Union, as a separate and independent State, have had the subject referred to them under consideration, and beg leave, respectfully, to submit the following report:

That there has existed, within the Territory aforesaid, a temporary Government similar to that prescribed by the ordinance for the Territory northwest of the river Ohio, since the seventh day of April, one thousand seven hundred and ninety-eight; and, although the wisdom of Congress has been displayed in various modifications of that ordinance, it has never ceased to contain principles incompatible with the rights of freemen. The Executive, who is frequently a total stranger to the local circumstances of the country, possesses an unlimited veto on all laws passed by the representative branch of the Legislature. In addition to which, he is clothed with the odious authority to prorogue and dissolve the General Assembly, and thereby prostrate all power within the Territory to regulate its local and municipal concerns; these high prerogatives emanating from, and fit only to belong to Kings and despots, may be exercised at the discretion of the Governor, who is not even required to assign a reason on which the act is founded. The only security which the people, over whom this form of government is established, have, against the frequent and wanton abuse of these powers, is to be found in the mild and conciliatory disposition uniformly manifested by the General Government towards its Territories; but experience has shown that officers, situated at a remote distance from the tribunal to which they are responsible, too frequently "feel power, and forget right," and, by eluding the vigilance of rigid investigation, are enabled to practice acts of oppression with impunity. Your committee forbear to enter into an examination of the various objections which might be urged against the present system of Territorial Governments. It is sufficiently obvious, that, in many respects, they are hostile to the free constitution which guaranties the liberties of every American citizen. Your committee, therefore, consider it an act, both of strict justice and sound policy, to emancipate every Territory of the United States from the trammels of that probationary vassalage, whenever the number of inhabitants within the boundaries of the Territory shall fairly entitle them to a Representative in the Congress of the United States. Your committee have used the best means in their power to ascertain the number of souls within the Mississippi Territory. The official returns of the census have not yet been made to the Department of State, agreeably to the act of the last session, directing a census or enumeration of the inhabitants of the United States; consequently it became necessary and proper to seek, through other channels, the requisite information on that subject. It appears to your committee, from the best evidence which they have been enabled to collect, and on which they confidently rely, that there are in the southern and eastern counties of the Territory about the number of thirty-five thousand souls, and that the county of Madison, situated on the northern extremity of the Territory, near the great bend of the Tennessee river, contains a population of about ten thousand souls; it also appears to your committee that the emigration from the old States to this section of the Union will, in a very short time, constitute the number of inhabitants required by the articles of cession and agreement between the United States and Georgia, to vest in them the unqualified right to become a member of the Union. Connected with those considerations, the length of time which it will necessarily require to form a constitution, and put the same in operation, affords a strong pledge that, anterior to the final admission of the aforesaid Territory into the Union, the number of its inhabitants will amount to at least sixty thousand.

Your committee are of opinion that where no constitutional difficulty occurs, the formation of new States on the southern extremity of the Union ought not to be delayed. It is a remarkable fact, in the annals of this country, that, on the river Mississippi, which is acknowledged by all to be of the first importance, both in reference to its commercial advantages, and the vast extent of fertile territory through which it flows, there does not exist a solitary State Government. To unite every portion of the American family, by the indissoluble cord of affection, and to perpetuate the integrity of the Union, are objects paramount to all others which can be presented to the view of the National Legislature. These results cannot be secured but by an equal distribution of rights and privileges through every section of our extensive country. Let each enjoy civil, political, and religious liberty, subject to the control of independent local authorities, while the fostering hand of the Federal Government shall protect them in these enjoyments from domestic feuds and external violence. Your committee, with the foregoing impressions, do not hesitate to recommend the following resolution:

Resolved, That it is expedient to admit the Mississippi Territory into the Union, as a separate and independent State, on an equal footing with the original States; and that provision ought to be made, by law, to authorize the people of said Territory to elect a convention to form a constitution, to be submitted to Congress for their approbation.

[NOTE.—See report, No. 301.]

11th Congress.] No. 284. [3d Session.

LIST OF PATENTEES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 14, 1811.

Sir: Department of State, *January* 1, 1811.

In pursuance of the resolution of the House of Representatives of the United States, dated the 7th ultimo, I have the honor of transmitting a list of the names of persons who have invented any new or useful art, machine, or composition of matter, or any improvement thereon, and to whom patents have been issued for the same from this office, with the dates and general objects of such patents; and also the residence of the patentees, as far as they could be ascertained.

I have the honor to be, sir, with the greatest respect, your obedient servant, &c.

R. SMITH.

To the Hon. the Speaker *of the House of Representatives of the United States.*

Inventions.	When issued.	Names of patentees.	Residence.
	1805.		
Machine for cutting nails, brads, &c.,	May 1	Increase Kimball,	New Hampshire.
Improvement in the grist mill,	2	Joseph Copes,	Georgetown, Delaware.
A close fire-place,	3	Horatio G. Spafford,	Hudson, New York.
Machine for raising water from a running stream,	3	Frederick Lippart,	P. O. Keetztown, Penn.
In andirons,	4	John Stickney,	Baltimore.
An iron wheel for transporting carriages,	4	Robert Crane, Jun.,	Woodbury, Litchfield county, Connecticut.
A felloe mill,	4	Samuel Church,	Amherst, Hampshire co. Mas.
A metallic hone,	4	John Houston,	Williamsburg, Virginia.
A cross-cramp for four wheel carriages,	4	Simeon Glover,	Newtown, Fairfield co. Conn.
A washing and scouring machine,	4	Abraham Higham,	Hudson, New York.
Machine for raising and removing earth,	4	Joseph Platt,	Albany, New York.
In the physiognotrace,	4	Daniel Atherton,	Richmond, Virginia.
Machine for raising and removing earth,	4	Joseph Platt,	Albany, New York.
A beaming machine,	6	Allen Hill,	Hinsdale, Berkshire co. Mass.
Machine for removing earth, &c.	6	Jacob Welsh,	Boston.
Bleeding with and breeding leeches,	7	John Kunitz,	Philadelphia.
Machine for sawing shingles,	8	Isaac Baker,	Amherst, Northampton, Mas.
In glazing and polishing linens,	9	William Smith,	New York.
In making sod oil for leather,	10	George Poyzer,	Philadelphia.
Machine for shelling and hulling clover-seed,	10	Michael Zorger,	P. O. York, Pennsylvania.
Method of making moulds for casting iron screws, &c.,	10	Ebenezer Lester,	Herkimer town and co. N. Y.
In manufacturing tin ware,	10	Barnabas Langdon,	St. Albans, Vermont.
In the sluice to convey the water to horizontal wheels; and in the manner of forming the wheels of cast iron,	10	James Humiston Jun.,	Wallingford, N. Haven, Con.
On Anderson's patent condensing tub,	17	Henry Witmer,	Lancaster, Pennsylvania.
In the bark mill,	21	Thomas W. Pryor,	Philadelphia.
Apparatus for making tiles, bricks, &c.	22	William Hodgson,	Richmond, Virginia.
In the smut-fanning mill,	24	Thomas Pierce,	Fishkill, Dutchess co. N. Y.
Mode of making posts of clay for fencing,	27	William Cooley,	Bolton, Tolland co. Conn.
Machine for raising or projecting fluids,	27	Daniel Tomlinson,	Brookfield, Tolland co. Conn.
Method of boiling applicable to distilling, brewing, &c.,	27	Benj. Eggleston, Jun.,	Princetown, Albany, N. Y.
In the mode of setting boilers of every description,	June 1	Ebenezer Jenks,	Portland, district of Maine.
In planing by machinery,	1	John Bennock,	Boston.
Planing machine for sawing bellows boards, &c.	1	John Hinman,	New Haven, Connecticut.
Method of separating, preparing, and collecting the sulphate of potash into sal polychrestum, &c.,	15	Alexander McNitt,	Geneva, Ontario, New York.
Improvement in mills and machinery,	25	Lewis Valcourt,	Louisville, Kentucky.
Machine for ginning, carding, and spinning cotton,	Aug. 8	John McBride,	Nashville, Tennessee.
Machine for grinding, sawing, or rasping dye woods,	13	John Mathews,	Philadelphia.
Machine for casting types,	28	William Wing,	Hartford, Connecticut.
In springs for wheel carriages,	29	William Wing and Henry Salisbury,	Hartford, Connecticut.
In tub mills,	Sept. 25	Charles McLean and Solomon Loomis,	Hartford, Connecticut.
A clay pipe for conduits,	Oct. 1	Samuel Bartlett,	Hartford, Connecticut.
In making shingles,	9	Asahel A. Kelsey,	Hartford, Connecticut.
Manufacturing old junk or old rigging into oakum,	9	Daniel French,	Middletown, Connecticut.
In casting ship bolts,	28	Joseph Share,	Baltimore.
In rafts,	Nov. 4	William Deane,	Pittsburg, Pennsylvania.
In cattle mills,	4	La Paype, (ainé)	Baltimore.
Machine for raising water,	7	Seraphim Bellij,	Baltimore.
Machine for splitting skins,	9	William Lillie,	West Chester, New York.
In making salt,	13	John Gilman Taylor.	

LIST OF PATENTEES—Continued.

Inventions.	When issued.	Names of patentees.	Residence.
	1805.		
Machine for shearing woollen or other cloths by water, &c.,	Nov. 22	Friend B. Kellog,	Marlborough, Berks. co. Mas.
A distilling apparatus,	27	Abraham Heistand,	Yorktown, Pennsylvania.
Machine for preparing and hackling tow for paper or linen,	Dec. 7	James Tatterson,	Southampton, L. Island, N.Y.
Machine for washing, rinsing, and wringing clothes,	17	William Johnson Fulsom and John Hayden,	Hallowell, Kennebec county, district of Maine.
Rheumatic pill,	18	George Barber Dexter,	Boston.
A kiln for drying grain,	20	William Poole,	Wilmington, Delaware.
In kilns for drying grain,	20	James Abraham,	Middlesex, New Jersey.
Machine for reaping grain,	28	Samuel Adams.	
	1806.		
A rowing machine,	Jan. 13	Ebenezer Bryant,	New London, Connecticut.
A balance pendulum lock,	22	Samuel Goodwin and Richard Gains,	Baltimore and Georgetown, District of Columbia.
Machine for making batts or frames for wool hats,	24	Richard Gookins,	New Hampshire, Mass.
Machine for copying charts, landscapes, &c.,	Feb. 5	Cephas Thompson,	Bristol, Rhode Island.
A loom for weaving chip,	8	Philip Bennet,	Rochester, Ply. co. Mass.
A spring pump for raising water,	13	William Finn,	Baths, Baltimore.
Machine for picking oakum,	14	Michael Morrison,	Newburyport, Massachusetts.
Machine for making dough,	14	George Richards,	Stonington, New London co. Connecticut.
In bridges,	14	Theodore Burr.	
A planing machine,	19	Joseph Hawkins,	Philadelphia.
Improvement in gun carriages,	19	Samuel Hawkins,	New York.
Machine for raising mud,	21	John Eveleth.	
Medicine called the essence of tansy,	28	Israel Newton,	Norwich, Windsor co. Vt.
Machine for making brick,	March 1	John F. Gould.	
In suspenders,	5	Richard Howell.	
In evaporation,	5	Thomas Arnold.	
In stoves,	7	Samuel Dickey,	Oxford, Chester co. Penn.
In tilt hammers,	8	John F. Gould.	
A joining and planing machine,	8	Joseph S. Mott,	Alburg, St. Albans, Franklin county, Vermont.
A balance pendulum lock,	17	Richard Gaines,	Georgetown, District Colum.
A hoisting machine,	19	William Purden,	Baltimore.
In a caboose,	21	George Youle,	New York.
For dressing flax,	21	Elisha Mack.	
Preparing and welding cast steel to iron or other steel for tools,	22	Daniel Pettibone,	Roxbury, Norfolk, Conn.
A fulling mill and washing machine,	26	John Kennion,	Dutchess county, New York.
Carding machine to form batts for wool hats,	31	Abner Guild,	Dedham, Norfolk co. Mass.
Machine for splitting skins or neats' leather,	31	Stephen Payn.	
In diving machines,	April 1	Richard Tripe,	Dover, New Hampshire.
In cider and bark mills,	5	Isaac Quintard,	Stanfield, Fairfield co. Conn.
In propelling boats,	17	John Heavin,	Montgomery county, Va.
Machine for cutting straw,	17	John Heavin,	Montgomery county, Va.
In saw mills,	25	Joseph Quinby,	Boston.
In water wheels for mills,	May 1	Ephraim Hubbel,	Middlebury, Vermont.
In reducing calcareous matters into lime,	2	Charles Varlé.	
In the steelyard,	19	John Edwards,	New York.
In scale beams and balances,	19	John Edwards,	New York.
A caboose stove, apparatus for cooking and distilling, &c.	21	George Youle,	New York.
In windmills,	22	John Cooper,	Philadelphia.
In boxes for carriage wheels,	23	James Gridley,	Boston.
Machine for shearing cloth,	25	Beriah Swift,	Washington, Duchess co. N.Y.
In the churn,	26	Abner Wing,	Do. do.
A washing machine,	29	Reuben Buck.	
In boxes for carriage wheels,	30	Levi Brown,	Berkshire, Massachusetts.
Extracting salt from sea water,	June 12	Standfast Smith,	Suffolk, Dorchester, Mass.
In facilitating the process of extracting salt from sea water,	13	Standfast Smith,	Suffolk, Dorchester, Mass.
In facilitating the process of extracting salt from sea water,	13	Standfast Smith,	Suffolk, Dorchester, Mass.
In filtering impure water, wine, &c.	24	Solom. McCombs, Jos. Smith, & Ben. D. Galpin	Baltimore.
In making pantiles,	July 3	William Harwood,	Richmond, Virginia.
A perpendicular boring machine,	7	Roger Selden.	
Machine for facilitating the spinning of rope yarn, &c.	14	Nathaniel Cutting,	Washington city.
In making boots and shoes, &c.	16	John Bedford,	Philadelphia.
A swing cradle,	17	Zachariah Mills,	Hartford, Connecticut.
Anti-streamboat,	17	William Wadsworth,	Hartford, Connecticut.
A cover for buildings, called artificial slate or tile,	Aug. 7	Thomas Woodsend.	
Apparatus for improving the quality of cables, &c.	14	Nathaniel Cutting,	Washington city.
Improvement whereby a beautiful yellow paint may be prepared,	Sept. 2	The Baron Alexis Carrendeffez,	New York.
Machine for raising vessels out of water to repair them,	Oct. 9	John Titus Morgan,	New York.

LIST OF PATENTEES—Continued.

Inventions.	When issued.	Names of patentees.	Residence.
	1806.		
Apparatus for the sublimation of sulphur,	Oct. 9	George Barber Dexter,	Boston.
Mixture to render all kinds of woollen cloth water proof,	21	Jas. Pountrey Wightman,	Boston.
In screens for freeing grain from dirt, seeds, &c.	28	William Tullock,	Lantern Mills, Orange C. H. Virginia.
In suspenders,	Nov. 6	Jonas Dawson,	Philadelphia.
A perpetual oven,	Dec. 4	James Deneale,	Dumfries, Virginia.
	1807.		
A composition for covering and flooring houses,	Feb. 3	Louis De Niroth,	Baltimore.
A traverse sleigh,	4	Levi Rogers,	Berwick, Massachusetts.
Machine for winding cotton,	5	David Brown, Jun.	Warren, Bristol co. R. I.
Machine for grinding, sawing, and rasping dye woods,	6	John Matthews,	Philadelphia.
A paper trimmer,	7	Parke Shee,	Philadelphia.
Accommodating bolted truss for ruptures,	7	John Beath,	Boston.
In the auger,	7	William Hale,	Champlain, Clinton co. N. Y.
Machine for cutting brads,	10	Jonathan Ellis.	
Mode of making the bottoms of shoes and boots of metallic substance,	10	Samuel Milliken,	Lexington, Massachusetts.
A water-tight swivel screw adapted to steam engines, stills, &c.	10	Abel W. Hardenbrook	New York.
In making boots and shoes,	11	William Montgomery,	Philadelphia.
The Egyptian lock,	11	Abr'm Ogier Stansbury	New York.
Making charcoal from peats,	11	Charles Fales,	Worcester, Massachusetts.
A hemp and flax machine,	11	Richard Button,	Cassenovia, New York.
Method of making moulds for casting trundle heads of any kind of metal, &c.	12	Ebenezer Lester,	Little Falls, Herkimer county, New York.
A fire place with a flat funnel,	19	Abraham Fisher.	
A tilting wagon,	17	Abraham Hobart,	Braintree, Norfolk co. Mass.
For carding fur and wool for hats,	21	Arnold Buffum.	
In the grist mill,	22	Ezekiel Hale,	Haverhill, Essex co. Mass.
Machine for cutting and heading nails at one operation,	22	Jesse Reed,	Boston.
Machine for working a trip hammer with a perpendicular handle,	25	Joel Fox, Jun.	Middlesex, Massachusetts.
In making butter,	27	Bornt G. Burtis and Gersham Burtis,	New York.
A washing machine,	28	Richard R. Elliot,	Watertown, Mid'sex co. Mass.
Mode of making salt,	April 1	Timothy Green,	New York.
A pendulum screen,	1	Lewis Dupré,	Charleston, South Carolina.
A double forcing pump,	1	Charles Colver,	Champlain, Essex co. N. Y.
In the caboose stove for cooking, &c.	1	George Youle,	New York.
In ploughs,	1	David Peacock,	Burlington, New Jersey.
Machine for dressing shingles and staves,	1	Jeremiah McIlvaine,	Chester, Delaware co. Penn.
Machine for cutting nails,	1	Elisha Bigelow,	Baltimore.
Machine for propelling boats, &c. by oars, &c.	7	James A. Pearce,	Louisville, falls of Ohio.
Machine for raising stumps, &c. from the ground,	15	Alexander Craig,	New Hampshire.
In the application of bark for hats, caps, &c.	17	Sylvester G. Whipple,	Hallowell, Kennebeck co. Ms.
In making fire brick,	17	Ebenezer Jenks,	Canaan, Litchfield co. Conn.
In main springs for carriages,	18	Jonathan Mix,	New Haven, Connecticut.
In the construction of bridges,	18	Thomas Pope,	New York.
In the steel yard,	23	Barnabas Langdon,	St. Albans, Vermont.
In an apparatus for, and mode of distilling,	23	Abraham Weaver,	Adams county, Pennsylvania.
In the splinter bar and swingle trees of carriages, to disengage the horses from suddenly,	23	Henry Dunlap,	Georgetown, Columbia.
Applicable to fire places and stoves,	23	Allan Pollock,	Boston.
In heating rooms, &c.	24	Allan Pollock,	Boston.
A washing machine,	25	Simon Willard, Jun.	Hudson city, New York.
A washing, scouring, and churning machine,	25	Thomas Beatty.	
In making ropes of any size, and lines, &c.	May 5	John Sellers and Andrew Bartle,	Alexandria.
A gunner's quadrant,	6	Charles Hammond,	Concord, Middlesex co. Mas.
Machine for breaking and grinding bark, &c.	7	Cornelius Tobey,	Hudson, New York.
Machine for making paper,	8	Charles Kinsey,	Essex, New Jersey.
Machine for shearing cloth,	8	Russell Dorr,	Kinderhook, New York.
In rigging vessels of every denomination,	9	Stephen Sayre,	Bordentown, New Jersey.
In hanging curtains or blinds in coaches, &c.	9	Peter Harvey,	Philadelphia.
In shingling the roofs of houses, &c.	11	Thomas Young,	Philadelphia.
In lasts for boots and shoes,	20	William Young,	Philadelphia.
In the fire engine,	20	Jacob Smith, Jun.	New York.
Mechanical spring buckle,	20	John Green,	New York.
In mills,	21	Christian Hamaker,	Lancaster.
A washing machine,	June 6	Josiah Cleaveland,	Franklin county, Penn.
A mortising machine,	8	Simeon Glover and David Parmelee,	Newtown, Connecticut.
In galvanism for salivating, &c.	9	William Phœbus,	New York.
In stills,	20	Stephen Steward,	Walpole, New Hampshire.
In cotton gins,	22	Obadiah Crawford.	
In machines for shearing cloth,	23	Enoch Burt,	Princeton, New Jersey.
In saw mills,	23	Jacob Spofford,	Ipswich, Massachusetts.
In churns,	23	Reuben Buck,	Baltimore.
In the axle and box of carriages,	26	Cyrenus Beach,	Newark, New Jersey.

LIST OF PATENTS—Continued.

Inventions.	When issued.	Names of patentees.	Residence.
	1807.		
In the filtering pot,	July 1	Michael Freytag,	Philadelphia.
In piano fortes, &c. &c.	2	Ralph Shaw,	Boston.
Manufacturing wrought nails and brads,	8	Jordan Dodge,	Rutland, Vermont.
In condensers in distillation,	9	Thomas O'Connor,	New York.
Machine for making pills,	10	Webster Lewis.	
Machine for making wrought nails, &c.	11	Jonathan Nichols,	Rhode Island.
Mode of heating water in boilers of steam engines, by the rays of the sun,	11	Matthew Longwell,	Gettysburgh, Adams' county, Pennsylvania.
In making Italian pastes, Maccaroni, Vermicelli, &c.	13	John B. Sartori,	Philadelphia.
Machine for cutting straw,	18	Josiah Cleaveland,	Franklin county, Penn.
Machine for cutting straw,	20	Benjamin Connor,	Portsmouth, New Hampshire.
Washing-machine,	24	Ebenezer Jones,	Alfred, Berkshire co., Mass.
Apparatus for, and mode of, cleaning windows,	24	Thomas Bruff,	Washington city.
In preparing a vermifuge,	Aug. 11	Joseph Lehman,	Philadelphia.
In washing machines,	Oct. 1	Martin Lee & Timothy Barber,	Oneida county, New York.
A churning machine,	3	Buel Cutler,	Washington, Dutchess county, New York.
In stills,	3	Edward Richardson,	Fredericktown.
Moulds for casting copper sheathing nails, &c.	6	Thomas McIlwham,	Princeton, N. Jersey.
In preparing green coloring matter or paint,	12	Baron Alexis De Cardeffez,	New York.
Mode of preparing leather for straps of suspenders, &c.	14	Orange Webb,	New York.
Machine for planking hats, and making cloth without yarn,	19	Jos. Pitkin & Timothy Kimball,	Hartford, Connecticut.
In the cheese press,	26	Jesse Arnold,	Pawlings, Dutchess county, New York.
Manufacturing sheet iron into funnel for stove pipes, &c.	Nov. 4	Richard Wheatly and James Beaumont,	Boston.
In manufacturing iron,	12	James Butland,	Philadelphia.
A plough harrow,	18	Seth Vinton,	Willington, Connecticut.
Manufacturing thimbles for the sails of ships, &c.	20	Isaiah Jennings,	New York.
A gauge setting machine for saw mills,	27	Anson Blake,	Lincoln, Kentucky.
In thrashing machines,	30	Benjamin B. Bernard,	Virginia.
For cutting and heading nails,	30	Simon Willard,	Hudson, New York.
For thrashing and cleaning grain,	30	Simon Willard, Jun.	Hudson, New York.
In the water wheel,	Dec. 1	Simon Willard, Jun.	Hudson, New York.
An improved still,	13	William Thornton,	City of Washington.
Machine for heading nails,	15	Samuel Rogers,	Plymouth, Massachusetts.
A churning machine,	15	John Scripture,	Alford, Berkshire, Mass.
Manufacturing hoop and sheet iron,	24	Jeremiah H. Pierson,	Ramapo Works, Rockland, New York.
In the rolling and slitting mills,	24	Isaac Pierson,	New York.
	1808.		
In making and refining sugar,	Jan. 8	Antoine Boucherie,	Philadelphia.
Machine to facilitate the making of boots and shoes,	9	Eli Barnum,	Massachusetts.
Machine for manufacturing flour and meal,	22	Oliver Evans,	Philadelphia.
Nail cutting machine,	28	Jonathan Hicks,	Hadley, Hampshire co., Mass.
In fire places or open stoves,	Feb. 1	John F. Gould,	Newburyport, Mass.
In the fanning mill for grain, &c.	9	Samuel Dodge,	Cleveland, Trumbull county, Ohio.
Machine for splitting leather and skins,	24	William Bent,	Boston.
In the plough,	24	Hezekiah Harris,	Bullitt, Kentucky.
In the common suction pump,	Mar. 4	Daniel Watson,	Plymouth, Mass.
In propelling boats,	4	Philemon Heaton, M. B. Boyes, and Philemon Heaton, Jun.	
Machine for manufacturing cordage, and improving its quality, &c.	4	Robert Fulton & Nathaniel Cutting,	N. C. Washington, R. F. New York.
Machine for making combs,	5	Phineas Pratt,	Saybrook, Connecticut.
In churns,	8	Simeon Hays,	Poultney, Steuben county, New York.
A forcing pump with double action, applied to engines, &c.	9	Eleazer Cady, Jun.	Chatham, Col. co., N. Y.
A revolving churn,	10	Nicholas King,	Washington city.
In the churn,	11	Stephen Stackhouse,	Casanovia, Madison co. N. Y.
In chimneys,	13	Giles Gridley,	Newburyport, Mass.
In fire places,	14	Giles Gridley,	Newburyport, Mass.
A washing machine,	15	William Wadsworth,	Hartford, Connecticut.
Machine for propelling boats, &c.	15	William Wadsworth,	Hartford, Connecticut.
Machine for grinding bark and dye woods,	18	Obadiah Pease & Asher Donalds,	Norfolk, Connecticut,
In the cider and cheese press,	21	Ebenezer Benedict,	New Marlborough, Berk. co., Mass.
For distilling or boiling water,	21	Eli Barnum and Benjamin Brooks,	New Marlborough, Berk. co., Mass.

LIST OF PATENTEES—Continued.

Inventions.	When issued.	Names of patentees.	Residence.
	1808.		
A wheel to run under water,	Mar. 21	John Johnson,	Indiana Territory, Knox. co.
In churns,	22	Wm. W. Townsend,	Sandy Hill, New York.
A fanning mill for grain or clover seed, &c.	23	Oliver Barrett, Jun.	Sandy Hill, New York.
A lever for turning wheels, for rowing boats, &c.	25	Roswell Hopkins,	Hopkinton, St. Lawrence co., N. Y.
Machine for trimming straw plat for bonnets,	30	Eleazer Smith,	Franklin, Norfolk co., Mass.
Mode of applying power, and causing motion to machinery by the pendulum,	31	Jedediah Tallman,	Albany, New York.
An economical furnace or stove,	April 6	Joseph Poudrell,	New York.
Cross cut saw machine,	11	Thomas Cohoon,	Cazenovia, New York.
In lessening the friction in axletrees of carriages, &c.	12	Robert Kilborn,	Gt. Barrington, Berks. co., Mass.
In cheese presses, &c.	12	Ephraim Warner,	Waterbury, New Haven co., Conn.
Machine for breaking and swingling hemp and flax, &c.	13	Thomas Cohoon,	Cazenovia, New York.
In the screw press,	14	Thomas Cohoon,	Cazenovia, New York.
In faucets for drawing liquor from casks	14	Ira Ives,	Bristol, Hartford co., Conn.
Machine for smoothing and polishing paper, and other substances,	18	Wm. Coolidge,	Boston.
Mode of striping alum dressed leather for shoe binding, &c.	20	Samuel Frothingham and George Harris,	Middletown, Middlesex co., Conn.
A cylindric ruling machine,	21	John Fairbanks,	Boston.
In the churn,	22	Daniel Pierpont,	New Haven, Connecticut.
In the spinning wheel,	23	Timothy Cruttenden,	Poultney, Rutland co. Vt.
In manufacturing hats, cloths, &c. from a fleece, or sheet taken from a carding engine, without bowing,	23	Roswell Pitkin,	East Hartford, Connecticut.
In the churn,	25	Aaron Reed,	Columbia county, New York.
In carriages for field artillery,	25	David Cobb.	Boston.
In the churn,	25	Nehemiah Howe,	Windham, Connecticut.
In preparing and making twisted whalebone whips,	25	Joseph Reeve,	Newburgh, Orange county, New York.
Mode of impelling boats, water, or land carriages,	25	Benjamin Taylor,	New York.
Machine for making rivets,	25	Josiah Jennings,	New York.
For making oakum,	26	Daniel Rider,	New York.
A washing machine,	26	Leonard Kennedy,	Hartford, Connecticut.
Machine for shearing woollen and other cloths,	26	Ebenezer Stowell,	Worcester, Wor. co., Mass.
The anglet, for taking and laying down angles,	29	Benjamin Dearborn,	Boston.
A washing machine,	May 14	Elam King,	Johnstown, Montgomery co. New York.
In making pearlash in kettles, without the use of ovens,	14	Reuben Ainsworth.	
The life buoy, or seaman's friend,	14	William Flower,	Philadelphia.
A friction roller door hinge,	16	John Bailey, Jun.	Plymouth county, Mass.
In the construction of pumps,	16	William Rhodes,	New York.
A floating dry dock, for cleansing the bottoms of vessels,	16	William Rhodes,	New York.
In the churn,	18	Simeon B. Willard,	Bloomfield, Ontario co. N.Y.
In pressing machines,	21	Robert Pierpoint Cunningham,	Pomfret, Connecticut.
In the application of the whip saw,	June 1	Sam'l Barber and Nehemiah U.Tompkins,	New York.
In the double lever press, for tobacco, &c.	3	Caleb Johnson,	New Glasgow, Virginia.
Machine for rasping dye woods,	3	Jesse Reed,	Boston.
In carriage springs,	3	Enoch Ives and Jerry Hill,	New Haven, Connecticut.
Apparatus for propelling boats across rivers by the force of the current,	3	Samuel Stilwell and Daniel T. Wandall,	New York.
In washing machines,	4	Martin Lee,	New York.
Machine for washing, churning, and getting out clover seed, &c.	13	Robert Patten,	Columbia, Lancas'r co. Penn.
Machine to cut and head nails,	14	Joseph Jelleff,	Butternuts, Otsego co. N. Y.
In the chain bridge,	17	James Finley,	Fayette county, Penn.
Thoroughbrace springs, for carriages,	17	Jonathan Mix,	New Haven, Connecticut.
In stoves, &c. for heating rooms,	17	Allen Pollock,	Boston.
In the cider and cheese press,	18	Ebenezer Benedict,	New Marlborough, Mass.
A perpendicular washing machine,	20	Ebenezer Jones,	Alfred, Berkshire co. Mass.
Machine for sawing stone, wood, &c.	–	Ebenezer Jones,	Alfred, Berkshire co. Mass.
For shearing cloth,	21	Simson Stewart, Ebenezer Hovey, and James Henderson,	Pittstown, Ontario co. N. Y.
A hydrant, for drawing water from aqueducts,	22	David Burt,	Schenectady, New York.
In the rectification of spirits,	23	Osborn Parsons,	Hudson city, New York.
In lighting the binnacle of ships,	24	Winslow Lewis,	Boston.
In making conduit pipes, &c. from clay, &c.	24	Robert Ramsey,	Hanover, New Hampshire.
An illuminator, for lighting stair cases, &c.	24	John Henry Ross,	Baltimore, Maryland.
Folding or spiral springs, for carriages, &c.	27	James Armour, Jun.	Baltimore.
Machine for slitting boards, plank, &c.	29	Ezekiel Olds,	Brookfield, Worc'ter, co.Ms.
A washing machine,	July 1	Asahel E. Paine,	Delhi, Delaware co. N. Y.

LIST OF PATENTEES—Continued.

Inventions.	When issued.	Names of patentees.	Residence.
	1808.		
In the churn,	July 7	Dyer Cleveland,	Sheffield, Massachusetts.
A pressing and boring machine,	9	Robert Ramsey,	Hanover, New Hampshire.
In tanning,	9	Samuel Parker,	Billerica, Middlesex co. Ms.
In currying and finishing leather,	9	Samuel Parker,	Billerica, Middlesex co. Ms.
The universal vitriolic test, for making all kinds of bank or other bills,	11	Abel Brewster,	Hartford, Connecticut.
A washing machine,	11	Enos Trescott,	N. Marlboro', Berks. co. Ms.
A washing machine,	11	Theron Henry,	Bloomfield, Ontario co. N. Y.
A washing machine,	11	Thomas Osgood,	Charlestown, Mid'sex co. Ms.
A washing machine,	11	Ebenezer Lister,	Killingworth, Mid'sex co. Ct.
A washing machine,	11	Dudley Loomis and Ira Millington,	Springfield, Otsego co. N. Y.
In the churn,	11	Dyer Cleveland,	Sheffield, Massachusetts.
In churns,	12	Erastus Townsend,	Canaan, Columbia co. N. Y.
Machine for splitting skins,	12	Isaac Cobb,	Walpole, New Hampshire.
Machine for cleaning rice,	12	Jonathan Lucas, Jun.	Charleston, South Carolina.
In distilling,	13	Eli Barnum and Benjamin Brooks,	N. Marlboro', Berks. co. Ms.
In funnels, for filling vessels with fluids,	13	Philip Apple,	Philadelphia.
In the wind mill,	18	Uzziel Geer,	Norwich, Connecticut.
In rolling tub mills,	19	Samuel Bartlett,	East Windsor, Connecticut.
For shaving and splitting leather,	29	Martin Tullar,	Royalton, Vermont.
In churns,	Aug. 2	John Bolton,	Philadelphia.
Machine for cutting straw,	2	Elihu Hotchkiss,	Brattleboro', Wind'm co. Vt.
In the spinning wheel,	6	Obadiah Seely.	
Machine for making wheels of all sorts,	6	Jacob Coon,	Granville, New York.
Machine for hulling and cleaning rice, and for many other purposes,	8	John Thos. Ricketts,	Cameron, Fairfax co. Va.
For elevating water at mills, &c.	12	William Smith,	Gloucester county, N. J.
Improvement in chain bridges, invented by James Finley,	16	John Templeman,	Allegany county, Maryland.
In carriage springs,	26	Joshua Cone,	Reading, Connecticut.
Machine for raising water,	26	William Barker.	Wilkesbarre, Pennsylvania.
A washing machine,	30	Stephen W. Dana,	Rutland, Vermont.
In wheel carriages,	30	Stephen W. Dana,	Rutland, Vermont.
A washing and churning machine,	31	Stephen Winchester,	Newtown, Connecticut.
Machine for pressing straw or chip hats, &c.	31	Samuel Prince,	New York.
An elastic chair,	31	Samuel Gragg,	Boston.
A geometrical interest table,	Sept. 7	Gershom Cobb,	Boston.
A washing and churning machine,	7	Garry Bishop,	Cazenovia, Madison co. N.Y.
A rocking churn,	8	Dan Parmele,	Dutchess county, New York.
Machine for heading nails,	16	Asaph Chandler and Silas Shepard,	Taunton, Bristol co. Mass.
A fanning and winnowing mill,	19	Benjamin Atwell,	Burlington, Otsego co. N. Y.
A pump bellows, for furnaces and forges,	20	Isaiah Jennings,	New York.
A ratchet wheel,	21	Marcus B. Parmelee,	Newtown, Connecticut.
In making brick,	21	Asa Frost,	Cazenovia, Madison co. N.Y.
Machine for grinding bark, for tanning, &c.	22	Paul Pilsbury,	Newbury, Massachusetts.
In the tailor's bench,	Oct. 3	William Burtis,	New Brunswick, N. J.
In lightning rods,	3	Elisha Calender,	Boston.
Machine for making balls and shot by pressure,	5	Thomas Bruff,	Washington city.
In military knapsacks,	7	John P. Lherbette,	Washington city.
In churns,	24	Samuel Moon, Jun.	Downington, Chester co. Pen.
In ovens,	27	John West,	Stafford county, Virginia.
A black pigment, or mineral black, for printing ink, or painting in oil or water,	28	Jacob Cist,	Wilkesbarre, Pennsylvania.
A rarefying air stove, for warming rooms, &c.	28	Daniel Pettebone,	Roxbury, Norfolk co. Mass.
In looms, for weaving of every kind,	Nov. 4	Charles Cooper,	Lebanon, Dauphin co. Penn.
Machine for separating grain and seeds from straw, &c.	9	Randall Wallis,	Baltimore.
Machine for scrubbing or scouring floors of houses, &c.	17	Simon B. Willard,	Bloomfield, Ontario co. N. Y.
In refining lamp oil,	17	Eli Fourestier,	Philadelphia.
In stills and rotary steam engines,	21	Stedman Adams.	
In boots and shoes,	21	Samuel Chamberlain,	Boston.
In McComb's horizontal reacting water wheel,	23	Joel Farnham,	Oswego, Tioga county, N. Y.
In ploughs,	25	Rich'd B. Chenoweth,	Baltimore.
A rolling wheel on an inclined shaft,	30	Stephen Mirick,	Madison county, New York.
A churn and washing machine,	Dec. 5	John Devotie,	Vernon, Oneida co. N. Y.
A mill for breaking plaster of Paris, &c.	8	William Brown,	Baltimore.
In grist mills,	8	Rufus W. Adams,	Marlboro', Windham co. Vt.
An elastic trace and brace, by connected springs,	10	Benjamin Giddins,	Baltimore.
Machine for rolling and plating iron, and cutting nails,	10	Stephen Couch and Asa Towne,	Boston.
In the churn,	10	Luther Jones,	Canton, Hartford co. Conn.
In still tubs,	12	Isaac Bennitt,	Newtown, do.
Machine for dressing shingles,	13	Robert Nicholson and Thomas Nicholson,	Bairdstown, Kentucky.
An alarm bell for fire engines,	19	James P. Parke,	Philadelphia.
In the cheese press,	19	Levi Martin,	Granville, New York.
A double boiler for distilling,	19	Anos Gunn,	New Haven, Connecticut.
In casting pipes or tubes,	26	Willard Badger,	Boston.

LIST OF PATENTEES—Continued.

Inventions.	When issued.	Names of patentees.	Residence.
	1808.		
Mode of suspending or hanging pleasure carriages, &c.	Dec. 26	Joseph Henderson,	Gilford, Connecticut.
In the cheese press,	27	Hezekiah Dickerman,	G. Barr'gton, Berks. co. Mas.
In distillation,	28	John Dimond,	Philadelphia.
A geer press for pressing cheese, &c.	28	Hazen Erwin,	Boston.
The vegetable pulmonic detergent,	31	George Rogers,	Northampton, Massachusetts.
	1809.		
For cleaning clover seeds,	Jan. 6	William Sampson and Cyrus Curtis,	New Haven, Vermont.
A pneumatic forcing pump,	6	Pliny Upham,	Brookfield, Massachusetts.
Machine for manufacturing dip candles,	6	William Miller,	New York.
Machine for dipping candles,	6	Samuel Stansbury,	New York,
In pumps,	6	Abraham Horn,	Easton, Northampton co. Pa.
Machine for making window sashes,	7	Joel Farnham,	Oswego, Tioga co. N. Y.
Machine for splitting hides and shaving leather,	7	Seth Boyden,	Foxborough, Norfolk, Mass.
In hair combs,	10	Moses Moss,	Farmington, Hartford co. Con.
A washing and wringing machine,	12	Septimus Tucker,	Dublin, Philadelphia co. Pen.
A composition for the bottoms of vessels,	14	Jonathan Pratt,	Middletown, Connecticut.
In carriages,	14	William Ross,	New York.
In fastening to window shutters, &c.	14	James Blanchard,	New York.
In the clay conduit,	15	Samuel Bartlett,	Hartford, Connecticut.
In steamboats and boilers, &c.	16	William Thornton,	Washington city.
Machine for heating liquids,	16	Samuel Bolton,	Philadelphia.
Machine for dressing flax and hemp,	18	Richard S. Chappel,	Pawlet, Rutland co. N. Y.
Machine for pounding rice, &c.	19	Alex. Duncan Moore,	New Hanover, N. Carolina.
A distilling apparatus,	30	Antoine Boucherie,	Philadelphia.
For discoloring linseed oil, imparting to it a drying quality, and converting it into an uncolored varnish,	30	Nicholas Simon Parmantier,	Philadelphia.
Improvement in making gin cordial, called Holland's gin,	31	Antoine Boucherie,	Philadelphia.
Machine for sawing timber in a circular form,	Feb. 4	James Linsey,	Casenovia, Madison co. N.Y.
Improvement in steamboats,	11	Robert Fulton,	New York.
For cleansing lye, and melting potash,	11	Jonathan Jones,	Fabias, Onondago, N. Y.
A washing machine,	11	Eli F. Hill,	Fabias, Onondago, N. Y.
A flax and hemp machine,	11	Eli F. Hill,	Fabias, Onondago, N. Y.
An overshot strap or chain wheel to go by water,	13	Richard Berrian,	New York.
Machine for propelling boats, &c. by horses,	14	Moses Crafts,	Troy, New York.
A thrashing and winnowing machine,	15	Lawrence Hock,	Frederick county, Maryland.
Mode of making paper from Alga or sea weed,	15	Samuel Green,	New London, Connecticut.
Machine for paring, quartering, and coring apples,	16	Willard Badger,	Boston.
In the mode of teaching to read,	16	Hugh Chard,	Courtlandtown, Washington county, New York.
In bellows for forges,	16	Henry Dotterer,	Philadelphia.
A washing machine,	16	Aziel Blodget,	Amherst, Hampshire co. Mas.
For thrashing and other purposes,	17	Robert Patten,	Columbia, Pennsylvania.
In constructing of mills, and the means of communicating a rotary motion by an augur, spindle, and spur wheel, with cylindrical teeth,	18	Sam. Mans & Jer. Black	Pennsylvania.
In mills by a wheel of a new construction,	22	Ephraim Rew,	Canandaigua, New York.
In stoves,	22	James Fales,	Newport, Rhode Island.
In curing tobacco,	25	John Robinson,	Charlotte, Virginia.
In navigating rivers and shoal waters,	24	Michael Williams,	Albany, New York.
Application of the pendulum to mills, &c.	March 1	Isaac Cobb,	Walpole, New Hampshire.
In making Bene oil,	1	William Few,	New York.
Machine for extracting hair, and cutting fur from peltry,	1	Ephraim Cutter,	Brattleboro', Windham co. Vt.
In making bow strings for hatters,	1	Daniel Nichols,	New Milford, Connecticut.
A churn,	2	Ira Willington,	Warren, Herkimer co. N. Y.
In scows and boats,	2	Elihu Sherman,	Lansingburgh, Rensselaer co. New York.
Machine for getting out clover seed,	3	Samuel Condon,	New Hartford, Litchfield co. Connecticut.
Machine for thrashing grain, and breaking and dressing flax, &c.	3	Samuel Condon,	Ditto.
In ovens,	3	John Barnitt,	Upper Providence, Montgomery co. Pennsylvania.
A washing machine,	11	Joseph Yarwood,	New Brunswick, N. Jersey.
A cement intended as a substitute for slates, tiles, &c. for covering houses,	13	Charles Morneweck,	Baltimore.
Machine for planting Indian corn, &c. in rows,	18	John Beecher,	Lycoming co. Pennsylvania.
Machine to facilitate the coloring and finishing of silk stuffs, &c.	22	Abner Stearns,	W. Cambridge, Middlesex county, Massachusetts.
In washing machines,	23	Levi Anderson,	Bristol, Bucks county, Penn.
A washing machine,	23	William Buckman,	Ann Arundel co. Maryland.
A case or curb to be used to prevent incavation in sinking wells and boring into loose ground,	April 13	Job Cowperthwaite, Sr.	
Horizontal wheel for cutting and heading nails,	15	Jesse Reed,	Kingston, Massachusetts.
In making salt,	17	Benjamin Wheeler,	Boston.
A washing machine,	17	Garry Bishop,	Madison county, New York.
In the hand saw,	17	Isaiah Jennings,	New York.
A churning machine,	21	Ezra G. Jones,	Otsego, New York.
In harness,	21	Benjamin Mirick,	Rutland county, New York.

LIST OF PATENTEES—Continued.

Inventions.	When issued.	Names of patentees.	Residence.
	1809.		
Machine for heading cut nails,	April 21	Samuel Wilmot, Jun.	New Haven, Connecticut.
A washing and wringing machine,	24	Lemuel Bachelor,	Vernon, Oneida county, N.Y.
A geometrical interest table,	24	Gersham Cobb,	Boston.
Improvement in currying and finishing leather of all kinds, &c.	26	Samuel Parker.	
Machine for laying out window sashes,	27	David Worthington,	Hartford, Connecticut.
A tide water or river wheel,	May 1	William Stubbs,	Chillicothe.
In weaving straw with silk or thread,	5	Mary Kies,	Killingly, Windham co. Con.
Machine for splitting leather and skins, &c.	8	John Woodcock,	Worcester, Massachusetts.
A balance spring catch lever,	8	Levi Kendall,	New York.
In churns,	9	Hezekiah Dickerman,	G. Barrington, Berkshire co. Massachusetts.
In wooden combs,	9	Nathaniel Jones,	Southington, Hartford co. Ct.
In churns,	10	George Votee,	Berling, Hartford co. Conn.
A cheese press,	13	Phineas Allen,	Burlington, Otsego co. N. Y.
In compounding a blue color as a substitute for indigo,	15	Samuel De Riemer,	Poughkeepsie, New York.
A washing machine,	15	Orin Chatfield,	Burlington, Otsego co. N. Y.
A washing machine,	21	Nicholas Van Zandt,	City of Washington.
Machine for cutting straw,	25	Roger Haskell,	Burlington, Otsego co. N. Y.
A washing and churning machine,	June 7	Gardener Osgood,	Madison county, New York.
Machine for dividing and boring hubs, &c.	7	James B. Cleveland,	Bergen county, New Jersey.
A washing machine,	8	Martin Lee,	Burlington, Otsego co. N. Y.
Medicine to prevent or cure the effects of the bite of a mad dog,	9	Elizabeth Stoy, executrix of Wm. Stoy,	Lebanon, Dauphin co. Penn.
For pounding the husk off rice,	9	Jacob Reed,	Charleston, South Carolina.
A sea table,	9	Wm. H. Richardson,	Baltimore.
A uniform turning lathe,	10	Amos Hagget,	Middlesex co. Massachusetts.
A churn,	13	John McCoord,	Washington, Dutchess co. N. York.
A washing machine,	13	Isaiah Jennings,	New York.
Mill for grinding painters' colors, &c.	13	John J. Wells,	Hartford, Connecticut.
In the telegraph,	14	William Shultz,	Baltimore.
Machine for carding wool,	14	Daniel Smith,	Philadelphia.
Mode of boring boxes for axletrees of carriages, &c.	14	Aaron Broad,	Salisbury, Litchfield co. Conn.
For roving flax and hemp for spinning, &c.	16	George Brown,	Schaghticoke, Rens. co. N. Y.
Machine for moving ground in rivers, creeks, &c.	16	William Shultz,	Baltimore.
A water table for doors, &c.	17	Nathaniel Briggs,	Brattlebo', Windham co. Vt.
In shutters for windows,	17	Truman Bartholomew,	New York.
A water back and tewel for smiths,	24	Oliver Ames,	Plymouth, Massachusetts.
A washing machine,	24	Thomas Pierce,	Fishkill, New York.
A worm boiler,	24	James Truman,	Philadelphia.
A mechanical pump,	24	William Shultz,	Baltimore.
Machine to lay cables, and spin ropes of any size,	24	William Shultz,	Baltimore.
In the churn,	24	Luther Thomson,	Sturbridge, Worcester co. Massachusetts.
On the time and striking parts of a clock,	24	Ira Ives,	Bristol, Stratford co. Conn.
In chimneys,	26	Lewis Lecesne,	Philadelphia.
Machine for polishing and graining morocco leather,	26	Jacob Perkins,	Boston.
Mode of making combs with hoofs of cattle,	26	Robert Gedney,	New York.
Machine for cutting straw,	26	Jacob Canfield,	Morristown, New Jersey.
Machine for cutting nails,	27	Luther Bissel,	Hartwick, Otsego co. N. Y.
A washing machine and press,	27	Amos Hosford and Ezekiel Kelsey,	Berlin, Hartford co. Conn.
Machine to facilitate the dying of silk goods, and frame to finish them,	27	William Barrett.	
For shearing cloth,	27	David Dewey,	Poultney, Rutland co. Vt.
Machine for cutting dyers' wood,	27	Ephraim Hubbel,	Middlebury, Addison co. Vt.
For raising mud from rivers, &c.	27	John Newman,	Providence, Rhode Island.
For securing a button in a lathe, &c.	27	Geo. W. Robinson,	Providence, Rhode Island.
In pumps,	28	Jacob Canfield,	Morristown, New Jersey.
A trigonometer or trigon, for ascertaining the sides of angles, &c.	28	William Chamberlin.	
A hemp and flax spinning machine,	28	Nathaniel Foster,	Flamingsbury, Kentucky.
A washing machine,	30	Timothy Freeman,	Madison county, New York.
Machine called the wheat rubber,	July 1	James Deneale,	Dumfries, Prince William co. Virginia.
The rapid jack, for ascending rapids,	3	Augustus Sacket,	New York.
A spiral float wheel mill,	5	Fitch Ives,	Lisle, Broome county, N. Y.
For manufacturing light hats,	6	Henry Lainhart, Jun.	Baltimore.
In hair combs,	6	Timothy Stanley,	Southington, Hartford co. Con.
Machine for tempering clay,	6	John Mathews,	Baltimore.
Mode of distilling spirits from corn stalks, &c.	6	Burgiss Allison,	Philadelphia.
A revolutionary astronomical time keeper, &c.	7	Theodore Newell,	Sheffield, Berks. co. Mass.
An over balanced pendulum lock,	7	Samuel Goodwin,	Baltimore.
A twisting or bobbing machine for weaving the wire work of papermakers' moulds, &c.	7	Phares Bernard,	Whitestown, Oneida co. N. Y.
A pipe or grate boiler and heater,	7	Samuel Bolton,	Philadelphia.
A turning lathe,	10	William Ross,	Chester co. Pennsylvania.
A spiral truss,	13	Philip A. de Savignhac,	New York.

LIST OF PATENTEES—Continued.

Inventions.	When issued.	Names of patentees.	Residence.
	1809.		
In pruning shears,	July 13	Simeon Jocelin,	New Haven, Connecticut.
Machine for riving and shaving shingles, &c.	15	Jacob Balcomb,	Reading, Steuben co. N. Y.
In manufacturing shot,	17	John William Jope,	Philadelphia.
A cheese press,	18	Benjamin Atwell,	Burlington, Otsego co. N. Y.
A planting plough,	18	Frederick Woodward,	New Lisbon, Otsego co. N.Y.
Machine for cutting screws of wood,	19	Abel Stowell,	Worcester, Massachusetts.
A balance wheel uniform working pump,	25	James Josslyn,	Hanover, Plymouth co. Mass.
A stump lifting machine,	27	David Stone,	Clearmont, New Hampshire.
In the caboose,	27	George Youle,	New York.
In the wood saw,	31	James Hamilton,	Brookfield, Worc'r co. Mass.
A double podded centre screw auger,	31	Ezra L'Hommedieu,	Saybrook, Middlesex co. Con.
In hot pressing all kinds of paper, &c.	31	Francis Bailey,	Salisbury P. O. Philadelphia & Lancaster turnpike road.
Improvement in the hydraulic ram,	Aug. 3	Joseph Cerneau and Stephen S. Hallet,	New York.
A churn,	10	Thomas Nicholson,	Nelson county, Kentucky.
Machine for planing boards,	11	Christian Ritter,	Beaver, Northumb'd co. Pa.
A washing machine,	12	Shubael Kimball,	Rhinebeck, Dutchess co. N.Y.
A churn,	15	Benjamin U. Lapish,	Durham, Stafford, co. N. H.
A truss for the prevention and cure of ruptures,	17	Joseph Cerneau,	New York.
A wheel to operate by wind or water,	18	William L. Bakewell,	New Haven, Connecticut.
A flax dressing machine,	23	Jonathan Barlow,	Granville, Massachusetts.
The barbal alkahest, or magic lotion,	24	John Hopkins,	Philadelphia.
A horizontal mill,	25	Israel Kelsey,	Hartford, Connecticut.
Machine for paring and coring apples,	25	Stephen Cruttenden,	Gilford, New Haven co. Con.
A nail machine,	Sept. 1	Joseph Elgar, Sen. and John Elgar,	Yorktown, Pennsylvania.
In ameliorating spirits and wines, &c.	-	William Thornton,	Washington city.
A mode of imitating natural mineral waters, &c.	7	Joseph Hawkins,	Baltimore.
Machine for making horse shoes,	Oct. 11	Stephen Decatur and William Tatham.	
A churning machine,	11	Nathaniel Harrington,	Whitestown, Oneida co. N.Y.
In cotton twisting frames, denominated the Delaware spinner,	11	Jacob Alricks,	Wilmington, Delaware.
Improvement in the steam engine for boats, mills, &c.	12	Daniel French,	New York.
In the striking part of a clock,	12	Lemuel J. Kilborn,	Pennsylvania.
Machine to press cheese, cider, oil, tobacco, &c.	12	Israel Nichols,	Otsego county, New York.
Machine for furrowing two or three furrows at a time, and dropping corn, &c.	12	Martin Nichols and Israel Nichols,	Otsego county, New York.
In casting wheels for clocks, &c.	13	Lemuel J. Kilborn,	Pennsylvania.
The bureau dressing table,	13	Nathaniel Perry,	Boston.
A washing machine,	14	Rozel Philips,	Otsego county, New York.
A trip hammer,	14	John Smith,	Otsego county, New York.
A churning machine,	14	Benjamin Atwell and Israel Nichols,	Otsego county, New York.
A mould for running cart boxes,	17	Samuel Smith, 2d,	Amherst, Hampshire co. Mass.
In melting metals, &c.	17	Joseph Walworth,	New York.
Machine for manufacturing bricks, tiles, &c.	17	John F. Gould,	Newburyport, Massachusetts.
Machine for striping leather,	26	David Ridgway.	
For splitting shingles,	31	Joseph Coppinger,	Baltimore.
A planing machine,	31	Joseph Coppinger,	Baltimore.
For thrashing and cleaning grain,	31	Joseph Coppinger,	Baltimore.
A washing machine,	Nov. 3	Robert Robinson,	Leesburgh, Virginia.
Machine for binding and securing cotton, hay, &c.	7	David P. Simmons & Condy Raguet, administrators of Jas. Simmons,	Philadelphia.
A horizontal water wheel,	20	David Parmelee,	Reading, Fairfield co. Conn.
A churn,	20	Enoch Burt,	Princeton, New Jersey.
Machine for manufacturing spoons,	20	Isaiah Bisbee,	Bath, Lincoln co. Mass.
Improvement in Wm. Bent's machine for splitting hides and skins,	20	William Brown,	Philadelphia.
Machine for cleaning rice,	21	Roswell King,	Darien, Glyn co. Georgia.
Mode of distilling with cast iron stills,	21	Joseph Coppinger,	Beaufort, South Carolina.
In casting iron, brass, and composition nails,	22	Joseph Walworth,	New York.
Mode of preserving animal and vegetable substances,	23	Joseph Coppinger,	Beaufort, South Carolina.
In the application of heat to fluids,	22	Sam. Applegate, Thos. Howard, and Peregrine H. Wharton,	Philadelphia.
A metallic writing pen,	22	Peregrine Williamson,	Baltimore.
A flexible platform for giving motion to wheels and machinery of all kinds,	22	John Johnson, Jun.,	Charleston, South Carolina.
A circular saw mill or machine,	24	George Huling,	Shaftsbury, Vermont.
In geometrical writing plates,	25	Samuel Ellis.	
A thrashing machine,	29	Jno. Meriwether Syme,	New Bedford, Bristol co. Ms.
In the mariner's or surveyor's compass,	Dec. 1	William Russell,	New Bedford, Bristol co. Ms.
A double bored pendulum pump,	5	Atkinson Farra,	Montgomery county, Penn.
An improved balance wheel pump,	8	Lewis Schrack,	Norristown, Montg'ry co. Pa.
A churn,	8	John Whitmore,	Litchfield, Connecticut.

LIST OF PATENTEES—Continued.

Inventions.	When issued.	Names of patentees.	Residence.
	1809.		
In the fishing seine and mode of using it, -	Dec. 16	Philip Groff, -	Little York, Pennsylvania.
Machine for sawing felloes for wheels, &c., -	20	William E. Sheffield,	New York.
A floating mill and silent fisher, - -	21	Ebenezer Ford, -	Charleston, South Carolina.
A sawing machine, - - -	21	Ezekiel Olds and Pliny Upham, -	Worcester, Massachusetts.
Machine for drilling rocks, &c., - -	21	Elihu Jones and Philip White, -	Brookfield, Worcester co. Ms.
A thrashing and shelling machine, - -	27	Asa Cady, -	Florida, Montg'ry co. N. Y.
A hemp break, - - -	28	William Mason -	Washington county, Ohio.
A chain band with buckets or float boards, to give motion to the machinery of mills, -	28	Stephen Belknap, -	New York.
In the construction of steam engines and boilers, &c. - - - - -	1810. Jan. 3	John Stevens, -	New York.
In plating gun barrels, locks, &c. - -	4	John Fowler, -	Lancaster, Pennsylvania.
In the trip hammer, - - -	8	Ezra Osborn, -	Berkshire county, Mass.
A churn, - - - - -	8	David Osborn, -	Berkshire county, Mass.
Machine for carding and spinning wool by one continued operation, - - -	8	Alanson Holmes, -	Pomfret, Niagara co. N. Y.
In plating horn combs with tortoise shell, -	8	John P. Spies, -	Baltimore.
In coopering machine, - - -	8	Oliver Barber, -	Hartford, Connecticut.
In the marine time keeper, - -	15	Isaac Gill, -	Charleston, South Carolina.
A machine for compressing sole leather, -	18	Jonathan Elliot, -	Sharon, Litchfield co. Conn.
A hopper blower, - - -	18	Thomas S. Barnum, -	Sharon, Litchfield co. Conn.
A universal protractor, - -	19	Ennion Williams, -	Philadelphia.
For sawing timber, &c., without a stub-short, -	20	Elisha Cook, -	Bethlehem, Berkshire co. Ms.
For thrashing and cleaning grain, - -	25	Joseph Comfort, -	Bucks county, Pennsylvania.
For thrashing grain and seed, - -	25	John Comfort, -	Bucks county, Pennsylvania.
A circular printing press, - -	Feb. 1	John P. Sawin & Thomas B. Wait, -	Boston.
A water elevator, - - -	1	John Herrick, Jun., -	Albany, New York.
In sinking wells in or under water, -	1	Peleg Easton, -	Nantucket, Massachusetts.
A washing machine, - - -	1	Sylvester Noble, -	Hoosick, Rensselaer co. N.Y.
Manufacturing barilla from tobacco stems, corn stalks, &c., - - -	5	George Easterly, -	Richmond, Virginia.
Loom for weaving girt and cloth, &c., with one hand, - - - - -	8	Robert Lloyd, -	Philadelphia.
A jointer and gauge machine, - -	10	John Wadsworth, -	Milton, Massachusetts.
Method of making sheaves for blocks, -	12	Enoch Colman Toppan,	Essex, Newburyport, Mass.
Machine for extracting hair from peltry, -	12	Ephraim Cutter, -	Walpole, Cheshire co., N. H.
In the refining of camphor, - -	12	Henry Mead, -	New Haven, Connecticut.
Mode of engraving and printing important papers to prevent counterfeits, - -	13	George Murray, -	Philadelphia.
In stove pipes, - - -	13	John Parkhurst, Jun.,	Cheshire, New Hamphire.
Sawing plank or timber so as to leave no stub-short, - - - -	15	John Sweet, -	Bethlehem, Berks. co. Ms.
Measuring grain and seed, &c., - -	15	Peter H. Schenck, -	New York.
A mortising machine, - - -	15	Henry Parmele, -	Killingworth, Middlesex co. Connecticut.
In the weaving machine, - -	16	Walter Janes, -	Ashford, Windham co. Conn.
Machine for cleaning grain and destroying insects,	20	Joel Morgan, -	Baltimore.
A system of signals for vessels, - -	21	Nathaniel Shaler, -	New York.
A pendulum scale, - - -	21	Moses L. Morse, -	Cambridge, Middl'sx co. Con.
A cheese press, - - -	21	Ebenezer Raymond, -	Sherburne, Chenango co. N.Y.
A machine for pressing cotton, &c., -	22	Richard V. W. Thorne and John Thorne, -	New York.
Improvement in the construction of bridges, and other architectural works, - - -	23	Joseph Joshua Dyster,	Philadelphia.
Machine for raising grain, by blowing, &c., -	March 5	Jeremiah Baily, -	Chester county, Penn.
Moulds for casting boxes for carriage wheels, -	5	Leonard Farwell, -	Lancaster, Worcester co. Ms.
In the churn, - - -	5	Benjamin Fairbanks,	Worcester, Mass.
In bridges, - - - -	6	John Templeman, -	Georgetown, District Colum.
In the saw mill, - - -	7	Abel Wright, -	Canaan, Columbia co. N. Y.
A nail cutting machine, - -	8	Brigs Rogers Reid, -	Danvers, Essex county, Mas.
A ship carpenter's boring machine, -	8	Benjamin Hall, -	Canaan, Columbia co. N. Y.
A mitre point borer, - - -	8	Benjamin Hall, -	Canaan, Columbia co. N. Y.
A spring bolt and key for raising and fastening windows, &c., - - -	8	Roger Smith, -	Norwich, N. London co. Con.
A machine for moulding and rolling iron, &c.,	14	Josiah White, -	Philadelphia.
For planking hats, - - -	14	John Gregg, -	Green county, Pennsylvania.
For sawing timber, - - -	14	Adonijah Jones, Jun.,	Bethlehem, Berkshire, Mass.
In rollers for sheaves of blocks, - -	14	Mark Laighton, -	Portsmouth, Rockm. co. N.H.
Machine for separating onion seed from grain, -	16	Lazarus Ruggles and Daniel Tomlinson,	Brookfield, Connecticut.
Machine for mortising and tenoning, &c., -	17	Sylvanus Baldwin, -	Montpelier, Caledonia co. Vt.
A distilling apparatus, - - -	17	William Chamberlain,	Representative from Verm't.
Machine for shaving hoops out of split timber -	17	David Shriver, -	Petersburg, Adams co. Penn
Process of and machinery for stamping and staining leather, &c., - - -	19	Robert Robinson, -	Newburyport, Massachusetts.
In the spinning wheel, - - -	19	Winsor Drury, -	Brookfield, Worcester co. Ms.
Machine for beating out rice, &c., - -	19	John Beck and Joseph Coppinger, -	Beeks ferry, South Carolina.
For driving the whip saw, - -	19	Joseph Coppinger, -	Frederick, Georgia.
Propelling and navigating boats, vessels, rafts, &c.	22	Abm. Gulielmus Domini Tuthill, -	New York.

LIST OF PATENTEES—Continued.

Inventions.	When issued.	Names of patentees.	Residence.
	1810.		
Machine for making mortar,	March 22	Daniel Hunt,	Stanford, Connecticut.
In the gas lamp,	24	David Melville,	Newport, Rhode Island.
A pressing machine,	26	Richard V. W. Thorne and John Thorne	New York.
A horizontal pump,	28	Luther Holland,	Belchertown, Hampshire, Ms.
Machine for manufacturing ivory combs,	28	David Williams, 3d.,	Saybrook, Middlesex co. Con.
In manufacturing salt,	28	Benjamin Wheeler,	Boston.
Screw grist mill,	28	Joseph L. Miller,	Brookfield, Madison co. N.Y.
A thrashing machine,	30	Joseph Beach,	Northfield, Massachusetts.
A thrashing machine,	30	Isaiah Jennings,	Brookfield, Madison co. N.Y.
For spinning flax,	31	Alpheus Webster,	Green county, New York.
A perpetual still and evaporator,	April 2	Robert Gillespie,	Seneca county, New York.
In water wheels for mills,	2	Jonathan Minor,	Saratoga, New York.
Wheelwright's labor saving machine,	4	Mellen Battle,	New York State.
Earthen or clay tubes, for aqueducts,	4	James Ramsey,	Burke, Caledonia co. Vt.
A funnel with a vent,	9	David Clark,	W. Stockbridge, Berk. co. Ms.
A marble or pipe stone turner,	9	David Clark,	W. Stockbridge, Berk. co. Ms.
Machine for cutting, chiselling, and polishing marble, &c.	10	Anson Clark,	W. Stockbridge, Berk. co. Ms.
A horse mill,	10	Ephraim Brown.	
A saw and grist mill,	10	Joseph Ennals,	Newmarket, Dorches. co. Md.
A trip hammer,	11	Elisha Downer,	Duceyter, Madison co. N. Y.
In the heads of spinning wheels,	11	Amos Miner,	Marcelles, Oneida co. N. Y.
A churn,	11	Aaron Smith,	Tyngsborough, Mid'x co. Ms.
In bee hives,	11	John Sweet,	Bethlehem, Berks. co. Ms.
In the quadrant,	14	Josiah Arnold,	Caledonia, Vermont.
Machine for pressing cloths,	14	Joseph Sage,	Berlin, Hartford co. Conn.
In the turnpike gate,	16	Jeremiah Brainard,	Canaan, Columbia co. N. Y.
In the flax machine,	16	Oliver Wilde,	Canaan, Columbia co. N. Y.
A cylinder roller, for distributing ink on copper-plates, for copperplate printing,	17	Andrew Maverick,	New York.
A cheese vat, for forming pine apple cheese,	17	Lewis Mills Norton,	Goshen, Litchfield co. Conn.
Machine for breaking dough,	17	Cromwell Barnard,	Nantucket county, Mass.
In constructing chimneys to prevent smoking,	18	Oliver Richardson,	Medway, Norfolk co. Mass.
In preparing carbonated silk and paper, for multiplying writings,	20	Joseph Hartshorne,	Philadelphia.
In lamps, and the liquid to be burned therein,	21	Joseph Hawkins,	Baltimore.
Machine for cutting fur from skins and pelts,	21	Martin Clark,	New York.
Machine for raising water,	24	Samuel Currey,	Williamson county, Tenn.
Machine for sawing wood, &c. in a circular form,	24	Roger Smith,	Norwich, N. London co. Ct.
In coaches and other carriages,	24	Frederick Bremler,	New York.
Machine for pricking leather to be stitched,	24	Robert U. Richards and Mills Richards,	Norfolk, Litchfield co. Conn.
Machine for cutting and dressing felloes,	25	Samuel Church,	Amherst, Hampshire co. Ms.
A washing and churning machine,	25	Jesse Roberts,	Germantown, Pennsylvania.
A spring tree saddle,	25	David C. Mosely,	Boston.
A trip hammer,	25	Oliver Ames,	Plymouth, Massachusetts.
In wind mills,	25	Russel H. Wright,	Boston.
Machine for shaving and splitting hides, &c.	25	Nathaniel P. Whiting,	Providence, Rhode Island.
In the manufacturing of tobacco,	25	Peter Lorillard,	New York.
A fanning mill,	27	Samuel Snedeker,	Johnstown, Montg'y co. N.Y.
In wheel carriage boxes,	28	John Nicholson,	T. and co. of Herkimer, N.Y.
In casting metal screws,	28	John Nicholson,	Herkimer, New York.
Machine for cutting tenons in wood,	28	Ebenezer Basford and Elisha Johnson,	Livermore, Oxford co. Mass.
Machine for trying sash stuff, &c.	28	Ebenezer Basford,	Livermore, Oxford co. Mass.
In manufacturing military hats, &c.	30	Shubael Hoskin,	Catskill, Green co. N. Y.
In distilling by steam,	May 1	John Morris Bennett,	Middletown, Mid'x co. Ct.
Machine for sawing boards, &c.	1	Oliver Judd, Jun.	Loudon, Berkshire co. Ms.
A boring machine,	1	John Webster,	Great Barrington, Mass.
Machine for turning gun barrels,	1	Seth Youngs,	Hartford, Conn.
Elastic piston bellows,	1	Henry Dotterer,	Philadelphia.
A saw mill to be worked by hand, &c.	3	George Harris,	Philadelphia.
A varnish for leather,	5	John David,	Philadelphia.
Machine for shelling corn,	8	John Heavin,	Fredericktown, Maryland.
Machine for cutting fur from peltry,	9	Eleazer Sprague,	Danbury, Fairfield co. Conn.
For shearing cloth,	9	Eleazer Sprague,	Danbury, Fairfield co. Conn.
For shearing cloth,	15	Herman Matthews,	Delaware.
An elastic lamp reflector, or elastic tubes for Argand's lamps,	17	Josiah Flagg and Josiah Flagg, Jun.	Boston.
In the tide mill,	17	John P. Sawin and Jacob Skinner,	Roxbury, Norfolk co. Mass.
In suspenders,	18	James Davis,	Philadelphia.
A mining auger,	18	Perkins Nichols,	Boston.
Improvement in shearing cloth,	24	Beriah Swift,	New York.
In medicine, being a preparation called Lee's (Windham) bilious pills,	24	Samuel Lee,	New London, Connecticut.
A pumping machine,	28	Royal Yeamans,	Springfield, Massachusetts.
Machine for making saddle trees,	June 1	Reuben Fairchild and Eben. Fairchild,	Fairfield, Trumbull co. Ct.
Machine for cleaning grain and seeds,	8	William H. Peabody,	Woodbury, Litchfield co. Ct.
A reflecting and magnifying lantern,	8	Winslow Lewis,	Boston.

LIST OF PATENTEES—Continued.

Inventions.	When issued.	Names of patentees.	Residence.
	1810.		
A perpetual balance scale,	June 9	Russel H. Wright,	Boston.
A pendulum machine, for various purposes,	13	Joseph Lefever,	Providence, Rhode Island.
A fly or trip hammer,	16	Joseph Hines,	Providence, Rhode Island.
Copperplate printing, and modes of preventing counterfeits,	16	Jacob Perkins,	Boston.
In fire places,	18	Ebenezer Whiting,	Great Barrington, Mass.
In winding and spinning wire,	18	Henry Burke,	Philadelphia.
An apparatus for distilling,	21	Augustus Tobey,	Alford, Berkshire co. Mass.
A mode of breaking horses and cattle,	23	David Cooley,	Orange co. New York.
A washing machine,	26	Isaac Loofborrow,	New York.
In boat and ship building,	27	William Phœbus,	New York.
In rolling iron round, for ship bolts, &c.	27	Clement Rentgen,	West Chester, Pennsylvania.
In fire places,	27	Charles D. Cooper,	Albany, New York.
In making printer's ink,	28	Berry Chase,	New London, Connecticut.
In constructing mills,	30	Jeremy Frisbie,	Pennsylvania.
In casting hinges,	July 3	George A. Rogers,	Newburyport, Mass.
In moulds for casting boxes for carriage wheels,	6	Samuel Smith, 2d,	Amherst, Massachusetts.
A flat bottom boat, with moveable keels,	7	Samuel Buel,	Burlington, Vermont.
Machine for drying corn and grain of all kinds, &c.	7	Benjamin Parry,	Bucks county, Pennsylvania.
Machine for boring blocks for cartouch boxes, brushes, &c.	10	Valentine Bogenreiff,	Georgetown, South Carolina.
A cylindrical leather splitting mill,	12	Phineas Dow,	Boston.
Machine for shaving shingles,	13	Abiel A. Cooley,	Bolton, Connecticut.
In distilling,	13	Michael Garber, Sen.	Staunton, Virginia.
A draining trough,	13	Stephen Hall,	Boston.
In manufacturing cut nails, cut points, and cut brads,	17	Jacob Perkins,	Boston.
Machine for smoothing linen,	17	William P. Smith and Jacob Odell,	Durham, Stafford co. N. H.
Machine for shaving and dressing shingles, &c.	26	Daniel Newel,	Saratoga, New York.
A churning machine,	26	Ephraim Bacon,	Hancock county, Mass.
Machine for boiling water and producing steam,	26	John H. Williams,	Brunswick, New Jersey.
A Chinese chain pump, for raising water,	Aug. 2	Jeremiah Black,	Northumberland, Penn.
Machine for cutting dye woods,	13	Jedediah Richards, 3d,	Norfolk, Litchfield co. Conn.
In tanning hides,	14	Edward Siter,	Spread Eagle P. O. Delaware county, Penn.
An eccentric roller nail machine,	14	John Fairbanks,	Boston.
For cramping Suwarrow boot legs,	14	Eleazer Lundy,	New York.
The Grecian chaise body,	15	Phineas Dow,	Boston.
Machine for thrashing, fanning, and cleaning grain,	15	Ezekiel Miller and John Andrews,	Westmoreland, Oneida co. New York.
Mode of saturating water and other liquids with carbonic acid gas, &c.	16	Charles D. Simons and Jean J. Riondel,	Charleston, South Carolina.
In the mode of winding the thread and quills of a shuttle for weaving, called the thread guiding quill wheel,	16	Levi Ruggles,	Boston.
In making harness for carriages and saddlery,	16	Benj'n Foster, Daniel Washburn, Northorp Rockwell, and James O. Walker,	Castleton, Rutland co. Vt.
The socket hair comb,	16	Eli Parsons,	Bristol, Connecticut.
In the churn,	17	Simeon Gray,	Genesee, New York.
The domestic spinner,	17	Ebenezer Hearrick,	Albany, New York.
Machine for cutting and heading nails at one operation,	18	Brigs Rogers Reid,	Salem, Massachusetts.
Machine for winding spools and bobbins for weaving,	20	Walter Janes,	Ashford, Connecticut.
In making brick or artificial stone, without burning,	21	Joseph B. Harris,	Philadelphia.
A machine for making bricks and tiles,	22	Daniel French,	New York.
An apparatus for propelling boats by steam, &c.	29	Ralph Letton,	Albany, New York.
A windlass lever press,	31	Thaddeus Williams,	Philadelphia.
In making rifle guns,	31	Elisha Strong and Cotton Kellogg,	New Harford, Lichfield, Con.
Machine for swaying or setting shovels, &c.	31	Upton Reid,	Near Jopper Cross Roads, Harford, Maryland.
Machine for breaking flax and hemp,	31	Nathaniel Perrine Robinson,	Fleming county, Kentucky.
A new constructed loom,	Sept. 1	Water Janes,	Ashford, Connecticut.
A double screw press,	4	Elisha Winter,	New Orleans.
A carriage block for sawing timber, &c. without a stubshort,	6	William Underwood,	Herkimer, New York.
A Columbian balance,	8	William Granger,	Middlebury, Vermont.
A smoke conductor,	11	John C. Teale,	New York.
A weaving machine,	12	Samuel Blydenburgh,	West Brookfield, Mass.
Machine for cutting and heading nails at one operation,	16	Jesse Reed,	Kingston, Plymouth co. Mass.
In making elastic clear starch, &c. from wheat, in making spirits from the residue, and taking mildews, &c. from linen,	16	Elijah Perkins,	Shrewsbury, Monmouth co. New Jersey.

LIST OF PATENTEES—Continued.

Inventions.	When issued.	Names of patentees.	Residence.
	1810.		
In steering vessels,	Sept. 18	John Philips and James Smallman,	Philadelphia.
Machine for cutting and heading nails at one operation,	26	William Miller,	New York.
In teaching the art of writing,	Oct. 1	Samuel Randal,	Warren, Rhode Island.
A composition for the cure of the scrofula and cancer,	8	Elias Willard,	Albany, New York.
A washing machine,	8	William Jackman,	Painsville, Ohio.
Machine for cutting smoked beef,	9	Seth R. Kneeland.	
Machine for sawing various articles of carpenters', wheelwrights', joiners', and coopers' work,	25	David Parmelee,	Reading, Fairfield co. Con.
A currying knife,	25	Stephen Parsons,	Parsonsfield, Massachusetts.
Improvement in the boiler invented by and patented to Timothy Kirk, and in the rectifying still patented to William Chamberlin,	29	William Eaton,	Baltimore.
In preparing quercitron, or black oak bark, for dying or tanning,	30	Nathan Harper,	Frankford, Pennsylvania.
In water wheels, a compound wheel and chain or band wheel for propelling boats by steam, &c.	Nov. 1	Pinder Antrim and Samuel Bolton,	Philadelphia.
Machine for splitting and shaving skins and leather,	1	Philip White,	Worcester, Brookfield, Mass.
In stoves,	6	Augustus Graham,	Fredericktown, Maryland.
In the windlass and capstan,	6	John Galvin,	Philadelphia.
A horizontal double forcing pump for fire engines, &c.	6	Eli Smith,	Palmer, Hampshire co. Mass.
A mode of destroying the Hessian fly and weavel, or preventing them from injuring wheat or grain,	13	William Armistead,	Prince William co. Virginia.
In the loom,	17	Philo Clinton Curtis,	Paris, Oneida co. New York.
A steam still and water boiler,	17	Phares Bernard,	Whitestown, Oneida co. N.Y.
Machine for cutting tan bark and softening hides, fulling cloth, and for a grist mill, &c.	20	Chester Griswold and Hosea E. Potter,	Otsego, New York.
Machine for boiling potatoes, pumpkins, or other food, for cattle or swine, by steam,	20	Hosea E. Potter,	Otsego, New York.
A crank engine for raising and throwing water,	21	Joseph Clap,	Montague, Hampshire, Mass.
In grated fire places,	24	Augustus Graham,	Fredericktown, Maryland.
In heating water in vats to expedite the tanning of leather, &c.	24	Allen Henderson,	Gt. Barrington, Berks. co. Mass.
In wooden C springs for carriages,	27	William Robinson,	Wilmington, Delaware.
A water wheel for mills,	Dec. 5	Aaron Reuck,	Chillicothe, Ohio.
In the method of using the common screw auger,	11	Oliver Stetson and William Sebree,	Georgetown, Boone co. Ky.
A washing machine,	15	Daniel Robinson,	Franklin, Delaware co. N.Y.
For coring and quartering apples,	15	Cyrus Gates,	Rutland co. Vermont.
A thrashing machine,	15	Daniel C. Arnold.	
A double perpetual still, and mode of using it,	22	John James Giraud,	Baltimore.
A diving dress,	24	Chauncy Hall,	Connecticut.
In manufacturing hats,	26	Samuel Tibballs, Jun.	Tyringham, Berkshire co. Mass.
Improvement in their sawing machine, patented December 21, 1809,	26	Ezekiel Olds and Pliny Upham,	Brookfield, Massachusetts.
In window springs,	27	George Cannon,	Nantucket, Massachusetts.
Machine for printing calico and paper,	28	Leonard Beatty,	Wilkesbarre, Luzerne co. Pa.

11th CONGRESS.] No. 285. [3d SESSION.

MIDDLESEX CANAL.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 15, 1811.

BOSTON, *December* 7, 1810.

To the honorable the Senate and House of Representatives in Congress assembled:

The memorial of the proprietors of the Middlesex canal, in the State of Massachusetts, is respectfully addressed, to explain the grounds of their petition to Congress the last session, and to state more fully the relations which the works they have executed, those they have undertaken, and those to which the nature of the country in the same direction invites their enterprise, have to the public prosperity, and the good policy of the Union.

The great utility of canals, and their beneficial influence on the prosperity of an agricultural, manufacturing, and commercial people, so long experienced among the nations of Europe, and so often acknowledged by their Governments in the patronage afforded to the projectors of them, and even in their own enterprises of a similar

kind, cannot be unknown to your honorable body; and the attention which the subject has already received from the National Legislature, with the importance justly given to it by the Secretary of the Treasury, in his able report to the Senate in the year 1808, may, it is presumed by your memorialists, sanction their appearing before you on this occasion.

Your memorialists, in common with other companies formed for similar purposes, have hitherto failed of reaping the advantages due to their enterprise, though the community at large has already derived from their exertions great benefits, without risk and without cost. In the completion, therefore, of an enterprise, which the public is so directly concerned in, your memorialists hope they may look, without disappointment, for the fostering aid of the Government, to whose paternal care the nation's best interests are confided, especially as the assistance prayed for will be reciprocally beneficial.

The origin and purpose of the Middlesex canal is already known to your honorable body, by the report of the Secretary of the Treasury. Your memorialists, therefore, forbear to trespass on your attention with unnecessary details, and will only so far offer a general and brief description of their canal and its dependencies, as may seem to be at this time necessary.

The river Merrimack (which is connected with Boston harbor by the Middlesex canal) takes its rise in the western mountains of New Hampshire, about thirty miles from Connecticut river, and in its course southward, passing through a rich and populous district, receives, about the centre of the State, an equally copious stream from the lake Winnipisiochee, and other interior waters connected therewith. The shores of these lakes are not less than two hundred miles in extent, and are generally surrounded with good lands, rapidly settling, but still bearing great quantities of oak and pine timber of the largest size, and of a superior quality. From this junction of the two branches, at the distance of ninety miles from Boston, the river continues its course southward, parallel with the leading roads of the country, till it reaches a point in the State of Massachusetts, five miles within the boundary line, near where the Middlesex canal communicates therewith, at the distance of twenty-seven miles from Boston.

To open, by means of this river, an extensive inland navigation to the lakes of New Hampshire, and still further into the interior, by the western branch and Baker's river, was the object of the Middlesex canal; and it was partially accomplished in the year 1804, after ten years of unremitted perseverance, and at an expense to them of nine hundred and fourteen thousand one hundred and forty-two dollars and forty-two cents.

In its course, the canal is led over seven rivers and streams, by aqueducts. It is often carried on deep meadows by high embankments, and through extensive ledges of rocks; it is supplied with water from Concord river, which opens into it five miles from the Merrimack, on one side, and twenty-two from Boston on the other. From thence the fall to the Merrimack is thirty-one feet, by four stone locks; and towards Boston one hundred and seven feet, by seventeen locks. The general width of the canal is thirty feet on the surface of the water, and twenty at the bottom. It is calculated to carry boats seventy-five feet long, nine and a half feet wide, drawing three feet of water, carrying twenty-five tons, drawn by one horse, and conducted by two men; passing the whole distance of twenty-seven miles in one day. It also conveys rafts of timber, lumber, and fire wood, five hundred feet in length, with one horse, or a pair of oxen, attended by five men.

The expense of conducting a raft of one hundred and fifty tons of timber, through the canal, may be estimated and compared with land carriage as follows, viz:

Five men's wages and maintenance, 4 days,	$ 20
One pair of oxen, 4 days,	5
Toll 90 cents per ton on 150 tons,	135
	$160

If the same were to be transported by land carriage, it would require—

Seventy-five teams of 5 cattle, at $3 a day, 4 days, is $12 a team, amounting to	$ 900 00
Seventy-five men, at $1 a day, 4 days,	300 00
Expense of each team, at $1 33,	99 75
	$1,299 75
The same by water carriage, as above stated, being	160 00
Makes a saving to the owner or the public of	$1,139 75

The expense of conveying 100 tons of merchandise, by 50 teams of 5 cattle each, to the distance of fifty miles, or as far as boats now ascend the Merrimack from Boston, may be estimated at $15 per ton, amounting to	$1,500
To transport the same quantity by boats, cost $7 a ton, or	700
Making a saving on 100 tons, or 5 boats, of	$800

And if the advantages of having so many men and cattle, thus liberated from unproductive labor, employed in agriculture, and other productive avocations, be considered, the public still gains in a much greater ratio.

Although in the year 1804, when the canal was completed to the banks of Charles river, opposite the town of Boston, at the distance of less than a mile therefrom, the inducements to persevere appeared in as strong a light as when they first excited the proprietors to the enterprise; and, although the union of so great a river and country, with a metropolis where the produce of the interior might find a market or an outlet, seemed still to promise ultimate success and remuneration, yet much remained to be done, both to overcome the obstructions existing in the river Merrimack, and to lead the public, long habituated to land carriage, and totally inexperienced in the use of canals, to turn its attention to this great accommodation. And so much embarrassment had arisen, in consequence of the death of some of the associates, whose widows and children becoming holders of shares, were, with others of the proprietors, unable to sustain the burden of further assessments, adequate to the expense of the additional works requisite on said river, that your memorialists were unable to command funds for the execution of said works. The income of the principal canal, though increasing, have been insufficient for the current expenses, the repairs, and necessary improvements thereon.

This great work might long have remained in this state, but for the assistance obtained from the Legislature of Massachusetts, which, by granting to the corporation two townships of eastern land, enabled and induced the proprietors to undertake some of the improvements necessary to the extension of inland navigation as originally contemplated. These works, now constructing, under sundry acts of incorporation, principally with the funds borrowed on the credit of the lands above mentioned, consist of locks, dams, and canals, in three places, viz: in

Merrimack, Dumbarton, and Bow. They must necessarily cost considerably more than the said land is expected even to bring. And, in order to make the Middlesex canal good property, and as extensively useful to the public as it is capable of being, other works more interior ought to be accomplished; especially between the lakes above mentioned, and Merrimack river, to pass a number of falls not less together than two hundred and thirty feet in perpendicular height. But such is the fertility of this district, and so great the quantity of excellent timber, which the public would thereby save from destruction by fire in clearing the land, that ample renumeration may be confidently expected.

The articles also of beef, pork, flaxseed, ashes, grain, and various others which, on account of the distance, and the want of good roads, cannot now be brought to a market, or if brought, are consumed by the expenses attending the land carriage, would become of sufficient value to excite a spirit of general industry even in the most remote and uncultivated parts of New Hampshire.

Nor do these observations apply only to the shores of the lakes, and the country to the north, but may, with equal propriety, be extended to the counties lying to the northwest, to which these extensive waters, and the western branch of the river would, with some improvements, afford this cheap and convenient mode of conveyance. Your memorialists, fearful of trespassing too far on the time and attention of your honorable body, refer to a map of New Hampshire to show the extensive water communications that might be made with the canal, not mentioned herein, and hasten to state the general relations and advantages likely to result from *the assistance* for which they have petitioned the National Government. The immediate effect of such assistance would be to increase the national strength and wealth, by giving value to *millions of tons of timber* now considered an incumbrance to the ground; to enhance the value of land for agricultural purposes, by providing a cheap mode of conveying its produce to market, whilst the inhabitants of the coast will be more abundantly and cheaply supplied; to give advantages to commerce, by enabling the merchant to find cargoes at such rates as would enable him to export them profitably, and build his ships at less cost; to augment the population of that part of the country, and enable the inhabitants to receive articles of foreign growth and origin, now become necessaries of life, by boat navigation on better terms, and in greater quantities, thereby encouraging and increasing the importation, and consequently the revenues of the General Government. The easy communication with the interior, which the proposed works will afford, will be the means of essentially strengthening the frontier in a quarter where it is now most weak and vulnerable, and will attach the inhabitants in that direction still more to the Union, by a sentiment of increasing interest; our ports becoming more and more the source of this accommodation, and the vent of the produce of their industry. The canal will also be the medium of supplies to the navy yard at Charlestown, of the best materials of every kind for repairing or building ships, or for completing the wharves and docks which it may be found necessary to construct there; and it is conceived it will, in this alone, save the United States thousands of dollars yearly, and enable its agents to obtain from the interior every spar and every article, *not* excepting iron and copper, which may, in the event of hostilities, be wanted for ships of war.

Your memorialists would further beg leave to remark, that the provisions of the act which has already passed the honorable Senate, are such that, whilst they may afford the proprietors of the Middlesex canal the assistance they need to complete, and carry into effect the great and beneficial purposes originally contemplated, by purchasing a portion of their interest, the Government disposes of an unproductive property in lands, investing the proceeds in an institution endowed with perpetual privileges, which, to be soon profitable, requires but efficient aid; and which, from its very situation, cannot be rivalled, and must be progressive; so that, in a few years, the Government may, if occasion should require, sell the shares it may hold for money.

Your memorialists, convinced that the views they have herein taken of their enterprise, in relation to the public interests, are well founded, cannot but believe that your honorable body will be of opinion that this is one of those occasions alluded to, in the report of the Secretary of the Treasury, in which the resources of Government may, with the greatest effect and propriety, be brought in aid of private enterprise in public improvements. And they are encouraged to anticipate this result, from the deliberations of your honors, the more confidently, as it will have been made to appear that the Middlesex canal was undertaken and executed in the faith, that so important a part of the water communication with this large and fertile territory being effected, a just sense of the great advantage to result therefrom would stimulate the people to the formation of companies for clearing the obstructions of the river Merrimack, and for executing the other necessary works detailed in this memorial; or that Government would be induced to take the shares, originally reserved, whenever a representation of these advantages, to an extensive district of country, should be made to your honorable body, and thus afford the aid necessary to bring into activity resources so important to the growth of the Union. But the want of an avenue of easy communication with the seacoast, having placed it out of the power of the people most immediately interested in New Hampshire, to raise funds sufficient for the purposes herein contemplated; and men of moneyed capital in the sea-ports, with only partial views of the subject, having been deterred by the hitherto unproductive state of the Middlesex canal, from engaging in similar enterprises, it is only then from the more enlarged views of an enlightened Government that the wishes of your memorialists, in relation to their object, can be realized.

They have, therefore, thought they might reiterate their appeal to Congress on the merits of their petition, which has been favorably received by the Senate, at the last session of that branch of the Legislature, persuaded they are addressing those who cannot fail of feeling an interest in this, and all other concerns touching the internal improvements of the United States.

11th Congress.] No. 286. [3d Session.

ROAD FROM VINCENNES, INDIANA, TOWARDS DAYTON, OHIO.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 17, 1811.

Mr. Jennings, from the committee appointed on the 5th instant, to inquire into the expediency of opening a road from Vincennes towards Dayton, in the State of Ohio, made the following report:

That the opening of such a road was contemplated by Congress in the act passed April, 1806; but the moneys appropriated for that, and similar purposes, have been found insufficient to accomplish the desired objects.

That the opening of the contemplated road would certainly expedite the sales of public lands, insomuch, that the Government would shortly be remunerated from that source for the necessary expenditure, independent of the general advantage to be derived from such an addition to the number of our public roads.

That it will be found the most direct course from Pitsburg to Vincennes and St. Louis, and will no doubt become the chief post route to the Territories northwest of the rivers Ohio and Mississippi, from the seat of Government of the United States, by way of the seat of Government of the State of Ohio. The committee, therefore, beg leave to submit the following resolution:

Resolved, That it is expedient to cause to be opened a road from Vincennes, or from some point on the road leading from Vincennes to the falls of Ohio, to the eastern boundary of the Indiana Territory, in a proper direction, towards Dayton, in the State of Ohio.

11th Congress.] No. 287. [2d Session.

APPLICATION TO AMEND THE ACT CONTINUING CERTAIN PATENT RIGHTS TO OLIVER EVANS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 19, 1811.

Mr. Mitchill, from the Select Committee, to whom was referred the memorial of John Brumback, and others, made the following report:

The memorialists state that they are concerned in the erection and employment of mills for the conversion of grain into meal and flour. In these mills they constructed part of the machinery for facilitating that manufacture invented by Oliver Evans. When this was done, there was no legal impediment in the way. Since that time they have learned that they are accountable, in damages, to a person who now claims an exclusive right to erect such works. Believing this to be a grievance, they ask relief from the legislative interference of Congress.

To understand the nature of this application, it is necessary to be a little more particular. Some time after the passing of the first patent laws, Oliver Evans obtained letters patent, securing to him a monopoly in certain pieces of mechanism, called by him elevators, conveyors, hopperboys, and several other names. The patentee expected the benefit of his privilege during the term of fourteen years; then his patent would expire; and the various inventions, secured to him thereby, became the right of any person who thought proper to use them.

Owing to some informality in the patent, or some defect inherent therein, it was adjudged to be void by the court, in an action brought by the said Evans against Chambers. Afterwards, Evans presented to Congress a petition, praying for a renewal of his patent, and alleging, as a leading reason in his behalf, the hardship of his case, in having received a very inconsiderable advantage from it, during the time it was considered valid, and nothing afterwards.

Induced by these, and other considerations, Congress passed an act for the relief of Oliver Evans. This received the President's approbation on the 21st January, 1808. It directs the Secretary of State to grant letters patent to him, confirming the exclusive right of making, constructing, using, and vending to be used, his invention, discovery, and improvements in the art of manufacturing flour and meal, and in the several machines which he has applied to that purpose. This renewal is authorized on two conditions: the first is, that no person who may have heretofore paid the said Oliver Evans for license to use his said improvements, should be obliged to renew his license, or be subject to damages for not renewing the same; the second is, that no person, who shall have used the said improvements, or have erected the same for use, before the issuing of the second patent, shall be liable to damages for the same.

Under this renewed patent, Oliver Evans has claimed, since the date of it, in January, 22, 1808, the right of granting licenses to all persons, who, having erected his machinery after the expiration of his first patent, and before the grant of his second, continued to use and employ it after the date of the second.

The petitioners conceive themselves to be in this situation: Having furnished their mills with Evans's machinery, while there was no legal impediment, they feel an apprehension that they will be molested in the use thereof by the patentee, under his new grant. Believing themselves to be in his power, to make them pay considerable sums for licenses to use his machinery, or to undergo great inconvenience and loss, by removing it from their mills, and throwing it away, they request Congress may enact a statute, exempting them, and every other person in a similar situation, from all damages, and authorizing them to continue to use the said machinery, without being obliged to pay Oliver Evans any thing for the same, under the second patent.

On an examination of the merits of this subject, the committee were im mediately led to consider the judicial decision that had been made in the circuit court of the United States, on the meaning and construction of an act for the relief of Oliver Evans. The trial came on before Judges Washington and Peters, in the district of Pennsyl-

vania. The patentee brought an action on the case, for a violation of his right, by the defendant, one John Weiss, for putting up a wheel and pair of stones in his mill, on Wissahiccon creek, within the county of Philadelphia. The defendant had put up one wheel, and one pair of stones, under a license. A second wheel and pair of stones had been put up prior to the passing of the before mentioned act of Congress. This second pair he continued to employ since the 22d January, 1808, the date of the plaintiff's patent, and after due notice given by him to the defendant in the succeeding February. After inquiry into the merits, and hearing the arguments of counsel, the court gave judgment for the plaintiff on the ground that the statute, under which the second patent was issued, afforded no protection whatever against a claim for damages for using the inventor's machinery and improvements, after the issuing of the patent, although the same might have been erected without infringement of his right, between the expiration of the first, and the date of the second patent.

Considering the case in these various relations, it appears that the grievance complained of by the memorialists, has arisen under an act of Congress specially passed for the relief of the patentee, Oliver Evans; whatever that act contains is for his benefit, and no more. The interpretation of the statutes is the peculiar province and duty of the judges. The statute in question has already undergone judicial interpretation. It will not be sufficient to induce Congress to interfere, that the memorialists endure hardships by that exposition, nor will it be allowable for an individual, even of the persons who voted on that act, to say that such a meaning as the judges have given to it, was never intended by the Legislature. A statute must convey its own signification. The statute, under consideration, proceeds from the bounty of Congress towards Evans. It rests in him, for the time therein mentioned, certain rights. If these are more extensive than the memorialists wish, it is an inconvenience they must endure. Congress cannot consistently interfere to exempt them, and all other persons similarly circumstanced, from damages, by a declaratory act, narrowing the privilege heretofore granted by them, to the injury of Evans, by stripping him of his vested rights. Such of them as continue to employ his machinery, must do it with his permission, and cannot, by legislative interference, be exonerated from paying him for the same. Therefore,

Resolved That the petitioners have leave to withdraw their petition.

11th Congress.] **No. 288.** [3d Session.

EXTENSION OF PATENT RIGHTS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 28, 1811.

Mr. Mitchill, from the Select Committee, to whom was referred the petition of Benjamin Tyler, Jun. and John Tyler, made the following report:

These persons state that, prior to the 20th of February, 1800, Benjamin Tyler had made a useful invention in the manner of constructing mills for grinding of wheat and other grain. On that day he obtained letters patent, according to law, for the same. He afterwards made an assignment of the same, in due form, to the petitioners.

They further represent the necessity they felt to attempt the protection of their right, by bringing a suit against one of the several persons who had violated their privileges. They believe the defendant to have been supported by a combination of interested men. By the operation of various dilatory measures, the action, though brought on in 1804, was protracted until 1810, and eventually a verdict which had been given for the plaintiff, was set aside by the court. The expenses and costs incurred by the petitioners, in the course and event of these proceedings, were very oppressive.

But this was not all. During the time this law-suit lasted, the reality of their alleged and patented invention became suspected, and misrepresentations were industriously prosecuted against it, to a great extent, and they thereby suffered grievous inconvenience and injury.

There was yet another aggravation of their case. The patent being limited, by the very terms of its grant, to fourteen years, approaches the term of its expiration; at that time, the whole benefit of the invention will be lost to the inventor, and his assignees; and they request that, under the extreme hardship of their situation, involved in controversy, deprived of time, exhausted of money, persecuted by opposition, and disappointed in their expectations, aggravated by the shortness of their patent's duration, they may be indulged with a renewal of their privileges for another term of fourteen years, by a special statute in their favor.

By various and respectable testimonials, accompanying the memorial, it appears that the improvement, under consideration, known by the name of *Tyler's patent wry-fly wheel*, has been found to be very useful in the mechanism of corn, and wheat, and paper mills. It is simple and cheap in its construction; less liable to want repairs; and more secure from the action of frost; while it combines strength with celerity of motion, supersedes the necessity of the large water-wheel and ordinary cog-wheels, and performs the same work with half the water that is required for an undershot wheel.

The committee, on weighing these several matters, are of opinion that the case of the petitioners comes within the spirit of the provision contained in the constitution for the benefit of inventors and discoverers. The merit of the application is enhanced by the tedious and expensive law-suits in which he has the misfortune to be entangled. It is, at the same time, very questionable, whether Congress ought to indulge the practice, already begun, of legislating upon individual cases. It would be more correct and convenient to provide for the renewal of letters patent by a general regulation. There will be no end to applications of this kind, while the patent laws remain in their present imperfect state; while, by a discreet and early revision of them, this and all other similar cases, may be fully comprehended. By this means sound legislation will, most effectually, subserve the interest of the citizen. A mode of renewal has already been recommended, and forms a distinct section of the "bill for the encouragement of learning, and the promotion of the useful arts," now lying in the Committee of the Whole House. It is, therefore, recommended to agree to the following resolutions:

Resolved, That the request of the petitioners is reasonable, and ought to be granted.

Resolved, That provision ought to be made, by law, for the renewal of letters patent, in favor of inventors and discoverers, in certain cases.

11th Congress.] No. 289. [3d Session.

DISTRICT OF COLUMBIA—BANKS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 5, 1811.

Mr. Cheves made the following report:

The committee, to whom was referred sundry bills to incorporate sundry banks in the District of Columbia, having already reported in part, beg leave further to report:

That, in their opinion, the bills referred to them would authorize the establishment of a banking capital, which, with the banks already incorporated, would exceed what is required by the present state of the commerce, the population, the real capital, and the other reasonable exigencies of the District.

It is not, in the opinion of the committee, practicable, by the mere institution of banking establishments, to add to the wealth of the community, or to the utility, though it may increase the quantity of the circulating medium. On the contrary, they believe that a superabundance of paper circulation may, by destroying its credit and value, defeat its own end, while it will tend greatly, and almost entirely, to remove the circulating specie of the country. A paper circulation, within reasonable limits, is probably a great benefit; but, if unrestrained, or, what is worse, encouraged to transcend those limits, it will more probably become a great evil; and this evil it is the duty of legislative bodies, at least not to invite; for it will not be confined to those who, as the projectors of these institutions, are willing to adventure their property therein, but will be visited on those unsuspecting and unwary members of society who, with propriety, on such a subject, rely on a legislative guardianship.

The allegations, that there is abundance of capital, and that there is a want of capital, both of which have been alleged in favor of these institutions, equally prove, that they should be limited. If there be an abundance of capital, little aid of this kind will be wanting. If there be a want of real capital, there is no basis for an excess of this artificial capital; they are relative, and ought to be proportional to each other. The committee, pursuing and adopting these principles, but with some latitude, as they suppose, in favor of the applicants, have already reported the bill to incorporate the Bank of Potomac, and now beg leave to report, with sundry amendments, the bill to incorporate the Bank of Washington. The first they selected, because it had been some years in successful operation, and was, in other respects, unexceptionable; and the last because there is no other like institution in the city of Washington. If these shall be incorporated, there will be in

The town of Alexandria.

The Bank of Alexandria, with a capital of	$500,000
The Bank of Potomac, with a capital of	500,000

In Georgetown.

The Bank of Columbia, with a capital of	$1,000,000

And in Washington.

The Bank of Washington, with a capital of	$500,000

Forming a banking capital for the District of Columbia, of $2,500,000, which the committee think abundantly sufficient, and as much as it will, at present, be prudent or safe to authorize.

[Note.—See Report, No. 274.]

11th Congress.] No. 290. [3d Session.

DEFECTS IN THE SYSTEM OF GAUGING, AS PRACTISED AT THE CUSTOM HOUSES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 7, 1811.

Sir: Treasury Department, *February* 7, 1811.

I have the honor to enclose copies of two letters on the defects in the present mode of gauging. Sufficient information has not been obtained for preparing a plan on the subject; but it may, if required, be procured during the recess of Congress.

I have the honor to be, respectfully, sir, your obedient servant,

ALBERT GALLATIN.

Hon. Thomas Newton,
Chairman of the Committee of Commerce and Manufactures.

Sir: Boston, *April* 12, 1810.

The enclosed statement was presented to me by Mr. Dearborn, and I enclose it to you for your consideration and decision. I am induced to believe that Mr. Dearborn will, if encouraged, construct an instrument for ascertaining the contents of a cask with more accuracy than any we have in use; his propositions appear to be fair and candid; you will determine whether it will be advisable to have such an experiment made as he proposes, and on the conditions he proposes, or such other as you may deem proper.

Yours, with esteem, H. DEARBORN.

Hon. Albert Gallatin.

SIR: BOSTON, *March* 27, 1810.

In consequence of the peculiar care which Messrs. Loring and Lee, two of the gaugers for the customs, are now taking to have very accurate gauging instruments made at my factory, I have been led to a particular examination of the rules for cask gauging, and of the usual manner in which those rules are applied in practise; and finding both liable to errors, I shall enumerate them, first, for your consideration, and next for the consideration of Government, provided you shall think the subject worthy of forwarding this letter for their inspection, and they think it expedient to accept the proposition with which this representation closes.

First error. Different authors prescribe different rules for gauging.

EXAMPLE.

The contents of a cask of the following dimensions, as measured by different rules for four varieties, viz: Bung diameter, 32 inches; head diameter, 24 inches; length, 40 inches. If it be considered as—

	Quantity by Davy's rules.	Quantity by Everard's rules.	Quantity by Hawney's rules.	Difference between the extremes.
1st. The middle frustrum of a spheroid, - -	97.455	97.455	97.6	—.145
2d. The middle frustrum of a parabolic spindle, -	96.505	94.128	94.98	2.377
3d. The middle frustrum of two parabolic conoids, -	89.136	90.800	92.40	3.264
4th. The middle frustrum of two parabolic cones, -	87.934	87.934	89.85	1.916

Casks are rarely seen with the staves straight, from the bung to the head, ranking under the 4th form above mentioned, and others are not frequently found with the staves so much bended as to rank under the first form; consequently most casks are considered as belonging to the second or third varieties, in which the greatest difference is made by different rules of gauging, amounting to somewhat more than three gallons and a quarter in estimating the third form.

Second error. No rule has ever been given for estimating the rank a cask shall take in the above varieties, but it is left entirely to the judgment of the gauger, and he must, at times, be perplexed to decide its rank as second or third variety, although the decision will make a difference of more than seven gallons and one-third by Davy's rules, of nearly three and one-third by Everard's, and of more than two and a half by Hawney's.

Third error. No method has been devised for ascertaining the thickness of the heads and staves; they are estimated by supposition; and if they are one-twentieth part of an inch thicker than this estimate, a cask of the foregoing dimensions will contain about one gallon, wine measure, less than it will gauge; if they are one-twentieth of an inch thinner than the estimate, the cask will contain about one gallon more than it will gauge.

Fourth error. By reducing the thickness of the central part of the bung stave, and the stave opposite, one-tenth of an inch, and reducing the ends of the staves, where the heads are inserted, in the same quantity, the mean diameter of the cask will be increased two-tenths; this will cause the cask to measure one gallon and six-tenths more, in wine measure, than it will contain, supposing the dimensions as above stated; and, if the heads are also reduced in the same proportion, the error will amount to something more than two gallons.

Fifth error. Casks, from the lower tiers of a cargo, are frequently pressed out of their original shape, and the bung diameter is thereby rendered much less than it was when shipped, although the cask still contains the same quantity. In the usual mode of gauging no estimate can be made of this error.

Sixth error. In casks of molasses the sugar will sometimes subside in a mass so hard that it is very difficult to ascertain, with certainty, the bung diameter.

Seventh error. By placing the heads of a cask in an oblique direction, instead of being parallel to each other, it will gauge less or more than the true quantity, except a length be taken in a medium between the extremes; and this difference may amount to an inch in the length of a cask, without being observed in a cursory view.

Eighth error. A solid body may be so affixed inside the cask, opposite to the bung, as to make it measure some gallons less than the true quantity; and, by the usual mode of gauging, the imposition can never be discovered, nor the error corrected.

I now proceed to state it as my belief, that, by a course of actual experiments on the capacity of different casks, and by a new set of gauging instruments, I can correct, avoid, or greatly reduce all the errors before enumerated; that my system will be less complicated than the present mode, and will be perfectly intelligible to a common capacity; that more despatch shall be produced, in finding the mean diameter and length, so as to redeem time for taking the thickness of the staves and heads of every tenth cask in a cargo, without requiring more time for gauging the whole than is now consumed for an equal number; that the curve of the staves, instead of being estimated by guessing, shall be subject to accurate measurement; that casks, designedly made to gauge less or more than their actual contents, shall be subjected to a correct estimation, except that solid bodies enclosed shall reduce the quantity of liquor only as much as the amount of their bulk, without reducing the measurement; that casks pressed out of their original form shall be estimated with nearly the same certainty as others; that the subsiding sugar in casks of molasses shall produce no difficulty or uncertainty; that the error, produced by the heads of a cask being placed obliquely, shall always be counteracted; and, finally, that equal despatch, more simplicity, and much greater accuracy, shall result from this mode of gauging casks than from the mode now in practice.

On the foregoing points I submit the following proposition, viz: that arbitrators be appointed, consisting of three, six, nine, twelve, or fifteen persons, a part of whom shall be reputable mathematicians, and the remainder practical gaugers, to whom the common mode is perfectly familiar; that two-thirds of this number be appointed by an agent for Government, and the remainder by myself; that, after I have made the necessary experiments, and completed a set of the instruments, the arbitrators shall thoroughly examine the principles, and the practical application of my system, and report thereon. If they report that it embraces all the advantages contemplated in the foregoing statement, or so many of them as shall, in their opinion, render it an object worthy the patronage of Government, I will take out a patent for the instruments, and furnish such number as may be wanted, as soon as they can be made, upon condition that the Government shall introduce the use of these instruments exclusively in the customs of the United States, after a favorable report of the arbitrators. If they should report unfavorably, my labor and expense will, of course, be lost, in making the necessary calculations, experiments, and first set of instruments; yet, on the condition above named, the hazard of this loss will be cheerfully encountered by

Sir, yours respectfully, BENJAMIN DEARBORN.

HENRY DEARBORN, Esq., *Collector of the Customs.*

P. S. The price of the instruments cannot now be ascertained; I can only engage that it shall not exceed fifty dollars per set, and they may not amount to more than forty.

SIR: COLLECTOR'S OFFICE, PORT OF NEWPORT, *August* 3, 1810.

Conceiving it to be of importance that there should be a common standard of weights and measures, and a common mode of gauging throughout the United States, I wrote several letters to the Department of the Treasury on that subject, but have not received any answer to either of them. The first was to Mr. Hamilton, and is dated September 24, 1792; the second to Mr. Wolcott, bears date December 20, 1798; at the close of a letter to Mr. Steele, commissioner of the revenue, dated March, 1800, I expressed a hope that Congress would fix a standard for weights and measures; and in a letter to him, then Comptroller of the Treasury, of April 17, 1802, I wrote thus: "In a letter to the Secretary of the Treasury, of the 20th December, 1798, which I think was referred to you, I mentioned the difference between the mode of gauging in this State and the State of New York, and pointed out the mode of gauging, prescribed by a law of this State, and added, that a cask of one hundred gallons, gauged in New York, will gauge two gallons less than gauged here. What difference takes place in other States I do not know; but certainly the same mode of gauging, and the same standard of weights and measures, ought to be used in all."

By section 21 of the collection law, "the surveyor shall, from time to time, and particularly on the first Monday in January and July in each year, examine and try the weights and measures, and other instruments used in ascertaining the duties on imports, and with standards to be provided by each collector, at the public expense, for that purpose." If no standards are established by law, and there are none that I know of, how can the collectors provide them? For want of such standards, our weights and measures are adjusted by, I believe, British standards. How they are adjusted in the other States I am not informed. There is no law of this State for that purpose; but there is an act of this State establishing a just and equal method of gauging in and throughout the same. By it, no gauging is to be performed but by what is commonly called gauging by Gunter; and it is therein enacted, "that the rule and method to be used throughout the State, to find the mean diameter of any cask, in order to give the true gauge thereof, shall be by multiplying the difference between the head and bung diameter with 0.65, and adding the product to the head diameter, or which is the same, otherwise expressed, by adding six-tenths and a half of the difference between the diameter at bung and head to the diameter of the head." It is presumed that the difference between the gauge at this port and New York, arises from a difference in the multiplier of the difference between the head and bung diameter, and there may be a difference in the gauge in other States, proceeding from a similar cause. I am not possessed of the law of New York, nor of the other States. Permit me to add, that, until the United States shall have established a uniform standard of weights and measures, and a uniform method of gauging, an inequality will continue disadvantageous to trade and commerce, and probably to the revenue.

I am, with respect, sir, your obedient servant,

W. ELLERY, *Collector.*

ALBERT GALLATIN, Esq., *Secretary of the Treasury.*

11th CONGRESS.] No. 291. [3d SESSION.

APPLICATION FOR A REVISION OF THE PATENT LAWS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 15, 1811.

To the honorable the Senate and House of Representatives in Congress assembled: The Massachusetts Association for the Encouragement of Useful Inventions respectfully represent:

That, from long experience, they have found that the present patent laws are inadequate to the object proposed by them; that the penalties therein are not sufficient to protect the meritorious inventor from the avarice and rapacity of unprincipled men, who, in defiance of justice, openly invade the patents of their fellow-citizens with a confidence of impunity, from the impossibility of proving, by legal evidence, what damage the injured party has sustained.

That this law, intended to promote and protect improvements in the arts, is illusive; that, under its supposed protection, men of genius have been induced to devote the best portion of their lives and fortunes in making improvements in various machines, by which some branches of manufacture have even rivalled all other nations; and that, to his great vexation and disappointment, the ingenious artisan discovers that *his* is the only property in the United States which is not protected by the laws.

That there are persons associated and combined for the purpose of clandestinely procuring machines in magnitude, models, drawings, and specifications, of the most useful American inventions, and transmitting them to Europe, and there obtaining patents for the same, without the concurrence, or even the knowledge of the American patentee. The easy access to the patent department facilitates their views in this nefarious traffic.

That many valuable American discoveries have thus been pirated, sent to Europe, and there patented and published as European inventions, to the manifest injury of the true inventor, and derogatory to the honor and interest of the United States.

That property, to an immense amount, is already vested in patented machinery, and employed in various manufactures; but the unprotected state of the rights of patentees, and proprietors, will naturally and necessarily deter men of genius and property from further perseverance in improvements unless they are permitted to enjoy the fruits of their labors.

In stating the preceding facts, your memorialists have adverted to but two of the many inconveniences arising from the want of due provisions in the present laws; and they do most earnestly entreat that such remedies may be adopted as shall appear consistent with the true policy of a nation whose Government is actuated by just principles of honor, interest, and dignity. With these views, they beg leave to suggest the following observations as the basis of amendments to the present laws, calculated to remove some of the difficulties which experience has evinced as obstructing the beneficial design of the patent laws, viz:

1st. That any person who shall violate a patent by making, using, vending, or unlawfully having and keeping in his possession the thing or machine, or any part thereof so patented, shall, as well as his aiders and abettors, forfeit each and every one of them all such things, machines, or parts thereof, and three times the actual damage sustained by the injured party, which triple damage shall in no case be less than three times the value or price of the thing, machine, or part thereof, at which the injured party has sold, or offered for sale, or has licensed the same, or offered to license the same for use; to be recovered by action of the case in the circuit court in the district where the offence is committed.

2d. That, during the patent term, all persons, except the patentee or his assigns, be prohibited, under the same penalties and forfeitures as aforesaid, from exporting out of the country any machine or thing or parts thereof, or model or models thereof, or of any parts thereof, or of any drawings thereof, or of any part thereof which have been patented, without permission first had and obtained in writing from the patentee or his assigns, in case such assigns shall have obtained in such assignment the right of exporting the same out of the country.

3d. That no copies of specifications, drawings, or other papers, filed as evidences of an invention, or copies of models, or any part thereof deposited in the Patent Office, be allowed to be taken from said office, during the term of the patent, except by the patentee, his heirs or assigns, unless such copies be material to an issue in a court of law; and in such case the party, other than the patentee or his assigns, applying for the same, shall make oath before the judge of the said court, that such copies are material to such issue, and that he requires them for that purpose only; and the said judge shall record such oath, and certify the same in the application for such copies; and that all models, specimens, drawings, specifications, and other papers filed in said office, as evidence of an invention or improvement of any machine or thing patented, be kept from the view and inspection of the public until the patent or patents granted therefor shall have expired.

4th. That, on application being made for a patent, a critical examination shall be made to ascertain whether any patent has been previously granted for any machine or thing which would interfere with the machine or thing for which a patent is prayed for, and whether the interference is material, and whether the application of parts, principles, and powers, are alike in a patentable point of view, in order that a patent may not be granted for a machine or thing already patented, or which essentially or materially interferes with it.

5th. That, on application being made for information whether a patent has been granted for the machine, thing, or improvement, which the applicant describes in his application as being his invention, and which he intends to have patented, provided it doth not interfere with any machine or thing already patented, a critical examination shall be had, and a true answer given to such applicant, and for which he shall pay the sum of (say five dollars.) And the description, specification, and drawings filed by the applicant for such information, shall be signed and sealed by him in the presence of two subscribing witnesses; and he shall also make oath to the same in the same manner as is provided in the case of applying for a patent.

6th. That the person applying for information as aforesaid, or any other person, who shall produce a specification and drawings of his invention and improvement, duly witnessed and certified, as is provided in case of application for a patent, and signifying his desire of obtaining a patent therefor, and that further time is necessary to enable him to perfect his said invention or improvement; such specification and drawings, with written references thereto, may be filed in the patent office, as evidences that such person is the first inventor or discoverer thereof, in case, on such critical examination as aforesaid, that should be found to be the fact; and the same shall operate as a caveat against the other applicants for that machine, thing, or improvement, as the case may be, for one year from the time of filing the same; and a certificate to that effect shall be granted accordingly, and for which he shall pay the sum of (say ten dollars.) And when the person filing such caveat shall make application for his patent, he shall furnish a new specification and drawing, comprising all the improvements made in his said invention or discovery.

7th. That the most improved European or other treatises and publications on the improvement in the arts, sciences, and manufactures, shall, from time to time, as they are published, be procured, and kept in the patent department, in order that ready information may be had whether the thing, machine, improvement, or discovery, for which a patent may be applied for, has been previously known and published in this or any other country.

8th. That any patentee, or his assigns, or any person or persons being legally interested therein, knowing, or having good reason to suspect, any person or persons to be secretly violating their patent, by making, using, or having unlawfully in their possession the thing, machine, or any parts thereof so patented, may, on oath, made before the judge of the district court in the district where such offence is committed, and filing a statement thereof, obtain a writ of injunction commanding such suspected person or persons, their aiders and abettors, to desist from such violation; which writ of injunction shall be served on such suspected person or persons, their aiders and abettors, to appear before said judge at the time and place appointed; and in case of their default or non-appearance, the said judge shall forthwith order a *capias* against them, to be served and returned at such time and place as he shall direct; and if, in either case, on examination, the judge shall find that the complaint is well founded, he shall make the writ of injunction absolute, and order such violators to pay the costs, and give bond in an adequate sum, with sufficient securities to the party injured, to be forfeited, and the penalties therein recovered in a court of law, in case such injunction shall not be obeyed by the parties jointly and severally on whom such injunction is laid; but if such complainant should prove not well founded, the judge may order the complainants to pay the costs, unless it should appear that there was reasonable ground therefor; and, in such case, shall decide as to justice rightly appertains.

9th. That, if the thing or machine patented shall not be put into operation, or publicly offered for sale within five years from the date of the patent, the said patent shall, on the expiration of said five years, in such case be, *ipso facto*, null and void, and the thing thus patented become the property of the public.

10th. That the specific application of the specific parts, principles, and machine powers to the specific purpose fully explained, be in law considered as constituting the invention only; and that mere principles, mechanic powers, circumstances, or effects in themselves, cannot be the subject of a patent.

11th. That patents for any useful inventions or discoveries, may be renewed for another term of fourteen years, on application being made for that purpose, containing all the improvements made by the patentee, his heirs and assigns, properly described; which application shall be made to the Secretary of State in the same manner as an original application for a patent, *mutatis mutandis*. And of the great utility of such invention, and of the intention of renewing the patent therefor, the patentee, his heirs or assigns, as the case may be, shall give notice to the Secretary of State ——— months before the expiration of the first patent, and to his approbation; and, on obtaining such second patent, the patentee shall give public notice thereof in some public newspaper or newspapers.

12th. That the patentee may assign parts of his patent, and thereby granting the exclusive right of said patent for any particular district of country.

13th. That, for repealing any patent or patents surreptitiously obtained, or upon false suggestion, the process to be brought within three years, and the hearing had before the judges of the circuit court in the district where the patentee or his assigns reside, and not before the district court.

14th. That when an original inventor, his heirs or assigns, shall make any modification or improvement in the thing or machine patented during the first patent term, he or they, as the case may be, may file a specification and drawings thereof, showing the application of such improvement or modification on the original invention; which specification shall be executed, witnessed, sworn to, and certified in the same manner as in an original application for a patent; and, on his obtaining a certificate therefor from the Secretary of State, setting forth that such improvement or modification as specified, shall thereafter be considered as patented, and belonging to, and forming a part of, the said original patent, so far as it respects the security in law of such improvement or modification, to the person legally obtaining such certificate, and having a legal interest at the time in the original invention; and for every such certificate, the party obtaining the same, shall pay the sum of (say fifteen dollars,) and as, &c.

By order of the association:

BENJAMIN DEARBORN, *President.*
JOHN FAIRBANKS, *Secretary.*

BOSTON, *January* 31, 1811.

11th CONGRESS.] No. 292. [3d SESSION.

APPROVAL BY OHIO OF THE MEASURES OF THE FEDERAL GOVERNMENT.

COMMUNICATED TO THE SENATE, FEBRUARY 16, 1811.

Resolved by the General Assembly of the State of Ohio, That this Legislature fully believe that our political safety depends on our attachment to, and continuance in, our federative relations with our sister States, and we pledge ourselves to the General Government to support the union of those States to the utmost of our power, and believing, as we do, that the measures of the General Government are directed by sound policy, with the welfare of all in view, we hesitate not to say that this State will be found ever ready to support such measures as Congress may direct for securing our rights, sovereignty, and independence.

Resolved, That the Governor be requested to forward copies of the foregoing resolution to the President of the Senate, the Speaker of the House of Representatives, and to our representation in Congress.

EDWARD TIFFIN,
Speaker of the House of Representatives.
THOS. KIRKER,
Speaker of the Senate.

Attest: R. OSBORN,
Clerk of the House of Representatives.

Attest: CARLOS A. NORTON,
Clerk of the Senate.

SECRETARY OF STATE'S OFFICE, *January* 30, 1811.

I certify the foregoing resolution to be a correct copy of the orignal roll remaining on file in this office.

JOHN McLANE,
Secretary of the State of Ohio.

11th CONGRESS.] No. 293. [3d SESSION.

NATIONAL UNIVERSITY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 18, 1811.

Mr. MITCHILL, from the committee, to whom was referred, on the 10th day of December, 1810, that part of the President's message to both Houses of Congress, at the opening of the session, which relates to the establishment of a seminary of learning by the National Legislature, made the following report:

In obedience to the order of the House, the committee has duly considered the important matter referred.

A university, or institution for the communication of knowledge in the various departments of literature and science, presents to the mind, at one view, subjects of the most pleasing contemplation.

To a free people it would seem that a seminary, in which the culture of the heart, and of the understanding, should be the chief objects, would be one of the best guards of their privileges, and a leading object of their care.

Under this conviction, the patriotic spirit of Washington led him more than once to recommend, in his speeches to Congress, an attention to such an undertaking. He even bequeathed a legacy to the national university, which he persuaded himself would, at some future day, be brought into being. Two other Presidents have subsequently presented the subject to the Legislature as worthy of especial consideration.

Authorities so respectable, in favor of a project so desirable, carry with them great weight. A central school at the seat of the General Government, darting the rays of intellectual light, or rolling the flood of useful information throughout the land, could not fail to make a strong impression. A noble and enlarged institution may be conceived to impart to its pupils the most excellent instruction, and, by properly qualifying persons to be teachers and professors, to introduce a uniform system of education among the citizens.

On weighing these and other advantages, it was necessary to consider whether Congress possessed the power to found and endow a national university.

It is argued, from the total silence of the constitution, that such a power has not been granted to Congress, inasmuch as the only means by which it is therein contemplated to promote the progress of science and the useful arts, is, by securing to authors and inventors the exclusive right to their respective writings and discoveries for limited times. The constitution, therefore, does not warrant the creation of such a corporation by any express provision.

But it immediately occurred that, under the right to legislate exclusively over the district wherein the United States have fixed their seat of Government, Congress may erect a university at any place within the ten miles square ceded by Maryland and Virginia. This cannot be doubted.

Here, however, other considerations arise. Although there is no constitutional impediment to the incorporation of trustees for such a purpose, at the city of Washington, serious doubts are entertained as to the right to appropriate the public property for its support. The endowment of a university is not ranked among the objects for which drafts ought to be made upon the Treasury. The money of the nation seems to be reserved for other uses.

The incorporation of a university, without funds, appears a fruitless and inefficient exercise of the legislative power. There is, indeed, some personal estate on hand, which would vest in such a body on the moment of its creation; and more may reasonably be expected from legacies and other donations. But these sources of revenue are too scanty and precarious to be relied upon in the present case. It is better not to legislate at all, than to pass a statute destitute of the means of execution.

The matter then stands thus: The erection of a university, upon the enlarged and magnificent plan which would become the nation, is not within the powers confided by the constitution to Congress; and the erection of a small and ordinary college, with a pompous and imposing title, would not become its dignity. If, nevertheless, at any time legislative aid should be asked to incorporate a district university, for the local benefit of the inhabitants of Columbia, and of funds of their own raising, there can be no doubt that it would be considered with kindness, as in other cases; but it must be remembered that this is a function totally distinct from the endowment of a national university, out of the treasure of the United States, destined, in its legitimate application, to other and very different purposes.

The message before the committee proposes, however, "the institution of a seminary of learning by the National Legislature, within the limits of their exclusive jurisdiction, the expense of which may be defrayed or reimbursed out of the vacant grounds which have accrued to the nation within these limits." On inquiring into the value of these public lots, they fall so far short of the sum requisite for the object, that, if there was no constitutional impediment, they could not be relied upon, on account of the smallness and unproductiveness of the capital they embrace.

With these views of the subject, the committee does not find itself authorized to recommend the adoption of any measures relative to the part of the message referred.

On behalf of the committee.

SAMUEL L. MITCHILL, *Chairman.*

11th Congress.] No. 294. [3d Session.

PRESIDENT MADISON'S OBJECTIONS TO THE BILL "INCORPORATING THE PROTESTANT EPISCOPAL CHURCH IN THE TOWN OF ALEXANDRIA, IN THE DISTRICT OF COLUMBIA."

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 21, 1811.

To the House of Representatives of the United States: FEBRUARY 21, 1811.

Having examined and considered the bill, entitled "An act incorporating the Protestant Episcopal Church in the town of Alexandria, in the District of Columbia," I now return the bill to the House of Representatives, in which it originated, with the following objections:

Because the bill exceeds the rightful authority to which Governments are limited, by the essential distinction between civil and religious functions, and violates, in particular, the article of the constitution of the United States, which declares, that "Congress shall make no law respecting a religious establishment." The bill enacts into, and establishes by law, sundry rules and proceedings relative purely to the organization and polity of the church incorporated, and comprehending even the election and removal of the minister of the same; so that no change could be made therein by the particular society, or by the general church of which it is a member, and whose authority it recognises. This particular church, therefore, would so far be a religious establishment by law—a legal force and sanction being given to certain articles in its constitution and administration. Nor can it be considered, that the articles thus established are to be taken as the descriptive criteria only of the corporate identity of the society, inasmuch as this identity must depend on other characteristics; as the regulations established are generally unessential, and alterable according to the principles and canons, by which churches of that denomination govern themselves; and as the injunctions and prohibitions, contained in the regulations, would be enforced by the penal consequences applicable to a violation of them according to the local law.

Because the bill vests in the said incorporated church, an authority to provide for the support of the poor, and the education of poor children of the same; an authority, which, being altogether superfluous, if the provision is to be the result of pious charity, would be a precedent for giving to religious societies, as such, a legal agency in carrying into effect a public and civil duty.

JAMES MADISON.

AN ACT for incorporating the Protestant Episcopal Church in the town of Alexandria, in the District of Columbia.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the minister and vestry of the Protestant Episcopal Church of the town of Alexandria, in the District of Columbia, which was, on the first day of January, one thousand eight hundred and nine, associated as a religious society, be, and their successors are hereby, declared and made a body corporate and politic, by the name, style, and title, of the minister and vestry of the Protestant Episcopal Church of the town of Alexandria; and by the name, style, and title aforesaid, they, and their successors, shall forever lawfully have, hold, use, and enjoy, all and every tract and tracts of land, already belonging to the said church, which is now, or which may hereafter be, acquired by donation or purchase; the church already built, with the burying ground belonging to the same, with their hereditaments and appurtenances; and all books, and other property, heretofore, and that may hereafter be, appropriated to the use of the said church, to the sole and proper use and benefit of the said church, agreeable to the true intent and meaning for which any of the said property was or may be purchased, or given; and by the name, style, and title, aforesaid, they shall be capable, in law, to hold, maintain, and recover, all their estates, rights, and property, belonging thereto, and to sue and be sued, plead and be impleaded, answer and be answered, defend and be defended, in all suits, controversies, causes, actions, matters, and things, whether they be actions of debt, assumpsit, ejectment, trespass, or bill in chancery, in any court or courts of law or equity, and before any judge or justices whatsoever, and shall have one common seal and perpetual succession; and the service of process upon the church-wardens shall be a sufficient service upon the body corporate.

Sec. 2. *And be it further enacted*, That, in all proceedings of the aforesaid minister and vestry, all matters shall be decided by a majority of the votes; and the said minister shall in no case have a negative on the proceedings of the said corporation, except when his vote shall be with, or make a majority of, the votes present, at any meeting of the said corporation.

Sec. 3. *And be it further enacted*, That the said minister and vestry, by the name and style aforesaid, shall have good right, full power, and lawful authority, to have, take, receive, acquire, purchase, hold, use, and enjoy, all lands, tenements, hereditaments, and all goods and chattels; and to demise, alien, improve, and lease, not only the lands which they now have, but which they may hereafter acquire; and to use and improve such goods and chattels, to the use and benefit of the said church, so that the annual increase thereof shall not exceed six thousand dollars, any law, usage, or custom, to the contrary notwithstanding. And it shall and may be lawful for the said minister and vestry of the said church, to sell any of the said property, real or personal, which at this time lawfully belongs to the said church, or the interest which the said church may have in any property, real or personal, or which may hereafter belong to it, for the purpose of applying the proceeds thereof to the purpose of erecting a new church, or repairing the present church, for the use of the said congregation or building, or repairing dwelling or other houses, for the use of their minister, or school houses, within the said town of Alexandria, or in any other way or manner as they shall, from time to time, think necessary for the benefit of the said church: *Provided*, That nothing in this act shall be construed so as to affect the rights or claim of any person or persons, county or parish, in or to any property now in possession of the said church, or claimed by it.

Sec. 4. *And be it further enacted*, That the minister, or in case of his absence, or of a vacancy, the church-wardens shall call a meeting of the vestry as often as it shall be deemed necessary; seven of whom shall be a sufficient number to constitute a meeting for the despatch of business, and shall have power (except for the election of a minister, or of demising, alienating, or leasing of land, in which cases a concurrence of a majority of the whole number elected shall be necessary) to make such rules and orders, for the managing all the temporal affairs and concerns of the said church, as they, or a majority of them so met, shall agree upon, and shall think most conducive to the interest and property of the said church; and shall have the disposition and ordering of all payments of the moneys belonging to the said church, and also of the appointment of a clerk, treasurer, collector, and sexton, whenever they judge it necessary, and the said clerk, treasurer, collector, and sexton, at their pleasure to remove, and appoint others in their stead; all which orders, rules, and appointments, together with the accounts of the said church, the said vestry shall cause to be fairly entered and preserved in well bound books, to be provided for that purpose; and shall deliver the said books, with the papers and documents belonging to the said church, over to their successors in office.

Sec. 5. *And be it further enacted*, That, whenever a minister and vestrymen are wanting, to form a body corporate and politic, agreeable to the directions of this act, it shall be lawful for any two reputable members of the church to call together, at the said church, by notice duly published in one of the newspapers published in the town of Alexandria, the members of the said church, and there elect, by a majority of votes, twelve able and discreet men, members of the said church, who shall be a vestry to all intents and purposes, and who, with their minister, or during a vacancy without a minister, shall be a body corporate and politic, by the same name, and shall enjoy all the rights, powers, privileges, and immunities, which are given by this act to the said church.

Sec. 6. *And be it further enacted*, That, at all elections of a vestry for the said church, no person shall be allowed to vote who is not a member of, and who has not actually contributed to the support of the said church, for twelve months next preceding the said election. There shall be elections of vestrymen every third year, forever, the next election to be held on Easter Monday next, and all succeeding elections on the same day in every third year thereafter, which elections shall be held and conducted in the following manner: The members of the said church shall assemble at the said church, or if there should be no church house, at such other place as the vestry, for the time being, shall appoint by due notice, on Easter Monday in every third year, and then and there elect twelve able and discreet men, members of the said church, as vestrymen, who shall continue in office for three years, and until their successors be elected, in the manner aforesaid; two of the vestrymen so chosen, shall, annually, by a majority of the vestry, be appointed church-wardens, who, or either of them, and their successors, shall preside at all elections of a vestry, shall take care that such elections are conducted in a fair and orderly manner, and shall be judges of the qualifications of the electors.

Sec. 7. *And be it further enacted*, That, whenever a vacancy or vacancies in the vestry shall happen, either by death, resignation, quitting the church, or removal, the remaining vestrymen, or a quorum of them, shall choose such person or persons as they may think fit and proper, to supply the office of such vestryman or vestrymen, who, in complying with the rules and forms of the said church, shall continue in office until the next general election, except he or they remove, resign, or quit the church as aforesaid.

Sec. 8. *And be it further enacted*, That it shall and may be lawful for the said vestry to make such provision for the support of the poor of the said church as shall by them be thought proper; and to provide, also, in such manner as to them shall appear proper, for the education of the poor children of the said church.

Sec. 9. *And be it further enacted*, That the vestry of the said church, two-thirds concurring, shall have full power and authority to remove from the said church any minister guilty of unworthy behaviour, or of neglecting the duties of his office; and, upon such removal, the said vestry shall have authority to elect a successor.

SEC. 10. *And be it further enacted*, That it shall and may be lawful for the said minister and vestry to make such rules and regulations, for the good management of the temporal affairs of the said church, as may be deemed by them most expedient, and for the government of the said vestry, and the same to abrogate or alter as often as they shall see fit: *Provided always*, That such rules and regulations are not inconsistent with, and against any provision of this act, the laws of Congress, and the constitution of the United States, or any rule or canon of the Protestant Episcopal Church of the State of Virginia.

SEC. 11. *And be it further enacted*, That this act shall commence, and be in force, from and after the passing thereof.

JOSEPH B. VARNUM,
Speaker of the House of Representatives.

GEORGE CLINTON,
Vice President of the United States and President of the Senate.

11th CONGRESS.] No. 295. [3d SESSION.

PRESIDENT MADISON'S OBJECTIONS TO THE "BILL FOR THE RELIEF OF RICHARD TERVIN, WILLIAM COLEMAN, EDWIN LEWIS, SAMUEL MIMS, JOSEPH WILSON, AND THE BAPTIST CHURCH AT SALEM MEETING-HOUSE, IN THE MISSISSIPPI TERRITORY."

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 28, 1811.

To the House of Representatives of the United States: FEBRUARY 28, 1811.

Having examined and considered the bill entitled "An act for the relief of Richard Tervin, William Coleman, Edwin Lewis, Samuel Mims, Joseph Wilson, and the Baptist church at Salem meeting-house, in the Mississippi Territory," I now return the same to the House of Representatives, in which it originated, with the following objection:

Because the bill, in reserving a certain parcel of land in the United States for the use of the said Baptist church, comprises a principle and precedent for the appropriation of funds of the United States, for the use and support of religious societies, contrary to the article of the constitution which declares that Congress shall make no law respecting a religious establishment.

JAMES MADISON.

AN ACT for the relief of Richard Tervin, William Coleman, Edwin Lewis, Samuel Mims, Joseph Wilson, and the Baptist church at Salem meeting-house, in the Mississippi Territory.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That Richard Tervin be, and he is hereby, authorized to produce to the Register of the Land Office, and the Receiver of Public Moneys, for the district east of Pearl river, in the Mississippi Territory, evidence of his having inhabited and cultivated a tract of land in said Territory, prior to the thirtieth day of March, one thousand seven hundred and ninety-eight; and in case such evidence shall be produced, the said Register and Receiver are required to grant to the said Richard Tervin, a donation certificate for such tract of land not exceeding six hundred and forty acres.

SEC. 2. *And be it further enacted*, That William Coleman be, and he is hereby, authorized to produce to the said Register and Receiver, evidence of his right to a donation of a tract of land, on the Tombigbee river, in said Territory; and, in case he shall produce satisfactory evidence to the said Register and Receiver, that he was entitled to a donation of such tract, according to the provisions of the second section of the act entitled "An act regulating the grants of land, and providing for the disposal of the lands of the United States south of the State of Tennessee," and the acts supplementary thereto, it shall then be lawful for the said William Coleman to locate a quantity of land, equal to that to which he was entitled under the above mentioned provisions, on any lands of the United States, which shall have been offered at public sale in the said district, and that shall then remain unsold; and it shall be the duty of the said Register and Receiver to issue a donation certificate to the said William Coleman for the land so located by him.

SEC. 3. *And be it further enacted*, That Edwin Lewis be entitled to the right of pre-emption in five acres of land, situate within the boundaries of a tract of land whereon he resides, which five acres were heretofore used for an encampment for the troops of the United States, so soon as the same shall cease to be used for that purpose: the said five acres to be paid for at the same price, on the same terms and conditions, as are provided for lands granted by right of pre-emption in the Mississippi Territory.

SEC. 4. *And be it further enacted*, That Samuel Mims be, and he is hereby, confirmed in his title to a tract of land, containing five hundred and eighty-four acres, granted by the British Government of West Florida, to William Clark, so as not to deprive the heirs of said Clark, or any other person or persons, of their legal remedy, if any they have, for the recovery of said lands from the said Mims, his heirs, or assigns.

SEC. 5. *And be it further enacted*, That Joseph Williams be, and he is hereby, authorized to enter with the Register of the Land Office, his certificate of pre-emption right, granted to him by the Board of Commissioners, for the district east of Pearl river, in the Mississippi Territory, for the quantity of four hundred and eighty acres of land, lying on the Tombigbee river, in the said Territory; and that payment be made therefor, at the same price, and on the same terms and conditions as are provided, by law, for other lands granted in right of pre-emption in said Territory.

SEC. 6. *And be it further enacted*, That there be reserved the quantity of five acres of land, including Salem meeting-house, in the Mississippi Territory, for the use of the Baptist church, at said meeting-house.

JOSEPH B. VARNUM,
Speaker of the House of Representatives.

GEORGE CLINTON,
Vice President of the United States, and President of the Senate.

12th CONGRESS.] No. 296. [1st SESSION.

APPLICATION TO ANNEX WEST FLORIDA TO THE MISSISSIPPI TERRITORY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, NOVEMBER 20, 1811.

To the Honorable the Senate and House of Representatives of the United States:

We, the inhabitants of West Florida, your petitioners, represent to your honorable body, that, while we rejoice in the late event which has brought about our emancipation from the iron shackles of despotism, or rather released us from the more horrid calamities of anarchy, we still labor under the painful apprehension that your enlightened body will either continue us a separate Territory, or attach us to the Territory of New Orleans, instead of incorporating us with the Mississippi Territory, which we most ardently wish, for the following reasons:

The geographical and relative situation of West Florida and the Mississippi Territory plead powerfully in favor of the measure. The climate, the soil, the people, the manners, and the politics of both countries, are the same, being only divided by an ideal boundary. We are all Americans by birth, and in principle; but if we are united with the Territory of Orleans, we will be subjected to all the inconveniences and miseries resulting from a difference of people, language, manners, customs, and politics. The safety, and, indeed, the political salvation of the Government of the United States, entirely depend on the unanimity of all its parts, which is best insured by combining persons and things homogeneous in their nature. If this be true, and if West Florida and the Territory of Orleans differ in every material respect, (of which there can be no doubt,) it follows that a coalition of the two countries would be productive of discord, the evil genius of republican Governments.

Your petitioners are aware of the policy suggested by *some*, of adding *us*, who are all Americans, to the people of the Territory of Orleans, who are chiefly French, in order to counteract the French influence. This may be sound policy, but to make us the *instruments* of effecting that object, at the same time that it might be advantageous to the United States in general, it would be destructive to our individual happiness; a sacrifice too great, we trust, to be required of us to make by a Government, wise in its constitution, and just in its administration.

If, to counteract French influence, and subvert French politics, by populating the country with Americans, be the policy of the Government, your petitioners conceive that object will be shortly effected by the very great emigration of Americans from all parts of the United States. If those emigrants are subjected to all the inconveniences which we deprecate from a similar connexion, the case is not so hard with them as it would be with us, because they have voluntarily chosen that situation.

But waiving all objection on the score of dissimilarity betwixt us and the people of Orleans, nature herself seems to have thrown a barrier in the way to oppose the union. The city of New Orleans is, and in all probability will continue to be, the seat of Government of that country; where, of course, all public business must be transacted, and which will, therefore, induce the necessity of the personal attendance of a great proportion of the people within the jurisdiction of that Government, at the city of New Orleans, which will be extremely inconvenient to the inhabitants of West Florida, on account of the largeness and difficult navigation of lake Pontchartrain, which completely insulates us from the city of New Orleans.

If, however, your honorable body should deem it unadvisable to attach us to the Territory of Orleans, in order to prevent a measure calculated to continue us under a separate territorial Government, we beg leave to state that, owing to the local situation of our country, it is not susceptible of a thick settlement; that, if it were settled with as many persons as the nature of the country will admit, yet we do not believe there would be wealth enough among us to defray the expenses of a Government, without operating a very serious injury to us. But, admitting we are able to bear the expenses of a territorial Government, if the Mississippi Territory, and the Territory of Orleans should become States, independent of us, we would forever remain a Territory; for, neither in point of numbers, nor in point of extent of country, would we ever arrive at the proud magnitude of claiming an admission into the Union, as a free, sovereign, and independent State. Our only hope of participating with the rest of our brethren on the continent, in the rights and blessings of State sovereignty, is built upon the pleasing anticipation of becoming a part of the Mississippi Territory. By that means, independent of our own individual interests, the Mississippi Territory will derive the advantage of an extensive seacoast, of which she will otherwise be deprived.

For the foregoing reasons, we humbly trust that your honorable body will grant our request, by adding all that tract of country, now in possession, by virtue of the President's proclamation of 1810, to the Mississippi Territory.

There is also another subject in which your petitioners are deeply interested, to which we beg leave to call your attention. Your petitioners have generally emigrated to this country since the cession of Louisiana to the United States. When possession of New Orleans, and that of the country west of the Mississippi was taken, and the province of West Florida left in possession, and under the exclusive jurisdiction of Spain, we took it for granted that the Government of the United States either did not claim, or, if they did, meant not to insist upon their claim to West Florida; we, therefore, have made settlements on lands, under the rules and forms of the Spanish Government, expecting to hold our lands to ourselves and our heirs forever. We, therefore, pray your honorable body to confirm to us our settlement right, made between the time of the cession of Louisiana, until the time of taking possession of West Florida, wherever they have been made *bona fide*, and not with an intention to monopolise unreasonable quantities of lands, under such regulations as may best comport with the wisdom and justice of Congress.

We humbly trust that your enlightened body will grant this request, when you take into view all the circumstances which it involves. The consequences to us and our families are all important. If we are deprived of our possessions, we are deprived of our property; and, consequently, will be reduced to the extremes of want and wretchedness.

GEORGE PATTERSON,
And four hundred and ten others.

[NOTE.—See report No. 301.]

12th Congress.] No. 297. [1st Session.

CONTESTED ELECTION OF JOHN P. HUNGERFORD, A REPRESENTATIVE FROM VIRGINIA.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, NOVEMBER 21, 1811.

Mr. Findley made the following report:

The Committee of Elections, to whom was referred the petition of John Taliaferro, contesting the election of John P. Hungerford, returned as one of the Representatives for the State of Virginia, in the present Congress, and praying to be admitted in his stead, have had the said petition under consideration, and report, in part:

That, at the last general election in Virginia for Representatives to Congress, the said John Taliaferro and John P. Hungerford were opposing candidates, in the district composed of the counties of Westmoreland, Richmond, Lancaster, Northumberland, King George, and Stafford: from the polls of the several counties, the sitting member appears to have obtained a majority of six votes in the district, and he was accordingly returned as elected.

That of the polls taken for the county of Westmoreland, John Taliaferro had thirty-seven votes, and John P. Hungerford three hundred and sixteen votes, and that, on comparing the poll with the land list of the year 1810, and taking the list as a test, it appears to the committee that nine persons who voted for the former, and one hundred and sixty-two persons who voted for the latter gentleman, were not qualified to vote.

That of the polls taken for the county of Richmond, Mr. Taliaferro had one hundred three votes, and Mr. Hungerford one hundred and thirty votes, and that, on such comparison as aforesaid, twelve persons who voted for the former, and thirty-eight persons who voted for the latter gentleman, appear not to have been legally qualified voters.

That of the polls taken for the county of Lancaster, Mr. Taliaferro had one hundred and twenty-two votes, and Mr. Hungerford ninety-six votes, and that on such comparison as aforesaid, twenty persons who voted for the former gentleman, and twenty persons who voted for the latter, appear not to have been legally qualified voters.

That of the polls taken for the county of Northumberland, Mr. Taliaferro had two hundred and twenty-eight votes, and Mr. Hungerford seventy-six votes, and that on such comparison as aforesaid, thirty-five persons who voted for the former gentleman, and one person who voted for the latter, appear not to have been legally qualified voters.

That of the polls taken for the county of King George, Mr. Taliaferro had one hundred and fourteen votes, and Mr. Hungerford one hundred and twenty-five votes, and that, on such comparison as aforesaid, thirty-eight persons who voted for the former gentleman, and fifty persons who voted for the latter, appear not to have been legally qualified voters.

That of the polls taken for the county of Stafford, Mr. Taliaferro had one hundred and fifty-nine votes, and Mr. Hungerford twenty-six votes, and that on such comparison as aforesaid, twenty-nine persons who voted for the former gentleman appear not to have been legally qualified voters.

The result of such examination and comparison is, that deducting from both polls the persons challenged, who do not appear to have been qualified to vote according to the land lists of 1810, Mr. Taliaferro has a majority over Mr. Hungerford of one hundred and twenty-one votes.

The committee further report, that, on the 7th day of May last, the petitioner gave notice to the sitting member of his intention to contest the election, on the ground that the former had a majority of the legal and qualified votes, and that such notice was accompanied by a list of the persons challenged by the petitioner, with his objections to them. On the 28th of May the sitting member furnished the petitioner with a list of persons challenged by him, setting forth his objections against such voters. These lists contain, as well the names of the persons who the committee find not to be on the land lists, as others who are challenged by the parties for want of the freehold qualification, and for other causes.

That, on the 27th day of September last, the petitioner gave notice in writing, subscribed by him, to the sitting member, that testimony would be taken in relation to the present controversy, and to be used in the decision of the same, at King George court-house on the 10th, at Westmoreland court-house on the 17th, and at Richmond court-house on the 22d of October; and that the petitioner, agreeable to such notice, has taken sundry depositions, which are now before the committee; but the sitting member did not attend such examination, for reasons stated by him in a protest which he caused to be delivered to the petitioner.

The committee further state, that they made the comparison of the polls with the land lists, at the particular request of the petitioner, and for the purpose of reducing the controversy before them as much as possible; and that they were induced to this course from adopting as a principle, that, according to the laws of Virginia, the land list of the year prior to the election is, in the first instance, to be received as evidence of all the freeholders in the county: but this evidence they conceive, and so it was admitted by the parties, is only conclusive in the absence of all other evidence; and they accordingly are of opinion, that it is competent for the parties to show, by other testimony, that persons appearing on the land list are not freeholders, and thus not entitled to vote; and, on the other hand, that persons not appearing on the land lists are freeholders and voters.

The sitting member, before such examination was gone into, asked for time to take testimony, under the conviction that, in a reasonable period, to be fixed by the committee, he would be able, by evidence to be taken, to support his challenges and his poll, and he still requests such time to be allowed to him: the petitioner, on the other hand, has, at all times, opposed such request, on the ground that the sitting member has had sufficient time, since he was apprised that the election would be contested, to procure his testimony.

The committee are aware that some inconvenience must arise to the petitioner if this contest is laid over for any time, but they think the right of suffrage ought not to be hazarded or destroyed on account of any individual inconvenience. If there has not been gross neglect in the sitting member, the committee conceive that it is due to the electors of the district who polled for him, and to himself, not to hurry his case to a decision without affording them and him an opportunity to make good the election if they can do it.

It has been already stated, that the petitioner gave notice of his intention to contest the election to the sitting member on the 7th of May; and this the former contends was sufficient to put the latter to the task of collecting and arranging his proof: your committee see, however, that this proceeding was modelled on the laws and usages of Virginia, and, according to them, it is regarded as a mere incipient step calling for no proceeding from the other party. Such a notice on the heel of a contested election is an index to the feelings of the person giving it, but not always the proof of a settled determination. As the period of the election recedes, and the difficulties attending a canvass become more apparent, the unsuccessful candidate sometimes abandons his notice and his scrutiny. It

ought not, therefore, to be required of the person returned, for such cause alone, to wade through all the trouble, difficulty, and expense of a tedious examination, while it remains doubtful whether his opponent will proceed; it is surely in season to begin to take defensive testimony when the opposing party has commenced the investigation.

The notice given by the petitioner on the 27th of September, for examinations on the 10th, 15th and 22d of October, the committee have accordingly regarded as the first efficient measure towards the scrutiny, and they are satisfied that, in a district composed of six counties, and in a case where the votes challenged exceed four hundred, it was not practicable for the sitting member to take his testimony in season for the commencement of this session. A notice given by him after the 29th of September, would not have been deemed reasonable for an earlier day than the 10th of October, nor would it have been allowed in him to call the petitioner from his own examinations, which were to continue until after the 22d of October: after the 22d of October, it is not possible to conceive that the sitting member could procure his evidence, allowing him time before the first day of the session to travel to the seat of Government.

The committee, in addition to the facts already stated, report, that it appears to them that, on the 29th day of April last, being the day of the canvass, the petitioner procured the certificates, under oath, of two of the sheriffs, and two of the deputy sheriffs, who attended to compare the polls, that if an equality of votes had appeared, they would have voted for the petitioner, which certificate was transmitted by the magistrate, before whom it was attested, to the clerk of this House, at the request of Mr. Taliaferro, to be retained until called for by him.

This, the petitioner alleges, ought to be regarded as the commencement of his testimony, and he contends that it not only advertised the sitting member that his seat would be contested, but made it necessary for him forthwith, and without further notice or act on the part of the petitioner, to proceed to his examinations. The committee, however, have nothing before them which goes to show distinctly the object of the petitioner in procuring the certificate, nor can they, in any point of view, consider it as such a prelude to the scrutiny as to require from the sitting member that he should proceed to his canvass.

The committee, therefore, upon a view of all the circumstances of the case, are of opinion, that further time ought to be granted to the sitting member to procure testimony, and they accordingly submit the following resolution:

Resolved, That a reasonable time be allowed to John P. Hungerford, a member of this House, to procure testimony relative to his election, and that the Committee of elections have power to examine witnesses, and to make order for such examinations in the case of the said election.

SIR: WESTMORELAND COUNTY, *April* 29, 1811.

The enclosed document was taken, signed, and sworn to, by the subscribing gentlemen, in the presence of John Taliaferro, Esq., General Hungerford, and myself, at a meeting of the sheriffs at Westmoreland court-house, for the purpose of comparing the Congressional poll for the counties of Stafford, King George, Westmoreland, Richmond, Lancaster, and Northumberland; and which paper I herewith transmit to you, at the request of Mr. Taliaferro, to be retained by you till called for by him.

I am, sir, yours, &c. &c.

THOMAS ROWAND.

PATRICK MAGRUDER, Esq., *Clerk of the House of Reps. U. S.*

We, the undersigned sheriffs, who have assembled at Westmoreland court-house, on the 29th day of April, 1811, to count and compare the polls taken in our respective counties for a delegate to serve in the House of Representatives for the Congress of the United States, do certify that, if an equality of votes had appeared on the whole of the poll, we should have voted in the following manner:

Richard Claughton, deputy sheriff for Thomas Hurst, sheriff of Northumberland, should have voted for John Taliaferro. William S. Sterne, deputy sheriff for Enoch Mason, sheriff of Stafford, should have voted for John Taliaferro. J. Diggs Dishman, sheriff of King George, would have voted for John Taliaferro. Joseph Carter, Jun., sheriff of Lancaster, would have voted for John Taliaferro.

STATE OF VIRGINIA, *Westmoreland county, to wit*:

This 29th day of April, 1811, the aforesaid Richard Claughton, William S. Sterne, James D. Dishman, and Joseph Carter, Jun., made oath before me, a justice of the peace for said county, that they would have given their votes in the manner as above stated by them. Given under my hand the day and year above.

THOMAS ROWAND.

STATE OF VIRGINIA, *Westmoreland county, sct:*

I, Joseph Fox, clerk of the court of Westmoreland county, qualified according to law, do certify that Thomas Rowand, whose name is subscribed within, was, at the time of taking the affidavit to which his name is subscribed, and is now, an acting justice of the peace for said county, duly commissioned and qualified according to law, and that due faith and credit ought to be given to all his acts as such.

In testimony whereof, I have hereunto set my hand, and affixed the public seal of my office, this thirteenth day of April, in the year of our Lord one thousand eight hundred and eleven, and of the commonwealth of Virginia the thirty-fifth.

JOSEPH FOX, *C. W. C.*

SIR: KING GEORGE, *May* 4, 1811.

Be pleased to take notice, that I shall, on the meeting of the next Congress of the United States, contest your election to represent the counties of Westmoreland, Richmond, Lancaster, Northumberland, King George, and Stafford, in that body, on the ground that you did not, at the last election, obtain a majority of the electors of the said district who were legally qualified to vote for a Representative to Congress. And I shall further make it appear, if necessary, that your election has been contrary to law; and, finally, that I shall claim the right to represent the said district, in virtue of my having obtained over you a majority of the votes of the electors thereof who were duly and legally authorized to vote in the election. Below you will find a list of the names of the persons from the several counties in the said district, who voted for you, to whose votes I object as not being legal, and my particular objections to the legality of each person's vote are placed opposite to each of their names.

I am, respectfully, your obedient servant, &c.

JOHN TALIAFERRO.

General JOHN P. HUNGERFORD.

[Here follows the list of 304 names.]

SIR:

Below you will find a list of the names of the persons from the several counties composing the Congressional district for which I have been elected, who voted for you to represent the said district in the Congress of the United States, to whose votes I object as being illegal; and opposite to the name of each voter so objected to by me you will find my particular objection to the legality of the vote.

Yours, respectfully,

JOHN P. HUNGERFORD.

Mr. JOHN TALIAFERRO.

[Here follows the list of 189 names.]

WESTMORELAND COUNTY, *to wit:*

On this day Henry Hungerford personally appeared before me, James Miller, a justice of the peace in and for the aforesaid county, and made oath that, on the 24th day of May, he delivered to John Taliaferro, Esq. a true copy of the aforegoing writing. Certified this 30th day of October, 1811.

JAMES MILLER.

SIR: SEPTEMBER 25, 1811.

Be pleased to take notice, that I shall, at King George court-house, on the 10th day of October next, and at Westmoreland court-house, on the 17th of the same month, and at Richmond court-house, on the 22d of the same month, proceed to take the evidence of sundry persons, to be used by me in the decision of the contest now depending between you and myself for a seat in the next Congress of the United States, as the Representative of the district composed of the counties of Stafford, King George, Westmoreland, Richmond, Northumberland, and Lancaster; and that I shall proceed, at each of the above places, at the times above stated, to take evidence, and continue at each place, from day to day, to take evidence till the whole can be gone through with.

I am, sir, respectfully yours,

JOHN TALIAFERRO.

General JOHN P. HUNGERFORD.

STATE OF VIRGINIA, *King George county, set:*

Meriwether Taliaferro made oath before me, an acting justice of the peace for the aforesaid county, that he did, on the 27th of last month, (September,) deliver to General John P. Hungerford a notice, in writing, of which the within is a true copy. Given under my hand, this 8th day of October, 1811.

ALEX. S. HOOE.

SIR: LEEDSTOWN, *October* 9, 1811.

I protest against the notices you have recently given me, to take depositions in three of the counties of the district, for the following reasons:

1st. There exists no law entitling you to give them, empowering a magistrate to administer the oaths, or to take the depositions providing an authority to decide incidental questions during an investigation, or enabling me to obtain the attendance of witnesses.

2dly. There does exist a law requiring my attendance in Congress on the 4th of November next, as the member returned for the district.

3dly. It is impossible for me to obey the existing law, and conform also to the mode you have adopted, without law, for scrutinizing the election. It terminated on the 22d of April. On the 4th of May you notified me, according to the law of Virginia in relation to State elections, of your intention to dispute my election, and furnished me with lists of votes you objected to, in each of the six counties composing the district; and I furnished you with similar counter-lists, according to the same law. Recently you have given me notice of an intention to take depositions in three of these counties, on the 10th, 17th, and 22d of this month; reserving an equal power to exhaust the month of November in the other three, in the same way, before I can be apprised of the nature of your exceptions, or the evidence necessary to meet them. This ingenious management for pushing the scrutiny beyond, or far into, the session of Congress, makes it impossible for me both to obey the law requiring my attendance during this period, and to obey your future notices; or to avail myself of a right of a personal attendance, without violating the right of my constituents to representation; and, however imperative the preference between these evils may be, in a case of necessity, I know not by what authority you can impose it.

4thly. Nor do the principles of reason and equity, in my view, militate less forcibly than those of law, against the mode of scrutiny you have attempted to prescribe. The notification, according to the State law, was also a notification of your intention to adopt its rules throughout. It enacts that scrutinies shall commence within two months of the election, and terminate thirty days before the ensuing session of Assembly. Your proposed commencement is near six months from the election, and the termination of the scrutiny, if I ought to be allowed as much time as you have exhausted and will exhaust, would probably go beyond, or deep into, the session of Congress. If, by your first notice, you can avail yourself of the letter or equity of the State law, your subsequent non-conformity to either was a notification to me of an abandonment of the scrutiny. If not, even your first notice was irrelative and void. But if its equity and justice is sustainable upon the moral authority of the law, the same authority is equally conclusive against the equity and justice of your lying by for near six months, and then attempting to compel the returned member to desert his constituents, or his defence. The object of the law you have adopted, and violated, was to prevent a mode of proceeding injurious to an individual or to the people; to the individual, from the decisive advantage his absence would give to an antagonist in the investigation of a multitude of distinct cases, as to which no agent could or would be sufficiently informed to do him justice; or to the people, from the loss of representation, or from receiving it rather from a scrutiny unequally conducted, than from their own suffrages.

Whatever might have been a proper line of conduct for me, had you continued to conform to the principles of our State law, I discover no obligation for conforming to a mode of scrutiny, prescribed only by yourself, contrary to those principles; because it appears to me to be warranted as little by justice as by law, to correspond with no principle countenanced, or likely to be countenanced, by either, and to be at least as liable to be rejected on my part before I had adopted it, as the State mode can be on yours after you had done so. I cannot, therefore, in justice to the district, or to myself, perform any act from which could be inferred a submission to the unauthorized system you have adopted, nor allow any validity to the affidavits you may take in pursuance thereof.

I am, sir, respectfully, yours, &c.

JOHN P. HUNGERFORD.

OCTOBER 12, 1811.

This extraordinary paper, so full of truism and sophism, whether it be considered as a serious protest, or as an indirect mode of popular wheedling, was received by me on or about the 11th instant, (October.) I certainly never meant to act under either of the laws referred to in the paper; the State law, regulating its own proceedings on contested elections, had no application; and the law of Congress, on a like subject, had long ago expired. What might possibly be the "moral authority," mentioned in the paper, of a foreign, a repealed, or of an expired law, in the case, I cannot undertake to say. I considered that the House of Representatives, both from the nature of the case, and from the positive words of the constitution, had full power to judge of the elections, qualifications, and returns of their own members; that so general a grant of power necessarily implied a great range of discretion in respect to evidence; that, from the commencement of the Government to January, 1798, and from April, 1804, to the present day, no act of Congress had existed regulating contested elections; that, in those periods of time, elections had been contested and decided on almost every point that admits of contest. I, therefore, without reference to any past law, endeavored to procure sufficient testimony on the general principles which are adopted in courts of law, where affidavits are received in place of the oral testimony of witnesses present. I meant, at the earliest day, to submit the testimony I had, with deference, to the Committee of Elections, to solicit their earliest attention to its sufficiency in point of form, and their instructions as to what other sort of testimony they might require, that I might, in the speediest way, perfect the one and procure the other.

JOHN TALIAFERRO.

WASHINGTON CITY, *November* 19, 1811.

The petitioner, in answer to the objections of Mr. Hungerford, the sitting member, to the admission in evidence of the notice and affidavits produced by the petitioner in support of the allegations in his petition, respectfully represents to the Committee of Elections, that, though no law of the United States, or of the State of Virginia exists, prescribing the mode of taking evidence in contested elections like the present, yet it has been the settled practice of Congress, since the law of the United States on that subject expired, to receive the evidence of either party, taken conformably to the laws and general usage of the State to which they belong, requiring always that reasonable notice be given to the adverse party of time and place, that he may attend and cross-examine the witnesses, if he thinks proper. The petitioner, therefore, submits to the committee, whether the notices given by him, and the evidence taken, do not come within the established practice of Congress, so as to render them admissible on the present occasion. With regard to the suggestion of the sitting member, that he has not had time to collect and prepare the evidence in support of his return, the petitioner begs leave to state the following facts: 1st. That the election closed on the 29th day of April last, at which time the petitioner declared to the sitting member his intention to contest the election; and did, in the presence of the sitting member, cause the affidavits of four persons to be taken and transmitted to the clerk of the House of Representatives, to be used as evidence in the controversy. 2d. That, on the 7th day of May, he caused to be delivered to the sitting member a notice in writing, stating more fully the intention of the petitioner to contest the election; annexed to which notice was a list of the names of all the voters on the polls of the sitting member objected to by the petitioner, and a specification of the particular ground of objection to each voter. And, 3dly, That the petitioner did, on the 27th of September, give the sitting member notice of the times and places when and where the testimony of the witnesses proposed to be examined by the petitioner would be taken; during the whole of which time the sitting member made no effort either to controvert the evidence adduced by the petitioner, or to show that, according to the constitution and laws of Virginia, those voters to whom the petitioner had objected were entitled to the right of suffrage; nor has he alleged a single reason why he could not have availed himself of such testimony, if it existed, at the opening of the present session of Congress. If there is a point which the sitting member can establish to change the aspect of the case, or if it be in his power to countervail the evidence before the committee so as to produce a result in his favor, the petitioner demands an exposition of that point, and a disclosure of the evidence upon which the sitting member will rely to effect that object. The question will then be fairly presented to the view of the committee, and they can determine whether the evidence, which the sitting member supposes to be material, might not have been obtained, with proper exertion, anterior to the meeting of Congress; whether due diligence has been used by him for that purpose, and, if not, from what cause the neglect has arisen; and, finally, whether the proof which the sitting member imagines to exist would, if it were before the committee, be sufficient to sustain the validity of his election. The petitioner begs leave to refer the committee to an attentive examination of the constitution and laws of Virginia establishing the right of suffrage. From these it will appear that every male citizen of the State, (other than free negroes and mulattoes,) aged twenty-one years, who is possessed of a freehold estate at the least, or who is tenant for life, in a quantity of land, if improved, equal to twenty-five acres, or fifty acres of unimproved land, or of a lot or part of a lot in any town established by law, and who shall have been so possessed six months, unless the same shall be derived by marriage or by descent, and none others shall be entitled to vote for Representatives to the General Assembly. It is also provided by a law of the State that one or more commissioners of the revenue shall be annually appointed by the court of each county, whose especial duty it shall be to register, in alphabetical order, in a book called the land-book or list, the name of each and every landholder in his county; and for the better execution of which, it is provided, by law, that each person shall annually, on oath, give a true and exact account of all lands and other property of which he is possessed, to be entered on the book or the list of the said commissioner. This land list is, by express statute, made conclusive evidence for and against sheriffs in the collection of the land tax. It is, by law, evidence for or against persons who omit or refuse to vote at elections for Representatives to the State Legislature or to Congress. By law, it is the test by which to try the competency of grand jurors, as none but freeholders are allowed to be grand jurors. It has been the immemorial usage of the Legislature of Virginia to resort to the land-list as the most satisfactory proof in contested elections, and their decisions, in cases similar to the one before the committee, have uniformly been in favor of the candidate having on his poll a majority of votes supported by such list. From this view of the laws and usages of Virginia, the committee will readily perceive that great credit is due to the land list, as a list of the qualification of voters; and the petitioner feels confident that it will be received by the committee as conclusive evidence in the case under consideration, unless other testimony, equally respectable, should be adduced to support the pretensions of the sitting member. Apply this list to the poll of each party, and it is a fair inference, that, out of any given number of votes divided between them, its operation would diminish the votes of each in equal proportions.

The petitioner humbly conceives that the proposition of the sitting member for further time to collect his evidence, is supported neither by reason nor precedent. It would seem to be unnecessary, after the solemn decision of the House of Representatives in the case of Baylies and Turner, to enter into any general reasoning upon this subject. In the case referred to, an application for further time was refused, notwithstanding the sitting member declared it would be in his power to produce, on a subsequent day, material evidence of which he had not pre-

viously known. But without the aid of this adjudication, such an indulgence is manifestly inconsistent with the plainest dictates of justice, and the most familiar maxims in every judicial tribunal. If, indeed, the sitting member can show to the committee that the evidence he is in search of was not in his possession or power at any former period, that it is material to the support of his claim to a seat in the House of Representatives of the United States, and that he has made use of every reasonable diligence to obtain the same in due time without effect, the petitioner would not contest the propriety and fairness of suspending, for a limited time, a final determination of the present controversy. But, on the contrary, it is manifest to the committee, that all the means in the power of the petitioner to prosecute the inquiry, on his part, were equally open to the sitting member to prepare for his defence; that, immediately after receiving the notification, as early as the 7th of May, last, that his election would be contested, it was the incumbent duty of the sitting member, without waiting for any other or further steps to be taken by the petitioner, to have met the objections made by the petitioner to the voters specifically named, and to show the basis on which their right to vote rested. Such a course was due to himself, if he believed the evidence for that purpose was in existence; it was due also to the respect which ought, on all occasions, to be evinced for the honorable body of which he was returned a member, and before whom his case was to be heard. Regardless of these considerations, and of the right of the petitioner to demand, in behalf of the electors of his district, a speedy decision of a case involving their dearests interests, the sitting member has suffered six months to elapse without even an attempt to obtain that evidence which he now pretends to be so essential in his defence. He has appeared before the committee, not for the purpose of making his defence, but to be relieved from that unpleasant task; the committee are gravely asked to reward his negligence by granting a delay, which, in all human probability, will amount to a virtual confirmation of his seat. The sacred right of representation in the Legislature, at this critical and important conjuncture of our national concerns, ought not to be arrested from a portion of the American people, upon pretexts which are not supported by facts or circumstances, and which, if true in their fullest extent, would fail of producing any material change in the result of the present investigation. To demonstrate the accuracy of this proposition, the petitioner begs leave to refer the committee to the extraordinary augmentation of votes in the county of Westmoreland, by which it will appear that one hundred and sixty-two voters not enrolled on the land list, were given to the sitting member in that county, being more by twenty-eight than are excluded from the entire poll of the petitioner, by the application of the land list as a test to his poll taken for the six counties composing the district; in addition to which, the sitting member received a very large proportion of bad votes in the other counties.

From these premises, which are supported by the strongest proofs in the possession of the committee, the conclusion is irresistible, that, admitting the sitting member to sustain every objection which he has made to the poll of the petitioner, he would fall very far short of raising his number to a legitimate majority of the district. The petitioner, therefore, with due deference to the opinion of the committee, can perceive no possible benefit to be derived from an enlargement of the time for taking testimony.

Such a course might, and most probably would, enable the petitioner to increase the majority of constitutional suffrages to which he is entitled, but it could not most assuredly lessen them into a minority. Deeply impressed by the foregoing considerations, and with the important rights of his fellow-citizens involved in the issue of the question before the committee, the petitioner prays that his case may be considered and determined without further delay.

JOHN TALIAFERRO.

12th Congress.] **No. 298.** [1st Session.

PROVISION FOR MAKING THE ROADS DESIGNATED BY THE TREATY OF BROWNSTOWN.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, NOVEMBER 28, 1811.

Mr. Jeremiah Morrow, from the committee appointed on the 11th instant, reported on the expediency of laying out and making the roads contemplated by the treaty of Brownstown, concluded on the 25th of November, 1808:

That the roads contemplated by the said treaty have for their object the opening a communication by land between the Territory of Michigan and the different settlements in the State of Ohio, and generally with the other parts of the United States. A view of the geographical position of the Territory of Michigan, situate as it is, bordering for a considerable extent on the British province of Upper Canada, bounded on the east, north, and west, by water, and on the south by an extensive tract of country to which the Indian title remains unextinguished, convinces the committee of the utility and necessity of the proposed roads. They would subserve to the convenience of the citizens in their ordinary intercourse; of the Government in the transportation of the public mail; and, especially in an emergency, would be necessary for military operations.

The distance from the rapids of the Miami of the lakes to the western boundary of the Connecticut Reserve is about thirty-five miles; and from the lower Sandusky, in a southwardly direction, to the old Indian boundary line, is about seventy miles; making proper allowance for windings in the roads, so that they may be made on the best ground. The aggregate length of road proposed to be made may be estimated at one hundred and twenty miles; but, however great the advantage, and immediate the necessity of these roads, it is not probable that the object will be accomplished for many years to come, unless the United States provide the funds. The Territory of Michigan is destitute of the means, and the proposed roads are without the limits of her territorial jurisdiction; the State of Ohio, with limited public resources, and multiplied demands for extensive improvements on the roads within her settlements; it is not to be expected that either will afford the funds necessary to accomplish the proposed object. The committee are of opinion that provision ought to be made for laying out and making the said roads, and that they ought to be located of the width proposed by the said treaty.

[Note.—See report, No. 282.]

12th CONGRESS.] No. 299. [1st SESSION.

UNION CANAL IN PENNSYLVANIA.

COMMUNICATED TO THE SENATE, DECCEMBER 6, 1811.

PHILADELPHIA, *November* 19, 1811.

To the Senate and House of Representatives of the United States in Congress assembled: the memorial of the President and Managers of the Union Canal Company of Pennsylvania, respectfully showeth:

That, in the year one thousand seven hundred and ninety-one and two, the Legislature of Pennsylvania, for the purpose of opening a communication between the eastern and western parts of the State, by canals and locks, incorporated two companies under the titles of "The Schuylkill and Susquehanna Navigation," and "The Delaware and Schuylkill Canal Navigation," with such powers, privileges, and immunities as were then deemed requisite for the accomplishment of the object.

That a number of citizens (some of whom were greatly distinguished by former services, civil as well as military, rendered to their country in the contest which secured and established her independence,) actuated by a regard for the public good, and by an ardent desire of strengthening and cementing that union which had then so recently been established, made liberal contributions of their wealth to a large amount, and engaged in the measures necessary to the opening of the contemplated communication with a spirit of zeal and enterprise worthy of the patriotic undertaking.

That large sums of money were expended for the purpose of exploring the country, and deciding on the best route, and afterwards in the purchase of the soil through which the canals were to pass, and in partial openings of them to a considerable extent; and the most sanguine expectations were entertained that the works would proceed rapidly to their completion.

Encountered, however, with difficulties which had not been anticipated (many of them arising, doubtless, from the novelty of such an undertaking in this country, and the want of experience in the mode of accomplishing it,) the affairs of the companies became embarrassed. Unfortunately, too, the allurements of *external* commerce, promising enormous advantages, (which have since, however, proved so precarious and delusive,) fascinated the public attention to such a degree, that the moderate and progressive, through certain and permanent advantages of *internal* commerce, were, for a season, neglected and forgotten, and the canal companies were left to languish; many years elapsed; until, at length, the outrages committed by foreign nations upon the property of our commercial citizens taught us the expediency and the necessity of looking at home for those sources of wealth and national greatness which we had persuaded ourselves were to be found exclusively in *foreign* commerce.

Your memorialists regard with inexpressible satisfaction the resolution of the Senate of the United States of the 2d of March, 1807, which required the Secretary of the Treasury to report on public roads and canals. The discussions on that occasion, and the publication of the report of the Secretary, have recalled the public attention to the all-important interests of *internal commerce;* and your memorialists are impressed with a firm conviction that if the countenance and aid of the Government are, in a due degree, extended to those who have engaged, or are willing to engage, in the execution of canals, the United States will, ere long, rival the nations of Europe in works of this description.

Your memorialists further represent that the Legislature of Pennsylvania, actuated by the same patriotic motives which have produced the measures taken by the Federal Government, and regarding those measures as a pledge that its aid would not be withheld by an act of the 2d of April last, united the two canal companies before mentioned, and incorporated your memorialists, and the other stockholders therein, under their present title of "The Union Canal Company of Pennsylvania," with increased powers and privileges; and, to enable them to embrace the object of the Federal Government in its full extent, the Legislature have expressly authorized this company to extend the route of their canal so as to communicate with lake Erie, or other waters of any neighboring State.

Since the incorporation of the Union Canal Company your memorialists have engaged themselves in extricating the affairs of the former companies, in organizing the new one, and in forming such plans as, uniting prudence with a due portion of enterprise, will be best calculated to ensure ultimate success. It is their determination to avail themselves of the assistance of practical and scientific engineers; and, having no personal interests to consult in the choice of the route, they will have a single eye to the interests of the public, which must be the interests of the company.

Your memorialists have some grounds for believing that the desired communication between the lakes and the Atlantic can be effected in Pennsylvania with less delay than by any other route, and at less expense. They feel, however, no jealousy of canals projected by their neighbors, but, on the contrary, are desirous of co-operating in the promotion of them, being convinced that, by two or more such communications, the public interests will be better subserved, and no injury or diminution of profit suffered by the individuals or companies who may undertake them.

Your memorialists will not misuse the time and attention of your honorable bodies by adducing facts, or entering into arguments to show the powerful tendency which an easy communication, and frequent intercourse with our Western brethren, would have "to increase union," ensure domestic tranquillity," and "promote the general welfare of the people of the United States;" but, resting the truth of these positions on the broad basis of *universal opinion*, strengthened by what they are persuaded is the sentiment of the enlightened Representatives of the nation, they will content themselves by praying that your honorable bodies will give such aid to the Union Canal Company of Pennsylvania as in your wisdom shall seem proportioned to the usefulness and greatness of their undertaking, and the extensive means and munificence of this great and growing republic.

And your memorialists will ever pray.

CHARLES G. PALESKE, *President.*
JAMES MILNOR, *Vice President.*
G. SIMPSON, *Treasurer.*
WM. MEREDITH, *Counsellor.*
JOSEPH WATSON, *Auditor.*

[NOTE.—See report, No. 313.]

12th CONGRESS.] No. 300. [1st SESSION.

COMPLAINT AGAINST HARRY TOULMIN, ONE OF THE JUDGES OF THE MISSISSIPPI TERRITORY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 16, 1811.

SIR: WASHINGTON, M. T. *November* 20, 1811.

By a resolution of the House of Representatives of the Mississippi Territory, I have the honor to forward to you a copy of a presentment of the grand jury for the county of Baldwin, against Harry Toulmin, Esq., Judge of the Superior Court for the district of Washington. The House over which I have the honor to preside, deeming the charges therein contained worthy of further investigation, has required me to transmit another copy to the delegate of this Territory, to be laid before the House of Representatives of the United States in Congress assembled, accompanied with a transcript of the resolution which gives me the honor of this communication.

With high consideration and respect, I am, sir, your obedient and very humble servant,

COWLES MEAD,
Speaker of the House of Representatives, M. T.

To the Hon. the SPEAKER
Of the House of Representatives of the United States.

To the Honorable Legislative Council and House of Representatives of the Mississippi Territory in General Assembly convened, the presentment of the Grand Jury of Mississippi Territory for Baldwin county to the Legislature of the Territory:

We, the grand jury in and for the county aforesaid, do represent unto your honorable body that we hold the pure and impartial administration of justice the firmest bond to secure the cheerful submission of a free people to their Government; and whenever an individual, who has been clothed with the office of a judge to effect this object, has betrayed the trust confided in him by the Government, and oppressed the people, it becomes the absolute duty of the unfortunate citizens, over whose lives, liberty, and property he may ultimately decide, to represent his nefarious conduct to that body who can, with the whole voice of the Territory, call on that tribunal who has the power, constitutionally placed in them, to examine the conduct of such officer, and to deprive him of that office if found guilty. As such, we, as the grand jury of our country, the guardians of our fellow-citizens' lives, liberty, property, and reputation, do most solemnly call the attention of your honorable body to the conduct of H. Toulmin, Esq., who has presided ever since the year eighteen hundred and five, as judge of the superior court for Washington district. Although he has not scrupled to prostitute his dignity, and betray the sanctity of his office, decency and truth shall alone guide the way in our presentment.

We present the following acts of his mal-administration:

1st. Making decisions in vacation, and at the next term having them made a matter of record.

2d. Uniting in himself the character of judge and party, in making a challenge of a juror.

3d. Acting partially in his office as judge of the superior court for Washington district.

4th. For having refused an unfortunate prisoner, when on his trial, to consult with his counsel, or his counsel with him, in private; declaring that there should be no secrets, but what advice was to be given should be given in open court.

5th. For having ordered the Attorney General for Washington district to file an *ex officio* information against a citizen of this country for a capital offence, in violation of the constitution of the United States.

6th. For having ordered a jury to find a citizen of this country guilty, after they had returned their verdict of not guilty to the court.

7th. For having established a rule of court for the district of Washington, that no person shall dismiss a suit, except in open court, and that with leave of the same.

8th. For having holden a court of examination in the garrison of Fort Stoddard, and examined witnesses at the point of the bayonet.

9th. For having carried on a verbal as well as a written correspondence and intercourse with the Government of Spain, heretofore exercised in West Florida, with intent to influence the conduct of the said Government in relation to the dispute with the United States, as to the sovereignty of West Florida, and to defeat the measures of the Government of the United States.

WILLIAM BUFORD, *Foreman*,

REPRESENTATIVES' CHAMBER, *November* 18, 1811.

Resolved by the House of Representatives of Mississippi Territory in General Assembly convened, That the Speaker of this House be requested, without delay, to forward three copies of the presentment of the grand jury of Baldwin county, made to this House against Harry Toulmin, Esq., Judge of the Superior Court for Washington district, one copy to the Speaker of the House of Representatives of the United States, one copy to the President of the United States, and one copy to the honorable George Poindexter, our delegate in Congress, together with a transcript of this resolve, to be by him laid before the House of Representatives of the United States in Congress assembled, for their consideration.

COWLES MEAD,
Speaker of the House of Representatives.
Attest: THOS. B. REED, *Clerk.*

12th Congress.] No. 301. [1st Session.

ADMISSION OF THE MISSISSIPPI TERRITORY INTO THE UNION.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 17, 1811.

Mr. Poindexter made the following report:

The committee, to whom was referred the memorial of the Legislative Council and House of Representatives of the Mississippi Territory, and the petition of sundry citizens thereof, praying to be admitted into the Union of the United States, on an equal footing with the original States; and also the petition of the inhabitants of West Florida, setting forth their desire to be annexed to said Territory, for reasons therein contained, have had these subjects under consideration, and beg leave to submit the following report:

That there has existed in the Mississippi Territory a temporary Government, founded on the ordinance for the government of the Territory northwest of the river Ohio, since the eleventh day of April, one thousand seven hundred and ninety-eight. That, although this ordinance has undergone some modifications, extending, in a limited degree, the rights and privileges of the citizens, it still contains provisions incompatible with political liberty, and unfavorable to a due and impartial administration of justice, in the redress of private wrongs and injuries. The chief Executive Magistrate is charged with the execution of the laws; is commander-in-chief of the militia; has the sole power of appointment to offices, civil and military, within the Territory, and the removal of these officers at pleasure; is vested with an unqualified *veto* on all bills passed by the other co-ordinate branches of the Legislature; and is, moreover, clothed with the odious and arbitrary authority to prorogue and dissolve the General Assembly whenever, *in his opinion*, it shall be expedient. These high and regal prerogatives, constituting some of the most obvious characteristics which distinguish an absolute monarchy from the constitution of a free State, are confided to the discretionary exercise of a Governor, who is neither chosen by, nor responsible to, the people. He is often a total stranger to the local interests and circumstances of the country over which he possesses such unlimited control, and is accountable only for mal-conduct or corruption in office to the President of the United States. The only security which exists against the frequent and wanton abuse of these powers is to be found in the mild and conciliatory disposition uniformly manifested by the General Government towards its Territories. But experience has shown that, in all colonial Governments, officers situated at a remote distance from the tribunal to which they are responsible, too frequently "feel power and forget right;" and, by eluding the vigilance of rigid investigation, are enabled to practise acts of oppression with impunity.

Your committee forbear to enter minutely into an examination of the various objections which might be urged against the present system of Territorial Governments.

The above summary of Executive powers, so opposite in their nature to those principles which form the basis of the Federal constitution, and which are transfused through the constitution of the several States, is sufficient to show that the people are deprived of all participation in the choice of those who administer the laws, and that public functionaries are rendered independent of the community whose interests are confided to their management and discretion. These restrictions on the rights of the people can be justified only by the most evident necessity, resulting from peculiar and unavoidable circumstances. Your committee, therefore, consider it an act both of strict justice and sound policy to advance the respective Territories of the United States to the grade of a separate commonwealth, whenever they shall contain the number of inhabitants necessary to entitle them, under the ratio established by law, to a Representative in the Congress of the United States. On the subject of population there exists no difficulty, whether the Territory be taken in connexion with West Florida or with its present limits. From the official returns of the census, taken during the summer of the past year, it appears that there were, in the Mississippi Territory, the number of forty thousand three hundred and fifty-two souls. This enumeration, it is alleged, fell considerably short of the actual population of the Territory at that time; and, without casting the most remote censure on the officers who were employed in that service, such a suggestion is strongly supported by the vast extent of country over which the settlements are dispersed. It also appears to your committee that the progressive emigration from the old States to this section of the Union, added to the length of time which it will require to form a constitution, and put the same in operation, afford satisfactory pledges that, anterior to the final admission of the Territory to the rights of State sovereignty, the number of its inhabitants will amount to at least sixty thousand, whereby they will possess the unqualified right, in conformity with articles of cession and agreement between the United States and Georgia, to be admitted into the Union on an equal footing with the original States.

This view of the subject is presented without reference to the augmentation of population, which would result from the annexation of West Florida; in that event the number of souls in the Territory, exclusive of the county of Madison, which lies near the Great Bend of Tennessee river, may be estimated at about eighty thousand; and from the geographical situation of the territories belonging to the United States, south of the State of Tennessee, and north of the Iberville and the lakes, your committee feel satisfied that an alteration of limits, so as to include the whole population between the Yazoo and the Iberville, where they unite with the river Mississippi, and from these points respectively, east, to the boundary line of the State of Georgia, would greatly contribute to the future convenience and prosperity of the people who reside in that country.

At a very early period after the treaty of 1763 between France and Great Britain, by which the latter became possessed of the Floridas, the jurisdiction of the province of West Florida was extended north, by a line drawn from the mouth of the Yazoo due east to the river Chatahouchy. The Government of Spain, also, when that power succeeded to the possession of the country, by conquest, in the year 1781, continued to exercise authority over it in the same extent which the British Government had previously done until, by the treaty concluded between the United States and Spain, on the 27th day of October, 1795, the southern boundary of the United States was declared to extend to the thirty-first degree of north latitude. The Government of the United States, by the treaty of 1803, with France, having acquired Louisiana in the extent that France then held it, and that it had in the hands of Spain, prior to the treaty of St. Ildefonso, there does not seem to be a reasonable doubt as to the claim of the United States to the country east of the Mississippi, as far as the river Perdido, which lies between Mobile and Pensacola.

Your committee, therefore, conceive that, insomuch as the entire tract of country formerly possessed by Great Britain, under the name of West Florida, and subsequently transferred to Spain, as forming a part of Louisiana, has fallen under the dominion of the United States, it ought, in strict propriety, to be restored to its ancient limits, as the measure corresponds with the wishes, and is calculated to promote the permanent welfare of the people, whose interests are immediately concerned. It is assuredly the incumbent duty of the General Government to make such a partition of its Territories on the waters of the Mississippi, as will combine with local advantages

a due regard to national policy. These essential objects cannot, in the opinion of your committee, be secured without a suitable division of the seacoast, acquired by the purchase of Louisiana. It must be obvious, that, to confer on the State to be formed of the Territory of Orleans, the whole extent of seaboard from the river Perdido to the Sabine bay, would give to it an influence over the commerce of the Western country which might be productive of the most mischievous consequences; for, although the legislative authority of the State could impose no tax or duty on articles exported from any other State, yet there are many important regulations which would materially affect the navigation of the numerous rivers flowing through this country into the Gulf of Mexico, falling within the legitimate range of State powers; among these may be enumerated the incorporation of navigation companies, and appropriations of the public revenue for the purpose of opening canals. Thus, by affording every facility to the trade passing down the river Mississippi to New Orleans, and by interposing vexatious obstructions to the commerce of those rivers emptying into the bay of Mobile and the lakes, that city will become the emporium of all the bulky articles of agriculture, which constituted, in time of peace, the great export trade of the Western States and Territories. The direct tendency of such a monopoly would be to raise the commercial importance of New Orleans at the sacrifice of the best interests of those who inhabit the vast, fertile, and extensive region watered by the Tennessee, the Tombigbee, and Alabama rivers, and their tributary streams, besides many other important rivers, affording outlets through the Mississippi Territory into the lakes Maurepas and Pontchartrain. To guard against these contingences, and to unite a people, whose language, manners, principles, and usages are assimilated, your committee recommend that all that tract of country, of which possession has been taken by virtue of the President's proclamation, bearing date the 27th day of October, 1810, be added to the State to be formed of the Mississippi Territory, whenever the same shall be admitted into the Union as such.

Your committee cannot forbear to express their decided opinion, that where no constitutional difficulty occurs, the formation of new States on the southern extremity of the United States ought not to be delayed. To bind together every portion of the American people by the indissoluble cord of affection, and to perpetuate the integrity of the Union, are considerations paramount to all others which can be presented to the view of the National Legislature.

Let us, therefore, extend to every section of our beloved country a just equality of rights and privileges, that each may enjoy civil, political, and religious liberty, subject to the control of independent local authorities, while the fostering hand of the Federal Government shall protect them in the enjoyment of these blessings from domestic feuds and external violence.

Under these impressions, your committee submit the following resolution:

Resolved, That it is expedient to admit all that tract of country, bounded north by a line drawn due east from the river Yazoo, where it unites with the Mississippi, to the river Chatahouchy, and down said river to the thirty-first degree of latitude, thence along said degree of latitude to a point opposite the river Perdido, thence to the confluence of said last mentioned river, with the Gulf of Mexico, and thence in a direct line through the middle of the lakes Maurepas and Pontchartrain, to the junction of the Iberville with the river Mississippi, and up said river to the above mentioned river Yazoo, into the Union of the United States, on an equal footing with the original States.

[Note.—See report, No. 283.]

12th Congress.] **No. 302.** [1st Session.

REMONSTRANCE AGAINST EXTENDING CERTAIN PATENTS GRANTED TO ROBERT FULTON.

COMMUNICATED TO THE SENATE, DECEMBER 23, 1811.

To the honorable the Senate of the United States of America in Congress assembled, the memorial of Aaron Ogden, of Elizabethtown, in the State of New Jersey, most respectfully showeth:

That your memorialist, having full confidence in certain improvements on Boulton and Watt's steam engine, now patented to Mr. Daniel Dod, of Windham, in New Jersey, did, many months since, make with him a contract for a steam engine upon his improved plan.

That your memorialist did also, about the same time, make another contract for building a suitable boat, to be propelled by the said engine, for the better accommodation of passengers between New Jersey and New York.

That the said machinery and boat are now nearly completed, at a very great expense, already incurred and to be incurred, in fulfilling the said contracts, all which will be chiefly lost and sacrificed, and a very great public accommodation prevented, if your memorialist shall be precluded from the free use of his boat by any law of the United States hereafter to be passed.

That your memorialist has been informed, by persons skilled in this kind of machinery, and himself verily believes, after full examination, that the plan he has adopted will not interfere with any right now secured to Mr. Fulton by any patent or patents which he has obtained under the constitution of the United States; and that if the above patentee should bring suit, under present existing laws, for an interference with any of his said supposed rights against your memorialist, that your memorialist believes that he will be able to prove fully at the trial that the thing which may be alleged to be so secured by the patent, and so interfered with, "was not originally discovered by the said patentee, but that the same had been in use, or had been described in some public work anterior to the said supposed discovery," under which testimony, agreeably to the express provisions of the law of the United States, of the 21st February, 1793, judgment must be rendered for the defendant.

That, if the bill now before the Senate should pass into a law, it will become necessary, under the *third* section thereof, for a defendant *further* to prove that such thing had been in effectual use or operation *within three years next before the time* when a steamboat was first brought into public use by Mr. Fulton; whereby steamboats lawfully built, and constructed at very great expense, and for public benefit, may be totally useless, and lost both to the public and the owners.

Your memorialist will not further transgress, by urging considerations arising from the terms of the constitution, which, in article 1, section 8, makes provision for the exclusive rights of discoveries for the benefit of *inventors* only; from the inferences, in respect to the existing rights of Mr. Fulton, to be drawn from his application for a special law in his favor; from the general nature of retrospective legal provisions; from the public inconvenience in the extension of monopolies; and, finally, from the prescribing a particular mode of trial and proof in favor of particular persons, differing from the mode prescribed in similar cases by the general law of the land.

Your memorialist, entirely confiding that the rights of all the citizens of the United States will be duly considered in regard to the premises, most humbly prays that the bill now before the Senate, and above referred to, may not pass into a law.

And your memorialist, as in duty bound, shall ever pray, &c.

AARON OGDEN.

Personally appeared before me, Caleb Halsted, Jun., mayor of the borough of Elizabethtown, Aaron Ogden, within named, who, having been duly sworn, deposes and says, that the matters herein set forth as his own acts and deeds, are true, and, as far as regards the acts and deeds of others, he believes to be true.

AARON OGDEN.

Sworn before me, at Elizabethtown, New Jersey, this 18th day of December, 1811.

CALEB HALSTED, Jun., *Mayor.*

To the honorable the Senate and House of Representatives of the United States of America in Congress assembled, the memorial of Isaiah Townsend, in behalf of himself and others of the city of Albany, in the State of New York, proprietors of the steamboats Hope and Perseverance, of said city, respectfully showeth:

That your memorialists, in the year 1811, built two boats, at an expense of upwards of fifty thousand dollars, under a conviction that they had a right to navigate the same under the existing laws of the United States; that the said boats have successfully plied between the cities of New York and Albany, on the Hudson river, for the greater part of the last season for the accommodation of passengers.

That a suit has been commenced, in the circuit court of the United States for the district of New York, against your memorialists, by Robert Fulton, of the State of New York, under a pretence that your memorialists have invaded certain patents granted to him from the Department of State, to recover from your memorialists *treble* damages, under the third section of the act of Congress, passed the 17th day of April, 1800; which suit is now pending and undetermined.

That your memorialists, under the full conviction that the said Robert Fulton is not in fact the inventor or discoverer of the mode of propelling boats by steam, have instituted proceedings in the district court of the United States for the district of New York, pursuant to the 10th section of the act of Congress, passed the 25th day of February, 1793, to effect a repeal of the patents granted to the said Robert Fulton; which proceedings are also pending and undetermined: and your memorialists are confident that, upon the trial, they will be able satisfactorily to prove that the said Robert Fulton is not the discoverer or inventor of the mode of propelling boats by steam.

Your memorialists would, therefore, respectfully submit to your honorable bodies the propriety of any legislative interference, while the rights of the said Robert Fulton and your memorialists are thus pending in the competent judicial tribunals of the country, where a fair, full, and impartial investigation can be had under the existing laws of the United States, under which the said patents have been granted. Your memorialists view the application made to your honorable bodies by Mr. Fulton for relief, (if granted to him,) as contravening that sound policy which forbids legislation in particular cases falling within the scope of general laws, as it is introductive of an odious and oppressive favoritism, in subversion of justice and of right.

Your memorialists will conclude, by submitting one other consideration in relation to the bill now pending before the honorable the Senate, for "extending the time of certain patents granted to Robert Fulton," and which to them appears of itself to be a sufficient objection to passing the same into a law. The patents to Mr. Fulton are of recent date, and it is yet to be ascertained (if it shall be decided that Mr. Fulton's patents are valid) whether he will not be fully and amply remunerated at the period of their expiration. And if, at that time, it shall appear that his merit has not been sufficiently rewarded, your memorialists confidently believe that he may then, with a certainty of success, apply to an American Congress, who will ever yield to genius its due, and to merit its reward.

And your memorialists, as in duty bound, will ever pray.

ISAIAH TOWNSEND.

DECEMBER 27, 1811.

12th CONGRESS.] No. 303. [1st SESSION.

NEW YORK CANALS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 23, 1811.

To the Honorable the Senate and House of Representatives of the United States in Congress: The undersigned commissioners of the State of New York respectfully represent:

That, by a law of which they have taken the liberty to transmit an exemplified copy to the President, they are, among other things, directed to make application to the Congress of the United States for their co-operation and aid in making a canal navigation between the Great lakes and Hudson river, which, in the opinion of the Legislature of New York, will encourage agriculture, promote commerce and manufactures, facilitate a free and general intercourse between different parts of the United States, tend to the aggrandisement and prosperity of the country, and consolidate and strengthen the Union.

To these powerful incentives we feel it a duty to add our conviction that, in a fiscal point of view, this object is not unworthy of public regard, seeing that, by a good navigation from the lakes to the ocean, and by that alone, the speedy sale of, and payment for, many million acres of the public lands can be effected.

We might add other considerations, but, as doubts may, in course of the business, arise, and explanations be required, we have deemed it advisable to depute two of our members, De Witt Clinton and Gouverneur Morris,

* * * * * * *

to be the bearers of this application to the seat of Government, with instructions to enter, from time to time, into all needful expositions.

We crave, on the part of the State of New York, the credence and favorable notice of their representations.

And, as in duty bound, shall ever pray.

GOUVERNEUR MORRIS,
DE WITT CLINTON,
SIMEON DE WITT,
W. NORTH,
THOMAS EDDY,
ROBERT R. LIVINGSTON,
ROBERT FULTON,
PETER B. PORTER.

[NOTE.—See report, No. 313.]

12th CONGRESS.] No. 304. [1st SESSION.

NEW YORK CANALS.

COMMUNICATED TO CONGRESS, DECEMBER 24, 1811.

WASHINGTON, *December* 23, 1811.

To the Senate and House of Representatives of the United States:

I communicate to Congress copies of an act of the Legislature of New York, relating to a canal from the Great lakes to Hudson river. In making the communication I consult the respect due to that State in whose behalf the commissioners appointed by the act have placed it in my hands for the purpose.

The utility of canal navigation is universally admitted. It is not less certain that scarcely any country offers more extensive opportunities for that branch of improvements than the United States; and none, perhaps, inducements equally persuasive, to make the most of them. The particular undertaking contemplated by the State of New York, which marks an honorable spirit of enterprise, and comprises objects of national, as well as more limited importance, will recall the attention of Congress to the signal advantages to be derived to the United States from a general system of internal communication and conveyance, and suggest to their consideration whatever steps may be proper, on their part, towards its introduction and accomplishment. As some of those advantages have an intimate connexion with arrangements and exertions for the general security, it is at a period calling for these, that the merits of such a system will be seen in the strongest lights.

JAMES MADISON.

AN ACT to provide for the improvement of the internal navigation of the State: Passed April 8, 1811.

Whereas a communication, by means of a canal navigation, between the Great lakes and Hudson river will encourage agriculture, promote commerce and manufactures, facilitate a free and general intercourse between different parts of the United States, and tend to the aggrandisement and prosperity of the country, and consolidate and strengthen the Union: Therefore,

I. *Be it enacted by the people of the State of New York, represented in Senate and Assembly*, That Gouverneur Morris, Stephen Van Rensselaer, De Witt Clinton, Simeon De Witt, William North, Thomas Eddy, Peter B. Porter, Robert R. Livingston, and Robert Fulton, shall be, and hereby are, appointed commissioners for the consideration of all matters relating to the said inland navigation; and in case of the resignation or death of any of the said commissioners, the vacancy shall be supplied by the person administering the Government of this State.

II. *And be it further enacted*, That the said commissioners, or a majority of them, shall be, and hereby are, empowered to make application in behalf of this State to the Congress of the United States, or to the Legislature of any State or Territory, to co-operate and aid in this undertaking, and also the proprietors of the land through which such navigation may be carried, for cessions or grants to the people of this State, to be received by the said commissioners in their discretion; and also to ascertain whether loans can be procured on advantageous terms, on the credit of this State, for the purpose aforesaid, and the terms on which the Western Inland Lock-navigation Company would surrender their rights and interests to the people of this State.

III. *And be it further enacted*, That the said commissioners shall be, and hereby are, empowered to employ engineers, surveyors, and such other persons as, in their opinion, may be necessary in order to enable them to fulfil the duties imposed on them by this act, and to pay them, for their respective services, such sums as may be reasonable.

IV. *And be it further enacted*, That the said commissioners shall, and they are hereby required to report to the Legislature, at their next session, an account of the whole of their proceedings.

V. *And be it further enacted*, That the Treasurer shall pay to the order of a majority of the said commissioners, out of any moneys in the Treasury, not otherwise appropriated, any sum or sums not exceeding $15,000, and for which the said commissioners shall account to the Comptroller of this State.

[NOTE.—See report, No. 313.]

12th CONGRESS.] No. 305. [1st SESSION.

APPROVAL OF THE MEASURES OF THE FEDERAL GOVERNMENT BY PENNSYLVANIA.

COMMUNICATED TO CONGRESS, DECEMBER 27, 1811.

WASHINGTON, *December* 27, 1811.

To the Senate and House of Representatives of the United States:

I lay before Congress copies of resolutions entered into by the Legislature of Pennsylvania, which have been transmitted to me with that view by the Governor of that State, in pursuance of one of the said resolutions.

JAMES MADISON.

The present is a period replete with national occurrences as momentous as ever marked the annals of the world. That collision of kingdoms and empires, which has deluged Europe with blood, borne down the practice, and nearly extinguished the principles of justice and humanity, is not, in its effects, confined to that unhappy quarter of the globe. The unparalleled prosperity, the enterprising spirit, and the expanding commerce of the United States of America have rendered them, to the two mighty belligerents, an object of envy and a medium of retaliation, pretended as to one, and iniquitous in both.

The Emperor of the French has yet much to do before the just claims of our country can be satisfied. But he has annulled those decrees which were the only legal obstruction to a friendly and commercial intercourse with his dominions. He has annulled those very decrees on which the British Government solemnly declared its orders in council to be suspended. To the British Government and to the world he has evinced the extinguishment of those decrees by the united evidence of solemn profession and uniform practice. But have the orders in council expired with the French decrees? No. Compared with their prior, their subsequent operation has been as life from the dead. They have been executed with redoubled rigor. Our seamen are impressed, our citizens robbed, our flag prostrated, our own waters infested, our coasting trade annoyed, our harbors blockaded.

While maritime oppression has thus risen to its summit, an envoy extraordinary is sent to our Government, not (as might have been reasonably expected) to soften our irritated country by conciliatory language; not to offer atonement for offences, and indemnifications for wrongs that are past: these, with a single exception, he passes over as things beneath the notice of the British Government or its envoy, or as injuries to which the inexhaustible forbearance, the presumed timidity, or the abject debasement of the American Government would ensure her silent submission. He commences a new species and system of insult. He prescribes to the President what he shall recommend, and what the National Legislature shall enact. He demands a law which shall admit the products and manufactures of Great Britain into the ports of the United States, although American manufactures are, even in time of peace, excluded from the British dominions. He commands the American Government to procure of Napoleon an abandonment of his continental system, and the admission of British products and manufactures into his own and the ports of his allies. A compliance with the first of these demands is a relinquishment of sovereignty; to fulfil the latter, the United States have neither right, nor power, nor the folly to attempt. The first is degrading, the second impossible. And yet a submission to these royal mandates is menacingly declared to be the only condition on which the orders in council shall be repealed, and the violation of our neutral rights discontinued.

Solemnly impressed with these considerations, and contemplating demands so unjust, so unreasonable, so disrespectful to the intelligence, and so insulting to the sovereignty of an enlightened, free, and independent people, therefore,

1. ***Resolved, by the Senate and House of Representatives of the Commonwealth of Pennsylvania in General Assembly met,*** That the policy of the British Government, as exhibited by her naval power on the high seas, and expressed by her envoy near the United States, merits the reprobation, and cannot but arouse the virtuous indignation of every friend to this country and its Government.

2. ***Resolved,*** That, when submission or resistance to the unjust demands of a tyrant is the alternative, the latter only can be chosen by the freemen of America.

3. ***Resolved,*** That, though we would rejoice in that adoption and practice of justice which would secure to Great Britain and to the world our friendship and friendly intercourse, we will, in order to repel aggression and obtain reparation, vigorously exert all the powers which we possess to accelerate the accomplishment of such military preparations as the wisdom of our National Legislature may require.

4. ***Resolved,*** That it is our duty as legislators to employ a suitable portion of the finances of this Commonwealth in promoting the growth and prosperity, and in securing the permanence of our infant manufactures: that, as individuals of the community we will, as much as possible, abstain from wearing any thing in our apparel that is not the product of these manufactures, and that we will recommend the same patriotic practice to our constituents.

5. ***Resolved,*** That the question merits serious consideration, whether, in order to suppress the system of plunder and impressment on the high seas, it would or would not be a just, humane, and efficient retaliation to lay hold on property of the British Government or of its subjects, whenever such property can be found to an amount sufficient to indemnify the plundered American; and, for every impressed American citizen, to seize a subject of His Britannic Majesty, wherever such subject can be found, and to subject him to imprisonment and labor, corresponding to the condition of the impressed American on board of a British ship of war.

6. ***Resolved,*** That the wisdom, patriotism, and firmness of the Executive and councils of the General Government entitle them to our perfect confidence, and their measures to our prompt and zealous o-operation; and, in case an appeal to arms should be deemed necessary, we will support them at the risk of our lives and fortunes.

7. ***Resolved,*** That the Governor of this Commonwealth be instructed to transmit an authenticated copy of these resolutions to the President of the United States, with a request that he communicate them to Congress.

JOHN TODD, *Speaker of the House of Representatives.*
P. C. LANE, *Speaker of the Senate.*

IN THE HOUSE OF REPRESENTATIVES, *December* 20, 1811. Read, and agreed to.
Attest: GEORGE HECKERT, *Clerk of the House of Representatives.*

IN SENATE, *December* 14, 1811. Read, and adopted.
Attest: JOSEPH A. McJIMSEY, *Clerk of the Senate.*

PENNSYLVANIA, *ss.*—In the name and by the authority of the Commonwealth of Pennsylvania, Simon Snyder, Governor of said Commonwealth, to all to whom these presents shall come, sends greeting:

Know ye, that James Trimble, whose name is subscribed to the instrument of writing hereunto annexed, was, at the time of subscribing the same, and now is, deputy Secretary of the said Commonwealth, duly appointed and commissioned, and full faith and credit is and ought to be given to him accordingly.

Given under my hand, and the great seal of the State, at Lancaster, this twenty-first day of December, in the year of our Lord one thousand eight hundred and eleven, and of the Commonwealth the thirty-sixth.

SIMON SNYDER.

By the Governor: JAMES TRIMBLE, *Deputy Secretary.*

PENNSYLVANIA, *ss.*—OFFICE OF THE SECRETARY OF THE COMMONWEALTH, *Lancaster, December* 21, 1811.

I do certify, to all whom it may concern, that the foregoing is a true copy of the original, remaining in the said office, amongst the rolls of the Commonwealth. Witness my hand and seal, the day and year aforesaid.

JAMES TRIMBLE, *Deputy Secretary.*

12th CONGRESS.] No. 306. [1st SESSION.

APPROVAL OF THE MEASURES OF THE FEDERAL GOVERNMENT BY THE MISSISSIPPI TERRITORY.

COMMUNICATED TO THE SENATE, DECEMBER 30, 1811.

Resolved by the Legislative Council and House of Representatives of the Mississippi Territory in General Assembly convened, That the embarrassments and difficulties under which the United States have for many years labored have been caused by the injustice of foreign nations and of domestic faction. That the late and present administrations of the General Government have, in our opinions, pursued a wise, impartial, and just cause towards the belligerent powers of Europe, and such as ought to conciliate and unite the affections of every American citizen. That the correspondence just published between the American Secretary of State and Mr. Foster, the British Envoy, afford additional and conclusive evidence of the determination of Great Britain to continue to violate her most sacred pledges, to trifle with the American nation, and to persevere in a course of unjust and hostile measures towards the commerce, the Government, and the honor of the United States. That the late message of the President of the United States to both Houses of Congress breathes the true spirit and feelings of the American people. That we will support the administration of the General Government, in its efforts to obtain justice from offending nations, with our lives and fortunes, and for which we pledge our sacred honors.

Resolved, That the President of the Council and Speaker of the House of Representatives be requested to cause four copies of these resolutions to be made out, one of which shall be transmitted to the President of the United States, one to the President of the Senate, one to the Speaker of the House of Representatives of the United States, and one to our delegate in Congress.

COWLES MEAD,
Speaker of the House of Representatives.
ALEXANDER MONTGOMERY,
President of the Legislative Council.

12th CONGRESS.] No. 307. [1st SESSION.

APPROVAL OF THE MEASURES OF THE FEDERAL GOVERNMENT BY NORTH CAROLINA.

COMMUNICATED TO THE SENATE, DECEMBER 31, 1811.

NORTH CAROLINA, IN GENERAL ASSEMBLY, *December* 19, 1811.

Resolved, That the sentiments contained in the message of the President to the Congress of the United States are such as must gratify the feelings, and advance the welfare of a nation sensible of its rights, and determined to maintain and defend its sovereignty and independence.

Resolved, That the evils which we have been compelled to endure, for years past, have arisen wholly from the unprincipled conduct of the belligerent nations of Europe.

Resolved unanimously, That we will cheerfully co-operate with the General Government in the prompt and effectual execution of such measures as may be deemed best calculated to promote the interest, and secure the union, liberty, and independence of the United States.

JOSEPH RIDDICK,
Speaker of the Senate.
JOHN STEELE,
Speaker of the House of Commons.

I certify that the foregoing is a true copy of the original filed in the Senate office.

M. STOKES,
Clerk of the Senate.

12th Congress.] No. 308. [1st Session.

LIST OF PATENTEES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 21, 1812.

SIR: DEPARTMENT OF STATE, *January* 20, 1812.

In pursuance of the resolution of the House of Representatives of the United States, dated the 13th instant, I have the honor of transmitting a list of the names of persons who have invented any new or useful art, machine, manufacture, or composition of matter, or any improvement thereon, and to whom patents have been issued for the same from this office, from the 28th day of December, 1810, to the 1st day of January, 1812, with the dates and general objects of such patents; and also the residence of the patentees, as far as they could be ascertained.

I have the honor to be, sir, with the greatest respect, your obedient servant, &c.

JAMES MONROE.

To the Hon. the SPEAKER *of the House of Representatives of the United States.*

LIST OF PATENTEES.

Inventions.	When issued.	Names of patentees.	Residence.
	1811.		
A perpetual steam still and water boiler,	Jan. 11	Philo M. Hackley,	Herkimer county, N. York.
In drying fuel for glass furnaces,	14	James Lee,	Philadelphia.
Improved cocks, or locks, for the passage of fluids,	16	Joshua Witherle,	Boston.
A steam pump,	16	Phares Bernard and Timothy Soper.	Whitestown, Oneida co. N. Y.
A water boiler and steam still,	16	Phares Bernard,	Ditto.
A chain float steamboat,	17	Michael Morrison,	Boston.
Improvement in the sleigh,	19	Augustus Day,	Bordentown, New Jersey.
A new power by means of combustion, or combustion and explosion,	19	Augustus Day,	Ditto.
In co-operating frictionless cylinders,	24	John P. Sawin,	Roxbury, Norfolk, Mass.
An expanding and folding wheel,	24	Henry Steward,	Clark county, Indiana ter'ry.
A vat for facilitating and cheapening the tanning of leather and coloring cloth,	24	Nathaniel Burley,	Strafford, New Hampshire.
In the churn,	24	Joseph Beach,	Northfield, Hamp. co. Mass.
In distilling essential oil and spirits,	24	David Jewett,	Pittsfield, Massachusetts.
A cylindrical printing press,	28	John P. Sawin and T. B. Wait.	Roxbury, Norfolk, Mass.
Improved printers' type mould,	29	Archibald Binny,	Philadelphia.
In the water boiler and steam still,	Feb. 4	Borden Wilbor & T. Soper.	Washington county, N. Y.
In making salts by evaporation,	4	Borden Wilbor,	Ditto.
For smoothing or rubbing printers' types,	4	Archibald Binny,	Philadelphia.
In making rims to ladies and tailors' thimbles, without soldering them.	4	Stephen Chandler,	New York.
In forming, heating, removing, and using metal plates, in pressing woollen cloths.	6	Volkert Vedder,	Amsterdam, Mont. co. N. Y.
In the cotton gin,	6	Rob't Hancock, Sen., and Ed. W. Carr.	Philadelphia.
In the churn,	7	Lewis Cleveland,	Holliston, Middlesex, Mass.
In making ardent spirits out of the juice of Southern corn-stalks, called the horse tooth, or Virginia corn.	7	John Sanders,	Schenectady, New York.
A machine for cutting nails or brads,	8	John P. Sawin and J. Skinner.	Roxbury, Norfolk co. Mass.
For constructing boats or vessels which are to be navigated by the power of steam engines.	9	Robert Fulton,	New York.
A threshing machine,	9	James W. Walker,	Wilmington, N. Carolina.
A steam still,	9	Samuel Bacon,	Lanesborough, Massachusetts.
An elevator for the use of the sick,	15	Jonathan Elliot,	Newbury, Essex co. Mass.
A descending saw-mill,	15	Stephen Belknap and Samuel Merrill.	Georgetown, Washington, D. [C.
In the double forcing pump,	19	William Beach,	Franklin, Delaware co. N. Y.
In propelling boats and vessels by horses,	19	Salmon Fuller,	Clark county, Indiana ter'ry.
In the double forcing pump,	20	Thomas Ferris,	Dutchess county, N. York.
A mode of producing what he calls Columbian oil.	23	Thomas Paul,	Baltimore.
A mode of preserving and defending wood immersed in salt water, from the attacks or injuries of that species of worms which is generally found destructive at sea, &c.	23	Robert Lloyd Nicolls,	Easton, Talbot co. Maryland.
In the steam engine called the vaporeum machine.	25	James Stubbs & Nat'l Parsons.	Chilicothe, Ross co. Ohio.
In the saw-mill,	26	Miles H. Abbot.	
For cutting and gathering grain and grass,	26	John Comfort,	Bucks county, Pennsylvania.
In andirons and fire places,	26	John Sweet,	Berkshire, Massachusetts.
In making flour, starch, and spirit, from wheat or other vegetable matter.	26	Elisha Perkins,	Shrewsbury, Monmouth co. New Jersey.
For shearing cloth,	28	Ezra Willmarth,	Rumney, Grafton, Mass.
In manufacturing straw wove plat,	28	William Pond,	Wrentham, Norfolk co. Mass.
Machine for cutting felloes for wheels,	28	Joseph Goulding,	Leicester, Massachusetts.

LIST OF PATENTEES—Continued.

Inventions.	When issued.	Names of patentees.	Residence.
	1811.		
In the forge and trip hammer,	Mar. 1	Joseph Goulding,	Leicester, Massachusetts.
In mills,	1	Joseph Goulding,	Ditto.
In training and breaking horses,	1	Townsend Cock,	New York.
A machine for cutting wooden screws, &c.	1	Rob't Hancock, Sen., and Ed. W. Carr.	Philadelphia.
Reverting wheels, for various purposes,	1	Otis Paine,	Foxborough, Norfolk, Mass.
In the condensation of vapors in distillation,	2	Noel Blanche,	New York.
A tide mill wheel,	2	Dexter Wheeler,	Bristol, Massachusetts.
In the stove,	2	William Watson,	Weymouth, Gloster co. N. J.
A machine for rubbing out clover,	2	Nehemiah Price,	Frederick county, Maryland.
In chain paddles for propelling boats,	2	Azael Pierson,	Cumberland county, N. J.
A machine for hulling rice,	2	Sherman Dewey,	Hartford, Vermont.
For shearing cloth,	2	Benjamin Cummings,	Palmer, Hampshire co. Mass.
In the application of slate to various uses,	2	William Sheldon, Jun.	Springfield, Massachusetts.
In distilling,	2	Jacob Miller,	Lancaster county, Penn.
In warming rooms,	4	Barzillai Russell,	Hartford, Connecticut.
A machine for shearing cloth,	4	George C. Killogg,	New Hartford, Litchfield, Ct.
A water loom,	4	Thomas Mussy,	Philadelphia.
A reverse impelling pump, being a double forcing pump.	7	Levi Gray,	Otsego county, New York.
In planking and felting hats,	7	Israel Swan,	Haverhill, New Hampshire.
In the pump for raising water,	9	Pliny Upham,	Brookfield, Worcester, Mass.
The subignis air draught,	12	Samuel Randall,	Providence, Rhode Island.
A machine for cutting sausage meat, &c.	19	George Neff,	Dauphin county, Penn.
A fire cavern,	20	Abraham Quincy,	Boston.
In fire places,	20	Peter Sternberg,	Montgomery county, N. Y.
A bark mill,	20	Luther Gale,	Berkshire county, Mass.
A horizontal bellows wind wheel, which, by reversing the wheel, may be applied to water.	21	Daniel Van Voorhis,	Long Island, New York.
In the condenser,	26	Lyman Cook,	Whitestown, Oneida co. N.Y.
A churn,	28	Harry Mumford,	Ulster county, New York.
A threshing machine,	28	Rulef C. Van Houton,	New York.
In four wheel carriages, to be moved by manual labor.	28	Lyman Cook,	Whitestown, Oneida co. N.Y.
For straining and grinding cards,	30	John Boynton,	Windham county, Conn.
A mode of casting large iron rollers for rolling iron, &c.	30	Cyrus Algier,	Boston.
A nail machine for making wrought nails and spikes, or drawing small iron into any form.	April 8	Abiather Eastman,	Norway, Oxford co. Mass.
A stave and shingle machine,	10	William Baley,	Nelson county, Kentucky.
In the form of cossack boots, or rather in the mode of cutting leather for the formation of boots of every description.	10	John Morgan,	Philadelphia.
In tanning leather,	10	Joseph Barker,	Deerfield, Oneida co. N. Y.
In making gin,	10	Erastus V Freeman.	
In the lee-board,	10	J. Swain, H. Swain, & Joshua Swain.	Cape May court-house, N. J.
In saw-mills,	15	Oliver Evans,	Philadelphia.
For vibrating nail plates while cutting,	16	Joseph Bernard,	Troy, New York.
In distilleries and kitchen ranges,	18	William Gamble,	Washington City, D. C.
A lever purchase machine, for propelling boats, working mills, &c.	24	Shubael Kimball,	Rhinebeck, Dutchess co. N.Y.
A floating machine for supplying ships with fresh water.	25	John F. Randolph,	New York.
In the kitchen stove,	25	Andrew Sherwood,	New York.
For cramping Suwarrow boot legs,	25	Jeremiah Sibley,	New York.
The drum cooking stove,	25	Andrew Sherwood,	New York.
In the spiral water wheel, by balance gates,	25	Benj. Schoolfield and Wm. Stanton.	Lynchburg, Campbell co. Va.
For trimming and pressing straw plait,	26	Daniel Atherton,	Providence, Rhode Island.
A flax and hemp break,	26	Edward Rumsey,	Christian county, Kentucky.
For shearing cloth,	30	Jesse Molleneux,	Hempstead, New York.
A shearing machine,	May 2	Eleazer Hovey,	Canaan, Columbia co. N. Y.
For rasping or sawing dye woods,	3	Samuel Stone,	Enosburg, Franklin co. Vt.
A churn,	3	Daniel Robinson,	Franklin, Delaware co. N. Y.
In distilling,	3	Andrew Dunlap,	Boston.
A mode of working a water wheel, by raising and lowering it in a current or tide.	4	Mark Andrews,	Kennebeck, Massachusetts.
In manufacturing bricks,	7	James Gregg,	New Hampshire.
Machine for cutting off the ends of bolts, &c.	8	John Rewey,	Berkshire, Broome co. N. Y.
A vertical balance wheel nail-cutting machine,	8	Ebenezer A. Lester,	Herkimer, New York.
For weighing hay, live cattle, &c.	10	Thomas Armat,	Philadelphia.
In the bodies of carriages called the standing roof landau.	10	Edward Gibson,	New York.
A writing instrument,	11	Ezra L. Miller,	Charleston, South Carolina.
A perpetual steam still,	15	John James Jiraud,	Baltimore.
In breaking hemp and flax,	16	John C. Johnston,	Fayette county, Kentucky.
In fire-arms,	21	William Thornton & John Hatkill.	Washington City.
In constructing steam engines for propelling boats.	21	John Stephens,	New York.
A spring for fastening window sashes,	22	John Ballthorpe.	
A washing machine,	23	David Dungan,	Upperville, Loudoun co. Va.

LIST OF PATENTEES—Continued.

Inventions.	When issued.	Names of patentees.	Residence.
	1811.		
In saw-mills,	May 24,	Marshall Lewis,	Chenango, Broome co. N. Y.
A machine for dressing mill-stones,	24,	Charles Woolverton & B. Ridgway, Jun.	Morris Villa, Pennsylvania.
In suspenders, &c.	25,	Henry Burke,	Bucks county, Pennsylvania.
In the carding machine,	25,	Heman Palmerler,	Shoreham, Addison county.
In cutting fur from peltry,	28,	Joshua Witherle,	Boston.
A horizontal water wheel,	29,	John Osborn, Jun.	Litchfield, Connecticut.
Being a double suspender spring,	29,	Benajah Wolcot,	Danbury, Huron co. Ohio.
Machine for shaving shingles, &c.	30,	Daniel Parker & John Sanford.	Sharon, Litchfield co. Con.
In working certain ores,	30,	Vincent King & Jeremiah King.	Bellair, Harford county, Md.
A water blast,	June 6,	Joseph Ruggles,	New Milford, Litchfield, Ct.
In sawing and polishing marble,	7,	Luther Bissel,	Otsego county, New York.
A machine for moving two water-wheels at the same time.	7,	Luke C. Hinman, L. Bissel, & M. Barnes.	Ditto.
A composition for mending china, glass, &c.	10,	Harvey Bascom,	Weston, Massachusetts.
In shears for shearing woollen cloth,	11,	William Stillman,	Westerly, Rhode Island.
In the steam kitchen for baking, &c., &c.,	11,	Samuel Smith,	Herkimer county, N. York.
In chair bottoms,	12,	Abner Ellis,	Dedham, Norfolk co., Mass.
In distilling,	14,	John James Giraud,	Baltimore.
A distilling and refining apparatus,	17,	Jacob Sherer and Abr. Killian,	Lancaster, Pennsylvania.
A fanning mill for cleaning grain,	18,	Thomas W. Jessup,	Fredericktown, Maryland.
Machine for shaving, jointing, and forming the staves and heads of barrels, &c.	20,	Barnabas Langdon & William Mowry,	Washington co., New York.
A steam stove for roasting, boiling, and baking,	21,	Josiah Noyes,	Herkimer co., New York.
The family cotton spinning machine,	22,	John George Baxter,	Philadelphia.
In preparing and packing quincitron or black oak bark or other barks for exportation.	July 1,	Joseph Lyon,	Philadelphia.
A balance bridge,	1,	Jonathan Jessop,	Yorktown, Pennsylvania.
For spinning and winding rope yarn,	2,	Christ'n Bergh and Peter Shermerhorn, Jr.	New York.
In the forge bellows,	8,	Charles McMurtry,	New Marlborough, Mass.
For breaking hemp and flax,	13,	Robert Miller,	Lexington, Kentucky.
In medicine cases,	16,	Allen Harrington,	Otsego county, New York.
A pendulum steam engine,	18,	John Staples,	Richmond, Virginia.
In kiln drying corn and malt, &c.	18,	John Hughson,	Clinton county, New York.
A machine for chopping meat or any other substance fine.	19,	Haziel Smith,	Philadelphia.
An improved accelerating wheel head,	20,	Archelaus Putnam,	Philadelphia.
In horizontal wooden springs for carriages,	22,	Leonard Sommer,	Downington, Chester co., Pa.
A flax and hemp break,	23,	Jacob A. Dana,	Casanovia, Madison co., N. Y.
A machine for making sacket and sand shovels,	23,	Jonathan Righter,	Downington, Chester co., Pa.
In the still and condenser,	25,	Richard Sealy,	Newark, New Jersey.
In tanning,	30,	Wm. Hollingsworth,	Elkton, Maryland.
In boot and shoe making,	30,	Samuel B. Hitchcock and John Bement.	Homer, Cortland co., N. Y.
A wear for catching fish,	Aug. 14,	Hawley Emerson,	Hancock.
In cutting and heading nails,	14,	Jessee Reed,	Kingston, Plymouth co., Mas.
In mill stones,	15,	William Miller,	Lampter, Lancaster co., Pa.
For picking wool, &c., called the wool picker,	15,	Michael Morrison,	Boston.
A perpetual lime kiln,	17,	William Gorsuch,	Baltimore.
In the sea motion pump,	19,	Bennet Lies,	New York.
In varying the motion of a plough,	20,	John Sanford,	Sharon, Litchfield co., Conn.
In weaving,	20,	Nathaniel Miller and Philip W. Miller.	Franklin, Norfolk co., Mass.
A mode of propelling carriages by steam,	21,	Charles Reynolds,	East Windsor, Connecticut.
A mode of ripening and keeping malt liquor and cider.	22,	Robert Hare,	Philadelphia.
In the electrophorus,	23,	David F. Launy,	Philadelphia.
In the water wheel,	28,	Abraham Lands,	Georgetown, Columbia Dist.
A double spring angular truss,	30,	Theodore Hart,	New York.
In constructing and working pumps for the use of ships, &c.	30,	And'w Henshaw and Nathan. Harlow, Jr.	Bangor, Hancock co., Mass.
In stills and boilers,	Sept. 2,	Jacob Decker,	Green, Shenango co., N. Y.
A drying house for drying fruit, &c.,	2,	Stephen Strong,	Wilks township, Gallia co., O.
In manufacturing inkstands of stone,	3,	Abraham H. Quincy,	Boston.
A water wheel,	5,	Joseph Atkinson,	Amherst, Massachusetts.
In the common plough,	7,	Nicholas Turbutt,	Fredericktown, Maryland.
A horizontal pump,	10,	Luther Holland,	Belcherton, Hampshire, Mas.
For spinning wool and cotton, &c., called the pleasant spinner.	10,	Daniel Read,	Brookfield, Madison c., N. Y.
A horizontal vibrating churn,	12,	Thomas Pratt,	Cheshire county, N. Hamp.
In stills,	19,	Henry Wittmer,	Lancaster, Pennsylvania.
In looms,	25,	Nathaniel Perry,	Boston.
In propelling boats by steam,	27,	James Rodgers,	Albany, New York.
In stoves,	27,	Thomas Power,	New York.
A crank loom for weaving all kinds of cloth,	27,	Ephraim Cutter,	Walpole, New Hampshire.
In tanning,	30,	Alexander H. Avery,	Bennington, Vermont.
A churn,	Oct. 1,	Joseph H. Shepard,	Canaan, Somerset co., Mass.
In the press, for pressing cotton, hay, &c.,	2,	Moses Jaques and H. Freeman.	Woodbridge, Mid'x co., N. J.
For drawing and spinning wool,	4,	William Humphreys,	Humphreysville, N. Hav. C.
A trip hammer,	5,	Josiah Beal,	Ontario county, New York.

LIST OF PATENTEES—Continued.

Inventions.	When issued.	Names of patentees.	Residence.
	1811.		
A pendulum mill,	Oct. 9,	Solomon Thayer,	Braintree, Norfolk co., Mass.
For cutting files,	10,	Ernst Gehbe,	Northampton county, Penn.
In manufacturing fine salt from coarse,	11,	Charles W. Sellers,	Alexandria, Columbia Dist.
For breaking, swingling, and beating hemp and flax.	15,	William Harper,	Richmond, Virginia.
In circular boilers,	15,	Jonathan Sizer,	New London, N. Lon.co.Ct.
A wooden screw press for packing cotton, wool, &c.	17,	Jacob Pierson,	Knoxville, Knox co., Tenn.
In cutting and manufacturing boot legs,	21,	John Vernon,	Baltimore.
In breaking and swingling hemp and flax,	24,	Archibald Tanner,	Trumbull county, Ohio.
Improvement in his patent fireplace,	28,	Peter Sternberg,	Montgomery county, N. Y.
In the mode of washing white lead,	29,	Samuel Wetherill, Jr.	Philadelphia.
In setting the beds or stacks (by admission of air) in making white lead.	29,	Ditto,	Philadelphia.
In screening and separating *in water* the corroded parts of lead from the uncorroded parts, in the process of making white lead.	Nov. 1,	Ditto,	Philadelphia.
A machine for separating the oxidated from the metallic lead, in the process of manufacturing red lead, and of the manner of using the machine:	1,	Ditto,	Philadelphia.
A water wheel,	2,	Elisha Mack,	Sheffield, Massachusetts.
In casting metallic boxes or centres of shieves or trundles for pulleys:	4,	Lebbeus Larrabee,	Nantucket, Massachusetts.
A machine for basining, hardening, and steaming hats.	6,	Jonathan Sizer,	New London, N. Lon. co., Ct.
A machine for boring posts,	7,	Anthony Butler,	Vermont.
In the process of making sulphuric acid,	7,	Benjamin Bell,	Boston.
For cutting wheat and other small grain,	8,	Wm. P. Claiborne,	King William county, Va.
A balance water gate,	12,	William Maher,	Rome, Oneida county, N. Y.
A mode of distilling ardent spirits by one operation:	13,	Jonathan Shaw,	Palmer, Hampshire co., Mass.
A hot heading nail machine for cutting and heading nails.	14,	Mark Reeve & Richard Reeve.	Philadelphia.
A mode of welding or uniting scrap iron or steel preparatory to forming it into bars, &c., by the forge hammer, and of effecting the same by pit coal in its crude state, without the use of coke or charcoal.	15,	Benjamin King,	Navy Yard, Washington C.
An elevating aqueduct or water conductor, being an improvement of Clapp's crank engine.	16,	Joseph Clapp,	Greenfield, Massachusetts.
A descending air flue, with the chimney pipes, &c., in which it is to be used.	19,	James Macomber,	Greenwich, Wash. co., N. Y.
On his former improvement in fireplaces,	19,	Peter Sternberg,	Montgomery county, N. Y.
A compound lever & parallel shaft nail machine,	25,	Robert Turner,	Boston.
In making hats of paper,	25,	Joseph Ford and John White.	Boston.
A churn,	27,	Adam Sheble,	Philadelphia.
In constructing boats and vessels,	29,	Francis Rotch,	New Bedford, Bris.co., Mass.
A loom,	29,	Richard C. Rodgers,	Maine, Massachusetts.
A steam engine,	29,	Daniel Dod,	New York.
A portable kitchen or stove caboose,	Dec'r 3,	James Trueman,	Philadelphia.
A machine for roving and spinning wool and cotton,	3,	Oliver Barrett, Jun.,	Schaghticoke, Renss.co.N.Y.
A distilling apparatus,	4,	Lewis Lecesne,	Belleville, New Jersey.
In the structure of beehives,	9,	Timothy Stanly,	Farmington, Hartford, Conn.

12th CONGRESS.] No. 309. [1st SESSION.

APPROVAL OF THE MEASURES OF THE FEDERAL GOVERNMENT BY NEW JERSEY.

COMMUNICATED TO CONGRESS, JANUARY 22, 1812.

WASHINGTON, *January* 22, 1812.

To the Senate and House of Representatives of the United States:

At the request of the Legislature of New Jersey I communicate to Congress copies of its resolutions transmitted by the Governor of that State.

JAMES MADISON.

LEGISLATURE OF NEW JERSEY, HOUSE OF ASSEMBLY, *January* 13, 1812.

Whereas, in cases of great national concern, involving, in their consequences, the interests, the rights, and the welfare, as well of the future as of the present generation, it cannot fail to be useful and acceptable to those intrusted with the National Government, to be made acquainted with the deliberate opinion of every portion of the Union,

the members of the Legislature of New Jersey, at this momentous crisis in our national concerns, think it a duty incumbent on them publicly to express, as well the sense of the Legislature, as the known feelings and sentiments of the citizens of the State they represent.

In contemplating the convulsive struggles that have, within the last twenty years, broken up the Governments, overturned the ancient landmarks, and carried disorder and distress into almost every quarter of the European world, the citizens of New Jersey have surveyed the destructive progress of this war of ambition on the one side, and of mercantile monopoly on the other, not only as men commiserating the sufferings of others, but with a view to the consequences on the safety and happiness of America. The anxious solicitude manifested by the General Government, to observe an impartial neutrality, in relation to the belligerent nations, has, at all times, met the decided approbation of the Government and citizens of New Jersey.

It was confidently hoped that this line of conduct would have secured to our country the complete observance of the acknowledged laws of civilized nations, or, at least, have protected the persons and property of our citizens from outrageous violence. It was, therefore, not without emotions of astonishment and indignation that they saw the two great belligerent European Powers set at defiance the public law of nations, by commencing a wanton, unprovoked attack upon the property and persons of our citizens on the high seas. This indignation was increased by the insults offered to an enlightened nation in the pretexts assigned as the causes of this violence. The danger and impolicy of waging war against all Europe at once justified the course pursued by the General Government, of remonstrance, negotiation, and commercial restrictions. It has now become a subject of some consolation, that one of the great belligerent nations has receded from her hostility, ceased to violate our neutral rights, made assurance of future amity, and the observance of the laws of nations, and thereby left America a single antagonist to contend with, one against whom she has already measured her strength.

In contemplating the evils inflicted on our country by Great Britain, the Legislature of New Jersey disclaim bringing into calculation the injuries suffered in the revolutionary war; these having been magnanimously buried in the treaty of 1783. Nor do they take into account the alleged instigation of the savages to hostilities on our frontier settlements, the facts not being officially ascertained and declared. They leave out also the insult to the American flag, in the attack on the Chesapeake frigate, that having been amicably adjusted. Nor would they, at this time, think proper to complain of the refusal of Great Britain to accede to the desires of the civilized world, of ameliorating the evils of war, by adopting, as a rule, that free ships make free goods. Even if the controversy between the two countries arose solely out of the interruption of our carrying trade, although they consider that trade founded on a perfect, indisputable right, which ought never to be yielded by treaty, yet policy might suggest the propriety of sleeping over the injuries arising from the deprivation of the exercise of this right for a time.

But the two following causes of complaint, on which America and Great Britain are at issue, are of so unquestionable a nature, as to leave no doubt or hesitation on the mind: First. The abominable practice of impressing native American seamen while in the pursuit of a lawful commerce, forcing them on board their ships of war, and compelling them, under the lash, to fight against nations with whom we are at peace, and even against their own country.

Second. The depredations committed on the legitimate commerce of America, it being now openly avowed by the British Government that an American built ship, owned by the citizens of the United States, navigated by native American seamen, laden with goods, the growth and manufacture of the United States, not contraband of war, bound to a belligerent port, which is neither invested nor blockaded, is subject, by the orders of the British Government, to seizure and condemnation, both ship and cargo; the ruin of individuals, and the destruction of commerce, evidence the rigid execution of these orders.

This flagitious conduct of the rulers of Great Britain needs no comment; it is too notorious to be denied, too palpable to be susceptible of explanation, and too atrocious for palliation or excuse. The answers to the reasonable remonstrances of our Government have only added insults to injuries, by assuming positions at variance with reason, justice, and the public laws; in consequence of which further negotiation becomes idle and vain. It only remains for the constituted authorities of the Union to guide the destinies of a numerous, brave, and powerful nation, by marking out its future course; that, in doing this, they may rely with confidence on the support of New Jersey.

Be it resolved, by the Legislative Council and General Assembly of the State of New Jersey, That, at this important crisis in our national concerns, the Government of New Jersey entertain a full and perfect confidence in the wisdom and integrity of the President, the Senate, and House of Representatives of the United States of America, and hereby most solemnly assure the National Government that New Jersey will readily accord in any measures which it may, in its wisdom, think proper to adopt for the redress of national wrongs. That they cordially approve the recommendation of the President of the United States to both Houses of Congress, admonishing them to put the nation in armor. That, in case the Government of the United States shall eventually determine to resist, by force, the lawless aggressions committed by the British nation on the persons and property of our citizens, this Legislature, in behalf of themselves, and the citizens of New Jersey, whose representatives they are, pledge themselves to the nation to render to the General Government all the aid, assistance, and support in their power, and will, with readiness, perform all the duties required of them in the prosecution of a war undertaken for the common defence and general welfare.

Resolved, That His Excellency the Governor be requested to transmit a copy of the foregoing to the President of the United States, with a request that he would be pleased to communicate a copy to each branch of the National Legislature.

Resolved, That His Excellency the Governor be also requested to transmit a copy to each of our Senators and Representatives in Congress.

Signed by order of the House:

WILLIAM KENNEDY, *Speaker.*

COUNCIL CHAMBER, *January* 17, 1812.

Concurred in by Council.

By order:

CHARLES CLARK, *Vice President.*

SECRETARY'S OFFICE, *January* 18, 1812.

I certify the foregoing to be a true copy.

JAMES LINN, *Secretary of State.*

12th Congress.] No. 310. [1st Session.

APPROVAL OF THE MEASURES OF THE FEDERAL GOVERNMENT BY VIRGINIA.

COMMUNICATED TO THE SENATE, FEBRUARY 3, 1812.

SIR: RICHMOND, VIRGINIA, *January* 29, 1812.

It is with great pleasure I comply with the request of the General Assembly of this Commonwealth, by communicating to you the enclosed preamble and resolutions of that body concerning certain measures of the General Government connected with our foreign relations. You will be good enough to present them to that branch of the National Legislature over which you preside.

I am, with sentiments of very high respect, your obedient servant,

J. S. BARBOUR.

The Hon. the VICE PRESIDENT OF THE UNITED STATES, *Washington City.*

STATE OF VIRGINIA, *January* 25, 1812.

The General Assembly of Virginia have beheld, with deep sensibility, the flagrant violations which the great belligerents of Europe have practised upon the rights of neutrality, as established upon the principles of universal law, and sanctioned by the acquiescence of the whole civilized world for many ages. These violations have driven all the nations of Europe into a war, alike unexampled in its ravages and its consequences; and, whilst the United States have kept out of its vortex, and most scrupulously adhered to the duties devolved upon them, by treating all with equal impartiality, they have, from year to year, indulged the illusive hope that reflection would bring back the aggressors to a sense of justice, and returning reason would ensure to the long violated immunities of the persons and property of their citizens an exemption from the war committed upon them. France has paused in her career of hostility, and thereby afforded to her rival, England, an opportunity of performing her solemn promises without a compromitment of her pride; and it was expected by the Government and people of the United States that the proofs of this pause, presented in an unquestionable shape to the British ministry, would have been promptly followed by a repeal of the orders in council; but fatal experience has produced the painful conviction that in this just expectation they have been mistaken. And, regardless of all principle, the bold avowal has been made by Great Britain, that the permitted admission of her fabrics into the continent of Europe, through neutral vessels, was an indispensable preliminary to the termination of her aggressions; a condition which the United States have no right to demand in relation to the produce of their own soil or manufactures, and which their honor forbids them to demand at the instance and for the benefit of another. With a knowledge of this avowal, and the daily evidence that Great Britain executes her orders in their living spirit, which is war upon us, of the most aggravated species, a further indulgence of hope is allied with disgrace, and forbearance becomes criminal; and although this Assembly confide in the patriotism of the Congress and Executive of the United States to assert the rights of the nation, in the manner its honor requires; and, as regards themselves, this expression of their opinion may be superfluous, yet, influenced by the examples of preceding Legislatures, at times less momentous than the present, and apprehensive that their silence will be misconstrued into indifference or distrust, more especially as the minister plenipotentiary of Great Britain, in his correspondence with the Government of the United States recently published, has opposed, to the act of the Executive, and the evidence on which it was predicated, a presumed disagreement, as to the fact upon which he decided, and the *justice* of the measure that he had adopted, by "all the legal authorities in the United States;" and because we believe the measures of hostility, pursued by the British Government against us, are persisted in, in the belief that we are a divided people, this Assembly declare their conviction to be, that not only "all the legal authorities of this State," but the people, also, from whom the former derive their powers, concur in the sentiment of confidence in the Government of the Union, and a firm resolution to support it in the redemption of its plighted faith, "to maintain the rights, honor, and independence of the United States;" and, actuated by a sacred regard for the constitution and liberties of United America, sanctioned by the wisdom of their fathers, and consecrated with their blood, they will not withhold the testimony of their confidence, and the solemn assurance of their co-operation to meet the crisis with the firmness of men, and the determination of freemen: Therefore,

Resolved, That this Assembly, speaking, as they believe they do, the voice of the people of this Commonwealth, have viewed with approbation the uniform zeal with which just remonstrances have been made by the General Government, for the purpose of obtaining from Great Britain, by honorable negotiation, a redress of the many wrongs inflicted upon us by her orders in council, and other measures equally hostile to the interest of the United States.

Resolved, as the opinion of this Assembly, That, however highly we value the blessings of peace, and however we may deprecate the evils of war, the period has now arrived *when peace, as we now have it*, is disgraceful, and war is honorable.

Resolved, That this Assembly will support the General Government in all constitutional and legitimate measures, which may be adopted in vindication of the rights and interest of the people of the United States, and in support of the character and dignity of the Government thereof; and, for these purposes, we pledge "our lives, our fortunes, and our sacred honor."

Resolved, That the Executive of this State be requested to transmit the foregoing preamble and resolutions to the executive and legislative departments of the General Government.

JANUARY 25, 1812.

Agreed to by the Senate and House of Delegates.

ROBERT TAYLOR, *Speaker of the Senate.*
ANDREW STEVENSON, *Speaker of the House of Delegates.*

A copy. Attest: JOHN A. RUSSELL, *Copying Clerk.*

12th Congress.] No. 311. [1st Session.

CUMBERLAND ROAD.

COMMUNICATED TO CONGRESS, FEBRUARY 3, 1812.

FEBRUARY 1, 1812.

To the Senate and House of Representatives of the United States:

I lay before Congress a report of the Secretary of the Treasury, containing a statement of proceedings under the "act to regulate the laying out and making a road from Cumberland, in the State of Maryland, to the State of Ohio."

JAMES MADISON.

SIR: TREASURY DEPARTMENT, *January* 25, 1812.

In conformity with the provisions of the act "to regulate the laying out and making a road from Cumberland, in the State of Maryland, to the State of Ohio," several proposals were received, and contracts entered into for making the first ten miles of the road with the following persons, viz:

	Miles.	Perches.					
McKinley,	2	246	at $21 25	per perch,	- - - - - -		$18,827 25
Randle,	2	8	14 50	"	- - - - - -		9,396 00
Cochran,	2	131	22 50	"	- - - - - -		17,347 50
Cochran,	2	255	16 50	"	- - - - - -		14,767 50
	10 miles.		- - -	- - - - - -			$60,338 25

A copy of one of the contracts (A) is herewith enclosed which will show, in detail, the terms, the obligations entered into by the contractors, and the manner in which the road is to be made.

In those contracts the bridges are not included, and all the smaller ones have been contracted for at the rate of $1 50 to $2 per perch of mason's work. This, together with contingent allowances, some additional work which could not be embraced in the contracts, and the annual salary of $1,800 allowed to Mr. David Shriver, Jr., who superintends the whole, will, it is believed, make the entire cost of those ten miles seventy-five to eighty thousand dollars.

It appears, by Mr. Shriver's report, which, together with an extract of his letter of same date, is herewith enclosed, (B,) that it is probable that these ten miles will be completed by the 1st day of August next, according to contract.

The sum appropriated for making the road amounts, after defraying the expenses of surveying, and laying out the same, to $125,477 51, and there will, therefore, remain, after paying the whole expense of finishing the first ten miles, an unexpended balance of about $50,000 applicable to the prosecution of the work. This, supposing the expense to be at the same rate, would be sufficient to complete near seven miles more.

Mr. Shriver suggests that it would be desirable that contracts might be made, and the road be completed for eleven miles instead of seven. This would reach as far as Tomlinson's, twenty-one miles from Cumberland, where the old and new roads meet, and render the whole work done useful even if it proceeded no further. For effecting that object a further appropriation of about $30,000 would be necessary.

Another observation of the superintendent, which deserves particular attention, relates to the necessity of levying tolls sufficient to keep the road in repair: but this can be done only under the authority of the State of Maryland.

From the nature of the contracts, and from the manner in which the work has been executed, it will, it is believed, satisfactorily appear that the chain of mountains, which divides the Atlantic from the Western States, offers no real impediment to an easy communication, and that roads may generally be made as perfect, as convenient, and on the same terms, across those mountains, as in any other part of the Union.

I have the honor to be, with the highest respect, sir, your most obedient servant,

ALBERT GALLATIN.

To the PRESIDENT OF THE UNITED STATES.

A.

Articles of agreement made and concluded on the eighth day of May, in the year of our Lord one thousand eight hundred and eleven, between Henry McKinley, of Maryland, of the one part, and Albert Gallatin, Secretary of the Treasury, in behalf of the United States, on the other part.

Whereas, the said Henry McKinley has agreed for, and in consideration of, the payments hereinafter mentioned, to make and complete in a workmanlike manner a certain part of the road leading from Cumberland, in the State of Maryland, to Brownsville, in the State of Pennsylvania, as the same has been laid out and confirmed, in pursuance of the act entitled "An act to regulate the laying out, and making a road from Cumberland, in the State of Marylaad, to the State of Ohio," and of the act entitled "An act in addition to the act, to regulate the laying out and making a road from Cumberland, in the State of Maryland, to the State of Ohio," which part of the road thus contracted for by the said Henry McKinley, and hereinafter described, is to be made and completed by the said Henry McKinley, in the following manner, and on the following conditions, that is to say: The trees to be cut down and cleared the whole width of sixty-six feet, according to the fourth section of the act above mentioned; the stumps to be grubbed, and the bed of the road to be levelled thirty feet in width; the hills to be cut down, the earth, rocks, and stones, to be removed, the hollows and valleys, and the abutments of all the bridges and culverts, to be filled, so that the whole of the road on the aforesaid width of thirty feet, to be reduced in such manner, that there shall not in any instance be an elevation in said road when finished, greater than an angle of five degrees with the horizon, nor greater than the gradation fixed by the commissioners who laid out the road, and so that the surface of the said road shall be exactly adapted to the marks or stakes, made or to be made, by the person appointed superintendent for the said road by the President of the United States. Where the earth is to be raised, the sides are to slope at an angle not exceeding thirty degrees, the base or bottom part thereof to be of such width as to secure to the road a complete surface of thirty feet in width; a proper allowance to be made for

the settling of made earth, according to the directions of the superintendent; and no stumps, logs, or wood of any kind, to be permitted in the filling. In all situations on sides of hills or otherwise, where it may be necessary to fill, but where the nature of the ground will not, in the superintendent's opinion, admit filling with such slope as above mentioned, and where side walls will be built at the expense of the United States, the contractor is to fill four additional feet in breadth, so as to give thirty-four feet surface to the road. Where the hills are cut through, or the road dug along the side of a hill, the bank or banks to be cut of such slope as will be necessary to prevent the earth from falling or slipping in upon the said surface of thirty feet. But in those places where, from the steep ascent of the side of the hill, to cut with such slope would be impracticable, and where the superintendent may cause side walls to be built to support the bank at the expense of the United States, the bank may, with his permission, be cut perpendicular or with a greater angle. The superfluous earth to be removed to the next filling, and there spread, so as to increase the breadth of the road equally on each side, from the commencement of the filling to the end of it, unless otherwise permitted or directed by the superintendent. What may be deficient, in order to fill the hollows, to be dug out of the aforesaid thirty feet, or from the banks in such a way as to increase the width of the road equally through the nearest cutting, unless otherwise permitted or directed by the superintendent. Nor in any instance, the earth to be dug without such permission or direction, more than one foot below the surface of the pavement, within the aforesaid breadth of sixty-six feet. A ditch or water course to be left or made on each side of the said surface of thirty feet, and contiguous thereto; but where the road is dug along the side of a hill, having an ascent exceeding thirty degrees, the ditch along the side of the hill may be dug within the width of the thirty feet, so that the surface of the road, including the said ditch, shall, in such cases, be only thirty feet in breadth. The ditches are in every instance to be of such breadth and depth as the superintendent shall direct, and valleys or sewers above the surface of the ground, necessary to give vent to the waters on the side of the hills, to be made in all parts where, and in such manner, as shall be designated by the superintendent. The road to be covered twenty feet in width, with stone eighteen inches in depth in the middle, and diminishing to twelve inches at the sides; the upper six inches thereof, to be broken to such a size that each particle thereof will pass through a ring of three inches in diameter, and the remaining or lower stratum to be broken so as to pass through a seven inch ring. No stones to be used for said pavement but such as may be approved of; provided, they are within one mile on an average, from the part of the road where they may be wanting, and particular pains to be taken to select the best for the upper six inches. In all cases, where bridges or culverts are built, the pavement to extend twelve inches deep from the extremity of the aforesaid breadth of twenty feet to each side wall, the whole length of said walls; for which additional pavement the contractor shall, in addition to the price stipulated in the articles of agreement, hereto annexed, receive an allowance at the rate of one dollar for every fifty superficial square feet of such additional pavement. The whole of the said artificial stratum of broken stones to be made in a compact manner, and to be supported on each side by good and solid shoulders, and its surface to be formed as smooth and even as may be, and of such convexity as the superintendent may direct. Each grade of the road to be perfectly levelled, brought to the proper degree, and approved, before any stones are put on the same; and the lower stratum of stones passing through a seven inch ring, is then to be put on, levelled and approved, before the upper stratum of stones, passing through a three inch ring, is put on. In every instance the contractor to find, at his own expense, the stones wanted for the pavement, and for his work on the road, but to be allowed, in addition to the price stipulated as hereinafter stated in the articles of agreement, at the rate of half a dollar for each perch in length of the road, where he shall be obliged to pay the owners of the adjacent farms for such stones. The side roads, on each side of the pavement, to be dug as low and deep in the cut parts of the road, and particularly through the rock, as the superintendent may direct; and the filling of such side roads, where the same is necessary, to be raised as high as may be directed by the superintendent. No contractor is to interfere with the stones of the contractors for adjacent sections of the road; for which purpose a line at right angles with the road, at the end of each section, will be considered as dividing the right to stones by each contractor, unless otherwise directed by the superintendent on account of a want of stones within the limits of any one section. Masons, or other persons, who may contract with the United States for the building of bridges, culverts, walls, or any other species of mason's work on the road, to be permitted by the contractor to take and select such stones, within his division, as such mason or other person may think proper, and to haul the same along the parts of the road levelled by the contractor, or elsewhere, to the place where such stones may be wanted, without any interruption. Wherever the new road meets with, or runs along the course of any other road heretofore used, a sufficient width of road to be kept open for wagons and all kinds of carriages, to pass and repass without delay or interruption, whilst the new road is making. The contractor shall not in any instance let or transfer his contract, or any part thereof, to any other person without the superintendent's consent; and in every instance, where such sub-contract may be made, the price per perch to be allowed to such sub-contractor shall be fixed, with the said superintendent's approbation, and shall be paid by him to such sub-contractor, out of the first moneys which may become due to the principal contractor, according to the provisions for payment stipulated in the articles of agreement. The contractor shall not employ any workmen or laborers, who commit depredations in the neighborhood, or insult the travellers; and he shall, on the application of the superintendent, immediately discharge any workman or laborer in his employ. The contractor shall commence working on his station at the end nearest to Cumberland, unless a deviation in that respect be assented to by the superintendent.

Now, this agreement made and concluded on the 8th day of May, 1811, between the said Henry McKinley, of the one part, and Albert Gallatin, Secretary of the Treasury, in behalf of the United States, of the other part, witnesseth, that the said Henry McKinley, for his heirs, executors, and administrators, does hereby covenant, promise, and agree with the said Albert Gallatin as aforesaid, that he, the said Henry McKinley, shall and will, well and faithfully, and in a workmanlike manner, on or before the 1st day of August, 1812, make, finish, and complete in the manner, and on the conditions herein before mentioned, all that part of the road above mentioned, which is designated by the name of the "first section," beginning at Cumberland, in Maryland, and ending at a place on said road two miles and two hundred and forty-six perches distant from said Cumberland. In consideration whereof, the said Albert Gallatin, for and in behalf of the United States as aforesaid, doth hereby covenant, promise, and agree, to and with the said Henry McKinley, his executors, and administrators, that the said United States shall and will, for doing and performing the work aforesaid, well and truly pay, or cause to be paid, to the said Henry McKinley, his executors, or administrators, at the rate of twenty-one dollars and twenty-five cents for each and every perch in length of said road in the following manner, viz: when forty perches in length of said road are finished, and approved by the superintendent, the United States will pay to the said Henry McKinley, for twenty perches; and after that, they will pay him on the completion of every twenty perches for the said twenty perches; at all times reserving the amount due for the first twenty perches, until the whole of the section hereby contracted for shall have been finished and completed to the satisfaction of the superintendent, agreeably to contract, when the balance due shall be paid to the said Henry McKinley. And the said Henry McKinley, for himself, his heirs, executors, and administrators, further covenant and agree with the said Albert Gallatin, Secretary of the Treasury, for and in behalf of the United States, that, in case the said Henry McKinley shall not well and truly, from time

to time, comply with and perform all the covenants and conditions hereinbefore stated and stipulated on his part to be done, performed, and complied with, in the manner and form, and within the time hereinbefore mentioned; or, in case it should appear to the Secretary of the Treasury, for the time being, or to the superintendent of the road for the United States, that the work does not progress, and go on with sufficient speed, so as to be finished and completed in the time herein specified, that then the foregoing agreements on the part of the United States, and every part thereof, shall become null and void; and the United States shall be at liberty, and have full right and authority, any thing herein to the contrary notwithstanding, to employ and set to work, or to contract with any person or persons whomsoever, in the place and stead of the said Henry McKinley, and without any interruption or interference whatsoever from him, the said Henry McKinley, his executors, or administrators.

In witness whereof, the said Albert Gallatin, Secretary of the Treasury, in behalf of the United States, hath hereunto subscribed his name, and affixed the seal of the Treasury; and the said Henry McKinley has hereunto set his hand and seal, the day and year first before mentioned.

ALBERT GALLATIN, *Secretary of the Treasury.*
HENRY McKINLEY.

Signed, sealed, and delivered, in the presence of
GEORGE BRUCE,
JOHN RIVE,
M. WALLACE.

Approved: JAMES MADISON.

Extract of a letter from David Shriver, Jun., to the Secretary of the Treasury, dated

WESTMINSTER, *January* 14, 1812.

I hope the enclosed report will be found such as was required. Should any part be found improper, I will thank you to return it to me, at this place, with your remarks; or should it be thought best that I should again attend at the city, you will please direct me: my reason for pointing out the probable cost of the ten miles is, that Congress might know what sum would complete the road to any particular point.

The small sum wanting, in addition to the balance that will remain unexpended, to enable them to make the road across Meadow mountain to Tomlinson's, (which would be eleven miles in addition,) Congress ought to give. The road then would be very beneficial to the public; whereas, if we stop at the end of seventeen or eighteen miles, it will be of little or no service, ending in a wilderness instead of a settlement, and in a tolerable level country, where persons from various points might travel to it. This small sum would likewise enable us to keep the hands, now on the work, in employ; a great number of them have families, and have moved on the work at considerable expense, which has, in a number of instances, been paid by the contractors, and the poor people, yet indebted some of them considerably, should they be obliged to leave the work, it would, in my opinion, be difficult to gather them again.

The Legislature of this State has passed a law to establish a bank at Cumberland. The stock is to be subscribed on the 1st of April next. This bank will remove one difficulty, which has always been an important one with me.

I shall leave this place for the road as soon as there is any prospect of being able to go on with the work.

SIR: JANUARY 14, 1812.

It being required by law that a statement should be submitted to Congress at each session, I have considered it my duty to give a concise view of the progress and present state of the Western road under my superintendence, with such additional observations as arose out of the subject.

The levelling and shaping the bed of the road is complete (with a few exceptions) for about five miles; the stone for the pavement laid on a greater part thereof, and about four miles broken so as to be nearly complete. Such being the present state of the work, the probability is that the ten miles will be completed within the time limited by contract, (the 1st of August next.)

The expense of mason-work, bridging, lime, &c., cannot at present be exactly ascertained, but is expected, when added to the contracts, will make the entire cost of these ten miles about $75,000.

Should it be finally determined to roll the road, and gravel or sand it, the cost will be, in addition to the above amount, rolling about thirty dollars per mile, gravelling or sanding (where either of those articles can be conveniently had) about one dollar per perch in length of the road.

The whole of my attention being absolutely required on the work in hand, I have not been enabled to acquire sufficient information of the next ten miles so as to speak with precision, but have viewed the location, and made such an estimate as circumstances would admit, by which it appears that the expense will be nearly the same.

No alteration or addition to the law has suggested itself, as absolutely necessary, except some provision for keeping the road in repair, after it shall be received from the contractors; for, on turnpikes which pass over a more level surface, that have time to settle and become firm, and on which constant repairs are made, it has, notwithstanding, been found difficult, at certain seasons of the year, to keep them in good order. The present road passing over ground so broken, subject to the wash of large quantities of water discharged from steep valleys adjoining, as well as the operations of the seasons upon it in its green and unsettled state, and the great use which, from its local situation, will immediately be made of it, will, when taken into view together, present to the mind the state in which it will very soon be, if left to the free and unrestrained use of all, without attention and without repair.

I would respectfully suggest the propriety of demanding such a toll as will be sufficient to keep it in good and perfect order.

I am, &c.

DAVID SHRIVER, JUN.

The Hon. ALBERT GALLATIN,
Secretary of the Treasury of the United States.

[NOTE.—See report No. 317.]

12th Congress.] No. 312. [1st Session.

NEW YORK CANALS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 3, 1812.

SIR: ZANESVILLE, OHIO, *January* 18, 1812.

In obedience to the request of the Legislature of this State, I have the honor to transmit you a copy of a resolution on the subject of the contemplated canal between the river Hudson and the Great lakes.

I am, very respectfully, sir, your obedient, humble servant,

RETURN JONATHAN MEIGS.

Hon. HENRY CLAY,
Speaker of the House of Representatives, United States.

Resolution, that the expense of a canal from Hudson river to the Great Lakes ought to be provided for by Congress.

JANUARY 17, 1812.

Whereas the commissioners, appointed under the first section of the act of the Legislature of the State of New York, passed the 8th day of April, 1811, entitled "An act to provide for the improvement of the internal navigation of the State," have, in pursuance of the provisions of said act, applied in behalf of said State to the Legislature of this State, for their aid and co-operation in carrying into effect the object contemplated in said act, and have particularly solicited the influence of this State in the public councils of our country for that purpose, being fully impressed with a sense of the importance of the object as well as with the respectful attention due to our sister States; therefore,

Resolved, by the Senate and House of Representatives of the State of Ohio, That they consider the communication, by means of the canal navigation, between the Great lakes and Hudson river, as a project of national concern; that the accomplishment of such a project, free from a transit duty, would have the most extensive and beneficial effects, by facilitating the intercourse between remote parts of the United States; diminishing the expense of transportation, thereby rendering the produce of our country more valuable, the price of foreign commodities cheaper; and that its tendency would be to encourage agriculture, manufactures, internal commerce, and to strengthen the bond of union between the States.

Resolved, As the sense of this General Assembly, that it would be expedient for the expense of said canal to be provided for by the United States in such manner as they shall think proper, and that the same be free from toll or transit duty, for the transportation of produce, manufactures, or merchandise thereon.

Resolved, That the Governor of this State be requested to transmit copies of this resolution to the President of the United States, the President of the Senate, the Speaker of the House of Representatives of Congress, the Governor of the State of New York, and to our Representatives, and each of our Senators in Congress.

MATHIAS CORWIN,
Speaker of the House of Representatives.

Attest: R. OSBORN,
Clerk of the House of Representatives.

THOS. KIRKER,
Speaker of the Senate.

Attest: CARLOS A. NORTON,
Clerk of the Senate.

SECRETARY OF STATE'S OFFICE,
ZANESVILLE, OHIO, *January* 18, 1812.

I certify the foregoing to be a correct copy of the original, remaining on file in this office.

J. McLENE, *Secretary of State.*

[NOTE.—See report, No. 313.]

12th Congress.] No. 313. [1st Session.

UNION, CHESAPEAKE AND DELAWARE, AND NEW YORK CANALS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 20, 1812.

Mr. RIDGELY, from the committee to whom were referred the several memorials of the President and Directors of the Chesapeake and Delaware Canal Company, of the President and Managers of the Union Canal Company of Pennsylvania, and of the Commissioners of the State of New York, respecting a canal from the Great Lakes to Hudson river, made the following report:

That they consider the improvement of the internal navigation of the United States, by means of the canals contemplated by the said companies and the State of New York, of great national importance, and well meriting

the patronage and aid of the General Government. That, under this impression, the committee have paid particular attention to the subject-matter of the said memorials, and have felt the strongest disposition to report favorably to the petitioners. The committee, however, lament that the inauspicious situation of the United States, in regard to our foreign relations, renders it, in their opinion, improper, at the present time, to grant that effectual aid to the undertaking to which they are so well entitled. They, therefore, under these circumstances, submit the following resolution, viz:

Resolved, That the State of the public finances and resources, and the present embarrassed situation of the country, render it inexpedient for the Congress of the United States to make a donation in land or money, at the present time, for the purpose of effecting the objects contemplated in said memorials.

SIR: TREASURY DEPARTMENT, *January* 6, 1811.

I have the honor to enclose answers to the queries proposed in your letter of the 28th ultimo, and also the copy of a report on the same subject, made on the 4th of April, 1818, in obedience to a resolution of the Senate of 2d of March, 1807.

I have the honor to be, very respectfully, sir, your obedient servant,

ALBERT GALLATIN.

Hon. H. M. RIDGELY, *Chairman of the committee on several canals.*

Answers to the queries proposed by the committee, to whom were referred the "memorial of the President and Managers of the Union Canal Company of Pennsylvania, praying the aid and patronage of the General Government in accomplishing the extensive and useful works in which they are engaged," &c.

TREASURY DEPARTMENT, *January* 6, 1812.

1st Query. "Will the state of the finances of the United States admit of the application of public moneys to the improvement of the country by means of canal and inland navigation?"

Answer. The state of the finances of the United States does not, at this time, permit the application of public moneys to any new objects of improvement. The revenue is at present considerably less than the annual public expenses.

2d Query. "If the state of the finances will not admit of pecuniary aid being afforded by the Government, can any other resources be applied to these objects without interfering with the national engagements or the public exigencies? If so, I am desired to request that you will specify them, and the mode of application, so as to promote, in the most effectual manner, these important objects, and to diffuse the benefits arising therefrom as generally as possible among the several States."

Answer. A portion of the public lands may be selected, and its proceeds appropriated to these objects, without causing any sensible diminution of the revenue arising from that source, and, therefore, without interfering with the national engagements and public exigencies. It is only necessary, for that purpose, that the tract or tracts of land thus selected, should be without the boundaries of the land districts already established by law, so that the annual sales in those districts, and the payments into the Treasury, which constitute the existing land revenue, may not, in any degree, be affected by the contemplated appropriation.

The quantity of land set apart for that purpose should be sufficient to produce, when sold, a sum equal to that which Congress intends to apply to these objects; and the States, companies, or trustees under whose direction the several works will be executed, should be authorized to sell, from time to time, at a price limited by law, such portions of the land as will be necessary to defray the expenses of the works. The proceeds of the sales might be anticipated by authorizing loans, to an amount not exceeding the value of the lands appropriated, and made reimbursable at distant periods; in which case the faith of the United States might also be pledged for the reimbursement of such parts of the principal of such loans as could not be discharged out of the proceeds of the sales of the lands; the residue of the lands then remaining unsold reverting, in that case, to the United States.

3d Query. "Will the projected canal from the Great lakes to the tide-waters of the Hudson tend to raise the price of the public lands, facilitate the means of payment for them, and arrest the illicit trade which is now practised with a neighboring nation, and by which the public revenue is greatly diminished?"

Answer. A canal uniting lake Erie with the tide waters of the Hudson, or of any other Atlantic river, cannot fail to enhance the value of all the public lands adjacent to the Great lakes, or otherwise so situated that their inhabitants may use that navigation for the transportation of produce or merchandise. For the same reason it will be giving access, on cheaper terms, to a better market, and facilitate, to a certain degree, the means of paying for the lands thus situated. It is not believed that the canal would materially arrest the illicit trade from Canada.

4th Query. "What are the ideas of the Secretary of the Treasury as to a general system of improvement by canals and opening of rivers, and as to the means of effecting it within the power of the General Government?"

Answer. In a report made on the 4th of April, 1818, in obedience to a resolution of the Senate of 2d March, 1807, the Secretary of the Treasury submitted the general outlines of a plan to that effect. To this he begs leave respectfully to refer. Although the details must, in many respects, be incorrect, and several important objects may, for want of information, have been omitted, his opinion continues the same with respect to the general principles of the plan. It is still believed that a system of improvement, embracing all the important communications pointed out by the great geographical features of the country, and also such other local objects as it may be necessary to include, in order to equalise, as far as practicable, the benefits of the plan, would have a most powerful effect towards promoting the prosperity of the country, and consolidating the interests of the most remote quarters of the Union. The modifications which existing circumstances render necessary, in the manner of applying the resources of the United States to that important object, have already been suggested in the answer to the second query.

Respectfully submitted,

ALBERT GALLATIN.

12th Congress.] No. 314. [1st Session.

CONTINGENT EXPENSES OF THE HOUSE OF REPRESENTATIVES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 30, 1812.

Mr. Turner, from the Committee on Accounts, reported:

That it appears that the contingent expenses of the House have been gradually increasing, and will, for this session, amount to at least forty thousand dollars; an increase which, among other causes, is principally due to the great mass of printing ordered by the House; to which must also be added a new source of expense, viz: the repairs of the buildings and furniture, which had heretofore been defrayed from another fund.

That the Clerk of the House has heretofore acted as the agent of the House and of the Treasury with respect to that branch of expenditure; advances being made from time to time by the Treasury to him on his own application, and his disbursements, after being approved by the committee, being ultimately settled by the accounting officers of the Treasury in the same manner as other accounts.

That those services appear to have been rendered without any law or resolution to that effect, and that the agency of the Clerk of the House, though not properly belonging to his official duties, has arisen from the nature of the services which, from his situation, he was more competent to perform than any other officer.

That, although owing to those circumstances the services have heretofore been performed without any compensation being allowed to that officer, and without his giving security for the trust thus reposed in him, it appears to the committee that, considering the large sums which now pass through his hands, and the increased labor and responsibility resulting therefrom, it would be just to allow him a reasonable compensation for those services; whilst, at the same time, the public may be secured against any eventual loss by requiring him to give security in the same manner as other officers intrusted with public moneys. The committee, therefore, submit the following resolutions:

Resolved, That the Clerk of the House be allowed a commission of two and a half per centum on all the moneys disbursed by him on account of the contingent expenses of the House, provided that the whole amount allowed shall not exceed five hundred dollars in any one year.

Resolved, That the Clerk aforesaid shall give bond in the sum of ten thousand dollars, with security, to be approved by the Comptroller of the Treasury, for faithfully accounting for the moneys received by him on account of the said contingent expenses.

12th Congress.] No. 315. [1st Session.

OBJECTIONS OF PRESIDENT MADISON TO THE BILL "PROVIDING FOR THE TRIAL OF CAUSES PENDING IN THE RESPECTIVE DISTRICT COURTS OF THE UNITED STATES, IN CASE OF THE ABSENCE OR DISABILITY OF THE JUDGES THEREOF."

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, APRIL 3, 1812.

To the House of Representatives of the United States: April 3, 1812.

Having examined and considered the bill entitled "An act providing for the trial of causes pending in the respective district courts of the United States, in case of the absence or disability of the judges thereof," which bill was presented to me on the 25th of March past, I now return the same to the House of Representatives, in which it originated, with the following objections:

Because the additional services imposed by the bill on the Justices of the Supreme Court of the United States are to be performed by them, rather in the quality of other judges of other courts, namely, judges of the district courts, than in the quality of Justices of the Supreme Court. They are to hold the said district courts, and to do and perform all acts, relating to the said courts, which are, by law, required of the district judges. The bill, therefore, virtually appoints, for the time, the Justices of the Supreme Court to other distinct offices, to which, if compatible with their original offices, they ought to be appointed by another than the legislative authority, in pursuance of the legislative provisions authorizing the appointments.

Because the appeal allowed, by law, for the decision of the district courts, to the circuit courts, whilst it corroborates the construction which regards a judge of one court as clothed with a new office, by being constituted a judge of the other, submits for correction erroneous judgments, not to superior or other judges, but to the erring individual himself, acting as sole judge in the appellate court.

Because the additional services, to be required, may, by distances of place, and by the casualties contemplated by the bill, become disproportionate to the strength and health of the Justices who are to perform them; the additional services being, moreover, entitled to no additional compensation, nor the additional expenses incurred to reimbursement. In this view, the bill appears to be contrary to equity, as well as a precedent for modifications and extensions of judicial services encroaching on the constitutional tenure of judicial offices.

Because, by referring to the President of the United States questions of disability in the district judges, and of the unreasonableness of delaying the suits or causes pending in the district courts, and leaving it with him, in such cases, to require the Justices of the Supreme Court to perform additional services, the bill introduces an unsuitable relation of members of the Judiciary department to a discretionary authority of the Executive department.

JAMES MADISON.

AN ACT providing for the trial of causes pending in the respective District Courts of the United States, in case of the absence or disability of the Judges thereof.

Be it enacted, by the Senate and House of Representatives of the United States of America, in Congress assembled, That, whenever satisfactory evidence shall be shown to the President of the United States, that, from the necessary absence or disability of the judge of either of the district courts of the United States, the decision of the suits or causes pending therein will be unreasonably delayed, he is hereby authorized to require the Justice of the Supreme Court allotted to that circuit, in which such district court ought, by law, to be holden, to hear and determine all such causes; and it is hereby declared to be the duty of said Justice, during the continuance of such absence or disability, to hold the said district court at such time and place at which the same is, by law, directed to be holden, and to hear and determine all suits or causes pending therein, and to do and perform all such acts, relating to the said court, which are, by law, required of the district judge: *Provided*, That the said Justice shall be authorized to adjourn the said court to such time as he shall think it expedient; and he shall, also, have authority to hold special terms of the said district court, for the trial of such causes as may arise during his exercise of the duties required by this act, whenever, in his opinion, the same shall be necessary. And the President of the United States is hereby authorized to determine when such absence or disability shall cease to exist.

H. CLAY, *Speaker of the House of Representatives.*
WM. H. CRAWFORD, *President of the Senate, pro tem.*

12th CONGRESS.] No. 316. [1st SESSION.

VIOLATION OF SECRECY RELATIVE TO CERTAIN PROCEEDINGS OF THE HOUSE OF REPRESENTATIVES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, APRIL 6, 1812.

Mr. GRUNDY, from the committee appointed, on the 4th instant, to inquire whether there has been any, and, if any, what violation of the secrecy imposed by this House, during the present session, as to certain of its proceedings, made the following report:

The committee to whom was referred the resolution directing an inquiry to be made, whether any, and, if any, what violation of the secrecy imposed by this House, during the present session, as to certain of its proceedings, have, according to order, proceeded in said inquiry, and beg leave to state that, under the authority with which they were invested by the House, they have caused to come before them four witnesses, whose testimony, on oath, is as follows, to wit:

Charles Prentis states that he furnished to the editors of the Spirit of Seventy-six (a paper printed in Georgetown) the paragraph giving an account of the proceedings of the House of Representatives, while sitting with closed doors, on the subject of the embargo; and he further says, that he did not receive the information, or any part thereof, which enabled him to write said paragraph, from any member of Congress, or officer of this House. Upon being interrogated, he states that he received the whole of his information from Nathaniel Rounsevell, one of the editors of the Alexandria Herald; that he received it on Wednesday, late at night, and he asked Mr. Rounsevell whether the injunction of secrecy had been removed. Rounsevell replied that he had not inquired. On Thursday morning, the witness spoke to some of the members on the subject, and, from their conduct, he was satisfied the injunction of secrecy had not been removed; notwithstanding which, the witness sent the paragraph, above alluded to, to the editors of the Spirit of Seventy-six on Thursday.

John M. Carter and James B. Carter, editors of the Spirit of Seventy-six, state that they received from Mr. Prentis, in writing, the statement which appeared in their paper; that they received no information on the subject from any member or officer of the House.

Nathaniel Rounsevell, upon being interrogated, says he composed the paragraph which appeared in the Alexandria Herald on Friday last, containing a statement of the secret proceedings of the House of Representatives upon the subject of the embargo; and that he, on Wednesday night, after the adjournment of the House, derived a part of the information, on which he was enabled to give the detailed account, from the conversation of members of the House, with whom he accidentally fell in company; that he was acquainted with the members, and they with him; they knew he was present; he partook, in some degree, in the conversation.

Question by the committee. From the conversation of what members did you collect the information of which you have spoken?

The witness refused to answer the interrogatory.

Question 2d. At what place was the conversation held?

Witness refused to answer.

Question 3d. Have you seen the members alluded to, or any of them, since you first appeared before this committee on Saturday last?

Witness likewise refused to answer this interrogatory.

12th Congress.] No. 317. [1st Session.

CUMBERLAND ROAD.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, APRIL 14, 1812.

Mr. Morrow, from the committee to whom was referred the message of the President of the United States, of the 1st ult., transmitting a report and letter concerning the proceedings under the act entitled "An act to regulate the laying out and making a road from Cumberland, in the State of Maryland, to the State of Ohio," and also a petition from a number of the inhabitants of the western counties of the State of Pennsylvania, praying that an appropriation may be made for the purpose of erecting a bridge over the Youghogany at the place where the new road crosses the said river, made the following report:

That two subjects are suggested by the said message, which require legislative provision, viz: the appropriation of $30,000 for completing the said road to Tomlinson's, where the old and new roads meet, and the granting authority to levy toll sufficient to keep the said road in repair.

The reasons assigned in favor of such provisions, by the report and letter communicated by the message, are, in the opinion of the committee, sufficient to show the expediency of the measure; they, therefore, refer the House to these documents.

It is proper, however, to state that the appropriations already made for the objects have exceeded the moneys produced by the fund pledged to defray the expense of the said road, which will appear by a letter from the Treasury Department, accompanying this report. That circumstance, as also the present state of the public finances, the necessity arising out of the existing crisis in the national concerns, for applying the public resources to objects of security and defence, have been duly considered, and whatever ground of objection to the proposed measure these considerations may afford, the committee are of opinion, nevertheless, that the advantages the public would derive from an immediate extension of the new road to where it will intersect with the old are sufficient to justify the appropriation.

They are of opinion that an appropriation for erecting a bridge over the Youghogany river would be improper at this time, because, by law, the superintendent, in making the road, has power to deviate from the original survey, only that the road shall pass through the principal points established; if, then, a bridge should be erected over the said river, that place must necessarily become fixed as a point to which the road must lead, and being many miles in advance of the parts of the road contracted for, might prove inconvenient in the further prosecution of the work. The committee respectfully submit the following resolutions:

Resolved, That $30,000, in addition to the sums heretofore appropriated, and reimbursable by the same fund, shall be appropriated for making the road leading from Cumberland to Brownsville.

Resolved, That provision be made for the levying of toll sufficient to keep the same in repair.

Resolved, That it is inexpedient to appropriate money for erecting a bridge over Youghogany river on the said road.

12th Congress.] No. 318. [1st Session.

ADMISSION OF THE MISSISSIPPI TERRITORY INTO THE UNION.

COMMUNICATED TO THE SENATE, APRIL 17, 1812.

Mr. Taylor, from the committee, to whom was referred the bill from the House of Representatives "to enable the people of the Mississippi Territory to form a constitution and State Government, and for the admission of such State into the Union on an equal footing with the original States, made the following report:

That, in considering the subject referred to them, they could not avoid being struck with the immense size of the Territory proposed to be erected into a State, a size disproportionate to the size of any of the largest States which now compose our confederation.

It embraces, in its present form, and without any extension, to the gulf of Mexico, (as is proposed in the bill referred to us,) nearly six and a half degrees of geographical longitude, and four entire degrees of latitude, and affords an area of twice the surface of the State of Pennsylvania.

Your committee are strongly impressed with the propriety and expediency of dividing the said Territory, so as to form of the same two States, whenever the population, within the limits of each section, shall render it just and proper; and they respectfully submit to the Senate the following divisional line, between the western and eastern sections of the said Territory, viz: up the Mobile river, to the point nearest its source, which falls on the eleventh degree of west longitude from the city of Washington; thence a course due north until the line intersects the waters of Bear creek; thence down the said creek to its confluence with the Tennessee river; thence down the said river to the northern boundary line of the said Territory. By a view of the map of this country it will appear that the above divisional line will divide the Territory into nearly two equal parts, and it has, for the most part, a delineation by nature.

By the 5th section of the 1st article of the treaty of session from the State of Georgia the United States are bound to erect the said Territory into one State. It has, however, been suggested that the State of Georgia would not, upon a proper representation, withhold her consent to the proposed division.

To the end, therefore, that an opportunity may be afforded to the State of Georgia to express this consent, by a legislative act of the said State, as they shall think proper, your committee recommend that the said bill shall be postponed to the first Monday in December next.

The committee further recommend that the bill "to carry into effect the provisions of the eighth section of the act regulating the grants of lands, and providing for the disposal of the lands of the United States south of the State of Tennessee," which was also referred to the said committee, be postponed to the first Monday in December next.

12th Congress.] No. 319. [1st Session.

APPLICATION FOR THE EXTENSION OF A PATENT RIGHT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, APRIL 20, 1812.

To the honorable the Senate and House of Representatives in Congress assembled, the memorial of Eli Whitney respectfully showeth:

That your memorialist is the inventor of the machine with which the principal part of the cotton raised in the United States is cleaned and prepared for market. That, being in the State of Georgia in the year 1793, he was informed by the planters that the agriculture of that State was unproductive, especially in the interior, where it produced little or nothing for exportation. That attempts had been made to cultivate cotton, but that the prospect of success was not flattering. That of the various kinds which had been tried in the interior none of them were productive, except the *green seed cotton*, which was so extremely difficult to clean as to discourage all further attempts to raise it. That it was generally believed this species of cotton might be cultivated with great advantage, if any cheap and expeditious method of separating it from its seeds could be discovered, and that such a discovery would be highly beneficial both to the public and the inventor.

These remarks first drew the attention of your memorialist to this subject, and, after considerable reflection, he became impressed with a belief that this desirable object might be accomplished.

At the same time he could not but entertain doubts whether he ought to suffer any prospect of so precarious a nature as that which depends upon the success of new projects to divert his attention from a regular profession.

About this time Congress passed a new patent law, which your memorialist considered as a premium offered to any citizen who should devote his attention to useful improvements, and as a pledge from his country that, in case he should be successful, his rights and his property would be protected.

Under these impressions your memorialist relinquished every other object of pursuit, and devoted his utmost exertions to reduce his invention, which, as yet, was little more than a floating image of the mind, to practical use; and, fortunately for the country, he succeeded in giving *form* to the conceptions of his imagination, and to *matter* a *new mode of existence;* and the *result* of this *new modification of matter* was every thing that could be wished.

After reducing his theory to practice, by effectual and successful experiments, your memorialist took out a patent. So alluring were the advantages developed by this invention that, in a short time, the whole attention of the planters of the middle and upper country of the Southern States was turned to planting the green seed cotton. The means furnished by this discovery, of cleaning that species of cotton, were at once so cheap and expeditious, and the prospect of advantage so alluring, that it suddenly became the general crop of the country.

Little or no regard, however, was paid to the claims of your memorialist; and the infringement of his rights became almost as extensive as the cultivation of cotton. He was soon reduced to the disagreeable necessity of resorting to courts of justice for the protection of his property.

After the unavoidable delays which usually attend prosecutions of this kind, and a labored trial, it was discovered that the defendants had only *used*, and that, as the law then stood, they must both *make and use* the machine, or they could not be liable; the court decided that it was a fatal, though inadvertent defect in the law, and gave judgment for the defendants.

It was not until the year 1800 that this defect in the law was amended. Immediately after the amendment of the law, your memorialist commenced a number of suits; but so effectual were the means of procrastination and delay, resorted to by the defendants, that he was unable to obtain any decision on the merits of his claim until the year 1807; not until he had been *eleven years* in the law, and *thirteen years* of his patent term had expired.

A compromise has been made with several of the States, to which your memorialist has assigned his right, and relinquished all further claim; but from the State in which he first made and introduced his invention, and which has derived the most signal benefits from it, he has realized nothing; and from no State has he received the amount of half a cent per pound on the cotton cleaned with his machine, within that State, in one year.

Estimating the value of the labor of one man at twenty cents per day, the *whole amount* which has been realized by your memorialist for his invention is not equal to the value of the labor saved in *one hour* by his machines, *now in use*, in the United States.

Permit your memorialist further to remark that by far the greatest part of the cotton raised in the United States has been, and must of necessity continue to be, the *green seed*. That, before the invention of your memorialist, the value of this species of cotton, after it was cleaned, was not equal to the expense of cleaning it; that, since the cultivation of this species it has been a great source of wealth to the community, and of riches to thousands of her citizens. That, as a labor-saving machine, it is an invention which enables *one man* to perform, in a given time, *that* which would require a *thousand men*, without its aid, to perform in the same time. In short, that it furnishes to the whole family of mankind the means of procuring the article of cotton, that important raw material which constitutes a great part of their clothing at a much cheaper rate.

Your memorialist begs leave further to state that a confident expectation that his case would be embraced in the general law which Congress has, for several years, had under consideration, has prevented his making an earlier application. That the expenses incurred by him, in making and introducing this useful improvement, and establishing his claim to its invention, have absorbed a great proportion of what he has received from those States with which he has made a compromise. That he humbly conceives himself fairly entitled to a further remuneration from his country; and that he ought to be admitted to a more liberal participation with his fellow-citizens in the benefits of his invention.

He, therefore, prays your honorable body to take his case into consideration, and authorize the renewal of his patent, or grant such other relief as Congress, in their wisdom and their justice, may deem meet and proper.

ELI WHITNEY.

Washington, *April* 16, 1812.

12th Congress.] No. 320. [1st Session.

PROPOSITION FOR TWO SUBORDINATE APPOINTMENTS IN THE WAR DEPARTMENT.

COMMUNICATED TO CONGRESS, APRIL 22, 1812.

APRIL 20, 1812.

To the Senate and House of Representatives of the United States:

Among the incidents to the unexampled increase and expanding interests of the American nation, under the fostering influence of free constitutions and just laws, has been a corresponding accumulation of duties in the several departments of the Government, and this has been necessarily the greater, in consequence of the peculiar state of our foreign relations, and the connexion of these with our internal administration.

The extensive and multiplied preparations into which the United States are at length driven, for maintaining their violated rights, have caused this augmentation of business to press on the Department of War particularly, with a weight disproportionate to the powers of any single officer, with no other aids than are authorized by existing laws. With a view to a more adequate arrangement for the essential objects of that Department, I recommend to the early consideration of Congress, a provision for two subordinate appointments therein, with such compensations annexed, as may be reasonably expected by citizens duly qualified for the important functions which may be properly assigned to them.

JAMES MADISON.

12th Congress.] No. 321. [1st Session.

FAMINE IN THE CANARY ISLANDS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MAY 22, 1812.

Mr. NEWTON made the following report:

The Committee of Commerce and Manufactures, to whom was referred a resolution, instructing them to inquire whether any, and what, relief ought to be extended to the inhabitants of the Canary islands, suffering from famine, occasioned by the ravages of the locusts, have given due consideration to the same.

The committee report that the evidence submitted is not, in their opinion, sufficient to prove that a scarcity of provision prevails to such a degree as to justify them in recommending legislative interference. Had conviction been wrought on their minds that the people of the Canary islands were suffering under a severe calamity, and required prompt relief, the committee would have been as ready in recommending relief to them as they did to the distressed and afflicted people of Venezuela.

For the inspection of the House, they ask permission to present the evidence with which the committee have been furnished.

12th Congress.] No. 322. [1st Session.

COMPLAINT AGAINST HARRY TOULMIN, ONE OF THE JUDGES OF THE MISSISSIPPI TERRITORY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MAY 22, 1812.

Mr. POINDEXTER, from the committee to whom was referred the letter of Cowles Mead, Speaker of the House of Representatives of the Mississippi Territory, enclosing a presentment of the grand jury of Baldwin county, in said Territory, against the official conduct of Harry Toulmin, Judge of the district of Washington, in said Territory, beg leave to submit the following report:

That the charges contained in the presentment aforesaid have not been supported by evidence; and, from the best information your committee have been enabled to obtain on the subject, it appears that the official conduct of Judge Toulmin has been characterised by a vigilant attention to the duties of his station, and an inflexible zeal for the preservation of the public peace and tranquillity of the country over which his judicial authority extends; they, therefore, recommend the following resolution:

Resolved, That it is unnecessary to take any further proceedings on the presentment of the grand jury of Baldwin county, in the Mississippi Territory, against Judge Toulmin.

12th Congress.] No. 323. [1st Session.

CULTURE OF THE TEA PLANT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MAY 26, 1812.

SIR: HAMPSHIRE COUNTY, VIRGINIA, NEAR ROMNEY, *May* 13, 1812.

Supposing that an account of the introduction of any new species of agriculture might not be unexceptionable to the Legislature of the United States, I take the liberty of sending you an account of the progress I have made in the introduction of the *tea plant.*

Some years ago my brother went to China, in the Pennsylvania packet, from Philadelphia, and had the good fortune to procure several of the scions, or young shoots, of the tea plant, together with directions for curing the tea. As I was at Philadelphia at the time of his return, he made me a present of the plants, which I accordingly brought here and introduced on my farm. The two first years I paid no attention to its culture: but last year, having more leisure, I took the trouble to transplant fifty or sixty of the twigs, and in October to gather and preserve the leaves according to the written directions I had from him. I found it to yield at an amazing rate, and the beverage which it afforded to be superior to the best imported tea. Perhaps this may be owing to their losing their fine flavor by crossing the sea. The leaves when green are more excellent than when dry. I had first supposed that the plant would thrive best in warm, rich situations, but, on transplanting, I put some in cold, poor situations, and these yield by far the most plentiful crop. You may cut any number of twigs off the tree, or plant, and just stick them in the ground; they will take root and grow. And I have been thinking that in eight or nine years my little nursery (by clipping the branches and planting them again) might be made to afford plants enough to supply the whole United States with tea, and that at a trouble and expense which would be scarcely perceptible.

As my wagon is going down to Alexandria, I have filled a large box with earth, in which I have planted a number of the twigs, and to each of them tied a label or directions for raising the plant, and curing the leaves in the same manner as I got it from my brother; the whole of which I have directed to be left with Mr. Gray, bookseller, of Alexandria, and to be by him delivered to you or your order.

I have acted in this manner from a supposition that many of the members might be desirous of seeing this newly introduced plant, and perhaps wish to convey some of them to their places of abode, or have them planted in botanic gardens. My reason for addressing this letter to you was, that I supposed it more particularly your province than that of any other man to make the subject known to the House.

If it will be attended to, I make no doubt of the tea plant becoming a grand acquisition to the American nation, and the consciousness of having rendered my country a small service will be a sufficient reward for

Your very humble servant,

JOHN S. GRIMES.

Hon. HENRY CLAY, *Speaker of the House of Representatives.*

P. S. If no accident occurs, my wagon will leave the plants at the aforementioned place some time about the last of this month.

J. S. G.

12th Congress.] No. 324. [1st Session.

OPPOSITION OF RHODE ISLAND TO A WAR.

COMMUNICATED TO THE SENATE, JUNE 9, 1812.

STATE OF RHODE ISLAND AND PROVIDENCE PLANTATIONS,

IN GENERAL ASSEMBLY, *May session, A. D.* 1812.

Whereas, from the aspect of our foreign relations, and more especially from the character of the measures adopted, and proposed to be adopted, by Congress, during their present session, it is seriously to be apprehended that our country will soon be plunged into a ruinous war, unless a clear expression of the public opinion shall correct the dangerous and erroneous impression, which appears to have been made on the General Government, that the people are desirous of war, and do approve of the measures calculated to produce it; and whereas it is both the right and duty of the people, either immediately or by their representatives, upon occasions so important, and in times so alarming as the present, to express their sentiments upon public affairs, and also the privilege of rulers to be informed of those sentiments:

Resolved, That, for ourselves, individually, and as representatives of the freemen of this State, we deprecate at all times, and especially at a time when the pecuniary resources of the country have been exhausted and cut off, both by the depredations and sequestrations of foreign Powers, and by our own ruinous commercial restrictions; when, by the raising of a large military force, for the purpose of territorial conquests, great expenses will be incurred, and heavy burdens imposed, while, from the very limited appropriations made for the protection of commerce, and the defence of our seaports, the former will be exposed to certain capture, and the latter to invasion and pillage, thereby leaving the burdens to be borne almost entirely by the agricultural interest.

Resolved, That, from the extent of our commerce, the immediate and important interest which the whole community have in its encouragement, and the entire dependence of many of our citizens for support upon the employment it affords, the legislative restrictions upon trade operate with peculiar severity upon this State; that, from our inability to sustain the increasing burdens of war, destitute of public funds and of public lands, and depending, in time of peace, upon direct taxes for the support of our State government, the proposed land tax

and internal taxes of the United States will be exceedingly oppressive upon our citizens; and that the accessible situation and defenceless state of our harbors and seaports, and their superior eligibility, as a naval resort, for the cruisers of an enemy, rendering them exposed to invasion and liable to capture, will cause war, under such circumstances, to be ruinous to many of our towns, and eminently injurious to the whole State.

Resolved, That, when the unequalled privations, sufferings, and exertions of the citizens of this State during the revolutionary war are considered, it cannot be doubted that, whenever the country shall necessarily be involved in war, they will again exhibit the same patience, fortitude, and patriotism.

Resolved, That the Senators from this State, in Congress, be instructed, and the Representatives requested, to use their utmost endeavors to cause the legislative restrictions on our commerce to be removed; to prevent the passing of the proposed laws for imposing direct taxes; and, also, to oppose all measures which may be brought forward tending to involve the country in war.

Resolved, That, if these desirable objects cannot be obtained, and war shall appear to be unavoidable, our Senators and Representatives be instructed to represent to Congress, and to the Executive, the exposed and defenceless situation of this State, the want of arms for our militia, and the importance of our harbors and seaports to the United States; and to urge upon Government the propriety, necessity, and practicability of their defence, and to solicit and claim from them adequate and timely means of defence and security against those imminent dangers and perils to which we are to be unwillingly exposed.

Resolved, That His Excellency the Governor be requested to transmit copies of the preceding resolutions to the Senators and Representatives from this State in the Congress of the United States.

In the House of Representatives, May 9, 1812. Voted, &c. By order.

THOMAS BURGESS, *Clerk.*

In the Senate, read the same day, and concurred in unanimously. By order.

SAMUEL EDDY, *Secretary.*

A true copy. Witness: SAMUEL EDDY, *Secretary.*

12th CONGRESS.] **No. 325.** [1st SESSION.

OPPOSITION OF MASSACHUSETTS TO A WAR.

COMMUNICATED TO THE SENATE, JUNE 12, 1812.

COMMONWEALTH OF MASSACHUSETTS:

IN THE HOUSE OF REPRESENTATIVES, *June* 2, 1812.

Resolved, As the opinion of this House, that an offensive war against Great Britain, under the present circumstances of this country, would be in the highest degree impolitic, unnecessary, and ruinous; that the great body of the people of this Commonwealth are decidedly opposed to this measure, which they do not believe to be demanded by the honor or interests of the nation; and that a committee be appointed to prepare a respectful petition to be presented to Congress, praying them to arrest a calamity so greatly to be deprecated, and, by the removal of commercial restrictions, to restore, so far as depends on them, the benefits of trade and navigation, which are indispensable to the prosperity and comfort of the people of this Commonwealth.

TIMOTHY BIGELOW, *Speaker.*

To the honorable the Senate and the House of Representatives of the United States in Congress assembled: The Representatives of the Commonwealth of Massachusetts beg leave respectfully to state:

That, presuming the respectful expression of the public sentiment, from any portion of the Union, might be acceptable to Congress in the present critical state of public affairs, they trust that a communication to your honorable body of the opinions and feelings of the people of this Commonwealth, upon the momentous subject of a British war, will not be construed into a disposition to interfere with the functions of the National Government.

It is with deep regret, and with such emotions as the love of country should inspire, that we perceive the entire failure of the negotiations instituted by the National Government, with a view to obtain from the belligerent nations respect for our neutral rights, and a revocation of edicts which operate so injuriously upon our lawful commerce.

In the present unprecedented posture of Europe, we are firmly convinced that an immense majority of our constituents cannot be reconciled to the belief that an offensive war with Great Britain is demanded by the interest or honor of our country.

We presume not to enter upon a comparison of the injuries sustained by our commerce from the respective nations at war, nor to arraign the conduct which Government has seen fit to adopt in order to obtain redress. It would be foreign to our present purpose to enlarge upon the duplicity and prevarication exhibited by France in all her negotiations, which aggravate her numerous outrages, or to discuss the motives alleged by Great Britain in defence of a system of retaliation which bears with a severe pressure upon neutral rights. It is sufficient that every consideration arising from good policy, and from the duty of a nation to itself, forbids us to plunge into a war which desolates the European world, and from which it seems to have been the design of Almighty Providence to exempt us, if true to ourselves, by placing us remote from the theatre of their contentions.

An offensive war against any nation can be justified only by the reasonable motive of obtaining reparation for past injuries, or security against future dangers and aggressions. When such, therefore, is the local situation and relations of a country, that the hope of effecting either of these objects is precluded by an overruling necessity, its honor is not stained by yielding to circumstances which it cannot control; nor is the reluctance of its citizens to expose themselves in such case to the certain dangers and calamities of war, a reproach upon their want of sensibility to injury, their courage, or patriotism.

A war with Great Britain would furnish temptations to her *Government* to sequester the millions belonging to our citizens deposited in that country, and an opportunity to her navy and cruisers to sweep the ocean of the remains of our once flourishing commerce.

The conquest of Canada, the only point in which she is assailable, would afford no indemnification, if achieved, for the losses to which we should be exposed upon our unprotected seaboard, and upon the ocean. Destitute as we are of a navy, and the means of *immediate* maritime defence, we cannot perceive in what mode a war with this nation, so powerful on the ocean, can promise the attainment of its avowed object—the revocation of the orders in council. The Emperor of France having lately republished the decrees of Berlin and Milan, with renewed assurances of a determination to enforce them, and Great Britain having announced her deliberate purpose of making her orders in council commensurate with those decrees, we are impressed with a belief that a war, once begun, must be continued during the present European conflict, and perhaps abandoned, after years of disaster incident to all wars, without accomplishing the object for which it was undertaken.

We forbear to present to the consideration of your honorable body a detail of those multiplied evils which we anticipate in such a conflict, lest their magnitude and variety might be considered as calculated to depress the just confidence of the people in the national spirit and resources, and to encourage the perseverance of foreign nations in pretensions hostile to our rights. We cannot, however, but hope that Government, having tried for years a system of restrictions which has proved ineffectual in respect to foreign nations, and ruinous to ourselves, will once more restore us to our commercial pursuits, and, without abandoning just claims of reparation, will enable us to aid in those preparations which, in some more auspicious period, may afford capacity of vindicating such claims with a probability of success. And we can, upon this most solemn occasion, appeal to the Searcher of Hearts, that, in this application to your honorable body, we are influenced by no party considerations, no spirit of disaffection, no disposition to embarrass the proceedings, or reproach the motives of any of the Departments of Government. Neither do the people of Massachusetts, unmindful of the example of their ancestors, take counsel from fear. But in this last and respectful effort in behalf of their commercial rights, and to induce the national Government to pause and rescue their country from war, they are impelled by dictates of self-preservation, by their attachment to the Union, by a persuasion of the invincible and growing opposition of the people to these measures, and by duty to themselves, to posterity, and to God.

TIMOTHY BIGELOW, *Speaker.*

IN THE HOUSE OF REPRESENTATIVES, *June* 5, 1812.

Ordered, That the foregoing memorial be signed by the Speaker of the House, and, together with the resolve upon which it is founded, be forthwith transmitted to the Congress of the United States, and that the Senators and the Representatives of this Commonwealth in Congress be requested to use their utmost exertions to carry the object thereof into effect.

Attest: BENJAMIN POLLARD, *Clerk.*

12th CONGRESS.] No. 326. [1st SESSION.

INQUIRY INTO THE STATE OF THE PATENT OFFICE.—PROPOSITION TO ESTABLISH A "HOME DEPARTMENT."

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JUNE 12, 1812.

Mr. SEYBERT made the following report:

The committee to whom was referred the resolution directing them "to ascertain the number of persons employed in, and to inquire into the state and condition of, that branch of the Department of State wherein are preserved the models of machines for which patents have been granted by the United States, and whether any, and what, fees have been demanded by the clerks therein," beg leave to report, in part:

That, on the 25th day of May, 1812, your committee addressed a letter to the Secretary of State on the subject, and, on the 10th of June, 1812, received his answer, with sundry accompanying documents; all of which are herewith respectfully submitted.

Your committee accord with the Secretary of State in the opinion, that every institution ought to be comprised within some one of the departments of Government. They need not repeat the reasons assigned in his letter, and they deem any additional arguments unnecessary. That the Secretary of State must be, at all times, much occupied with the foreign concerns of the United States, must be evident to every member of the Legislature; and that our foreign relations are, in many respects, essentially distinct from many objects in the interior of our country, which are attached to the duties of this officer, must be equally apparent. These last must increase every year with the improvements and extension of our settlements: such must be the unavoidable result. Your committee, without entering into any detailed reasoning on the subject, offer, for the consideration of the Legislature, the propriety and necessity of authorizing a *Home Department*, distinct from the departments already established by law. Such departments are known to other Governments, and their benefits have been recognized in territories far less extensive than those of the United States. Your committee regret that, from an expectation of the short continuance of the present session of Congress, they cannot enter more at large into this subject, so as to urge its consideration with that weight of argument which it deserves; they will content themselves, at this time, with the bare suggestion of legislative interference being necessary.

The Secretary of State has remarked that it would be proper to extend the privilege of franking letters to the person who may be appointed to superintend the concerns of the patent establishment of the United States. Of this your committee are well satisfied. The Secretary of State is much occupied in receiving, reading, and franking letters, which he ultimately must refer to the clerk of the Patent Office. No advantage can arise from this regulation, and it is apprehended no serious evils can follow the alteration herein contemplated.

Your committee have inquired into the conduct of the clerks employed in the establishment, respecting their demand for or receipt of fees, and they are satisfied that no causes exist which can attach suspicion to their conduct in this respect. They have not been able to trace an instance where the clerks proceeded contrary to the established law on this subject. Mr. Lyon has, for some time past, been employed as an assistant clerk in the Patent Office: your committee are convinced that his services are necessary, and that he has performed his duty with propriety, without receiving a compensation for the last year; it is, therefore, recommended to Congress to pass the bill reported by the Committee of Claims for his relief.

The gross amount of fees received from the commencement of the establishment to the 31st of December, 1811, per statement B, is $49,110. Of the sums received, after deducting the amount paid for salaries to a clerk, and the moneys necessarily expended for parchment, stationary, printing, fuel, &c., there remains a balance of $25,379 34 in the Treasury of the United States, applicable to useful purposes connected with this institution. The statement B demonstrates that the amount annually received for patents issued has increased every succeeding year, and that, in the year 1811, it amounted to $6,810. From these facts your committee augur favorably as to the future. The office has done much more than to support itself: the fund thus created, if properly managed and applied, may hereafter give rise to many valuable institutions in our country. A *school of arts* may be organized by the Legislature, which will require no other pecuniary aid than will be contributed by the industrious, the ingenious, and the useful citizens of the United States.

The resolution submitted offers an extensive and fruitful field for inquiry in a national view. Your committee have ventured to trespass on the ordinary limits of a report, by entering into such details as the case admitted, and the importance of the subject demanded; they are of that class who consider a *well regulated conservatory* of the arts a highly useful institution. It may be well to ask, what is the design of a *depôt* of the models for which patents are granted? Idle curiosity alone cannot have induced the wisest Governments to take them under their special charge; if useful results had not been the consequence of such establishments, they would long since have been abandoned. In Europe experience has developed the numerous benefits which are derived from this source every year. In the subsequent part of this report your committee persuade themselves they will lay before the Legislature such details and facts, connected with our country, as will characterize the institution "a register of human industry and ingenuity." They anticipate the period when this *depôt* will constitute the basis of a *school of arts*, from whence shall emanate every class of useful citizens. In this school all children may be taught some useful trade, to the end that none may be idle, but the poor may work, and the rich, if they become poor, may not want. Your committee made a visit to the present establishment: for its various purposes the west wing of the second floor of the building, heretofore denominated Blodget's hotel, is allotted to the models. This portion of the building consists of four apartments, one of which is 56 feet by 39 feet; another 39 feet by 22 feet; the remaining two rooms 22 feet by 12 feet each, with ceilings well adapted for the purpose. Your committee propose that the two first mentioned rooms shall be appropriated solely for the placing and exhibiting of models; one of the smaller rooms to be occupied as an office by those who conduct the institution; and the other to be used for a library, to be formed of such books as may be deposited to secure the copy-right, for charts, &c.

The apartments are, at this time, in an unfinished state; workmen are employed to complete them; a sufficient appropriation for this purpose has been already made by Congress. Many models are already deposited; the manner in which they are placed tends to confusion, and to sink the establishment into contempt. All is chaos—the machines are out of repair, and so intermixed as to make them almost useless. Useful machines are thus kept from view; and, for the want of a proper catalogue, containing a general description of the models, they are not understood. By such means the most beautiful inventions have been brought to ridicule. The despatch, safety, and success of business is promoted by nothing so much as method and regularity. Every visiter ought to be able to derive benefit from this *depôt:* this can only happen where method is attended to. The subjects of this establishment admit of *classification*, according to fixed and established principles: all the apparatus used in distillation, the machines for cutting nails, for cutting files, for ginning, carding, roving, drawing, spinning, weaving, &c., should be contiguous to each other, and arranged according to the date of the patent. Placed in this manner, there would be a mass of knowledge embodied before the spectator; the arts would be easily traced; the machines would thus be advertised, as it were, and every one would go away much more informed than when they went into these apartments. The present prevalent confusion in some degree depends upon circumstances: when the machines were formerly deposited, near the Department of State, the room was much too limited; the machines were heaped together, and many of them were deranged in their several parts. The unfinished state of the present building will keep the models for a further time in a state of irregularity: it is to be hoped that habit will not operate to make this perpetual. Success in this institution depends much upon the competency of the person or persons who are to conduct it; they should be liberal in all their views; nowise ambitious to become patentees themselves; no jealousies should exist between them and inventors; to the latter every facility should be offered, and every aid given; because, often they are men of limited knowledge, and need the assistance of others in their specifications, &c. Under such guidance the institution will be promoted, and useful knowledge diffused throughout our extensive country.

To impose upon ourselves the task of proving the utility of this institution may, to many, appear idle and unnecessary. We have determined on the inquiry, and solicit your indulgence on the subject. By the acts which Congress have passed, relative to patents, it is indirectly provided that such a *depôt* shall be formed. In the United States no patent can issue to guaranty *a mere principle*, it "must be for the vendible matter;" hence the necessity of a *conservatory* to prove the facts in disputed cases; the act further requires models to be *deposited*, in such cases as the Secretary of State shall deem necessary. The arts have ever been patronised and protected by civilized nations; the ancient *republics* bestowed much upon the fine arts; at this time our object should be to promote those which are termed *useful.* Though we cannot but admire the taste and genius of a Pericles, or a Phidias, we deem it more consistent with the state of society and manners, in the United States, to mark with distinguished honors an Arkwright, a Bolton, a Watt, a Wedgewood, a Whitney, a Fulton, a Whittemore, an Evans, and a host of others, who compose the class of benefactors of the human race; their inventions not only astonish and confound by the intricacy of their structure, and the delicacy of their execution—they do more, they enrich a people, and constitute the formidable pillars of national independence; useful machinery excite human industry, circulate capital, expand the wings of commerce, and carry us to the remotest regions of the habitable world. The progress of the arts of civilization keep pace with each other; the arts are favorable to civil liberty; they alone give rise to internal improvements; and that nation is, of all others, the most certain of prosperity, by which these principles are well understood, and put into practice. America cherishes peace; circumstances may force her into a war; even in that state of things her arts will achieve more lasting advantages for her than did the conquests of an Alexander, a Cæsar, or a Zengis Khan!

Useful inventions of machines are more particularly necessary at this time in the United States, when much may depend upon our manufactures; all labor-saving machines add so much to our population. We do not dread that riot and famine will follow the introduction of such agents into our work-shops; we should do all in our power

to encourage their importation from abroad; in this respect England is an example worthy of imitation; whilst tyranny and oppression, from mistaken notions of policy, were operating with an iron hand upon the industrious in Flanders and France, England did all in her power to invite their emigration; every encouragement was given to them, and many advantages were offered; by such means did she establish her power and wealth, which, at this time, is gigantic, and threatens neutrals and herself with annihilation, from its misapplication. Our inventions keep pace with our necessities. It is not long since we dreaded the want of blankets. American genius has suggested a simple method by which a single workman can furnish twelve *per diem.* Almost every department of the mechanical arts was languishing for the want of *files;* several machines have been lately invented for cutting these highly useful instruments; with one of them a single workman may make several hundred files per day; which may be sold at prices much below the imported. Who, with a knowledge of facts like these, can deny protection and security to the useful arts? Such inventions will do more for the nation than can be effected with armies and fleets; it is certain fleets and armies cannot be supported without them.

We shall now give a short historical sketch of the subject in Europe, and then trace its progress in the United States. Two centuries have elapsed since Henry the 4th of France conceived the great design of a *conservatory* of models of whatever was curious or useful in machinery, "that all those (to use the language of Sully) who aspired to perfection might improve themselves without trouble in this silent school." The death of Henry put a stop to the execution of this scheme; in it he was followed by other monarchs, and by none with more zeal than those of France. In modern times we may refer even to the dark pages of *revolutionary* France, for many proofs of the devotion of that nation to this highly useful branch of knowledge, and at the present period the useful arts are well understood and cultivated with much success throughout that empire; liberal rewards are offered by that Government for such inventions as may prove of national benefit. The enormous sum of $183,332 is offered as a premium for a machine which will prepare and spin *flax* in as perfect a manner as is done with *cotton;* the ingenious of all nations are invited to become competitors for this prize; the Emperor has taken this department under his own direction, and no patent is granted "without a special decree from Napoleon; this arrangement gives consequence to the establishment; not content to stop here, a professor is appointed *especially* to deliver lectures on machines; he discourses on the models generally, and at stated periods accompanies his pupils to observe machines in the different workshops of Paris and its vicinity; the operations of the various manufactures are demonstrated, and a general discussion of all the principles, which are connected with the useful arts, is entered into and exemplified by practice. This institution furnishes annually a considerable number of useful members of society. In the establishment just alluded to, persons are employed, whose duty it is to form models of all such valuable machines as are deposited; these are on a regular scale, and accurate in the proportions of the several parts, so that the model will move correctly, and produce effects proportioned to its size; machines may be made from these of any dimensions. In France schools for instruction in every art and science are diffused throughout the empire; no useful branch is neglected. The teachers are very numerous, and each institution has a fixed number of pupils, who are supported at the expense of the Government; they are taught to arrange, plan, and execute all the operations which can be of use to the nation; in cases of emergency that empire may draw upon this capital stock for useful men of every description, whether it be in philosophy, the various mechanical arts, the military art, &c., &c. If the United States was equally prepared at this momentous period, much expense would have been saved to the nation, and much trouble to the Government; we repeat it, a *school of arts* is essentially necessary to our country. In the German schools they have professors, whose duties are like to those in France; at Gottingen professor Beckman, the author of three volumes of the History of Discoveries and Inventions, was employed. In England, in the Royal Institution they take a proper notice of this subject, and no one has ever visited the *depôt* of models at the *Adelphia*, without much pleasure and instruction. In Britain, where great distinctions are made in society, many persons occupy themselves with the useful arts, whose rank would seem to forbid it; several noblemen of distinction have patented useful inventions. If, then, all other nations deem it wise and essential to bestow favors in this way, shall it be said that, in the territories of the only free republic of modern times, the arts were ridiculed and neglected? This can never be the case with those who understand the true interests of the State; the national genius forbids it, and nothing can stifle this *infant Hercules* of the United States; no nation can boast of more useful inventions than those of the people of the United States; we might bring to recollection many, which alone could have resulted from the exercise of genius of a superior order. Rittenhouse contrived and set a world in motion. Whitney furnished us with a simple machine by which the people of a world are enriched and made happy. In obedience to the resolutions passed by the House of Representatives of the United States, the Secretary of State has reported that, from the 31st day of July, 1790, when the first patent issued from the office, to the 31st day of December, 1811, inclusive, one thousand six hundred and thirteen patents have been granted; of these two hundred and fifteen were for inventions patented in the year 1811. During the present year, (May, 1812,) one hundred and twenty-one patents have been already delivered; twenty are in preparation, and twenty more are suspended for the want of proper and suitable specifications; for several years past the number has increased annually, and an annual report of them has been directed to be made to Congress. This review of the progress of the arts is highly gratifying to us as citizens of the United States; we now see them flourish in situations where the footsteps of the savage have been scarcely obliterated by the busy scenes of civilized society; establishments are multiplying in all directions; nothing but time and proper encouragement are wanting to bring them to perfection. Superficial observers and persons, who are not accustomed to study, are apt to treat this subject lightly, and sink it into contempt; they undervalue inventions of every kind, and consider them more the results of chance than of mighty conceptions and painful thought; the sight of a *steam engine* in motion must convince the intelligent observer that the conception, which gave rise to this stupendous monument of human invention, is too vast for ordinary comprehension; persons thus disposed know little of the human mind; experience has not taught them the evils resulting from restless nights, and the many disappointments which await projectors; they often exclaim, what necessity or justice in granting rewards for discoveries? They say it cost nothing to effect the object; such persons have minds too limited to conceive a brilliant idea, too callous to receive a delicate impression, and a heart too cold to reward original genius. It is a habit with some to despise the knowledge of others. In answer to these declaimers we will offer the remarks of Burgh; he says, when treating of projects and schemes, "there is not one of a hundred that ever succeeds at all, nor one of many hundreds that brings their inventors any thing but disappointment and ruin. So that, we observe accordingly, whoever projects any thing new in science, in mechanics, or in trade, seldom does more than open the way for others to profit by his ingenuity." Notwithstanding experience has proved these statements beyond contradiction, many deny to inventors ordinary justice. They do not require of you to yield your privileges or property to them; they request of you simply, *to do as you would be done by*, and only to confirm them in that which has already been made theirs by the sacred decrees of the Great Creator of the universe. Too often do persons take advantage of the inventions of others, and deny them compensation; they are considered as common property. It is with difficulty that the case is brought to a decision before a court of justice, and not unfrequently the inexpediency of awarding in favor of the plaintiff is too well maintained by a jury of *interested*

persons. Our court records furnish too many instances of this kind; it becomes us to guard against them, in future, by a modification of the statute of the United States, which shall *unequivocally* secure to inventors their discoveries and inventions.

Before the adoption of the present constitution of the United States, the several States, as sovereign powers, granted patents. The framers of the constitution deemed this an object worthy their protection; and amongst the powers *delegated* by them to Congress, we find that "to promote the progress of science and the useful arts, by securing, for limited times, to authors and inventors the exclusive right to their respective writings and discoveries." Congress, pursuant to the recited constitutional provision, enacted a law on the subject, February 21, 1793; another April 17, 1800; and, during their present session, these several acts are under consideration, to be revised and amended, according as experience may have made it necessary. By these acts the fees which are directed to be paid by the *patentee* are inconsiderable—not one-fifteenth of the amount which is paid in Great Britain. It never was contemplated to derive a revenue from this source; the original intention was to make the amount received sufficient to cover the expenses of the institution. The statements herewith exhibited prove that a *surplus fund* has accumulated in the Treasury applicable to such purposes as the Legislature shall direct.

We do not hesitate to acknowledge that patents have often issued for inventions apparently trivial and ridiculous. On this ground many object to the institution. Reflection will remove this difficulty. The patent costs the State nothing; and from trifling causes wonderful consequences have ensued. *Newton*, from observing the falling of a *pear*, deduced his brilliant theory of *gravitation;* and no year passes in which the principle inherent in a trifling machine does not give rise to many valuable applications. You cannot limit in this respect: the constitution guaranties to every one his original inventions. And no harm can result from this practice; the patentee can alone be disappointed in his expectations. No one will purchase that which he deems useless; and a very few, indeed, speculate so far as to give premiums for inventions without having previously seen their promised advantages demonstrated by practice. England sets a high value on objects of this kind. She encourages the introduction from abroad of every useful machine; and she prohibits, under heavy penalties, the exportation of such as are useful in her manufactories. In the year 1774 an act was passed "to prevent the exportation of utensils employed in the cotton manufacture" in England. Any person going from Great Britain, and who carries with him the tools and instruments of any useful art or manufacture peculiar to his native country, "must be deemed a traitor."

We can defend this branch of knowledge upon the ground of an enlarged and wise policy. Our supplies of clothing and other articles have been generally derived from British manufactories. That nation has made us tributary to her workshops, in common with the rest of mankind. This system has been carried so far as to affect the independence of the United States. We may soon be engaged in a war with that Power: propriety and necessity combine to carry us into other channels. We need not leave our shores for this purpose. Unlike Great Britain, our agriculture furnishes us more food than we can consume, and yields us the raw materials from which *that most dependent of nations* has been heretofore supplied. We only need labor-saving machines to form these into the fabrics which habit, comfort, and fashion have made necessary in civilized society. Some say this is impossible. They do not know that the greatest changes in this way have taken place in England within the last thirty years! A revolution is at this time about to take place, by which all nations will free themselves from the shackles which heretofore bound them to Great Britain, and allowed them but a nominal independence. This revolution can alone be perfected by the agency of the useful arts. Great Britain is dependent upon foreign nations for eight-tenths of the raw materials which are used in her manufactories; and the few which she derives from her internal resources are forbid to be exported. As an indulgence in this respect, in the year 1777 it was enacted by Parliament to permit "the exportation of tobacco-pipe clay," it being necessary to the sugarmakers in the West Indies. All American trade has concentred in England, whether it be to the Mediterranean, the Euxine, or the Baltic. Thus have we contributed much to the support of British fleets and armies for many years past. The great pressure occasioned by the enormous national debt of Great Britain, and the increase of the annual taxes, may cause distress, turbulence, riot, and bankruptcy—even a change of the present *dynasty* may be the consequence. All these circumstances combined will not effect the *reduction* of that gigantic Power. Changes like these experience has proved are only changes of men in power; the nation still remains compounded of the same great mass, with her capital and skill undiminished, which, by a judicious system of reform, will secure to her power and wealth. England can only be seriously affected by striking a severe blow at the roots of her industry, the great base upon which her security is founded. A war against Great Britain will be inefficient, if carried on solely by your armies and fleets. By paralyzing her arts and manufactures you destroy her vitals. The heart will be seized by a canker which will render the extremities inefficient and useless.

The effects and benefits, in a national view, resulting from the introduction of useful labor-saving machines may be traced and demonstrated in the rise and progress of the British cotton manufacture. Not longer ago than the year 1755, the cotton manufacture in England was considered "amongst the humblest of the domestic arts." The products were chiefly for home consumption. Machinery in this branch was then unknown. In the year 1750, twenty thousand persons only were employed in this way: little progress was made for several succeeding years. In the year 1806 they declared, "*there is scarcely a civilized nation on the earth that is not indebted to us for some article of this manufacture.*" Some Manchester manufacturers have furnished as many as two thousand different varieties of patterns on their cards for the continent of Europe.

In the year 1705 not more than 1,170,881 lbs. of cotton wool was imported into England; in the year 1781 it amounted to 5,101,920 lbs.; in 1810 to the enormous and incredible quantity of 135,000,000 lbs. This last fact we state upon the authority of Sir Robert Peel, the most extensive cotton manufacturer in Great Britain.

In the year 1797 the cotton branch took the lead in the manufactures of Great Britain, and continued to advance until the American and continental markets, from motives of policy, were shut against them. In the year 1809 it was calculated that this branch of industry, in Great Britain, gave employment to 800,000 persons, and that the annual value thereof amounted to 30,000,000 pounds sterling, or $132,000,000!!! The United States, for many years, received more manufactured articles from Great Britain than the whole of Europe taken together. The following statements are given from Sir F. M. Eden's Letters on British Manufactures and Commerce:

Years.		*Exports to foreign Europe.*		*Exports to the United States.*
1795,	-	£4,222,782	-	£4,892,572
1796,	-	4,497,683	-	5,835,640
1797,	-	3,732,830	-	4,871,316
1798,	-	3,981,650	-	5,313,068
1799,	-	4,543,608	-	6,696,221

England has no advantages peculiar to herself; the introduction of useful machines gave her pre-eminence; machinery enabled the people of England to sell their manufactured articles at reduced prices, and to undersell all other nations. In the year 1762 *cylinder* cards were first made use of by Mr. Peel. In the 1767 James Hargrave

made the first great improvement in the spinning of cotton, by means of machinery; and Arkwright's first patent for spinning cotton, by means of rollers, was obtained in 1769; the machine was put in motion by the application of horse power; in 1771 water was employed, and *now* that of *steam* is in general use. Improvements in this art have been carried so far, "that a pound of fine cotton has been spun on the mule into 350 hanks, each hank measuring 840 yards, and forming together a thread 167 miles in length!" A single pound of cotton yarn, in England, has commanded the extravagant price of five guineas; so much has machinery added to the original value of the raw material, which, on an average, may be rated at twenty cents per pound. England, from these causes, progressed more in the last fifty years of the eighteenth century than she did in any equal number of years in any former century. In the time mentioned, the most useful inventions were brought to light, and made perfect; with the arts the nation flourished, and assumed the form of a political *Colossus*.

We need not abandon our country to seek for examples where a nation has been benefited and enriched by the genius of her citizens; we could specify many instances of the kind; on this occasion, however, we will content ourselves with a consideration of that of Mr. Eli Whitney, a native of the State of Massachusetts. It is to his *cotton gin* that many in the United States owe their wealth and comforts; but for this, or some equivalent instrument, poverty, barrenness, and waste, would infest an extensive and valuable portion of the United States. The opinion of Judge Johnson, an inhabitant of South Carolina, is too appropriate to be omitted; in deciding in the case of Whitney *vs.* Carter, he proceeded: "With regard to the utility of this discovery, the court would deem it a waste of time to dwell long upon this topic. Is there a man who hears us who has not experienced its utility? The whole interior of the Southern States was languishing, and its inhabitants emigrating, for want of some object to engage their attention and employ their industry, when the invention of this machine at once opened views to them which set the whole country in active motion. From childhood to age it has presented us a lucrative employment. Individuals who were depressed with poverty, and sunk in idleness, have suddenly risen to wealth and respectability. Our debts have been paid off, our capitals increased, and our lands are trebled in value. We cannot express the weight of obligation which the country owes to this invention; the extent of it cannot now be seen." Edwards, in his History of the West Indies, says the *green seed* cotton offers many advantages to the manufacturer; but, for the want of a proper instrument to separate the wool from the seed, "the value of the commodity is not equal to the pains that are requisite in preparing it for market." Before the gin was invented, this species of cotton was only cultivated for domestic purposes, and for supplying wick for the lamps that are used in sugar boiling. Formerly, cotton wool was imported into the United States; that obtained from the British West India possessions, on an average of three years from 1768 to 1771, amounted to one hundred and sixty-seven thousand seven hundred and forty-eight pounds; and from other places, two hundred and sixty-six thousand one hundred and eighty-two pounds. In 1783, after the peace with Great Britain, it was proposed we might furnish ourselves with the necessary quantity of cotton wool from the Dutch settlements at Surinam; no one then imagined it could be cultivated in the United States to be made an object of commerce. In 1791 it was proved that cotton might be cultivated to advantage in the United States; in this same year nineteen thousand two hundred pounds, the growth of the United States, was shipped to Europe, and the want of a machine to separate the wool from the seed was soon found to be essentially necessary. But for the invention of Whitney, which was brought to perfection in the year 1793, the United States would have continued to be *importers* of this article. The annual quantity made increased every year, until, in 1810, we exported, of the growth of the country, ninety-three million two hundred and sixty-one thousand four hundred and sixty-two pounds, of which quantity eighty-four million six hundred and fifty-seven thousand and seventy-eight pounds, only, were Sea Island or long staple. Besides the quantity exported, sixteen million pounds of the short staple are annually consumed in our country, which give an annual crop of one hundred million pounds. This, at fifteen cents per pound, presents us with an annual income of fifteen million dollars. If the *saw gin* of Whitney had not been brought to light, the green seed cotton could only be cultivated by those planters who have a superabundant number of laborers on their plantations, to give them employment at times when they otherwise would have gone idle. Sea Island cotton can only be raised in a very limited district of the Union, and it is not so fit for all purposes as the other species. By hand, an industrious man may pick one pound of cotton per day; a machine of a moderate size, attended by a boy to feed it, will do the same for one thousand pounds per day. Horse, water, or steam power may be applied; one man may readily attend ten of these; the quantity they would furnish for packing is incalculable. The facts we have just stated are known to all our cotton planters; such of them as are connected with commerce, are derived from the Treasury reports and books of authority on the subject. We could mention many other instances where valuable machines have benefited the United States; this is considered superfluous. Your committee, for the reasons which they have already assigned, must remain satisfied with offering this *report*, in part, for the present; had time and circumstances permitted, they would have presented for your consideration a detailed system, with rules and regulations for its execution; they indulge in the hope to furnish these at a more suitable time.

ADAM SEYBERT, *Chairman*.

SIR: COMMITTEE ROOM, *May* 25, 1812.

The following resolution was adopted by the House of Representatives, viz: "*Resolved*, That a committee be appointed to ascertain the number of persons employed in, and to inquire into the state and condition of, that branch of the Department of State wherein are preserved the models of machines for which patents have been granted by the United States, and whether any, and what, fees have been demanded by the clerks therein."

The committee have instructed me to request of you any general observations which you may think proper to communicate respecting the patent establishment of the United States; whether any necessary alterations in the act authorizing the establishment have suggested themselves to you; the amount of fees authorized by law; and if any instances are known where extra fees have been demanded or received by the clerks, or persons employed in that branch of the Department of State;

What has been the gross amount of fees received for patents granted from the commencement of the establishment to the 31st day of December, 1811; what amount has been expended in support of the establishment; whether a separate account is kept of the moneys received and expended for the establishment; is there a balance unexpended; if so, what is the amount thereof?

The committee regret, at this time, to give you the trouble imposed by the above queries, because they are convinced other objects, more immediately connected with the Department of State, demand your serious attention; nevertheless, this occasion may enable you, by a proper representation, to separate the patent establishment from the Department of State, and to afford you an opportunity to suggest an organization more proper than the present for the depôt of models.

I have the honor to be, &c.

ADAM SEYBERT, *Chairman*.

Hon. JAMES MONROE, *Secretary of State*.

SIR: DEPARTMENT OF STATE, *June* 10, 1812.

I have had the honor to receive your letter of the 25th ultimo, and regret that other duties of the office, particularly connected with the present state of public affairs, should have pressed so heavily upon me as to have rendered it impossible to give it an earlier answer.

Your inquiries point to two principal objects; first, the organization of the patent establishment; and, secondly, the conduct of the officers now employed in it, in respect to the fees which they have received for their services.

On the first head, the organization of the Patent Office, you wish me to state whether, in my opinion, some essential change in it might not be made with advantage, and, particularly, whether it ought not to be separated from the Department of State?

In meeting this inquiry, I am naturally led to examine another question, whether the Patent Office might not be independent of every Department of the Government, and amenable to the President only? If this is believed to be the case, its separation from the Department of State necessarily results from it.

I have always thought that every institution, of what nature soever it might be, ought to be comprised within some one of the Departments of Government, the chief of which only should be responsible to the Chief Executive Magistrate of the nation. The establishment of inferior independent Departments, the heads of which are not, and ought not to be, members of the administration, appears to me to be liable to many serious objections, which will doubtless occur to you. I will mention the following only, first, that the concerns of such inferior Departments cannot be investigated and discussed with the same advantage in the meetings and deliberations of the administration, as they might be if the person charged with them was present. The second is that, to remedy this inconvenience, the President would, necessarily, become the head of that Department himself, and thus be drawn into much investigation, in detail, that would take his attention from more general and important concerns, to the prejudice of the public interest.

Supposing the general organization of the Departments of Government to remain as they are, I am not aware that the Patent Office could, with more propriety, be attached to either of the other Departments than to the Department of State. I must, however, observe that I am conscious that I have not been able, since I have had the honor of being employed in this Department, to pay to the Patent Office all the attention which it is, at all times, my desire to bestow on any portion of the public duties confided to me. The foreign concerns of our country constitute, in themselves, a sufficient trust for the person at the head of this Department. They are very extensive, complicated, and important, and are becoming more so daily. The growth and rising importance of the United States necessarily produce that effect, but the Department of State is also charged with a correspondence with the Territorial Governments, Governors of the several States, &c.

If the Patent Office remains attached to this Department, or is placed under either of the other Departments, I think that the person employed at its head ought to have the power of franking letters. It would save to the Secretary of the Department much time in receiving and forwarding letters to that office, and franking letters from him. The business of the Patent Office would also be much facilitated thereby.

These remarks, you will readily perceive, are written in too much haste to give that aid on the subject that I should be happy to afford.

I have to observe that I have inquired into the conduct of the officers employed in the Patent Office, respecting the fees they have received, and that I have cause to be well satisfied with it. The committee will doubtless make further inquiry into the subject. I refer you to a statement on this point from Doctor Thornton, marked A. The fees allowed by law are confined to the Treasury fee of $30, and the copying fees, mentioned in the eleventh section of the patent law, 2d vol. of the Laws of the United States, are twenty cents for every hundred words, and two dollars for the copy of every drawing.

The gross amount of fees received for patents, granted from the commencement of the establishment to the 31st day of December, 1811, is $49,110. The particular statement is given in the accompanying paper B.

I do not know of any expenditure in support of the patent establishment, except what may have been absorbed in the unfinished preparation of two rooms for the models in the hotel; but as these expenditures include also the repairs of the building, and preparations for the General Post Office, I can only give the aggregate sums expended, which amount to $3,579 32. Whatever was expended previous to the removal of the office, was for stationary, cases, &c., which were in common with other objects of the Department of State, and paid for by the contingent fund. If the salary of Doctor Thornton should be considered as applicable, I enclose a statement of his salary till the end of the year 1811, C. Mr. Lyon's salary, from the 1st of June, 1810 to 1st of April, 1811, paid, amounts only to $416 66.

There is no account kept in the Department of State of the receipts and expenditures of the patent establishment, because the fees are paid immediately into the Treasury of the United States, and an annual report made thereof, from which the statement B is taken.

In reply to your last inquiry, I beg leave to refer to the paper marked D. It may be proper to observe that, prior to the year 1802, the patents for useful inventions were made out by the clerks employed in the general business of the Department, and that, therefore, the expense to the public attending the issuing of them cannot be precisely stated. Since that period a more satisfactory estimate can be made; even this last estimate is founded, in part, on conjecture, as a separate account has not been kept of the stationary, fuel, &c., used in the Patent Office.

I have the honor to be, very respectfully, sir, your obedient, humble servant,

JAMES MONROE.

The Hon. Dr. SEYBERT.

A.

I do solemnly affirm and declare, that, to the best of my knowledge and belief, Mr. Lyon has never demanded nor received any fees for business done in the Patent Office; nor has he ever demanded, to the best of my knowledge and belief, more than the law allows, viz: twenty cents for every copy of one hundred words, (see Laws of the United States, vol. 2, page 206, section 11,) and only for copies written in his private hours.

I do further solemnly affirm and declare, that I have been in public offices of the United States nearly eighteen years, and that I never received, while in any office to which a salary was attached, a single fee. I was appointed in 1794, by General Washington, a commissioner of the city of Washington, with a salary of $1,600 per annum, and remained till the Board was dissolved by the Honorable the Congress. I was, on Mr. Adams's retiring from public life, appointed one of the justices of the peace, and confirmed by Mr. Jefferson. The fees of office I received as the laws allowed, (for there was no salary,) and I have continued to serve in that capacity till the present time; but during this service the Congress enacted a law that no magistrate of the United States should be entitled to a fee. On this every justice of the peace between the capitol and Georgetown resigned, but myself; and though I

supposed that the law could not affect those who were previously appointed, and the same opinion governed the conduct of others who took fees, yet so unwilling was I to do any thing that could show the least inclination to violate what might be the intention of the representatives of the people, that, from that moment, I refused to receive fees, and had the whole duties to execute, between the capitol and Georgetown, which were exceedingly harassing; nor did I receive a single fee, during my services, for four years, except one, at the time a pauper was at my door, that I might give it to him. I was appointed in the latter end of the year 1802 to my present duties, by the present President, then Secretary of State, and, as the receipts of patents the preceding year did not much exceed $1,400, I could not, with propriety, receive more; but the President, Mr. Jefferson, appointed me one of the Commissioners of Bankruptcy, which he supposed, with my duties as a magistrate, would altogether give me $2,000 per annum, at least. That office ceased in about a year and a half, in which time I did not, I believe, receive $150; for, in many hard cases, I thought it only increasing distresses already sufficient, and I declined the fees. The duties of my present office have been increasing, till they have become truly oppressive, and require more aid.

The present President, when Secretary of State, thought me entitled to an increase of salary, before he left that office, and paid me the two last quarters, at the rate of $2,000 per annum. The late Secretary of State made a representation to your honorable body in my favor, and wished that salary to be continued, which he gave me in a memorandum from the 1st of June, 1810. (Original in the hands of the honorable Mr. Cheves, chairman of the Committee of Ways and Means.)

The present Secretary of State has done me the honor not only to express this opinion to me, but likewise to the Congress, and he would have continued that salary to me, if his predecessor had, by a more explicit estimate, obtained sufficient funds from the Congress; but more assistance in the Department of State being required, the funds fell short, and, consequently, my regular salary, for some quarters back, was discontinued; and I can truly state that the consequent embarrassment has reduced me to the necessity of borrowing small sums for support, and at the same time I have returned many fees of five and ten dollars at a time; for I could not be induced, by any distress, to break through the rule that has always governed my official conduct, of never receiving a fee.

WILLIAM THORNTON.

There has been received at the Treasury, as appears by the paper marked C, on letters patent for useful inventions, from the year 1793 to 1801, inclusive, the sum of - - - $9,450
Expense attending the issuing these patents, supposed to be about - - 7,357
2,093 00

Since the year 1802, when Dr. Thornton was exclusively charged with that business, to the end of the year 1811, there has been received, - - $39,660 00
His salary, including what was paid a clerk, as an assistant, amounts to $14,373 66
Supposed expenditures incurred by the office for parchment, printing, &c., 2,000 00
16,373 66
23,286 34

Amount of nett revenue derived from the Patent Office, - - $25,379 34

12th Congress.] No. 327. [1st Session.

SUNDAY MAILS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JUNE 15, 1812.

Mr. RHEA made the following report:

The Committee on the Post Office and Post Roads, to whom was referred the memorial of the General Assembly of the Presbyterian Church in the United States of America, have had the same under consideration, and do respectfully report:

That, heretofore, during the present session of Congress, petitions of the Synod of Presbyters, and other citizens of several Christian denominations, residing in the western part of the United States, were referred to the Committee on the Post Office and Post Roads; that the prayers of the said petitions were, in their object, design, and end, similar to that of the memorial of the said reverend General Assembly; that your committee, after having had the aforesaid petitions under consideration, reported thereon on the third day of January last past:

"That, however desirable it would be to advise the adoption of such regulations, relative to the carrying and opening of the mail, as might meet the views of the venerable Synod of Pittsburg, and the other petitioners, your committee cannot, at this peculiar crisis of the United States, recommend any alterations in the law regulating the Post Office establishment, and do respectfully submit the following resolution:

"*Resolved*, That the petitioners have leave to withdraw their petitions."

And the same resolution was afterwards concurred in.

Your committee further report, that there doth not appear any reason to induce a change or alteration of the report made in the case of the petition of the venerable Synod of Pittsburg; nor hath any reason occurred to induce your committee to report on the memorial now under consideration, different from the report on that petition; they do, therefore, respectfully submit the following resolution:

Resolved, That the memorialists have leave to withdraw their memorial.

All which is respectfully submitted.

12th Congress.] No. 328. [1st Session.

ESTABLISHMENT OF A FIRST MERIDIAN FOR THE UNITED STATES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JULY 3, 1812.

The SECRETARY OF STATE, to whom was referred, during the last session of Congress, the memorial of William Lambert, with sundry papers and astronomical calculations, relating to the establishment of a first meridian for the United States of America at the permanent seat of their Government, which accompanied the same, has examined the said memorial and papers, and thereupon respectfully reports:

That it is with diffidence he undertakes to give an opinion on any part of the subject submitted to him, and that he does it only from a sense of duty, in conformity with the reference of the House of Representatives.

That the principal object of the submission of these papers to the Department of State, seems to have been to obtain from it a report as to the policy, in a national point of view, of establishing a first meridian in the United States at the seat of their Government, and not as to the accuracy of the observations and calculations already made, respecting such a meridian.

To do justice to the latter, or scientific part of the subject, would require a profound knowledge of astronomy and mathematics, in the higher branches, to which the Secretary does not pretend. The House will be aware, that a knowledge so comprehensive cannot be acquired without much labor, in a long course of study, uninter-

rupted by other duties. These advantages the Secretary has not enjoyed. Had, however, his past studies qualified him for this part of the subject, his duties, since he came into this Department, have rendered it impossible for him to bestow that attention on it which, under any circumstances, would have been necessary.

In examining the papers submitted, it appears that the subject has already engaged the attention of a select committee of Congress, to whom they were originally referred, and who have, in a learned report, bearing date on the 28th of March, 1810, (see No. 277,) unequivocally expressed their opinion in favor of the proposed measure, in the following terms:

"That, situated as we are, in this western hemisphere, more than three thousand miles distant from any fixed or known meridian, it would be proper, in a national point of view, to establish a first meridian for ourselves; and that measures should be taken for the eventual establishment of such a meridian in the United States; and also, that no place, perhaps, is more proper than the seat of Government."

The Secretary of State has no hesitation to declare his accord with the committee, in their opinion, in favor of the establishment of a first meridian for the United States, and that it should be at the city of Washington, the seat of their Government.

The advantages of a first meridian are known, even to those who know least of the science on which it depends. To doubt it, would be to doubt the advantage of longitude, which regulates every movement on the ocean, and the divisions and sub-divisions; in short, the correct admeasurement of every part of our globe. All nations have agreed in the propriety of establishing a first meridian. Every mariner at sea, from the time he leaves port, begins to calculate his distance by reference to some fixed meridian; and every astronomical observer on land, in making his calculations, obeys the same rule.

Scientific men agree that it would be of advantage to science, if all nations would adopt the same first meridian; and before the discovery of the new world this was the case. It appears that the ancient geographers had adopted, for their first meridian, a line passing through the most distant of the Fortunate or Canary Islands, because it was the most western land then known. It appears, also, that the changes which the ancients made in their first meridian, of which there were several, were made in consequence of the discovery of the neighboring islands, which were still more to the westward, and on the principle of passing it through the most western point with which they were acquainted. But after the discovery of America, which banished the idea of the most western limit, that of a general meridian gradually lost ground; and, latterly, it has been completely abandoned. The great maritime and commercial nations of Europe have respectively established first meridians of their own; England, hers at Greenwich; France, hers at the observatory at Paris; and several other nations, at some fixed point, within their respective limits. Since the period alluded to, the establishment of a first meridian for themselves has become, by the usage of nations, an appendage, if not an attribute of sovereignty.

The United States have considered the regulation of their coin, and of their weights and measures, attributes of sovereignty. The first has been regulated by law, and the second has occasionally engaged their attention. The establishment of a first meridian appears, in a like view, to be not less deserving of it, at least until, by common consent, some particular meridian should be made a standard.

In admitting the propriety of establishing a first meridian within the United States, it follows that it ought to be done with the greatest mathematical precision. It is known that the best mode, yet discovered, for establishing the meridian of a place, is by observations made on the heavenly bodies; and that, to produce the greatest accuracy in the result, such observations should be often repeated, at suitable opportunities, through a series of years, by means of the best instruments. For this purpose an observatory would be of essential utility. It is only in such an institution, to be founded by the public, that all the necessary implements are likely to be collected together, that systematic observations can be made for any great length of time, and that the public can be made secure of the result of the labors of scientific men. In favor of such an institution it is sufficient to remark, that every nation which has established a first meridian within its own limits has established, also, an observatory. We know that there is one at London, at Paris, Cadiz, and elsewhere.

With respect to the accuracy of the observations and calculations referred to this Department, the Secretary of State is too conscious of the incompetency of his knowledge to venture to give an opinion. He is satisfied, from that cause, that the most favorable one could be of no advantage to the memorialist. The committee have borne testimony in favor of his industry and talents. The Secretary of State takes the liberty to remark only, that Mr. Lambert, in bestowing much attention on the subject, as he evidently has done, and in submitting it to the consideration of Congress, has given a proof of his patriotism.

All which is respectfully submitted.

JAMES MONROE.

[NOTE.—See reports, Nos. 332 and 386.]

12th CONGRESS.] No. 329. [2d SESSION.

PRESIDENT MADISON'S SIGNATURE WITHHELD FROM THE BILL "SUPPLEMENTARY TO THE ACTS HERETOFORE PASSED ON THE SUBJECT OF A UNIFORM RULE OF NATURALIZATION."

COMMUNICATED TO CONGRESS, NOVEMBER 6, 1812.

NOVEMBER 5, 1812.

To the Senate and House of Representatives of the United States:

The bill entitled "An act supplementary to the acts heretofore passed on the subject of a uniform rule of naturalization," which passed the two Houses at last session of Congress, having appeared to me liable to abuse by aliens having no real purpose of effectuating a naturalization, and, therefore, not been signed, and having been presented at an hour too near the close of the session to be returned with objections for reconsideration, the bill failed to become a law.

I recommend that provision be now made in favor of aliens entitled to the contemplated benefit, under such regulations as will prevent advantage being taken of it for improper purposes.

JAMES MADISON.

12th Congress.] No. 330. [2d Session.

HIGHLAND TURNPIKE ROAD IN NEW YORK.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 15, 1813.

Mr. Mitchell, from the select committee, to whom was referred the memorial of the president, directors and company of the New York Highland Turnpike, made the following report:

For the reasons and considerations therein stated, the memorialists ask the aid of twenty thousand dollars, or some other adequate contribution, for the purpose of building a bridge, and completing a road through the chain of mountains on the east side of Hudson river, between the cities of New York and Albany.

They urge in favor of their request, that the mail will be transported with greater speed, and troops and ordnance enabled to travel with additional ease, after the meditated improvements shall be completed. Indeed, they wish it to be patronized as a *military way*.

During the last session of Congress it was decided, after a fair and careful inquiry, that it was not expedient to make grants of land or money, for canals or similar conveyances, in the existing state of the treasury and our public affairs.

The committee have not been able to discover any thing in the memorial before them, entitling it to a preference over many others which have been laid aside.

It is hoped the time is not far distant, when the road of the memorialists, and numerous travelling routes besides, may be improved by a liberal extension of the national means. But the present does not appear to be the convenient season. At a more opportune moment, and in a more favorable condition of the finances, the committee anticipate a facilitated intercourse through various tracts of this extensive country, binding its citizens together by strong and increasing ties of convenience and interest. In this excellent work they have no doubt the memorialists will be considered and assisted.

In the mean time, it is

Recommended, That the memorialists have leave to withdraw their papers.

12th Congress.] No. 331. [2d Session.

APPROVAL OF THE MEASURES OF THE FEDERAL GOVERNMENT BY OHIO.

COMMUNICATED TO THE SENATE, JANUARY 19, 1813.

Sir: Chilicothe, *January* 10, 1813.

I have the honor to transmit you the enclosed declaration,

And am, with high esteem, your obedient servant,

R. J. MEIGS.

Hon. the Speaker *of the Senate of the United States.*

Declaration and Resolves of the General Assembly of the State of Ohio.

It has pleased Divine Providence that this General Assembly should convene under circumstances new, replete with interest, and of great national concern. While the moral and political convulsions of Europe have shaken empires from their centre, this nation has, alone, pursued a peaceful policy. It has grown in wealth, it has increased in importance, until its power has become a cause of jealousy among the nations of the old world, and its wealth has but too effectually invited their rapacity.

Endeavoring to surmount injustice, with its view fixed on peace, and with exertions never suspended, the American administration has been determined, if practicable, to elude the evils of war. Mildness has characterized its manner, and justice has been its whole demand: but forbearance has been in vain. Forgetting the principles of justice, and regardless of our unquestioned rights, the great contending Powers of Europe have reduced plunder to system, and, in that system, unremittingly persevere. Nor is this all: the British nation has superadded personal oppression, and the cruel enslavement of our citizens; and, even when professedly at peace with the United States, she has been perfidiously accessary to the murder of our frontier inhabitants, by instigating and aiding her savage allies, whose cruel mode of warfare is disgraceful to humanity. Still was she invited to be just. While the sword was yet starting from its scabbard, the olive branch was cordially offered to the enemy; but this offer is refused, and the only republic which has survived the general wreck of nations is in open war.

Impressed with a full conviction that the war in which this nation is involved is, on our part, just and necessary; that the course pursued by the administration, in recommending the measure, and its mild, conciliatory, and continued efforts to secure to this nation an honorable peace, merit the entire approbation of this General Assembly; and that not only the honour and dignity of this people, but its continuance as a free and independent nation, depend upon a vigorous prosecution of the war: therefore

Resolved, by the General Assembly of the State of Ohio, That, in the name, and in behalf of our constituents, we pledge ourselves to aid the National Government, in the present emergency, to the extent of our resources; and we do this in the hope that the goodly heritage of our freedom may descend from us to posterity, as we received it, excellent and unimpaired.

Be it further resolved, That we have seen, with emotions of much concern, the protracted delay of the French Government to render justice to this nation for its outrageous depredations upon us, and that we will afford to

the constituted authorities, in whose wisdom and firmness we place confident reliance, our utmost support in their efforts to sustain the honor of the nation, and to obtain suitable amends for its injuries.

Be it further resolved, That, in the opinion of this General Assembly, every republic is now peculiarly called upon, by all honorable and honest motives, to sacrifice, at the shrine of his country, political dissensions and personal animosities, and, with united efforts, to rescue from danger that civil and political liberty, for which our fathers so arduously struggled and so freely bled.

Be it further resolved, That the Governor be requested to transmit to the President of the United States, to the President of the Senate, the Speaker of the House of Representatives, and to our Senators and Representatives in Congress, one copy each of the foregoing declaration and resolutions.

JOHN POLLOCK, *Speaker of the House of Representatives.*
THOMAS KIRKER, *Speaker of the Senate.*

Attest: R. OSBORN, *Clerk of the House of Representatives.*
C. A. NORTON, *Clerk of the Senate.*

JANUARY 4, 1813.

12th CONGRESS.] No. 332. [2d SESSION.

NATIONAL OBSERVATORY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 20, 1813.

CAPITOL, *January* 20, 1813.

Mr. MITCHELL, from the committee, to whom was referred, on the 8th December, a letter from the Secretary of State to the Speaker of the House of Representatives, on the subject of William Lambert's memorial, made the following report:

On the 27th December, 1809, Mr. Lambert addressed the House of Representatives upon the expediency of establishing a first meridian for the United States at their permanent Seat of Government. This was ordered for consideration to a select number of gentlemen, who, on the 28th March, 1810, [see No. 277,] laid upon the table an able and learned opinion, accompanied with scientific calculations illustrative of the object. They concluded their investigation by recommending that provision should be made, by law, for determining, with the greatest accuracy, the distance between the city of Washington and Greenwich in England, and that the proper instruments should be procured.

Afterwards, on the 23d January, 1811, the memorial was referred to a select committee; and, on the 23d of the ensuing February, that committee was discharged, and the memorial referred to the Secretary of State for his consideration.

Conformably to the desire of the House, that officer wrote to the Speaker a letter which, after having been read, on 3d July, 1812, [see No. 328,] was ordered to lie on the table. That letter was, on the 8th December last, ordered to the present committee, who have diligently weighed the matters which it contains.

It is their opinion that astronomical observations are highly useful to a navigating and commercial people, already eminent for their progress in science and the arts, and who are laboring for the completion of their national dignity and splendor.

The most ready method of obtaining the information to be derived from noting the phenomena of the heavens, is by the establishment of an observatory. This may be erected at the city of Washington. By such an institution, means may be adopted not only to fix the first meridian, but to ascertain a great number of other astronomical facts and occurrences through the vigilance of a complete astronomer.

In behalf of the committee,

SAMUEL MITCHELL, *Chairman.*

[See reports, Nos. 277 and 386.]

12th CONGRESS.] No. 333. [2d SESSION.

LIST OF PATENTEES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 22, 1813.

SIR: DEPARTMENT OF STATE, *January* 13, 1813.

In pursuance of the resolution of the House of Representatives of the United States, dated January 13, 1812, I have the honor of transmitting a list of the names of persons who have invented any new or useful art, machine, manufacture, or composition of matter, or any improvement thereon, and to whom patents have been issued for the same, from this office, from the first day of January, 1812, to the 1st day of January, 1813, with the dates, and general objects of such patents, and, also, the residence of the patentees, as far as they could be ascertained.

I have the honor to be, sir, with the greatest respect, your obedient servant, &c.

JAMES MONROE.

To the Hon. the SPEAKER
of the House of Representatives of the United States.

LIST OF PATENTEES.

Inventions.	When issued.	Names of patentees.	Residence of patentees.
	1812.		
In the structure of beehives,	Jan. 6,	Timothy Stanly,	Farmington, Hartford, Conn.
In flyers for spinning cotton yarn,	6,	Azariah Walton,	Keene, Cheshire co. N. H.
A restorative elixir,	6,	Hervey Frink,	Northampton, Hamps. Mass.
In the loom,	6,	Richard Crosbie,	Newark, New Jersey.
A hydro pneumatic engine,	6,	Richard Crosbie,	Newark, New Jersey.
In the pump,	6,	Jonathan Evans,	Whites Town, Oneida county, New York.
A steam drawer kitchen, or apparatus for cooking,	6,	John Bouis,	Baltimore.
In converting pig iron into steel,	6,	Enoch Leonard,	Canton, Norfolk co., Mass.
An improved easy draught bedstead,	6,	Peter Tilton Walcott,	Monmouth co., New Jersey.
In the art of tanning,	10,	Joseph Barker,	Deerfield, Oneida co., N. Y.
A febrifuge,	11,	Asa Johnson,	Northumberland co., Penn.
In the net or seine, for taking shad or other fish,	11,	Samuel May,	Columbia, Lancaster, Penn.
A cylindrical frame for roving and spinning flax or hemp,	11,	William Giffen,	New York.
A machine for rolling wire,	11,	James Howell,	Philadelphia.
A new species of plant applicable to many uses, particularly for the uses of flax and hemp, &c.	11,	Charles Whitlow,	New York.
In cutting and heading nails,	11,	Josiah White,	Philadelphia.
A mode of teaching to write,	11,	Samuel Randall,	Warren, Bristol county, R. I.
In the construction of the plough,	11,	John Klay,	Frederick county, Maryland.
In the plough,	11,	Roswell Tousley,	Cayuga county, New York.
In the fanning mill,	15,	Thomas S. Barnum,	Sharon, Litchfield co., Conn.
A swinging keel,	15,	Josiah Beale,	Alexandria.
A machine for cutting files,	16,	Morris Burke Belknap	Brimfield, Hamp. co., Mass.
A machine for spinning cotton, wool, flax, and tow.	16,	Gilbert Brewster, Guy Trumbull, and James Mathes,	Barre, Orange co., Vermont.
A saveall for saw-mills,	18,	Josiah Hart & Lester Fling,	Cheshire, New Hampshire.
A machine for cleaning and picking cotton and wool,	18,	Ephraim Raymond,	Norton, Mass.
In the construction of coaches and other carriages,	21,	Frederick Biemler,	New York.
In the composition of materials for the manufacturing of hats,	23,	Frederick Messer,	Guildhall, Essex co., Ver.
In the art of weaving,	23,	Job Rood,	Canterbury, Windham, Conn.
In manufacturing flour,	27,	Joseph Rich,	Madison county, New York.
A metallic case or stove for kettles, boilers, stills, &c.	31,	Charles Gaston,	Williamsport, Wash. co. Pen.
A regulated mill,	Feb. 3,	Joseph Quinby,	Wilmington, N. Carolina.
A machine for cutting and heading nails, and for making wrought nails,	3,	Mark & Rich. Reeve,	Burlington, New Jersey.
A machine for cramping boot legs,	4,	Nathaniel L. Moore,	Smithfield, Madison, N. Y.
In musical types,	7,	Uri K. Hill,	New York.
A ruling machine,	7,	Asa Spencer,	N. London, N. L. co., Conn.
In steam engines,	8,	Junia Curtis & Royal Yeamans.	J. Curtis, Plymouth, Chenango county, N. York; Royal Yeamans, Westfield, Hampshire county, Massachusetts.
In the whirl and regulator for spinning flax, hemp, tow, &c.	10,	Chauncey Crafts,	Woodbury, Conn.
An increasing press,	11,	Abraham Norton,	Litchfield, Conn.
In air backs for chimneys,	13,	Joel Root,	Southington, Hartford, Conn.
A furnace for heating ovens,	17,	Abraham H. Quincy,	Boston.
In granulating gun-powder,	17,	Richard Crosbie,	Newark, Essex co. N. Jersey.
A rolling draw-bridge,	17,	Richard Crosbie,	Newark, do. [Penn.
A wind and water mill,	18,	Moses Pennock,	Kennet's square, Chesnut co.
In rowing and propelling boats, &c.	19,	William Shaw,	Otsego county, New York.
A thrashing machine,	21,	Benjamin S. Hort,	Georgetown, South Carolina.
An improved conveyor, elevator, and hopper boy,	22,	Samuel Walgemore,	Washington county, D. C.
In the pinions of clocks,	24,	Ira Ives,	Bristol, Hartford co., Conn.
In the cooking stove,	24,	Jonathan Low,	Fitchburg, Worcester, Mass.
In the construction of carriages,	26,	Daniel Neall,	Milford, Kent county, Del.
A machine for rubbing wheat and other grain, &c.	27,	John D. Richards,	Middleburg, Virginia.
In stoves,	29,	Nichodemus Lloyd,	Philadelphia.
A thrashing machine,	Mar. 2,	William Richards,	Culpepper county, Virginia.
In extracting icthyocalla or fish glues,	4,	Daniel Waldron,	New York.
In the mode of preparing flax, hemp, &c. to be spun on the same principles that cotton and wool is spun,	5,	John Owings,	Baltimore, Maryland.
In cutting and heading nails originally invented by Jonathan Newell.	9,	Nath'l Chickering and Daniel Chickering,	Dover, Norfolk county, Mass.
A steam-boat to be propelled by sculling,	11,	Joseph Hunt,	East Chester, New York.
A machine for spinning, reeling, and spooling flax and hemp,	14,	Noel Jones,	Madison county, New York.
A machine for making boots and shoes,	14,	Elijah Thayer,	Leicester, Worcester, Mass.
A machine for dressing shingles,	16,	John Heavin,	Montgomery co., Virginia.
In spinning sheep's wool, being an improvement on the water frames used for spinning cotton,	16,	Stephen Clements,	Hartford, Windsor co., Ver.
In grates,	17,	Charles Hunt,	New York.

LIST OF PATENTEES—Continued.

Inventions.	When issued.	Names of patentees.	Residence of patentees.
	1812.		
A thrashing machine, &c.	Mar. 19,	Joseph Goulding,	Bangor, Massachusetts.
A machine for separating grain and seeds by rubbing, &c.	19,	Geo. M'Adam Broun,	Northumberland co. Virginia.
A fire extinguisher and chimney regulator,	27,	Daniel Shoemaker,	Philadelphia.
A revolving steam engine, for propelling boats by poles,	27,	Millen Battle,	Herkimer county, N. York.
A wooden still and condensing box,	27,	Rufus W. Adams,	Marlboro', Windham co. Ver.
In tanning,	28,	Samuel Currie,	Philadelphia.
A hand and water loom,	28,	John Thorp,	Providence, Rhode Island.
In working saw, grist, and other mills,	28,	J. Devereux De Lacy,	New York.
In looms,	28,	Asa Campbell,	Kingston, Luzerne co. Penn.
In manufacturing salt,	31,	Ambrose Dudley,	King William county, Vir.
A brick machine,	April 1,	James McDonald,	New York.
A suction pump and fire engine,	1,	Isaiah Jennings,	Philadelphia.
In preparing magnesia,	1,	William Dunn,	Boston.
In forts,	2,	Edward Clark,	Philadelphia.
In making candles with tallow and wax,	2,	James Zwisler,	Baltimore.
A horizontal churn,	3,	John Davidson,	Cheshire, New Hampshire.
A tobacco spinning and turning off wheel,	8,	James Vanderpool & John Eagles,	Newark, Essex county, N. J.
A mode of obtaining power between the difference of a column of rarefied and unrarefied air,	8,	Samuel Morey,	Philadelphia.
A boring machine,	8,	N. Gillet & J. Smith,	Cazenovia, Madison, N. Y.
A machine for cutting files,	11,	Charles Hesser and Amos Paxton,	Philadelphia.
A machine far manufacturing files,	20,	Levi Anderson and David Anderson,	Philadelphia.
A machine for cutting mitres, &c.	22,	Zaccheus Kelley,	Easton, Maryland.
In the construction of bridges,	23,	Benjamin Conner,	Portsmouth, New Hampshire.
In propelling boats by steam called the setting float steamboat,	23,	John Evelett,	Boston.
A quilted clothing for a copper still-head,	25,	Charles Jenks,	East Windsor, Hartford, Con.
A wooden still-head,	25,	Charles Jenks,	East Windsor, do.
In fireplaces for warming rooms by means of a cast iron fluted back,	25,	Eli Mix,	New Haven, Conn.
A shearing machine,	27,	Stephen Treadwell,	Redding, Fairfield co., Conn.
A water loom,	27,	Silas Shepard,	Philadelphia.
A machine for cutting scaleboard,	27,	Jonathan Carrington,	Litchfield, Litchfield co., Con.
In refining and making camphor,	27,	Job Green,	Charlestown, Middlesex co., [Mass.
A portable spinning wheel,	27,	Burgis Allison,	Philadelphia.
In the spinning machine,	27,	James Shaw,	Herkimer county, N. York.
For combining wool into blankets and other manufactures,	29,	Elkanah Cobb,	Georgetown.
A sawing machine,	May 1,	Russel Canfield,	Philadelphia.
A travelling cross-cut saw-mill,	4,	Sam'l Kennedy Gore,	Bradford county, Penn.
In tanning,	5,	Chrs. Luther & James Smith, assigned to D. Renner,	Georgetown.
The linen spinner,	6,	Sylvanus Baldwin & Elisha Town,	Vermont.
For pressing and rendering transparent horse hoofs, and other corneous substances, for making combs, &c.	6,	Ed. Morris Canviss,	Southington, Hartford, Conn.
In breaking plaster of Paris, &c,	12,	Paul Geiger,	Robeson, Berks co., Penn.
In the steam engine,	12,	Daniel Dod,	Elizabethtown, New Jersey.
In horse-mills by using weights,	12,	John Grannis,	Cheshire, New Haven, Conn.
A washing machine,	12,	William Stanton,	Lynchburg, P. O. Campbell county, Virginia.
A machine for boring hubbs and felloes of wheels,	12,	David Sperry,	Colchester, N. London, Con.
In warming rooms, &c. by rarefied air, applicable to ovens, hot or green-houses, rooms, &c.	12,	Daniel Pettibone,	Philadelphia.
A plugged faucet,	13,	William Jones,	New York.
In moulds for casting metal buttons,	14,	George W. Robinson,	New Haven, Connecticut.
A machine for cutting screws,	15,	Elisha Hazard & Josiah White,	Philadelphia.
The fair dealer of the chartæ lusoriæ,	15,	Robert Bailey,	Washington, D. C.
For grinding corn in the cobb, &c.	15,	William Mayo,	Henrico, Virginia.
A rolling machine for reducing metal from bars and making wire round or square,	15,	Josiah White,	Philadelphia.
A machine for cutting furs from skins,	19,	Ira Ives,	Bristol, Hartford co., Conn.
A casting or smut machine,	20,	Daniel Tomlinson,	Brookfield, Conn.
A fire proof stone stove,	21,	Abraham H. Quincy,	Boston.
In making shoes and boots, with wooden pegs, screws, notches, or creases,	23,	Robert U. Richards,	Norfolk, Litchfield co. Conn.
A hydraulic machine for raising water,	26,	William Shultze,	Philadelphia.
In chair bottoms,	26,	James Elliott, Jun.	Philadelphia.
In saw-mills,	26,	Webb Hart,	Cheshire, Connecticut.
In the cure of consumptions, and all other pulmonary complaints,	27,	Charity Shaw Long,	Philadelphia.
A hydraulic boat, with the mode of propelling the same with or against the current, or stream, &c.	28,	William Shultze,	Philadelphia.
In propelling boats, working mills, &c.	June 5,	William Shaw,	Otsego county, New York.
A mode of preparing vegetable acids,	5,	Nath. S. Allison and Benj. Kugler.	Philadelphia.

LIST OF PATENTEES—Continued.

Inventions.	When issued.	Names of patentees.	Residence of patentees.
	1812.		
In grinding and packing bark for exportation, -	June 6,	Jos. Richardson and Benj. Stout.	Bucks county, Pennsylvania.
A machine for bowing wool for hatters, -	6,	H. S. Holladay and E. G. Griffin.	Lyme, New London county, Connecticut.
For shearing cloth, - - - -	12,	Walter Kennedy, -	Frankford, Franklin county, Kentucky.
A stone boiler for refining sulphur, and for chemical purposes, - - - -	13,	Abraham H. Quincy,	Boston.
A foot stove with stone heaters, - -	13,	Abraham H. Quincy,	Boston.
A machine for cutting files, - - -	13,	Morris Burk Belknap,	Worcester, Worc'r co., Mass.
A liquid heating machine, - - -	13,	Roswell Valentine, -	Canaan, Columbia co. N. Y.
In the cheese press, - - - -	13,	Wm. W. Townsend,	Addison county, Vermont.
In chain wheels and paddles for boats, - -	13,	Robert R. Livingston,	Clermont, New York.
A floating dry-dock, - - - -	15,	Samuel Rose, -	New York.
A flax dressing machine, - - -	19,	John Haws, -	Hudson, New York.
A washing and churning machine, - -	19,	Zina Phinney, -	Cairo, Green county, N. Y.
Improvement on John Moffatt's machine for boiling salt water, - - - -	19,	Zina Phinney, -	Cairo, Green county, N. Y.
In preventing the canker worm from destroying fruit trees, - - - - -	19,	Paul Adams, -	Newbury, Essex co. Mass.
A mode of shutting the water gate of a mill, -	19,	Amos Bolton, -	Fauquier county, Virginia.
In elevating grain, meal, flour, or other pulverized substances, - - - - -	19,	Jeremiah Baily, -	Kennet Square, Chester, Pa.
In pressing and straining oil, and other fluids, -	22,	John Cunningham & Sam. S. Edmonston.	New York.
In boots and shoes, called the elastic hair soles,	23,	William Francis, -	Boston.
A mode of purifying fish and other oils, -	23,	Lewis Lecesne, -	New York.
In his patented loom, - - - -	23,	Richard C. Rogers, -	District of Maine, Mass.
In manufacturing iron ore into paints, - -	23,	Robert Nicholson, -	Bairdstown, Nelson co. Ky.
In manufacturing edge tools of steel, prepared by a common rolling press, - - -	26,	Elisha Gordon, -	Philadelphia.
In plummets of lead to be used in teaching Wrifford's art of writing, - - -	26,	Thomas Weston, -	Peacham, Caledonia county, Vermont.
A machine for making and forming all kind of cordage, - - - - -	30,	Abel Hill, -	Walpole, New Hampshire.
A stove for heating water, and to wash and boil clothes, - - - - -	July 3,	Thomas Woolsen, -	[ty, N. H. Amherst, Hillsborough coun-
In malting and kiln drying, - - -	9,	Hezekiah Parsons, -	Colebrook, C. county, N. H.
A machine for cutting files, rasps, and sickles,	11,	Samuel Gilman White,	Haverhill, Essex co. Mass.
A machine for breaking, hairing, and fleshing every species of hides.	18,	Nath. Kirk and Sam. C. Clark.	St. Clairsville, Belmont, O. [N. York.
In shearing and laying the nap of cloth, -	18,	Lemuel Dickerman,	Schaghticoke, Rensselaer co.
A horizontal steam engine for boats, &c. -	18,	Jacob W. Sexton, -	Burlington, New Jersey.
A mathematical boot, - - - -	20,	Wm. G. Crease and J. Morgan.	Philadelphia.
An economical candle holder, - - -	20,	Peter Ward and Burgis Alison.	Philadelphia.
A roping and spinning machine, - -	22,	Gideon Cornell, -	Rensselaer county, N. York.
A machine for brushing and finishing cloth, -	27,	Seth Hart, -	Hempstead, L. I., N. York.
A plane for shaving leather, - - -	27,	Frederick Woodward,	N. Lisbon, Otsego co. N. Y.
In bookbinding, - - - - -	27,	John T. Sullivan, -	Philadelphia.
In purifying spirits, - - - -	27,	Abiel Pease and Samuel Bestor.	Enfield, Hartford co. Conn.
In constructing boats and vessels, &c. - -	Aug. 3,	Francis Rotch, -	Philadelphia.
A cog and pendulum pump, - - -	6,	Bennet Lies, -	New York.
In the fire-engine, - - - -	6,	Isaac Hathaway, -	Walton, Delaware co. N. Y.
In the fire-engine, - - - -	6,	Allen Pollock and Jacob Perkins.	Boston.
In roping and spinning cotton and wool, -	8,	John Brown, -	Providence, Rhode Island.
In the steam engine, - - - -	21,	Alexander Anderson,	Philadelphia.
In propelling boats or vessels, &c. - -	21,	Alexander Anderson,	Philadelphia.
A steam washer, - - - -	21,	James Truman, -	Philadelphia.
A facilitating washing machine, - -	21,	Joseph Palmer, -	Brookfield, Madison co. N. Y.
An apparatus, and the art of making oil of vitriol, - - - - -	21,	Richard Maiben, -	New York.
A steam machine, to be applied to keep a wheel in constant motion, - - - -	25,	Marcus B. Parmelee,	Newtown, Fairfield co. Conn.
In looms, - - - - -	27,	John Phelps, -	Manlius, Onondago co. N. Y.
In the bodies of carriages, - - -	27,	Henry Dunlap, -	Georgetown, Columbia Dist.
In iron-bound boots, bootees, &c. - -	28,	Ephraim Twombly, -	Norway, Oxford co. Mass.
In looms, - - - - -	28,	Charles Cooper and George Shaake.	Lebanon, Dauphin county, Pennsylvania.
A circular interest table, - - -	Sept. 8,	Joseph Jelleff, -	Butternuts, Otsego co. N. Y.
In constructing of wharves, - - -	9,	James Butler, -	Baltimore.
In fumiductors, - - - - -	10,	William A. Baron, -	New York.
In bookbinding, called the extra moveable case,	14,	Robert Desilver, -	Philadelphia.
In the trip hammer, - - - -	28,	Stephen Morrill, -	Readfield, Kennebec, Mass.
In chain carts and railways, for levelling hills, &c. - - - - - - -	28,	John H. Morison, -	[Hampshire. Boscawen, Hillsborough, N.
In the flyer for spinning cotton, - - -	28,	Martin Newton, -	Fitchburg, Worcester, Mass.
A machine for shearing cloth, - - -	28,	Gershom Bostwick, -	Brookfield, Connecticut.
A saw-mill, &c. to be worked by animal power,	Oct. 1,	Ethan Owen, -	Prince George co. Virginia.
A cooking apparatus, - - - - -	3,	John Morris, -	New Haven, Connecticut.
A box boiler, - - - - - -	3,	John Morris, -	New Haven, Connecticut.
A machine for drawing all kinds of wire, -	6,	William Wadsworth,	Hartford, Connecticut.

LIST OF PATENTEES—Continued.

Inventions.	When issued.	Names of patentees.	Residence of patentees.
	1812.		
A wool carding machine,	Oct. 13,	George Booth,	Poughkeepsie, New York.
For shearing cloth,	13,	George Booth,	Poughkeepsie, New York.
A magnetic cylinder,	13,	Samuel Browning,	Franconia, New Hampshire.
In breaking, taking off the hair, fleshing, and scraping hides and skins.	15,	T. E. Barker and S. S. Fordham.	Hudson, New York.
In the loom,	16,	John Heavin,	Montgomery county, Va.
In bedsteads,	16,	John Redman Coxe,	Philadelphia.
In tanning,	19,	William Edwards,	Northampton, Hamp.co. Mas.
In compressing leather by a roller,	19,	William Edwards,	Do. do.
A mode of obtaining extracts from barks, &c.	20,	Wm. G. Fessenden,	Walpole, New Hampshire.
In weaving feather cloth,	21,	Jonathan and Rozanna Sizer.	New London, Connecticut.
A machine for drawing wire,	31,	Jacob T. and Thomas Walden.	New York.
An elliptical hinge,	31,	Mark and R'd Reeve,	Burlington, New Jersey.
In cutting and heading nails,	31,	Mark and R'd Reeve,	Burlington, New Jersey.
In saving of fuel,	31,	Zina Phinny,	Cairo, Green county, N. Y.
In converting cider into wine,	Nov. 11,	Henry Seabolt,	Scipio, Cayuga county, N. Y.
In the mill wheel,	12,	Rufus Lathrop,	W. Springfield, Hamp. Mass.
In steamboats and engines,	12,	Daniel Large and F. Grice.	Philadelphia.
For setting saws,	16,	John Sommer,	Franklin, Pennsylvania.
In the mode of subliming sulphur,	16,	George Robertson,	Elizabethtown, New Jersey.
A cylindrical hulling machine,	16,	Sebastian Houpt,	Philadelphia. [N. York.
A machine for cutting files,	19,	William T. James,	Greenwich, Washington co.
In the flyer for spinning,	19,	Nehemiah Giles,	Fitchburg, Worcester, Mass.
In spinning cotton,	19,	Nehemiah Giles,	Fitchburg, Worcester, Mass.
In manufacturing of sugar-candy ware,	20,	Laurence Astolfi,	Philadelphia.
In lamps,	20,	James Mallory,	New York.
An elevator for raising fluids or grain,	21,	Robert Christy,	Jefferson county, Virginia.
In stills,	24,	Hiram Whitcomb,	Cornwall, Litchfield, Conn.
In stoves called the parlour fire-place,	24,	William Lankester,	Boston.
In open stoves,	25,	Joseph Howe & Wm. Lankester.	Boston.
In water mills,	27,	Samuel Brouwer,	New York.
A thrashing machine,	27,	T. Judson and J. Hotchkiss.	Woodbury, Litchfield county, Connecticut.
A snuff-cutter, or grater,	30,	John B. Partarrieu,	New York.
A mowing machine,	Dec. 4,	Peter Gaillard,	Lancaster, Pennsylvania.
A thrashing machine,	5,	Samuel Skiff,	Sharon, Litchfield co. Conn.
A machine for making cloth by felting,	8,	Oliver Barrett, Jun.	Troy, New York.
In bridles,	10,	Robert Smether,	Orange county, Virginia.
A machine for boring rocks,	10,	John Sanford,	Sharon, Litchfield co. Conn.
A thrashing machine,	14,	John Houpt, Jun.	Bucks county, Pennsylvania.
In wheel heads,	14,	William H. Peabody,	Woodbury, Litchfield, Conn.
In building or modelling ships or vessels,	17,	Frederick Tudor,	Boston.
In propelling boats by sculling,	17,	Isaac Silliman,	Philadelphia.
A linen spinner,	21,	Alpheus Webster,	Green county, New York.
In making shingles,	24,	John Loomis,	Geneva, Orange county, N.Y.
A hide mill, or machine for softening dry hides,	30,	William Edwards,	Northampton, Hamps. Mass.
Improvements in tanning sole leather,	30,	William Edwards,	Do. do.
An improved fire-engine,	30,	John Achman,	Washington, Columbia Dist.
A washing-machine,	30,	Erastus Denison,	New Lisbon, Otsego, N. Y.
In the bake oven,	30,	John Bouis,	Baltimore.
In the camboose,	31,	John Bouis,	Baltimore.
A rake for collecting apples,	31,	Ezias Hart,	Berlin, Hartford co. Conn.

12th Congress.] No. 334. [2d Session.

REVISION OF THE ACT "FOR THE GOVERNMENT OF THE TERRITORY OF MISSOURI."

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 29, 1813.

Mr. McKee, from the committee to whom was referred the resolution instructing them to inquire "if any, and, if any, what amendments are necessary to be made to the act entitled An act providing for the Government of the Territory of Missouri," made the following report:

That they have had the subject to them referred under their consideration, and have examined the act above recited. The principal difficulty suggested to the committee, occurring in the execution of the law, appears to relate to the election of a delegate to represent the interest of the Territory in the Congress of the United States. By the first clause of the 6th section of the act it is provided "that the House of Representatives shall be composed of members elected every second year, by the people of the said Territory, *to serve for two years.* By the 13th section of the said act it is also provided "that the citizens of the said Territory entitled to vote for Representatives to the General Assembly thereof, shall, at the time of electing their Representatives to the said General Assembly, also elect one delegate from the said Territory to the Congress of the United States. It also appears

that an election was held in pursuance of the act on the second Monday of November last, when a delegate was elected. It appears that doubts have been entertained whether the delegate thus elected can legally hold his seat after the 3d day of March next, and an alteration in the law has been suggested as necessary to obviate the difficulty. It seems to the committee that the first clause of the 6th section, and the 13th section of the act, taken together, leaves no room for doubt, but evidently fixes the period for which the delegate may hold his seat at two years from the second Monday of November last; and it follows, as a necessary consequence, that the delegate elected in pursuance of the law, and for the term of two years, cannot be deprived of his right to a seat by any subsequent law.

It also appears to the committee that the Territorial Legislature are furnished, by the 7th section of the act, with competent power to change the time of holding elections so as to obviate any difficulty that may occur in the subsequent elections of a delegate.

The committee, therefore, recommend the following resolution:

Resolved, That the act entitled "An act providing for the government of the Territory of Missouri," requires no amendment.

By BENJAMIN HOWARD, *Governor of the Territory of Louisiana, Commander-in-Chief of the militia thereof, and Superintendent of Indian Affairs, in and over the same.*

A PROCLAMATION.

In discharge of those duties enjoined on the Governor of this Territory by an act of the Congress of the United States of America, approved the 4th of June, 1812, entitled "An act providing for the government of the Territory of Missouri," I have made the following arrangements, preparatory to the new organization of Government to be instituted by the said act, and which will commence its operation on the first Monday in December next: that is to say:

I have divided the future territory of Missouri into five counties, excluding from the civil jurisdiction of each of said counties any tract or tracts of country which may fall within their respective general limits, as hereinafter set forth, the Indian title to which may not have been extinguished.

That portion of territory situated north of the Missouri river, and usually known by the name of the Forks, as lying between that river and the river Mississippi, shall compose one county, and be called the county of St. Charles.

That portion of territory bounded by the Missouri river on the north; by the Mississippi on the east; on the south by the Platin creek from its mouth to its source; thence by a west line to the Missouri river, or to the western boundary of the Osage purchase; and on the west, by the said western boundary of the Osage purchase, shall compose one other county, and be called the county of St. Louis.

That portion of territory bounded by the county of St. Louis on the north; on the east by the Mississippi; on the south by Apple creek from its mouth to its source; thence by a due west line to the western boundary of the Osage purchase; and on the west, by the said western boundary of the Osage purchase, shall compose one other county, and be called the county of St. Genevieve.

That portion of territory bounded on the north by the south limit of the county of St. Genevieve; east by the Mississippi; west by the western boundary of the Osage purchase; and south by that line which formerly separated the commanders of Cape Girardeau and New Madrid, and known more recently as the boundary between those two districts, shall compose one other county, and be called the county of Cape Girardeau.

That portion of territory bounded north by the south limit of the county of Cape Girardeau; east by the Mississippi; south by the 33d degree of north latitude, (the southern boundary of this Territory as settled by act of Congress;) west by the western boundary of the Osage purchase; and from the southern extremity thereof to the 33d degree of north latitude aforesaid, shall compose one other county, and be called the county of New Madrid.

And I do hereby make known and declare that elections of representatives, to serve in the General Assembly of the future Territory of Missouri, shall be holden throughout the Territory, on the second Monday of November next, at the respective seats of justice of the present districts, which are hereby declared to be the seats of justice for the several future counties respectively, except that the town of New Madrid shall be the seat of justice of the future county of New Madrid, which said future county will comprehend the present districts of New Madrid and Arkansas: to wit, at the town of St. Charles for the future county of St. Charles, at which time and place there will be chosen for the said county two Representatives. At the town of St. Louis for the future county of St. Louis, at which time and place there will be chosen four representatives. At the town of St. Genevieve for the future county of St. Genevieve, at which time and place there will be chosen for the said county three representatives. At the town of Cape Girardeau for the future county of Cape Girardeau, at which time and place there will be chosen for the said county two representatives. And at the town of New Madrid, for the future county of New Madrid, at which time and place there will be chosen for the said county two representatives.

And I do moreover make known and declare that, on the said second Monday of November next, an election will also be holden, at the several seats of justice aforesaid, for a territorial delegate to the Congress of the United States. And I do enjoin and require that these elections be holden by the sheriffs of the present districts, or in their absence, or inability to act, by the coroners respectively; that the said sheriffs or coroners shall take the polls of those qualified to vote; that the clerks of the courts of the present districts, or their deputies, shall respectively write down the names of the voters in a fair and legible manner, and that the presiding judges of the courts of the present districts respectively, or in case of absence, or inability to act, the next in commission shall attend, and be judges of the qualification of the voters; that the said elections shall be opened at the respective seats of justice aforesaid, at or before 9 o'clock in the morning of the said second Monday of November, and close at sunset of that day.

And the sheriffs or coroners respectively, after having caused the procès-verbal of said polls to be signed by the clerks or their deputies, who may have respectively committed the same to writing, and countersigned by the judges respectively who may have attended the elections, will themselves certify the same, explicitly stating, at large, the names of the persons elected as representatives, and the name of the person having the greatest number of votes as a delegate to Congress, and make immediate return thereof to the Governor of the Territory.

And I do lastly enjoin and require, that the representatives of the several future counties, so as aforesaid to be elected, do convene in the town of St. Louis on the first Monday in December next, as provided by the act of Congress aforesaid.

In testimony whereof, I have caused the seal of the Territory of Louisiana to be hereunto affixed. Given under my hand, at the town of St. Louis, the first day of October, in the year of our Lord one thousand eight hundred and twelve, and of the independence of the United States of America the thirty-seventh.

BENJAMIN A. HOWARD.

For the information of the people who are called on to decide the right of suffrage by the Governor's proclamation, we have inserted below that part of the law which defines the qualification as well of the representative as of the voter.

No person shall be eligible or qualified to be a representative, who shall not have attained to the age of twenty-one years, and who shall not have resided in the Territory one year next preceding the day of election, and who shall not be a freeholder within the county in which he may be elected; and no person holding an office under the United States, or an office of profit under the Territory, shall be a representative. In case of vacancy by death, resignation, or removal or otherwise of a representative, the Governor shall issue a writ to the county wherever a vacancy may be as aforesaid, to elect another person to serve the residue of the term. That all free white male citizens of the United States above the age of twenty-one years, who have resided in said Territory twelve months next preceding an election, and who shall have paid a territorial or county tax, assessed at least six months previous thereto, shall be entitled to vote for representatives to the General Assembly of said Territory.

12th Congress.] No. 335. [2d Session.

APPROVAL BY PENNSYLVANIA OF THE DECLARATION OF WAR.

COMMUNICATED TO CONGRESS, FEBRUARY 1, 1813.

To the Senate and House of Representatives of the United States: JANUARY 30, 1813.

At the request of the Legislature of Pennsylvania, conveyed through the Governor of that State, I transmit to Congress copies of its resolutions of the 16th December, 1812.

JAMES MADISON.

Viewing the present state of our foreign relations, we, with astonishment and regret, behold the Emperor of the French withholding from our country those indemnifications which ought to have been rendered with liberality and promptness. After the aggressions of Great Britain had, by long continued practice, been regarded by her Government as right, after the forbearance of the American Government had assumed the appearance of cowardice, war is reluctantly, unavoidably, but decisively declared. Animated by the most sincere love of peace, the President of the United States in the same despatch announces to the British Government the existence of war, and the equitable, easy, and honorable means by which its progress might be arrested, and its calamities permanently prevented; but this extraordinary proof of a humane and pacific disposition is treated with contempt. Familiarized with the slaughter of man around the globe, the British Government prefer the effusion of human blood to a suspension of the inhuman practice of impressment, even during the short space of an armistice agreed on for the purpose of negotiating a just and honorable peace; nay, notwithstanding the offer made by the Government of the United States to exclude British subjects from our merchantmen and navy. But what atrocities are too enormous to be found in that Government, whose characteristical features are cruelty and perfidy, which stimulates the savage to drench his tomahawk and scalping knife in the blood of our frontier men, women, and infants, which, making the most solemn professions of friendship and peace, strives by the malignant breath of its secret emissaries to kindle in our nation dissatisfaction, discord, rebellion and civil war, with all their sanguinary and horrible consequences! Thus is extinguished in the American Government, and in every American bosom, the last hope of finding in the conduct of Great Britain toward the United States a single voluntary act of justice or humanity. Impressed with these considerations, and with others of a collateral and subordinate nature, we, the Senate and House of Representatives of the Commonwealth of Pennsylvania in General Assembly met, do adopt the following resolutions:

Resolved, That the declaration of war against the United Kingdom of Great Britain and Ireland, issued by the General Government on the 18th of June last, was the result of solemn deliberation, sound wisdom, and imperious necessity.

Resolved, That the sword being drawn, should never be sheathed till our wrongs are redressed, our commerce unfettered, and our citizens freed from the danger of British impressment of imprisonment in the floating dungeons of the British navy, and the painful necessity of fighting the battles of an inveterate enemy, against their fathers, their brethren, their native country, and their friends.

Resolved, That, to exert all the energies of his body and of his mind, and to devote his property to bring the existing war to a speedy, just, and honorable issue, and to teach our insolent foe that the Americans are as free from timidity and weakness in battle as from covert and disguise in negotiating, is a duty which every citizen of the Union owes to himself, to his country, and to his God.

Resolved, That with painful regret we contemplated the refusal by the Executive authorities of some of the States in the Union to furnish, on the President's demand, their quota of militia for the defence of the seacoast; and that with confidence we expect from the National Legislature a prompt attention to this alarming and unprecedented occurrence.

Resolved, That the promptness and the zeal with which the Governor of this Commonwealth executed the military orders of the President, since the commencement of hostilities, entitle him to the gratitude of this General Assembly of Pennsylvania, and of the nation.

Resolved, That the Governor of this Commonwealth be instructed to transmit a copy of these resolutions to the President of the United States, with a request that he communicate them to Congress.

JOHN TODD, *Speaker House of Representatives.*
P. C. LANE, *Speaker of the Senate.*

IN SENATE, *December* 10, 1812. Read, and adopted.

JOSEPH A. McJIMSEY, *Clerk of the Senate.*

IN THE HOUSE OF REPRESENTATIVES, *December* 16, 1812. Read, and adopted.

GEO. HECKERT, *Clerk House of Representatives.*

COMMONWEALTH OF PENNSYLVANIA, *ss:* SECRETARY'S OFFICE, *January* 21, 1813.

I certify that the annexed is a true copy of the original resolutions remaining among the rolls in this office. Witness my hand and seal.

N. B. BOILEAU, *Secretary.*

12th Congress.] No. 336. [2d Session.

RIGHT OF SUFFRAGE IN THE ILLINOIS TERRITORY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 15, 1813.

Mr. Little, from the committee to whom was referred the resolution instructing an inquiry, whether any amendments were necessary to the act to extend the right of suffrage in the Illinois Territory, and for other purposes, made the following report:

That they have had the subject under their consideration. The only difficulty presented to your committee, in the execution of the law, was that which relates to the time for which the present delegate from that Territory should be considered as elected. The third section of the aforesaid act directs that the citizens of the said Territory entitled to vote for members of the territorial Legislature, may, at the time of making such elections, elect one delegate to Congress who shall have the powers granted to the delegates from the several Territories of the United States, who are elected to serve two years. No doubt exists in the committee that the time of his services commenced at the time of his election, which will terminate at the subsequent election of members for the territorial Legislature. The committee recommend the following resolution:

Resolved, That the act to extend the right of suffrage in the Illinois Territory, and for other purposes, requires no amendment.

12th Congress.] No. 337. [2d Session.

APPLICATION TO AMEND THE ACT CONTINUING CERTAIN PATENT RIGHTS TO OLIVER EVANS.

COMMUNICATED TO THE SENATE, FEBRUARY 22, 1813.

Mr. Bayard, from the committee to whom were referred the memorials of John Worthington and others, and of Oliver Evans, reported:

That the subject of the memorials is of considerable interest and importance to the community, and involves difficulties which would require more time and patient investigation fully to understand than can be bestowed upon it during the remnant of the present session.

The committee confine themselves to stating that the grievance complained of by the memorialists first mentioned, proceeds from an act of Congress, passed the 21st day of January, in the year 1808, whereby a patent, which had before that time been granted to Oliver Evans for fourteen years, for certain mill machinery, and which had expired by its own limitation, was renewed and continued for fourteen years from the date of the act. It appears that, in the interval between the expiration and renewal of the patent, several grist mills were erected into which the use of Mr. Evans's machinery was introduced.

By a judicial construction of the act of Congress, it is held to prohibit the use of the machinery after the passing of the act, without the license of the patentee, although the mill and machinery were constructed when no patent or exclusive right existed.

It also appears that the price at which Mr. Evans rated his licenses before the act of 1808, for one water wheel, was from 30 to $40.

Since that act his prices have been gradually augmented, and he now requires from 3 to $400 for the machinery used in the manufacture of flour by each pair of stones of six feet diameter.

In a single mill, having several pair of stones, a demand was made of $2,200 for the use of the machinery.

The machinery is undeniably of great importance to the public; but the increased and increasing prices of the patentee threaten the imposition of an intolerable burden upon a very useful and important class of manufacturers.

The committee are not prepared to recommend any specific relief in the case; and conceiving that it deserves more attention than it can receive during the present session, consider that it would be advisable to abstain from acting upon the subject at this time, and to leave it to the mature consideration of the ensuing Congress. The following resolution is submitted:

Resolved, That the committee, to whom were referred the memorials of John Worthington, and others, and of Oliver Evans, be discharged from the further consideration of the subject of the said memorials.

12th Congress.] No. 338. [2d Session.

IMPROVEMENT IN CONSTRUCTING BRIDGES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 24, 1813.

Sir: War Department, *February* 23, 1813.

Mr. Benjamin Conner has submitted to my inspection models of bridges, which, from the simplicity of their structure, the cheapness of their materials, and the force of the mechanical powers employed in them, (the lever and arch combined,) are, in my opinion, well calculated for military purposes. I have the honor, therefore, respectfully to report, conformably to the order of the honorable the House of Representatives of the 11th instant, referring to this Department the petition of Mr. Conner, that the right to make and to use bridges, made after these models, and the models themselves, should be purchased from Mr. Conner.

The petition and documents are herewith returned.

I have the honor to be, with great respect, sir, your most obedient, humble servant,

JOHN ARMSTRONG.

The Hon. the Speaker *of the House of Representatives of the United States.*

12th Congress.] **No. 339.** [2d Session.

CUMBERLAND ROAD.

COMMUNICATED TO CONGRESS, MARCH 2, 1813.

To the Senate and House of Representatives of the United States: MARCH 1, 1813.

I lay before Congress a report of the Secretary of the Treasury, containing a statement of proceedings under the "act to regulate the laying out and making a road from Cumberland, in the State of Maryland, to the State of Ohio."

JAMES MADISON.

FEBRUARY 26, 1813.

The Secretary of the Treasury respectfully submits to the President the report made by the superintendent of the road from Cumberland to the State of Ohio, of the progress made towards completing the same during the last year.

ALBERT GALLATIN, *Secretary of the Treasury.*

SIR: CUMBERLAND, *December* 21, 1812.

The contracts for the first ten miles of the western road are completed, with but few exceptions, those of little importance, and such as are common on work of this kind. The contractors are paid, except a small sum reserved from each, sufficient to ensure the final completion next spring. The road is open, and used daily by travellers.

On the second letting, comprising nearly eleven miles in addition, the contractors (for the time) have made considerable progress, and are now at work, each with a considerable number of hands, and there is every probability the contracts will be completed within the time provided, viz: the first of November next.

It is now sufficiently ascertained that the estimates heretofore made, viz: $150,000, will be sufficient for the completion of the first twenty-one miles, embracing every expense, probably a small surplus of from three to five thousand dollars.

The next ten miles it is expected will cost, on an average, nearly the same as the preceding; a small sum in addition may be required, on account of several large bridges which will be wanting.

If it be desirable that the work should progress with more expedition, ten miles or more might be let the ensuing spring; it would be well, at all events, to contract for four or five miles more on account of building a bridge across the Little Youghiogany river, as it must be a considerable building, and, to lessen expense, it would be necessary to take advantage of low-water, and the spring season, for procuring sawed timber, as there is but one saw-mill convenient, and that during three-fourths of the year unemployed for want of water.

It is expected the Legislature of this State will pass a law, authorizing the President to receive toll, for the purpose of repairing the road, and likewise against abuses which are common on all roads of the kind, to prevent which laws have been found necessary. I am, &c.

DAVID SHRIVER, Jun.,
Superintendent of the United States Western road.

13th Congress.] **No. 340.** [1st Session.

CONTESTED ELECTION OF THOS. K. HARRIS, A REPRESENTATIVE FROM TENNESSEE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JUNE 4, 1813.

Mr. JAMES FISK made the following report:

The Committee of Elections, to whom was referred the petition of William Kelley, contesting the election of Thomas K. Harris, returned as one of the Representatives for the State of Tennessee in the present Congress, and praying to be admitted in his stead, have had the said petition under consideration, and report, in part:

That, at the last general election in Tennessee for Representatives to Congress, the said William Kelley and Thomas K. Harris were candidates in the third Congressional district. From a return of the polls in the district, as made to the Governor of said State, it appears that the sitting member obtained one vote more than the petitioner, and, therefore, was returned as elected.

By the laws of the State, it is made the duty of the inspectors of the elections for Representatives to Congress, to cause two fair statements to be made of the number of votes given at said election for each candidate, and certify the same; and it is also made the duty of the sheriff, or returning officer, to transmit one of said certificates to the Governor, and to file the other with the clerk of the county court of his county. That, on comparing the certificate of the polls taken in the county of Warren, in said district, and transmitted to the Governor, with the one filed with the clerk of said county, there appears to be two more votes for the sitting member on the former, than on the latter certificate; and it further appears, by the first certificate, that the number of votes given to each candidate, being added together, will exceed by two the whole number of votes certified to have been given. The petitioner contends that these facts prove the certificate filed with the clerk correct, and the petitioner entitled to his seat.

The sitting member was not notified that his election would be contested until after his arrival in this city; and he now states that he believes that, if time was allowed him, he would procure testimony to support his election, and to show that the petitioner received many illegal votes, and that there were several erroneous returns made in favor of the petitioner; and the sitting member asks for a reasonable time to be allowed him to obtain such testimony.

Upon a view of all the circumstances of this case, the committee are of opinion that further time ought to be granted to the sitting member to procure testimony, and they accordingly submit the following resolution:

Resolved, That until the ——— be allowed to Thomas K. Harris, a member of this House, to procure testimony relative to his election.

[See further report, No. 353.]

13th CONGRESS.] No. 341. [1st SESSION.

TEMPORARY APPOINTMENT OF A SECRETARY OF THE TREASURY IN THE ABSENCE OF ALBERT GALLATIN.

COMMUNICATED TO THE SENATE, JUNE 7, 1813.

To the Senate of the United States: WASHINGTON, *June* 3, 1813.

In compliance with their resolution of the 3d instant, the Senate are informed that the office of the Secretary of the Treasury is not vacated, and that in the absence of Albert Gallatin, commissioned as one of the envoys to treat with Great Britain and Russia, the duties of that office are discharged by William Jones, Secretary of the Navy, authorized therefor, according to the provisions of the act of Congress, entitled "An act making alterations in the Treasury and War Departments," passed May 8, 1792.

JAMES MADISON.

13th CONGRESS.] No. 342. [1st SESSION.

INQUIRY RELATIVE TO THE NOMINATION OF JONATHAN RUSSELL TO BE MINISTER TO SWEDEN.

COMMUNICATED TO THE SENATE, JUNE 7, 1813.

Mr. GOLDSBOROUGH, from the committee to whom had been referred a resolution "that the President of the United States be requested to inform the Senate whether any communication has been received from Jonathan Russell, admitting or denying the declaration of the Duke of Bassano to Mr. Barlow, that he had informed his predecessor of the repeal of the Berlin and Milan decrees, at the date of that decree;" and the nomination of Jonathan Russell to be minister plenipotentiary of the United States to Sweden, made the following report:

That, in pursuance of the order of the Senate, the committee met the Secretary of State, by appointment, at the office of the Department of State, when they were informed by the Secretary that there was no official denial, or admission, of Mr. Jonathan Russell's, that the allegation of the Duke of Bassano to Mr. Barlow, referred to, was true; but that he (the Secretary) had a private letter from Mr. Russell, subsequent to the allegation of the Duke of Bassano, in which he understood that allegation to be unequivocally denied.

13th CONGRESS.] No. 343. [1st SESSION.

CONTESTED ELECTION OF JOHN P. HUNGERFORD, A REPRESENTATIVE FROM VIRGINIA.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JUNE 10, 1813.

Mr. JAMES FISK made the following report:

The Committee of Elections, to whom was referred the petition of John Taliaferro, complaining of the undue election of John P. Hungerford, returned as one of the Representatives from Virginia, in the present Congress, have had the same under consideration, and report:

That, at the last Congressional election in that State, for Representatives, the said John P. Hungerford was returned as elected from the district composed of the counties of Westmoreland, Richmond, Lancaster, Northumberland, King George, and Stafford. The petitioner was also a candidate. The laws of Virginia, prescribing the manner of conducting such elections, direct that "the clerks of the polls shall enter in distinct columns, under the name of the person voted for, the name of each elector voting for such person."

They further direct, that "the clerks of the polls, having first signed the same, and made oath to the truth thereof, a certificate of which oath, under the hand of a magistrate of the county, shall be subjoined to each poll, shall deliver the same to the sheriff," &c. &c.

Upon inspecting the polls of the several counties, the following facts appear:

In Westmoreland the names of the voters are all entered in one general column, on the left hand margin of the book, and figures, in numerical order, instead of the names of the voters, are inserted in the columns under the names of the candidates, as evidence for whom each vote is given.

In Richmond the voters are registered in one column, and a straight mark, instead of the name of the voter, is inserted under the name of the candidate.

In Stafford the Christian name of the voter is not written on the poll; the initial letter only is given. The same occurs partially in Lancaster.

On the polls of Westmoreland, Richmond, Lancaster, and Stafford, no certificate is found of any oath having been administered to the clerks keeping the same.

The petitioner contends that the irregularities and deviations from the express provisions of the law are of such a nature as to render void the election, and require a new one to be held. On the other hand, it is urged by the sitting member that most of the proceedings objected to are justified by general practice, and that the manner of keeping the poll, by entering the names of all the voters in one general column, is sanctioned by long usage; and that in Stafford the initial only of the Christian name of the electors had been entered on the polls for several past elections.

The committee are sensible that trivial errors, committed by the officers conducting elections, resulting, perhaps, from a misconstruction of a doubtful passage of the law, ought not to deprive any class of citizens of the right of representation.

Still it must be manifest that, to preserve the elective franchise pure and unimpaired, the positive commands and requirements of the law, in respect to the time, place, and manner of holding elections, ought to be observed.

To enter the names of the voters promiscuously in one margin of the poll-book, when the law positively directs them to be "entered in distinct columns," and "under the name of the candidate voted for," is as manifest a departure from the law as the selection of another time, or another place, than that mentioned in the law. Nor can the committee conceive that the prefixing the initial only of the Christian name to that of the family or surname of the voter, is a fair compliance with the spirit and intent of the law, which declares "that the names of the voters shall be duly entered in distinct columns," &c. It is to be presumed that the object of the law in having the name "duly entered," is to exhibit to the country, on a scrutiny, who are the persons voting, and to test their title to a vote, by comparing the poll with the land-roll.

And when, for example, the initial letter is I, it must be obvious, that it may be taken to stand for John, or Joseph, or Jonathan, or Joshua, or Jeduthun, or Israel, or Isaac, or Jacob, or Isaiah, or Jeremiah, and it would require no small share of perseverance and industry to contest an election when such endless uncertainty stands in the way of examination.

The committee have not been satisfied that such irregularities have ever been sanctioned, on a scrutiny, either by the Legislature of Virginia, or of the United States. When opposing candidates have not objected to them, they may have passed *sub silentio*. We feel no hesitation in saying that custom ought not to justify a departure from the spirit and letter of positive law.

Upon a view of the whole ground, the committee, convinced of the importance of adhering strictly to the provisions of the law, as well as of the irregularities in conducting this election, respectfully submit the following resolutions:

Resolved, That the said election, held in the aforesaid district, in April last, was illegal, and ought to be set aside.

Resolved, That John P. Hungerford is not entitled to a seat in this House.

MAY 29, 1813.

To the Speaker and Members of the House of Representatives of the United States, in Congress assembled:

The undersigned, John Taliaferro, begs leave, most respectfully, to represent that, at the late election, held in the State of Virginia, for the choice of a Representative to your honorable body, for the counties of Stafford, King George, Westmoreland, Richmond, Northumberland, and Lancaster, your petitioner had a majority of the votes legally taken by the sheriffs, who conducted the said election.

Your petitioner, therefore, prays that your honorable body will cause an inquiry to be made, in the ordinary way, whether John P. Hungerford has been legally returned by the sheriffs to represent the aforesaid district. If it shall, on examination, be decided that the return of John P. Hungerford is legal, your petitioner is prepared to make it appear that a majority of the votes of the electors of the said district, legally qualified to vote, will be found on the several polls of your petitioner; in virtue of which he claims the right to a seat in your honorable body, to the exclusion of John P. Hungerford.

Relying on the wisdom and justice of your honors in the premises, your petitioner is, with due respect, &c. &c.

JOHN TALIAFERRO.

SIR: STATE OF VIRGINIA, KING GEORGE COUNTY, *May* 13, 1813.

Be pleased to take notice that I shall, at the meeting of the next Congress of the United States, contest the legality of your return, to serve in that body, as the Representative of the district, in Virginia, composed of the counties of Stafford, King George, Westmoreland, Richmond, Northumberland, and Lancaster, on the ground that the polls in the aforesaid counties of Westmoreland and Richmond were not taken in the manner prescribed by law. Should Congress decide that the polls in the said counties of Westmoreland and Richmond have been legally taken, I shall contest your right to a seat in that body, as the Representative of the aforesaid district, on the ground that a majority of the electors thereof, legally qualified to vote, will, on due examination, be found to have voted for me. In pursuance of which, you are hereby warned, that I object to the vote of each and every elector on your several polls, who is not enrolled on the land lists of the respective counties, in which the vote has been given, as possessing the quantity of land required to constitute a legal elector. To the vote of Daniel Carmichael, on the poll taken for Westmoreland county, I object, he having previously voted in the same election, and for the same candidate, in the county of King George. If there be two persons of that name entitled to vote, you can readily ascertain it. The affidavit of any one of respectability on that point will be satisfactory.

Very respectfully, I am, sir,

JOHN TALIAFERRO.

To General JOHN P. HUNGERFORD,
Leedstown, Westmoreland county, Virginia.

STATE OF VIRGINIA, *Stafford county, sct.*

On this 18th day of May, 1813, before me, a justice of the peace for said county, came William Rodgers, and made oath, that he did, on the 16th day of this present month, May, deliver to General John P. Hungerford, at his own house in Leedstown, a paper in writing, of which the foregoing is a true and exact copy.

Given under my hand, the day and year above mentioned.

NATHANIEL FOX.

VIRGINIA, *Stafford county, to wit:*

I, Valentine Peyton, clerk of the court of the county aforesaid, do hereby certify, that Nathaniel Fox, Esq., before whom the foregoing affidavit of William Rodgers appears to have been made, and who hath certified the same, was, at the time of so doing, and is still, a justice of the peace in and for the said county, duly commissioned and authorized; and that, to all his acts as such, full faith and credit is and ought to be given, as well in courts of justice as thereout.

In testimony whereof, I have hereunto set my hand, and affixed the public seal of the said county, on this 29th day of May, 1813, and in the 37th year of the commonwealth.

V. PEYTON,
Clerk of Stafford County Court.

JUNE 5, 1813.

In regard to the petition of John Taliaferro, now before the Committee of Elections, complaining of the undue return of General John P. Hungerford, to serve as a member in the thirteenth Congress of the United States, the petitioner begs leave, in the first place, to draw the attention of the committee to the law of Virginia directing the time, places, and manner of holding and conducting elections of members to Congress. By a reference to this law, and to the polls taken in pursuance of it, the committee will perceive that four polls of the six, in virtue of which Mr. Hungerford was returned, have been illegally taken, and ought not to be accepted by the committee as evidences of an election held in conformity with the law of Virginia. From the certified and authentic copies of the polls taken in all the counties composing the district for which Mr. Hungerford has been returned, and placed in the hands of the committee, it will be seen, that the polls of Westmoreland, Richmond, and Stafford were not taken in the manner prescribed by law; nor does it appear on the face of either of those polls, as by law it should, that the respective clerks had been sworn to keep them faithfully and impartially. The petitioner also objects to the legality of the poll taken in Lancaster county, for that the clerk who kept it was not, in conformity with the law, sworn to keep it faithfully and impartially. The petitioner is aware that custom will be pleaded and urged by the sitting member as a justification for the mode of keeping the poll in Westmoreland county. It, however, never can be admitted and sanctioned by a just and an enlightened tribunal, that mere custom ought to predominate over positive law, or that error, however long persisted in, can become right. The constitution of the United States has in vain vested in the respective States the power to pass laws prescribing the times, places, and manner of electing members to Congress, unless those laws, when enacted, are conformed to by those appointed to execute them, and unless they are respected and maintained inviolate by those who are, from time to time, called to decide as to their due and strict execution. If the slender protection of illegal usage should be claimed for the poll of Westmoreland county, the petitioner contends, that no parallel is to be found to palliate even the illegality of the mode in which the polls of Richmond and Stafford counties appear to have been taken. The law directs that, in taking the poll, the name of each voter shall be distinctly written in a column under the name of the person voted for. The deviation from the law, in this respect, in the polls of Westmoreland and Richmond is palpable, but more strikingly so in the poll of Stafford, which does not exhibit the name of a single voter out of near three hundred votes taken. The petitioner cannot forbear to state, that to sanction the polls so manifestly illegal would tend directly to a subversion of the vital policy of the law to which they ought to conform. The object of the law is to render easy and certain any investigation into an election which circumstances may require. It must be obvious to the committee, that an investigation of the nameless poll of Stafford county, with a view to ascertain the right of those who purport to have been placed on it, is not only not easy, but impracticable. The petitioner is aware that the sitting member may contend, that he ought to have had notice of the objections made to the legality of the polls taken in Stafford and Lancaster counties, as well as to those of Westmoreland and Richmond counties, prior to the meeting of Congress. Should such a suggestion be made by the sitting member, it is presumed that the committee will, at once, perceive that it is unfounded. The polls are the evidences on which the return of the sitting member rests. It cannot require a notice from the petitioner that he means to use those evidences to set aside the return. If, indeed, the sitting member can show, that by a notice given to him any time prior to the meeting of Congress, that he would have been better prepared to maintain the legality of his polls, or that thereby he could have more effectually obviated the objections of the petitioner to them, it must be admitted that he was entitled to a notice, but not otherwise. Finally, the petitioner begs leave to represent, that he does most conscientiously believe that a majority of the legal electors, of the district in question, voted for him at the late election, but that owing to the confused, irregular, and illegal manner in which the polls have been kept, an investigation into this fact has manifestly become impracticable. Upon the whole view of the case, the petitioner, earnestly disposed to promote public justice, and the particular interest of those for whom he now acts, trusts that the committee will see cause to recommend that the election in question be set aside as illegal, and that a new election be ordered.

JOHN TALIAFERRO.

STATE OF VIRGINIA, *Westmoreland County, sct:*

At the request of General John P. Hungerford, this is to certify that, at an election for a member to Congress of the United States, held in April, in the year 1799, when General Henry Lee and Doctor Walter Jones were candidates, and at another election held in the year 1801, when John Taliaferro and John Tayloe, Esquires, were candidates, that the polls were kept by the sheriff in ruled lines and figures in the same manner and form as they were kept by the sheriff at an election held in the said county in April, 1813, for a member to Congress, when General John P. Hungerford and John Taliaferro, Esquires, were candidates, as appears by the polls returned, according to an act of the General Assembly of Virginia, and recorded among the records of Westmoreland county court, and at all the elections inclusive from 1799 to 1813.

Given under my hand the 17th day of May, 1813.

JOSEPH FOX, *Clerk of Westmoreland.*

John P. Hungerford begs leave to submit to the Committee of Elections the following remarks, in reply to those offered by John Taliaferro, Esquire, who, by his petition, contests the validity of his election as a member of the House of Representatives:

The petitioner, in his remarks, seems to place his objections upon two grounds: 1st. That it does not appear that the clerk, who kept the poll in Lancaster county, was duly sworn; 2d. That the polls in some of the counties were not kept in the manner directed by the act of Assembly.

The sitting member contends that if it even did appear that the clerk, who kept the poll in the county mentioned, was not sworn, it would not vitiate the election, provided the committee were convinced that fairness and

impartiality, which the oath was intended to secure, had been observed in taking down the names of the electors. The forms prescribed, by law, are intended as *means* to secure a *just* result. If justice is obtained, it is humbly believed that the *manner* in which it was done is not very important.

But the sitting member contends that though it does not *directly appear* that the clerk was sworn, yet that it ought to be presumed that it was done. When the law gives a general power to any officer to do a certain act, all the incidents required will be presumed to have been performed; and it is incumbent on him who objects to show that the *act was not done*. Would it not be equally necessary, according to the position assumed by the petitioner, to prove that the persons who superintended the elections had been duly commissioned as sheriffs? that they had entered into bonds with security, and that they had taken the necessary oaths? All these things are required before a person can act as a sheriff, and of course before he can superintend any election. Would it not be novel to entertain objections which would make it necessary that these things should appear? and is it not equally novel to admit the doctrine that the *appointment* and *qualification* of the clerk who kept the poll ought to appear?

Equally untenable, in the opinion of the sitting member, is the objection stated by the petitioner as to the manner of keeping the polls. Unless some reasonable grounds can be shown to induce a belief that the result has been unjust, the variance will be considered as a matter of form, not affecting the justice of the case. The law requires many things of a sheriff in holding an election, which are considered as merely directorial; but the non-observance of which do not alone vitiate the election. He is bound to admit to the polls all persons who are qualified according to law; to exclude those who are not; to administer an oath to persons whose rights are doubtful, and set the names of those who refuse to take the oath on separate polls. He is required, before he closes the election, to make proclamation in a prescribed manner; yet can it be correct to contend that if the sheriff violates his duty in any of these respects, that it vitiates the election entirely, unless it can be shown that his departure from the law affected the result.

The principles here laid down have been sanctioned by the House of Representatives in several instances. In the contest from the State of Georgia between Spalding and Meade, it was determined that the law of the State, requiring the return of the votes within a certain period, should be disregarded, and the votes, though not returned in the *manner* prescribed by that law, should be considered as valid. In the case of Turner and Baylies, it was determined that the act of the Governor and Council of Massachusetts, *under* a law of that State, directing a new election, did not prevent the House from declaring Turner duly elected at the first election, though the manner of designating him on the ballots had not been observed as provided by the laws of that State.

It is not even suggested by the petitioner that the manner of keeping the polls in the counties of Westmoreland and Richmond has been productive of any other than a fair and just result. It is not pretended that a single vote, except one, has been set down in the column containing the progressive numbers of those who voted for the sitting member to which he was not justly entitled; or that any votes which were given for the petitioner were not regularly designated and numbered in his column. Why, then, if the result is just, fair, and unequivocal, is the election to be vitiated? As to the election in Stafford county, the sitting member can hardly suppose that a serious reply is necessary. If any error was committed, the presumption is, that it operated favorably to the petitioner, as he had a majority of votes in that county. The law does not require, in terms, that the Christian name of the elector should be written at full length; the claims of justice would be satisfied with such a certainty as would afford the means of a fair and effectual scrutiny, and, in general, that would not be difficult where the initial of the Christian name and the surname at length are given. Should there be instances where the surnames and the initials of Christian names of different persons are alike, the utmost that could be required would be to place the burden of proof (that they were different persons entitled to vote) on the party claiming the benefit of such votes.

All which is humbly submitted.

JOHN P. HUNGERFORD.

[NOTE.—See further reports, Nos. 345 and 355.]

13th CONGRESS.] **No. 344.** [1st SESSION.

INQUIRY RELATIVE TO THE NOMINATION OF ALBERT GALLATIN, SECRETARY OF THE TREASURY, TO A FOREIGN MISSION.

COMMUNICATED TO THE SENATE, JUNE 14, 1813.

Mr. ANDERSON, from the committee to whom had been referred the nomination of Albert Gallatin to be one of the "envoys and ministers plenipotentiary to negotiate and sign a treaty of peace with Great Britain, under the mediation of the Emperor of Russia; to negotiate and sign a treaty of commerce with Great Britain; and to negotiate and sign a treaty of commerce with Russia;" and a message of the President of the United States of the 7th instant, made the following report:

That, in obedience to the resolution authorizing the committee to inquire and report thereon, he had addressed a letter to the President of the United States, a copy of which accompanies this report, enclosing a copy of the resolution under which the committee were appointed; that he afterwards called on the President of the United States, who informed him that he did not consider the authority given to the committee by the resolution such as to authorize them to call on him in their official character; but that, if they were especially instructed to call upon him, and the specific object should be designated, he would freely receive them, and appoint a time for that purpose.

SIR: CAPITOL HILL, *June* 11, 1813.

I take leave to enclose you a copy of a resolution of the Senate. The committee appointed by that resolution have directed me to inform you that they will wait on you at such time as you may please to appoint, in order to commune with you upon the matter referred to them.

Accept assurances of my high respect,

JOSEPH ANDERSON.

The PRESIDENT OF THE UNITED STATES.

IN SENATE OF THE UNITED STATES, *June* 10, 1813.

Resolved, That the nomination of Albert Gallatin, together with the message of the President of the United States, received the 7th instant, relative to the said nomination, be referred to Mr. Anderson, Mr. King, Mr. Giles, Mr. Brown, and Mr. Bledsoe, to inquire and report thereon.

13th CONGRESS.] No. 345. [1st SESSION.

CONTESTED ELECTION OF JOHN P. HUNGERFORD, A REPRESENTATIVE FROM VIRGINIA.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JUNE 28, 1813.

Mr. JAMES FISK made the following report:

The Committee of Elections, to whom was recommitted the petition of John Taliaferro, contesting the election of John P. Hungerford, returned as a member of this House, with their report thereon, have, according to order, had the same under consideration, and further report:

That, from the polls of the several counties, the sitting member appears to have obtained a majority of twenty-four votes in the district.

The petitioner claims the seat on the ground that a majority of the legal votes at said election were given for him, and, as evidence to support his claim, produced the land list of 1812, with a copy of the poll taken in each county in the district, at said election. That, on comparing the poll of each county with the aforesaid land list, and taking that as the test, it appears that 193 persons who voted for the petitioner, and 234 persons who voted for the sitting member, were not qualified to vote; that, deducting from both polls the persons challenged, who do not appear to have been qualified to vote, according to the land list aforesaid, there is left for Mr. Taliaferro a majority of seventeen over Mr. Hungerford.

The petitioner contends that the difficulties of ascertaining the names, places of abode, and property of the voters, presented by the omission of duly entering their names in the poll-book, forbid the hope of a fair and successful scrutiny of the poll, by means of any other evidence than that of comparing it with the land list, on which alone ought to rest the merits of his claim, and the right of the sitting member to his seat.

But the committee were of opinion that it was competent for the parties to support their challenges and polls by other evidence, and, therefore, admitted the accompanying affidavits, with the testimony of Henry Lee, Jun., Daniel C. Brent, and John Cook, (the two latter gentlemen produced by the petitioner,) as sufficient to support forty-three of the votes on his poll, that were challenged by the petitioner, and not found on the land list as aforesaid. And the petitioner, by the testimony of the said Lee, Brent, and Cook, proved the legality of fifteen votes found on his poll, challenged by the sitting member, and not found on the land list; that, by adding the aforesaid forty-three votes to the poll of Mr. Hungerford, and the said fifteen votes to the poll of Mr. Taliaferro, there is left for the former gentleman a majority of ten votes over the latter.

The petitioner contended that the evidence exhibited by the affidavits fell far short of supporting the votes it was intended for; because it did not show that the voters had had the possession of the freehold title to their lands, as well as of the land itself, in right of which they voted, six months prior to the day of said election, and which, as he alleged, the laws of Virginia required, to entitle them to vote, except in cases where they came into the possession of the land by marriage, descent, or devise. If this construction of the law (which the strict letter of it seems to warrant) had been adopted by the committee, it would have left fourteen of the aforesaid forty-three votes given for Mr. Hungerford unsupported, and to the petitioner a majority of four votes; but, from the best information the committee could obtain of the construction given this law by the usage of the Virginia Legislature, a majority were inclined to the opinion that the spirit and intention of the law were satisfied, when the voter had been six months in the actual possession of the land, and obtained his freehold title to the same any time previous to his voting.

From the above statement of facts, the committee are of the opinion that the petitioner has not supported his petition.

[NOTE.—See Nos. 343 and 355.]

13th CONGRESS.] No. 346. [1st SESSION.

REMONSTRANCE OF THE LEGISLATURE OF MASSACHUSETTS AGAINST THE WAR, AND THE FORMATION OF NEW STATES FROM LANDS NOT WITHIN THE ORIGINAL LIMITS OF THE UNITED STATES, AND THE PROTEST OF THE MINORITY OF SAID LEGISLATURE.

COMMUNICATED TO THE SENATE, JUNE 28, 1813.

To the Honorable the Senate, and the Honorable the House of Representatives of the United States in Congress assembled:

The Legislature of Massachusetts, deeply impressed with the sufferings of their constituents, and excited by the apprehension of still greater evils in prospect, feel impelled, by a solemn sense of duty, to lay before the National

Government their view of the public interests, and to express, with the plainness of freemen, the sentiments of the people of this ancient and extensive Commonwealth.

Although the precise limits of the powers reserved to the several State sovereignties have not been defined by the constitution, yet we fully coincide in the correctness of the opinions advanced by our venerable Chief Magistrate, that "our constitutions ensure to us the freedom of speech, and that, at this momentous period, it is our right and duty to inquire into the grounds and origin of the present war, to reflect on the state of public affairs, and to express our sentiments concerning them, with decency and frankness, and to endeavor, as far as our limited influence extends, to promote, by temperate and constitutional means, an honorable reconciliation."

If, then, such are the rights and duties of the people, surely those who, at this solemn crisis, are selected by them, and who are specially honored with their confidence, may venture respectfully, but frankly, to express the sentiments and feelings of those whom they have the honor to represent.

The States, as well as the individuals composing them, are parties to the national compact, and it is their peculiar duty, especially in times of peril, to watch over the rights, and guard the privileges solemnly guarantied by that instrument. Certainly, then, this expression from the Legislature of the free and independent Commonwealth of Massachusetts will not be disregarded by the present Congress of the United States. For, although the numerous petitions and remonstrances of the people of this State, in relation to such measures as they deemed dangerous to their rights, and ruinous to their interests, have heretofore been received in a manner little calculated to produce that harmony, and to cement that Union, which ought to be the permanent aim of the General Government, yet we cannot but indulge the hope that new councils, and a more conciliatory spirit will distinguish the several branches of the present National Legislature; that they will endeavor, by the exercise of justice and impartiality, to allay the apprehensions, and restore the confidence of the Eastern and commercial States, to remove their actual sufferings, and to replace them in the happy and prosperous condition from which they have been driven, by a succession of measures hostile to the rights of commerce, and destructive to the peace of the Union.

It is not to be expected that a hardy and industrious people, instructed in the nature of their rights, and tenacious of their exercise, whose enterprise was a source of individual wealth and national prosperity, should find themselves obliged to abandon their accustomed employments, and relinquish the means of subsistence, without complaint; or that a moral and Christian people should contribute their aid in the prosecution of an offensive war, without the fullest evidence of its justice and necessity.

The United States, from the form of their Government, from the principles of their institutions, from the sacred professions which, in all periods of their history, they have made, from the maxims transmitted to them by patriots and sages, whose loss they can never sufficiently deplore, as well as from a regard to their best and dearest interests, ought to be the last nation to engage in a war of ambition or conquest.

The recent establishment of their institutions, the pacific, moral, and industrious character of their citizens, the certainty that time and prudent application of their resources would bring a seasonable remedy for any transient wrongs, would have induced a wise and provident, an impartial and temperate administration to overlook, if it had been necessary, any temporary evils, which either the ambition, the interest, the cupidity, or the injustice of foreign powers might, occasionally, and without any deep and lasting injury, have inflicted.

With these maxims and these views, we cannot discern any thing in the policy of foreign nations towards us, which, in point of expediency, required the sacrifice of so many and so certain blessings, as might have been our portion, for such dreadful and inevitable evils as all wars, and especially in a republic, entail upon the people.

But, when we review the alleged causes of the war against Great Britain, and, more particularly, the pretences for its continuance, after the principal one was removed, we are constrained to say that it fills the minds of the good people of this Commonwealth with infinite anxiety and alarm. We cannot but recollect, whatever the pretences of the Emperor of France may have been, pretences which have uniformly preceded and accompanied the most violent acts of injustice, that he was the sole author of a system calculated and intended to break down neutral commerce, with a view to destroy the opulence, and cripple the power of a rival, whose best interest, and whose real policy were to uphold that commerce, so essential to her own prosperity.

It is not for us to decide whether the enemy of France did, or did not, adopt the most natural and efficacious means of repelling her injustice. It is sufficient that we are persuaded the United States might, by a firm and dignified, yet pacific, resistance to the French decrees, have prevented the recurrence of any retaliatory measures on the part of Great Britain, measures not intended to injure us, but to operate on the author of this unjust and iniquitous system. And, however honorable men may differ, as to the justice of the British retaliatory orders, in council, we do not hesitate to say that France merited from our Government a much higher tone of remonstrance, and a more decided opposition.

In reviewing the avowed causes of the present war, we would, if it were possible, pass over a series of transactions, imperfectly explained, and calculated to excite our alarm and regret at the hasty manner in which it was declared. But the history of the pretended repeal of the French decrees, which, if our Government was sincere, we are bound to believe was the immediate cause of the war, is so well attested, and has been so often discussed, and is, besides, so important in this inquiry, that mere motives of delicacy cannot induce us to pass it over without notice.

If war could be justified against Great Britain exclusively, it must have been on the ground assumed by our Government, that the French decrees were actually repealed on the 1st of November, 1810. The indiscriminate plunder and destruction of our commerce, the capture of our ships by the cruizers of France, and their condemnation by her courts, and by the Emperor in person, his repeated and solemn declarations, that those decrees were still in force, and constituted the fundamental laws of his empire, at a period long subsequent to the pretended repeal, seemed to furnish an answer, sufficiently conclusive, to this question; and we cannot but lament that evidence, so satisfactory to the rest of the nation, should have had so little weight with that Congress whose term of service has lately expired.

But this important question is now definitively answered, and the American people have learned, with astonishment, the depth of their degradation. The French Emperor, as if for the perfect and absolute humiliation of our Government, and for the annunciation to the world, that he held us in utter contempt, reserved till May, 1812, the official declaration of the fact that these decrees were not repealed until April, 1811; and then, not in consequence of his sense of their injustice, but because we had complied with the condition he had prescribed in the letter of the Duke of Cadore, in causing our rights to be respected, by a resistance to the British orders; and he has since added that this decree of repeal was communicated to our minister at Paris, as well as to his own at Washington, to be made known to our cabinet. As the previous pledge of Great Britain gave the fullest assurance that she would repeal her orders as soon as the decrees on which they were founded should cease to exist; and, as her subsequent conduct leaves no doubt that she would have been faithful to her promise, we can never too much deplore the neglect to make known this repeal, whether it be attributable to the French Government or our own.

If to the former belongs the guilt of this duplicity and falsehood, every motive of interest, and every incitement of duty call loudly upon our administration to proclaim this disgraceful imposition to the American people; not only as it would serve to develope the true character and policy of France, but to acquit our own officers of a suppression too serious to be overlooked or forgiven.

But, whatever may be the true state of this mysterious transaction, the promptness with which Great Britain hastened to repeal her orders, before the declaration of war by the United States was known to her, and the restoration of an immense amount of property, then within her power, can leave but little doubt that the war, on our part, was premature, and still less that the perseverance in it, after that repeal was known, was improper, impolitic, and unjust.

It was improper, because it manifested, in this instance, a distrust in the good faith and disposition to peace of a nation from which we had just received a signal proof of both.

It was impolitic, because it gave countenance to the charge of a subserviency to the views of France, and of an ulterior design of co-operating with her in the profligate and enormous project of subjugating the rest of Europe.

It was impolitic, as it tended to unite all descriptions of people in England in favor of the present war, and to convince them, however erroneously, that moderation and fairness on her part only laid the foundation of new claims, and higher pretensions on ours.

It was unjust, because the evidence afforded by the prompt repeal of the orders in council ought to have satisfied us that Great Britain was sincerely disposed to maintain and preserve pacific relations with the United States; and all wars are unjust, the objects of which can be attained by negotiation.

It was unjust, because the whole history of our diplomatic intercourse with Great Britain shows that we never induced her to believe that we considered the impressment of her own seamen, on board our merchant ships, as a reasonable ground of war; and we had never offered her the alternative of war, or a relinquishment of this practice.

It was unjust, because the pretensions and claims, on the one side and the other, although attended with difficulties, were not irreconcilable. Great Britain did not claim the right to impress our native seamen; she disavowed the practice, in all cases, when the fact was made known to her; she restored on legal evidence; she had recently offered to return all who were of that description, of whom a list should be furnished by our Government; and she had, many years before, made such offers of fair and amicable arrangements of this whole subject, as, to two distinguished members of our present cabinet, appeared " both honorable and advantageous."

It was unjust, because we had not previously taken all the reasonable steps on our part to remove her complaints of the seduction and employment of her seamen. This is made manifest by the conduct of the same Congress which declared the war, they having admitted the propriety of obviating those complaints, by an act passed subsequent to the commencement of hostilities.

No State in the Union can have a greater interest, or feel a stronger desire to protect commerce, and maintain the legitimate rights of seamen, than this Commonwealth. Owners of one-third of all the navigation, and, probably, furnishing nearly one-half of all the native seamen of the United States, we are better enabled to appreciate the extent of their sufferings, and must also be presumed to sympathise with them more sincerely than the citizens of States destitute of commerce, and whose sons are not engaged in its prosecution, unless it be admitted that the sufferers, their parents, relatives, and friends, are less interested in their welfare and protection than those who are united to them only by the feeble ties of political connexion.

With all the means of information, furnished by every motive of duty, and every inducement of interest, we are constrained to say that this evil of impressment has been grossly exaggerated, that we have reason to believe an honest and fair proposal, as honestly and fairly executed, to exclude the subjects of Great Britain from our service, would have much more effectually relieved our own seamen, and more essentially advanced their interest, than a resort to war; that the true interests of the United States coincide with the policy adopted by all other countries, and that we should be more independent, our seamen would be better protected, and our country eventually more prosperous, by renouncing altogether the pretension of screening and employing British seamen.

The doctrine of natural allegiance is too well founded, has been too long established, and is too consonant with the permanent interest, the peace, and independence of all nations, to be disturbed for the purpose of substituting in its place certain visionary notions, to which the French revolution gave birth, and which, though long since exploded there, seem still to have an unhappy influence in our country.

Having thus found the avowed causes of the war, and especially the motives for a perseverance in it, so wholly inadequate to justify the adoption of that policy, we have been obliged to resort to other, and more concealed motives. We cannot, however, without the most conclusive evidence, believe, although the measures and language of some high public functionaries indicate the fact, that ambition, and not justice, a lust of conquest, and not a defence of endangered rights, are among the real causes of perseverance in our present hostilities.

Must we, then, add another example to the catalogue of republics, which have been ruined by a spirit of foreign conquest? Have we no regard to the solemn professions we have so often repeated, none to the example, none to the precepts of Washington? Is it possible either to acquire, or to maintain extensive foreign conquests, without powerful standing armies? And did such armies ever long permit the people, who were so imprudent as to raise and maintain them, to enjoy their liberties?

Instances of military oppression have already occurred among us; and a watchful people, jealous of their rights, must have observed some attempts to control their elections, and prostrate the civil before the military authority. If the language of some men high in office; if the establishment of a chain of military posts in the interior of our country; if the extensive preparations which are made in quarters where invasion cannot be feared, and the total abandonment and neglect of that part of our country, where alone it can be apprehended, have excited our anxiety and alarm, as to the real projects of our rulers, these emotions have not been diminished by the recent invasion, seizure, and occupation of the territory of a peaceable and unoffending neighbor.

If war must have been the portion of these United States; if they were destined, by Providence, to march the downward road to slavery, through foreign conquest and military usurpation, your remonstrants regret that such a moment, and such an occasion should have been chosen for the experiment; that, while the oppressed nations of Europe are making a magnanimous and glorious effort against the common enemy of free States, we alone, the descendants of the pilgrims, sworn foes to civil and religious slavery, should voluntarily co-operate with the oppressor, to bind other nations in his chains; that, while diverting the forces of one of his enemies from the mighty conflict, we should endanger the defenceless territories of another, in whose ports the flag of our independence was first permitted to wave, now struggling for existence beneath his iron grasp.

Permit the Legislature of this Commonwealth, whose citizens have been ever zealous in the cause of freedom, and who contributed their utmost efforts for the adoption of that constitution, under which, in former times, we enjoyed so much prosperity, most respectfully, but earnestly, to entreat and conjure the constituted authorities of

the nation, by the regard due to our liberties, to our Union, to our civil compact, already infringed, to pause before it be too late. Let the sober, considerate, and honorable Representatives of our sister States, in which different councils prevail, ask themselves—

Were not the territories of the United States sufficiently extensive, before the annexation of Louisiana, the projected reduction of Canada, and seizure of West Florida?

Had we not millions upon millions of acres of uncultivated wildernesses, scarcely explored by civilized man?

Could these acquisitions be held, as conquered provinces, without powerful standing armies? And would they not, like other infant colonies, serve as perpetual drains of the blood and treasure of these United States? Or, is it seriously intended to adopt the dangerous project of forming them into new States, and admitting them into the Union, without the express consent of every member of the original confederacy?

Would not such a measure have a direct tendency to destroy the obligations of that compact, by which alone our Union is maintained?

Already have we witnessed the formation and admission of one State, beyond the territorial limits of the United States, and this too, in opposition to the wishes and efforts, as well as in violation of the rights and interest, of some of the parties to that compact; and the determination to continue that practice, and thereby to extend our republic to regions hitherto unexplored, or peopled by inhabitants, whose habits, language, religion, and laws, are repugnant to the genius of our Government, is openly avowed.

Against a practice so hostile to the rights, the interests, the safety of this State, and so destructive to her political power; so subversive of the spirit of the constitution, and the very principles upon which it is founded, your remonstrants, in the name and behalf of the Commonwealth of Massachusetts, feel it their duty to enter their most deliberate and solemn protest.

If an extensive confederated republic is to be maintained—and we most fervently pray that it may—it can only be by a free communication of the grievances felt, and the evils apprehended, by any of its members, and by a prompt and liberal remedy. The same spirit of concession, which dictated the formation and the adoption of the constitution, should be kept in permanent and perpetual exercise.

The blessings of Government, its vigilance, its protection, its rewards, should be equally and impartially distributed, and its burdens as equally and fairly imposed. No portion of the Union ought to be sacrificed to the local interest, passions, or aggrandizement of others. It cannot, however, be denied, that causes have occurred to disturb the balance, which, when adjusted, was intended to form the principal security of our present compact. But the remedy is in the power of Congress, and we look to their wisdom for its efficacious and speedy application.

The chief motive which influenced the Eastern States to abolish the old confederation, and to surrender a greater share of their own sovereign power, as appears by the recent history of those times, was the expectation that their commerce would be better protected by the National Government.

The hardy people of the North stood in no need of the aid of the South to protect them in their liberties. For this they could safely rely, as they always had done, on their own valor. But it was an important object with them, that every aid, facility, and encouragement, should be given to that commerce, upon which their prosperity almost exclusively depended.

To ensure this great object a very unequal proportion of political power was conceded to the Southern States. The representation of slaves was the price paid by the Northern States, for the stipulated protection and encouragement of their trade, and for an agreement of the Southern members of the Union, that the public burdens should be apportioned according to representation. Experience, however, has proved that, although the contract, on our part, has been faithfully fulfilled, both these considerations have utterly failed.

Indications of a spirit hostile to commerce were early visible, among some of those who now control the destinies of our republic; but the father of his country then presided in our councils, and this spirit was vanquished. Under the influence of the wise, liberal, and magnanimous system, adopted and pursued by his administration, commerce was indeed cherished, extended, and protected, and the stipulations of the constitution were fulfilled in sincerity and good faith.

Since that period, however, the same spirit has arisen, and has exhibited an unrelenting severity in the exercise of its sway, until at length, by a series of restrictions, utterly destructive of the calculations of the merchant, by prohibitions and double duties, by embargoes and non-intercourse, and lastly, by war, the poor remains of that commerce which once covered the ocean with its sails, have been nearly annihilated.

Nor has the other part of the consideration been better fulfilled. Taxation has never, except in a single instance, and that to a hundredth part only of the revenue raised under the constitution, been apportioned according to representation; and with what reluctance it was then submitted to by the Southern States, and with what tardiness it was even partially collected, public records will determine.

Of the two hundred and fifteen millions of dollars derived by the United States, under the operation of the Federal Government, Massachusetts has paid upwards of forty millions, an amount beyond all proportion to her political weight in the Union.

If, therefore, the revenues derived from this Commonwealth, and paid into the National Treasury, had been preserved in her own, she would have been fully competent to her own defence, and would not have been obliged to solicit, nor experience the injustice of a refusal of the arms, for which she has long since paid, and which were her due from the General Government. What good cause can be assigned for this refusal your remonstrants are wholly unable to determine. No discretion is, by law, vested in any officer of the Government, in relation to this subject. Its provisions are simple, plain, and peremptory. Your remonstrants, therefore, cannot but express their astonishment, that the State of Massachusetts, possessing a seacoast more extensive and populous than that of any other State in the Union, and a defenceless frontier by land, should not only be entirely abandoned by the Government, whose duty it is to protect her, but should also be refused the arms for her own defence to which she is, by law, entitled. They cannot, however, permit themselves to doubt that Congress will, forthwith, adopt such measures as will render to this Commonwealth that justice which the Executive Department has refused.

If the war, in which we have been rashly plunged, was undertaken to appease the resentment, or secure the favor of France, deep and humiliating must be our disappointment. For, although the Emperor is lavish in his professions of "love for the American people," applauds our ready self-devotion, and declares "that our commerce and our prosperity are within the scope of his policy," yet no reparation has been made or offered, for the many outrages, indignities, and insults, he has inflicted on our Government, nor for the unnumbered millions of which he has plundered our citizens. And when we consider the course of policy pursued by our rulers, in their external relations, and commercial restrictions, from the prohibition of our trade to St. Domingo to the declaration of war against Great Britain; that this course often received his open approbation, and was not unfrequently conformable to the system which he himself had adopted; when we consider, also, the mysterious secrecy which has veiled the correspondence of the two Governments from our view; and, above all, when we consider that, in many instances, the most important measures of our Government have been anticipated in Paris, long before they were

known to the American people, we cannot conceal our anxiety and alarm for the honor and independence of our country. And we most fervently pray that the sacrifices we have already made, like the early concessions of Spain and Portugal, of Prussia and Sweden, may not be the preludes to new demands and new concessions, and that we may be preserved from all political connexion with the common enemy of civil liberty.

To the constituted authorities of our country we have now stated our opinions, and made known our complaints; opinions, the result of deliberate reflection, and complaints, "wrung from us by the tortures of that cruel policy" which has brought the good people of this Commonwealth to the verge of ruin; a policy which has annihilated that commerce so essential to their prosperity; increased their burdens, while it has diminished their means of support; provided for the establishment of an immense standing army, dangerous to their liberties, and irreconcilable with the genius of their constitution; destroyed their just and constitutional weight in the General Government; and, by involving them in a disastrous war, has placed in the power of the enemy the control of the fisheries, a treasure of more value to the country than all the territories for which we are contending, and which furnish the only means of subsistence to thousands of our citizens; the great nursery of our seamen, and the right to which can never be abandoned by New England.

Under such circumstances, silence towards the Government would be treachery to the people. In making this solemn representation of our sufferings, and our dangers, we have been influenced only by the duty which we owe to our constituents, and our country, to our consciences, and the memory of our fathers. And to the Searcher of all hearts we appeal for the purity of our motives, and the sincerity of our declarations.

Far from wishing to embarrass the administration in any of their negotiations for peace, we cannot but express our regret, that they should not have evinced a sincere desire for this great object, by accepting some of the repeated overtures made by the enemy for the suspension of hostilities. And permit us, in conclusion, most earnestly to request that measures may immediately be adopted to stay the sword of the destroyer, and to prevent the further effusion of human blood; that our invading armies may be forthwith recalled within our own territories; and that every effort of our rulers may be speedily directed to the attainment of a just and honorable peace; that mutual confidence and commercial prosperity may be again restored to our distracted and suffering country; and that, by an upright and faithful administration of our Government, in the true spirit of the constitution, its blessings may be equally diffused to every portion of the Union.

In the House of Representatives, June 14, 1813. Sent up for concurrence.

TIMOTHY BIGELOW, *Speaker.*

In the Senate, June 15, 1813. Read, and concurred in.

JOHN PHILLIPS, *President.*

A true copy. Attest:

SAMUEL F. McCLEARY,
Clerk of the Senate.

BENJAMIN POLLARD,
Clerk of the House of Representatives.

To the Honorable the Senate and House of Representatives of the United States of America in Congress assembled:

The undersigned committee, chosen by the minority of the Senators and Representatives of the Commonwealth of Massachusetts, beg leave to represent that they have perceived, with extreme regret, that the Legislature of this State, in their present session, have presented a remonstrance to Congress, denouncing the administration of the General Government, reprobating the war as improper, impolitic, and unjust, impeaching the motives of the Congress which declared it, excusing and justifying all the aggressions and outrages of Great Britain, and charging a majority of the Representatives of the people with wantonness, ambition, oppression, and cruelty. While the Executive of the United States is steadily pursuing that course of policy, which alone can secure a safe, equitable, honorable, and permanent peace, and we are actually negotiating to effect it, it is impossible to conceive what good motive could induce the Legislature of this State to vote a remonstrance so unreasonable in its origin, reprehensible in its language, erroneous in its facts and principles, and pernicious in its effects.

Who, that is American, can but feel indignant, to hear it stated by the Legislature of a State, that we ought to have resisted the French decrees, agreeably to the demand of the British Government? That we have seduced her seamen from their allegiance, and that we have invaded the territory of a peaceable and unoffending neighbor? Where is the man, who values his reputation, who would not indignantly frown at the insinuation, that war was waged from motives of ambition, or lust of conquest? That we are leagued with France, to oppress the European nations, and that our Government have established a chain of military posts, "to prostrate the civil to the military authority?" And what man, not altogether exclusively British, can, without the deepest mortification, read a remonstrance, which, in time of war, and pending negotiation, should take the enemy's ground, support their claims, and justify their aggressions?

We assure the Congress and people of the United States that we utterly protest against the statements and principles contained in that humiliating remonstrance. It appears to us too much like the attempt of a disappointed and malignant faction, who, to obtain power, would trample on the rights and liberties of their country. We do not, however, apprehend that any faction in this country have either the power or the nerve to effect a purpose of this sort. We trust, and sincerely believe, that the people would resist, and effectually suppress, every attempt to sever or weaken our bond of Union.

We are aware that it is in times of calamity and war that ambitious and designing men will be tempted to stir up the people to opposition and rebellion; but we are assured that a large majority of the people of this State would, at the hazard of their lives and fortunes, resist all opposition to the laws and Government of their country. We believe the war to be just and necessary; that the Government have invariably maintained strict justice and impartiality towards the belligerents of Europe; that they have submitted to an accumulation of wrongs, which no other nation would have endured; they have negotiated, until negotiation was vain; that it is their intention, as it is their duty, to protect the rights of commerce and of sailors, "peaceably, if they can, forcibly, if they must;" that, since the pretended repeal of the orders in council, every pacific advance has been made, both by the Executive, and by Congress, which was consistent with the rights and honor of the nation; and that we are willing to endure all the evils and privations of this war, and to expend our property and our blood in its prosecution. We hope the Legislature of Massachusetts have better evidence of their consistency, prudence, patriotism, and love of peace, than is contained in their extraordinary remonstrance.

We wish for peace, but we fear that this remonstrance, if it has any effect, will tend to prevent, rather than to accomplish it. We hope that the very proper course adopted by the administration, to effect a peace, will meet

with the success to which it is entitled; but, should Great Britain, regardless of the numerous wrongs she has inflicted on us, and, calculating on her power, or encouraged by her friends in America, persist in her hostile pretensions, we have no doubt but the people of this State will cordially, actively, and zealously come forward, and lend their aid in the prosecution of the war, until our rights are established on a permanent basis.

JOHN HOLMES,
WILLIAM MOODY,

Boston, *June* 16, 1813.

13th Congress.] **No. 347.** [1st Session.

PRESIDENT MADISON DECLINES A CONFERENCE WITH A COMMITTEE OF THE SENATE ON THE NOMINATION OF JONATHAN RUSSELL TO BE MINISTER TO SWEDEN.

COMMUNICATED TO THE SENATE, JULY 6, 1813.

To the Senate of the United States: Washington, *July* 6, 1813.

I have received from the committee, appointed by the resolution of the Senate of the 14th day of June, a copy of that resolution, which authorizes the committee to confer with the President on the subject of the nomination made by him of a minister plenipotentiary to Sweden.

Conceiving it to be my duty to decline the proposed conference with the committee, and it being uncertain when it may be convenient to explain to the committee, and, through them, to the Senate, the grounds of my so doing, I think it proper to address the explanation directly to the Senate. Without entering into a general review of the relations in which the constitution has placed the several departments of the Government to each other, it will suffice to remark, that the Executive and Senate, in the cases of appointments to office, and of treaties, are to be considered as independent and co-ordinate with each other. If they agree, the appointments or treaties are made. If the Senate disagree, they fail. If the Senate wish information previous to their final decision, the practice, keeping in view the constitutional relations of the Senate and the Executive, has been, either to request the Executive to furnish it, or to refer the subject to a committee of their body, to communicate, either formally or informally, with the head of the proper department. The appointment of a committee of the Senate to confer immediately with the Executive himself, appears to lose sight of the co-ordinate relation between the Executive and the Senate, which the constitution has established, and which ought, therefore, to be maintained.

The relation between the Senate and House of Representatives, in whom Legislative power is concurrently vested, is sufficiently analogous to illustrate that between the Executive and Senate in making appointments and treaties. The two Houses are in like manner independent of, and co-ordinate with each other, and the invariable practice of each in appointing committees of conference and consultation, is, to commission them to confer, not with the co-ordinate body itself, but with a committee of that body. And although both branches of the Legislature may be too numerous to hold conveniently a conference with committees, were they to be appointed by either to confer with the entire body of the other, it may be fairly presumed, that, if the whole number of either branch were not too large for the purpose, the objection to such a conference, being against the principle, as derogating from the co-ordinate relations of the two Houses, would retain all its force.

I add only that I am entirely persuaded of the purity of the intentions of the Senate, in the course they have pursued on this occasion, and with which my view of the subject makes it my duty not to accord, and that they will be cheerfully furnished with all the suitable information in possession of the Executive, in any mode deemed consistent with the principles of the constitution, and the settled practice under it.

JAMES MADISON.

13th Congress.] **No. 348.** [1st Session.

CHESAPEAKE AND DELAWARE CANAL.

COMMUNICATED TO THE SENATE, JULY 12, 1813.

Mr. Horsey, from the committee to whom were referred the message of the President of the United States, of the 5th ultimo, together with the act therein communicated, reported:

That, on the 5th of March last, the General Assembly of the State of Pennsylvania passed an act authorizing the Governor of that Commonwealth to subscribe, in behalf of the same, three hundred and seventy-five shares in the Chesapeake and Delaware Canal Company, if the United States shall subscribe seven hundred and fifty shares, the State of Maryland two hundred and fifty shares, and the State of Delaware one hundred shares, in the same company. That the utility and importance of a navigable canal over the isthmus which separates the bays of Che-

sapeake and Delaware, is so well understood, and so universally admitted, your committee have deemed it unnecessary to say any thing in addition to what already appears in the various reports and communications hitherto made to Congress on this subject. The cause which suspended the operations of the company, the extent and nature of the canal, the progress and state of the work, the annual saving to the community, the probable revenue of the canal, and the expenses of the whole work, are so ably stated and estimated in the report of the Secretary of the Treasury on the subject of public roads and canals, of the 2d of March, A. D. 1807, that your committee have taken the liberty to introduce here that part of the said report which relates to this particular subject.

"III. DELAWARE AND CHESAPEAKE CANAL.

"A company incorporated by the States of Delaware and Maryland for opening this canal has commenced its operations, now suspended for want of funds.

"The canal will commence at Welsh Point, on Elk river, an arm of the Chesapeake, and terminate at a distance of twenty-two miles on Christiana creek, a branch of the Delaware. At low water the depth of water in Christiana is nine feet, and in Elk twelve feet, within one hundred feet from the shore. The tide rises four feet in both rivers. The canal might, without increasing the distance, be conducted to Newcastle, on the Delaware itself, instead of ending at Christiana creek.

"The highest intermediate ground, over which the canal will be carried on a level of thirteen miles in length, is seventy-four feet above tide water, the descent being effected by nine locks on each side. The digging is generally easy; no expensive aqueducts or bridges, nor any other obstacle, but those which have already been overcome in digging the feeder through a very rocky soil.

"The supply of water drawn from Elk river by a feeder six miles in length, already completed, which is itself a boat canal three and a half feet deep, united by a lock of ten feet lift with the main canal, is calculated to fill daily one hundred and forty-four locks; a quantity sufficient, on an average, for the daily passage of twenty-four vessels. A reservoir covering thirty, and which may be increased to one hundred and fifty acres, will supply occasional deficiencies. Other reservoirs may be added; and Christiana and White Clay creeks may hereafter be brought in aid of Elk river, if the supply should prove too scanty for an increased navigation.

"The canal, twenty-six feet wide at the bottom, and fifty at the top, on the water line, being dug at the depth of eight feet, is intended for vessels of forty to seventy tons, drawing seven and a half feet water; but the banks, twenty feet wide for towing paths, and one of which may be converted into a turnpike road, being raised three feet above the level of the water, will, by increasing the height of the lock gates one foot, admit a depth of nine feet of water in the canal, at which depth it would perhaps be eligible to dig at once. The locks, eighty feet long, eighteen feet wide, and eight or nine feet deep over the gate sills, containing each eleven thousand five hundred to thirteen thousand cubic feet of water, and with a lift of eight to nine feet each, will be constructed of hewn stone laid in tarras. Those dimensions, both of the canal and locks, recommended by Mr. Latrobe, the engineer of the canal, may be adopted in all the other canals for sea vessels on this line of communication.

"The present annual carriage across the peninsula, which would be drawn through the canal, is estimated at forty-two thousand tons, exclusively of passengers. This will be greatly increased by the facility which the canal itself will afford to the commercial intercourse between the two bays, and to the conveyance of articles now carried through other channels, or too heavy for transportation at the present expense of carriage. The coals wanted for Philadelphia, and which brought down from the sources of the Susquehannah and Potomac, but principally from the vicinity of Richmond, would naturally pass through the canal, have been alone estimated at more than one hundred thousand tons a year. The annual carriage of all articles may, in the present state of the population, be fairly estimated at one hundred and fifty thousand tons, and the direct annual saving to the community at three hundred thousand dollars, being at the rate of two dollars a ton for the difference between land and water carriage across the peninsula, after paying the tolls. These, at the rate of fifty cents a ton, will give to the undertakers a revenue of seventy-five thousand dollars, leaving, after a deduction of ten thousand dollars for annual repairs, and of ten thousand dollars more for attendance and contingencies, a net income of fifty-five thousand dollars.

"The expenses of the whole work are estimated as follows:

"Digging twenty-two miles, at twenty thousand dollars a mile, - - -	$440,000 00
"Eighteen locks, at ten thousand dollars each, - - - - -	180,000 00
(The whole lockage being one hundred and forty-eight feet, would, at one thousand two hundred and fifty dollars a foot, amount to one hundred and eighty-five thousand dollars.)	
"Feeder, (nearly completed,) reservoirs, lock at the feeder, purchase of water rights and land, including a debt of ——— dollars due by the company, - - - -	230,000 00
	$850,000 00

"The interest on which sum, at six per cent., is fifty-one thousand dollars.

"The capital originally subscribed amounted to four hundred thousand dollars, divided into two thousand shares of two hundred dollars each. One-half of these has been forfeited, after a small payment of five dollars on each share. One hundred thousand dollars, paid by the other stockholders, have been expended in preparatory measures, in the purchase of water rights, and in digging the feeder, which was considered as the most difficult part of the work. Seven hundred and fifty thousand dollars are still wanted to complete the work; of which sum one hundred thousand dollars is payable by the stockholders, and the deficiency of six hundred and fifty thousand dollars must be drawn from other sources."

From this report of the Secretary of the Treasury, it would appear that the sum of seven hundred and fifty thousand dollars is now wanted to enable the company to complete the work; of this sum is already subscribed, and payable by the stockholders, - - - - - - $100,000 00

If the State of Pennsylvania subscribe three hundred and seventy-five shares, to - -	75,000 00
The State of Maryland two hundred and fifty shares, to - - - -	50,000 00
The State of Delaware, one hundred shares, to - - - -	20,000 00
The United States, seven hundred and fifty shares, to - - - -	150,000 00
The company will have - - -	$395,000 00

A sum which will enable them to recommence their operations, and, according to the estimate of the Secretary of the Treasury, nearly sufficient to complete the digging of the main canal.

Should this public aid be afforded, your committee feel a persuasion it would give a new impulse to the work, reanimate the company, inspire the community with confidence, induce the aid of individual capitalists, and ensure, at no very distant period, the completion of an undertaking of great national as well as local advantage and importance.

The lateness of the session, however, and the nature of the business which at present engages the attention of the Senate, renders it inexpedient to bring this subject forward during this session of Congress; but your committee, while they advise a postponement of the subject, earnestly recommend it to the early and attentive consideration of the Senate at the next meeting of Congress.

They, therefore, submit the following resolution:

Resolved, That the further consideration of the President's message of the 5th ultimo, with the communication accompanying the same, be postponed to the next session of Congress.

13th Congress.] No. 349. [1st Session.

CONTESTED ELECTIONS OF EBENEZER SAGE AND JOHN LEFFERTS, TWO OF THE REPRESENTATIVES FROM NEW YORK.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JULY 13, 1813.

Mr. JAMES FISK made the following report:

The Committee of Elections, to whom was referred the petition of Benjamin B. Blydenburgh and Peter Augustus Jay, contesting the election of Ebenezer Sage and John Lefferts, returned as two of the representatives for the State of New York in the present Congress, and praying to be admitted in their stead, have had the same under consideration, and report:

That, on viewing all the circumstances of this case, the committee are of the opinion that further evidence is necessary to enable them to come to a just decision, and that a reasonable time ought to be granted the parties to obtain such evidence; therefore, the committee respectfully submit the following resolution:

Resolved, That the parties be allowed until the first Wednesday in the next session of Congress, to procure testimony relative to said election.

13th Congress.] No. 350. [1st Session.

PRESIDENT MADISON DECLINES A CONFERENCE WITH A COMMITTEE OF THE SENATE ON THE NOMINATION OF ALBERT GALLATIN, SECRETARY OF THE TREASURY, TO A FOREIGN MISSION.

COMMUNICATED TO THE SENATE, JULY 19, 1813.

Mr. ANDERSON made the following report:

The committee to whom was referred the nomination of Albert Gallatin to be one of the envoys extraordinary and ministers plenipotentiary to negotiate and sign a treaty of peace with Great Britain, under the mediation of the Emperor of Russia; to negotiate and sign a treaty of commerce with Great Britain; and to negotiate and sign a treaty of commerce with Russia; together with the message of the President of the United States of the 7th June, report:

That, according to the instructions of the Senate of the 16th June, the committee, through its chairman, addressed a note to the President of the United States on the 12th instant, which accompanies this report; and, in reply thereto, the President addressed a note to the chairman on the 14th instant, which note also accompanies this report, appointing Friday, the 16th instant, to receive the committee, to communicate the aforesaid resolution of the Senate, and apprizing the committee of his late message to the Senate, containing the grounds on which he would be obliged to decline the proposed conference with the committee. Upon due consideration of this reply, the committee deemed it an incumbent duty to wait on the President, according to his appointment, and to present to him both the resolutions of the Senate in relation to the nomination referred to the committee; and did, accordingly, wait on him, and present them: when the President was pleased to observe to the committee, in substance, that he was sorry that the Senate had not taken the same view of the subject which he had done; and that he regretted that the measure had been taken under circumstances which deprived him of the aid or advice of the Senate. After the committee had remained a reasonable time for the President to make any other observations, if he thought proper to do so, and, observing no disposition manifested by him to enter into further remarks, the committee retired, without making any observations on the matter of the resolutions, or in reply to those made by the President.

SIR: JULY 12, 1813.

The committee, to whom was referred the nomination of Albert Gallatin to be one of the envoys and ministers plenipotentiary to negotiate and sign a treaty of peace with Great Britain, under the mediation of the Emperor of Russia; to negotiate and sign a treaty of commerce with Great Britain; and to negotiate and sign a treaty of commerce with Russia; together with the message of the President of the 7th of June, have directed me to enclose a copy of two resolutions passed by the Senate, and to request that you will be pleased to appoint such time to receive the committee as may entirely comport with your own convenience.

The committee sincerely lament that your indisposition, for some time past, has been such as would have rendered it improper to have addressed you upon this subject at an earlier period; and are now much gratified to learn that you are again so far restored to your health as to be enabled to attend to your official duties.

Accept my best wishes for a perfect restoration of your health, and assurance of my high respect.

JOSEPH ANDERSON, *Chairman of the committee.*

The PRESIDENT OF THE UNITED STATES.

IN SENATE OF THE UNITED STATES, *June* 16, 1813.

Resolved, That, in the opinion of the Senate, the powers and duties of the Secretary of the Department of the Treasury, and those of an envoy extraordinary to a foreign Power, are so incompatible that they ought not to be, and remain united, in the same person.

Resolved, That the committee, to whom was referred the nomination of Albert Gallatin, Secretary of the Department of the Treasury, as an envoy extraordinary to treat of peace and commerce with Great Britain, and of commerce with Russia, be instructed to communicate the foregoing resolution to the President of the United States, and respectfully to confer with him upon the matter thereof.

Reply of the President.

WEDNESDAY, *July* 14, 1813.

J. Madison presents his respects to Mr. Anderson, and informs him that he will, on Friday next, at eleven o'clock, receive the committee of the Senate instructed to communicate to the President their resolution of the 16th ultimo. The committee are apprized, by his late message to the Senate, of the grounds on which he will be obliged to decline the proposed conference with the committee upon the matter of that resolution.

13th CONGRESS.] No. 351. [2d SESSION.

CONTESTED ELECTION OF JOHN M. BOWERS, A REPRESENTATIVE FROM NEW YORK.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 16, 1813.

Mr. JAMES FISK made the following report:

The Committee of Elections, to whom was referred the petition of Isaac Williams, Jun., contesting the election of John M. Bowers, returned as one of the Representatives from the State of New York, in the present Congress, and praying to be admitted in his stead, have had the same under consideration, and report:

That, in addition to the facts and evidence stated in the report of the Committee of Elections, made in this case at the last session of Congress, it appears that, from the towns of Exeter, Milford, and Westford, three hundred and twenty-two votes were, through the mistake of the inspectors of elections in those towns, returned for Isaac Williams, which votes, according to the testimony of said inspectors, were given to, and ought to have been returned for Isaac Williams, Jun.; that, adding these votes to the poll of Isaac Williams, Jun., gives him a majority of one hundred and sixty-four votes over Mr. Bowers, and entitles him to a seat in this House. The committee, therefore, respectfully submit the following resolutions:

Resolved, That John M. Bowers is not entitled to a seat in this House.

Resolved, That Isaac Williams, Jun. is entitled to a seat in this House.

NOVEMBER 27, 1813.

To the honorable the House of Representatives of the United States of America in Congress assembled:

The petition of Isaac Williams, Jun., of the county of Otsego, in the State of New York, humbly showeth: That, at the last election for a Representative from the fifteenth congressional district of said State, your petitioner was elected by a majority of votes; that, through a mistake of the inspectors of elections for the towns of Westford, Laurens, Milford and Exeter, in said county, the votes taken for your petitioner by his name of Isaac Williams, Jun., were certified for Isaac Williams; that, in consequence of such mistake, John M. Bowers, Esq. appeared to have a majority of votes in said district, whereas otherwise, and of right, your petitioner had a majority, and was duly elected. Your petitioner, therefore, humbly prays, that, on due testimony of existing facts in the premises being laid before your honorable body, he may have his seat as such Representative assigned him, and that the seat of the said John M. Bowers, Esq. be vacated; and your petitioner, as in duty bound, will ever pray, &c.

ISAAC WILLIAMS, JUN.

EXETER, *June* 9, 1813.

We, the subscribers, do certify, that, at the annual election held in the town of Exeter, in the county of Otsego, and State of New York, commencing on the 27th day of April, 1813, and continuing three days in succession, the votes for members of Congress were as follows, to wit:

For *Isaac Williams, Jun.* ninety-one.
John M. Bowers, seventy.

We also certify, that, in the return made to Francis Henry, Esq., clerk of the above county, the addition of the word *junior*, annexed to the name of Isaac Williams, was left out or omitted by us, through mistake, and contrary to the canvass and estimation.

Also, that we made out a correct return, containing the above in substance, and presented to the above clerk within eight days after said election, which he refused to accept and file.

ANDERSON BECKWITH,
JEREMIAH ROBINSON,
JOHN MARTIN,
Inspectors of election for the town of Exeter, in 1813.

STATE OF NEW YORK, *Otsego county, ss.*

Jeremiah Robinson, Anderson Beckwith, and John Martin, inspectors of election for the town of Exeter, in said county, being sworn on the Holy Evangelists of Almighty God, depose and say, that the within certificate by them subscribed contains the truth, and nothing but the truth.

JEREMIAH ROBINSON,
ANDERSON BECKWITH,
JOHN MARTIN,
Inspectors of said election.

Sworn and subscribed, the 9th day of June, 1813, before me, Thomas Brooks, one of the justices of the peace in and for said county of Otsego.

MILFORD, *April* 29, 1813.

We do hereby certify, that the underneath is a true estimate of the votes taken at the annual election held for the town of Milford, in the county of Otsego, for one Representative to Congress, in the fifteenth congressional district for the Congress of the United States, beginning the last Tuesday in April instant, and continues three days successively.

Isaac Williams, Jun. one hundred and thirty-five votes.
John M. Bowers, one hundred and twenty-six votes.

EZRA ADAMS,
DANIEL LEE,
PETER COLLIER,
JOSEPH MUMFORD,
Inspectors of election.

MILFORD, *May* 5, 1813.

We also certify, that the returns made the 30th day of April, to the county clerk, dated the 29th, was incorrect, and happened by a mistake. Instead of Isaac Williams, it ought to have been Isaac Williams, Jun.

EZRA ADAMS,
PETER COLLIER,
JOSEPH MUMFORD,
DANIEL LEE,
Inspectors of election.

STATE OF NEW YORK, *Otsego county, ss.*

Ezra Adams, Daniel Lee, Peter Collier, and Joseph Mumford, inspectors of election of the town of Milford, in the county of Otsego, and State aforesaid, being sworn severally, say: that the certificate hereunto annexed is just and true; and that the certificate heretofore returned to the clerk's office of the county aforesaid, bearing even date with the certificate hereunto annexed, was incorrect in this, that the votes there purported to have been given for *Isaac Williams*, when in truth, and in fact, they were given for *Isaac Williams, Jun.*, and further saith not.

EZRA ADAMS,
DANIEL LEE,
PETER COLLIER,
JOSEPH MUMFORD,
Inspectors of election for the town of Milford, in 1813.

Sworn before me, this 5th May, 1813.

ELISHA FOOTE,
Justice of the peace in and for the above county.

STATE OF NEW YORK, *Otsego county, ss.*

John Kelso, David Smith, Jonas Babcock, and Rufus Bentley, inspectors of election for the town of Westford, in the county aforesaid, being sworn on the Holy Evangelists of Almighty God, depose and say: that the within certificate, by them subscribed, contains the truth, and nothing but the truth; and that they did, within eight days after said election, make out a corrected return, and commit it to Jonas Babcock, to be by him returned to the clerk of the said county; and further say not.

JOHN KELSO,
DAVID SMITH,
JONAS BABCOCK,
RUFUS BENTLEY.
Inspectors of election for the town of Westford, in 1813.

Sworn and subscribed before me, the 7th day of June, 1813.

ELISHA FOOTE,
A justice of the peace for said county.

STATE OF NEW YORK, *Otsego county, ss.*

Jonas Babcock, one of the inspectors of election, within mentioned, being sworn, deposeth and saith: that a return, of which the within is substantially a copy, was committed to him by the other inspectors of the town of Westford, to be returned to the clerk of said county; that, within eight days after said election, he presented said return to him, which he refused to receive.

JONAS BABCOCK.

Sworn and subscribed before me, the 7th day of June, 1813.

ELISHA FOOTE,
A justice of the peace in and for the county of Otsego.

WESTFORD, *June* 7, 1813.

We, the subscribers, do certify, that at the annual election, held in the town of Westford, in the county of Otsego, and State of New York, commencing on the 27th day of April, 1813, and continuing three days in succession, the votes for member of Congress were as follows, to wit:

For *Isaac Williams, Junior*, ninety-six.
John M. Bowers, ninety-one.

We also certify, that, in the return made to Francis Henry, Esq., clerk of said county, the addition of *Junior*, annexed to the name of Isaac Williams, was left out, or omitted through mistake, and contrary to the votes, canvass, and estimate.

JOHN KELSO,
DAVID SMITH,
JONAS BABCOCK,
RUFUS BENTLEY,
Inspectors of election for the town of Westford, in 1813.

I, Francis Henry, clerk of the county of Otsego, in the State of New York, do certify, that Elisha Foote, and Thomas Brooks, Esquires, are justices in the commission of the peace, for said county, and that they were such during the whole of the months of *May* and *June* last past.

In testimony whereof, I have hereunto affixed my hand, and the seal of said county, this 27th day of November, 1813.

FRANCIS HENRY.

Report of the Committee, on a resolution relative to the election of John M. Bowers, from the State of New York, 2d July, 1813. *Read and concurred in.*

The Committee of Elections, who were instructed by the resolutions of the House, of the 24th of June, to inquire "whether John M. Bowers, returned as a member from the State of New York, is entitled to a seat in this House," and "what person, if any, is entitled to a seat in this House, instead of the said John M. Bowers," have had the same under consideration, and report, in part:

That by a return of the votes from the fifteenth district, in said State, it appears, that

John M. Bowers, had	4,287
Isaac Williams, Jun.	4,129
Isaac Williams,	434
John Bowers,	70
John M. Bowey,	1
Several other persons, in all	17

From this statement it results, that John M. Bowers had a majority of one hundred and fifty-eight votes over Isaac Williams, Jun. By the affidavit of Luther Bissel, and the statement of the sitting member, it appears that there are three persons of the name of Isaac Williams, residing within the district; one of whom is designated by the addition of *junior*, and it is candidly admitted by Mr. Bowers, that Isaac Williams, Jun. and John M. Bowers were the only candidates at this election, within his knowledge. It appears probable to the committee, that the votes given to John Bowers, and John M. Bowey, were all intended for John M. Bowers; and that those given for Isaac Williams were intended for Isaac Williams, Jun.; which opinion seems to be strengthened by the fact, that, in four towns in said district, nearly one hundred votes were given in each for Isaac Williams, and not one for Isaac Williams, Jun. If this be admitted,

Isaac Williams, Jun. will have	4,563
John M. Bowers,	4,358
Leaving to Isaac Williams, Jun. a majority of	205

But the committee are of opinion that further evidence is necessary to form a correct decision; and, in order to afford time to procure the same, they respectfully submit the following resolution:

Resolved, That the further consideration of this subject be postponed to the first Wednesday of the next session of Congress.

IN THE HOUSE OF REPRESENTATIVES OF THE UNITED STATES, *June* 24, 1813.

Resolved, That the Committee of Elections be instructed to inquire whether John M. Bowers, returned as a member from the State of New York, is entitled to a seat in this House.

Resolved, That the same committee be instructed to inquire what person, if any, is entitled to a seat in this House instead of the said John M. Bowers.

Attest: PATRICK MAGRUDER, *Clerk.*

STATE OF NEW YORK, *Secretary's Office:*

I certify the above to be a true copy of the canvass, from the original returns made to this office, of the votes given at the last election, held in the several towns in the counties of Chenango, Broome, and Otsego, for a Representative from this State to supply the vacancy in the 13th Congress of the United States, occasioned by the death of William Dowse, Esq.

ARCHD. CAMPBELL, *Deputy Secretary.*

Luther Bissel's affidavit touching John M. Bowers's election.

CITY OF WASHINGTON, *ss.*

Luther Bissel, of the town of Hartwick, in the county of Otsego, and State of New York, being duly sworn, saith: that, at the late election held in the fifteenth congressional district, in the State of New York, composed of the counties of Otsego, Chenango, and Broome, on the last Tuesday in April last, Isaac Williams, Jun. and John M. Bowers were the opposing candidates; that Isaac Williams, Jun., was nominated by the electors denominated republicans, in the mode usually practised; that tickets for this candidate were printed, and distributed through the county of Otsego, and this deponent assisted in distributing them; and they were printed Isaac Williams, Jun. This deponent voted by a ballot printed Isaac Williams, Jun.; and this deponent understood at that time, and now believes, that a sufficient number of these printed ballots were sent to every town in the said county. And this deponent has further understood, and believes, that the inspectors of the towns of Milford, Lawrence, and Westford, in their return of votes to the canvassers, omitted the jun. in the votes given for the said Isaac Williams, Jun., by which omission about four hundred votes for him were not counted, and by which omission John M. Bowers appeared to have a majority of about two hundred votes over said Williams. And this deponent further saith, that Isaac Williams, Jun. has been high sheriff of the said county, is about thirty-five years of age, and well known in the county; that his father, Isaac Williams, resides in the same county, is about seventy years of age, infirm; and for some years past retired from business, and during eleven years last past, this deponent has known the said Isaac Williams, and he has not, during that period, been, to his knowledge or belief, engaged in any public business.

And this deponent further saith, that the said Isaac Williams, Jun. and John M. Bowers were the only candidates nominated or voted for at the said election, to his knowledge or belief.

And this deponent further saith, that, on the twenty-second day of May last, he saw the said Isaac Williams, Jun., and conversed with him, and the said Williams was then feeble and indisposed, and said, that, owing to his feeble state of health, the probability of a short session, and the circumstances of the case, he thought he should not attempt to take his seat at this session of Congress.

LUTHER BISSEL.

Appeared and sworn before me, this 26th of June, 1813.

DANIEL RAPINE,
Justice of the peace.

13th Congress.] No. 352. [2d Session.

CHESAPEAKE AND DELAWARE CANAL.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 20, 1813.

Mr. Ingersoll, from the committee to whom was referred the consideration of the memorial and petition of the president and directors of the Chesapeake and Delaware Canal Company, made the following report:

That, so long ago as in the year 1765, surveys and other preparations were made for undertaking this important national improvement, of which the practicability is so obvious, from the proximity of the waters of the Chesapeake and Delaware, and the nature of the intermediate ground, that, even at that early day, certain individuals were prompted to make the attempt.

That, in the year 1799, the Legislature of the State of Maryland enacted a law, which was followed up in the year 1801 by corresponding laws enacted by the Legislatures of Delaware and Pennsylvania, providing for the incorporation of a company, with a capital stock of four hundred thousand dollars, for the purpose of cutting and making a canal between the river Delaware and the Chesapeake bay. In pursuance of which acts of incorporation, subscriptions were received for nearly the whole amount of the two thousand shares, at two hundred dollars each, surveys were made, engineers and workmen employed, a route and position located for the canal on the isthmus which separates the bays of Chesapeake and Delaware, and some material progress effected in the execution of the work. But, after expending upwards of one hundred thousand dollars in the purchase of water rights, the construction of a feeder and reservoir, and digging some portion of the canal, the work was suspended in the year 1803, in consequeence of the non-payment of subscriptions, the evidence daily accumulating that four hundred thousand dollars, the whole amount subscribed, even if collected, was a sum inadequate to the completion of the canal, and of that depression of the funds and spirit of the company which were superinduced by the absence of public support, and encouragement from the individual enterprise which had so far carried on the undertaking. Since that time the subject has been frequently under consideration in Congress. Bills in various shapes have been acted on in the Senate for extending national aid to this great national work; and, on the 3d day of March, 1811, the last day of the last session of the eleventh Congress, a bill, which came from the Senate, appropriating two hundred thousand acres of public lands for this object, was indefinitely postponed in the House of Representatives, rather, as this committee have been taught to believe, from the lateness of the period at which the subject was brought before the House of Representatives, than from any indisposition on their part to accede to the liberal provision proposed by the Senate.

That, conceiving the present to be a moment when the importance of such a canal will probably be appreciated as it ought to be, your committee beg leave to enumerate briefly some of the most prominent advantages to be derived from it.

By connecting the waters of the Chesapeake and Delaware, the contemplated canal will throw open an internal navigation from the northwestern parts of the State of New York to the southern extremities of the State of Virginia.

Besides the contributions which such a course of internal navigation would afford to the sustenance of the community, and to an export trade, in the products of the earth, which it would transport from all the various regions it must connect together, it would moreover supply the coal from the banks of the James river and the Susquehannah to the cities and settlements along the Atlantic coast, thus substituting a cheap and inexhaustible species of fuel for the wood of which the country is deprived, and of which the price already constitutes so large a drain upon the resources of the poor and manufacturing classes.

The extensive beds of plaster of Paris, and other useful substances, which are said to exist on the shores of the Susquehannah, and of which the want is now so severely felt in other places, might be carried into active usefulness throughout some of the most agricultural districts of the Union.

The transportation of merchandise of all kinds, of articles of food, clothing, and necessity, of almost every thing which the North, Middle, and South interchange, would be facilitated in point of price, time, and safety, to a great amount. Your committee are informed that, at this time, Government is compelled to convey by land, in the winter season, over the portage from the Chesapeake to the Delaware, (a road rendered almost impassable by land carriage,) the most bulky pieces of timber for the ship of the line building at Philadelphia, and that the expense of conveyance over this small distance is enormous.

In the reduction of the time, labor, and cost of all military transportation, whether of men or things, the importance of the Chesapeake and Delaware canal is inestimable; and desirable as such an improvement may be in time of war, its use would be no less extensively beneficial in time of peace.

That, essential as such a canal is at this juncture, and advantageous as it would be at all times, the motives to its undertaking are increased by the facility and shortness of time with which it may be undoubtedly accomplished.

The canal begins at Welsh Point, on the Elk river, an arm of the Chesapeake, and is to terminate, at a distance of twenty-two miles, on Christiana river, a branch of the Delaware. At low water, the depth of water in Christiana is nine feet, and in Elk twelve feet, within one hundred feet from the shore. The tide rises four feet in both rivers. The highest intermediate ground, over which the canal is to be carried, on a level of thirteen miles in length, is seventy-four feet above tide water, the descent to be effected by nine locks on each side. The digging is generally easy; no expensive aqueducts nor bridges, nor any other obstacles occur, but those which have been already overcome in digging the feeder through a rocky soil. The supply of water drawn from Elk river, by a feeder six miles in length, which is completed, and which is itself a boat canal three and a half feet deep, united by a lock of ten feet lift in the main canal, is calculated to fill daily one hundred and forty-four locks; a quantity sufficient, on an average, for the daily passage of twenty-four vessels. The canal is twenty-six feet wide at the bottom, and fifty at the top on the water line, being dug at the depth of eight feet. It is intended for vessels of from forty to seventy tons, drawing seven and a half feet water. The banks, twenty feet wide for towing paths, one of which may be converted into a turnpike road, being raised three feet above the level of the water, will, by increasing the height of the lock gates one foot, admit a depth of nine feet water in the canal. The digging one mile through rocky ground cost thirteen thousand dollars; another mile, perfectly level, and without any impediments, cost two thousand three hundred dollars, which gives an average of seven thousand six hundred and fifty dollars a mile. The whole distance to be cut is twenty-two miles; the whole cost computed at eight hundred and fifty thousand dollars. Of this sum, one hundred thousand dollars has been laid out. The sum solicited by public contribution is two hundred and eighty-seven thousand dollars. Of this sum the State of Pennsylvania contributes seventy-five thousand dollars, to be reimbursed by three hundred and seventy-five shares of the stock; the State of Maryland contributes fifty thousand dollars, to be reimbursed by two hundred and fifty shares of the stock; and the State of Delaware twelve thousand dollars, to be reimbursed by sixty shares of the stock. The sum solicited of Congress is one hundred and fifty thousand dollars, to be reimbursed by seven hundred and fifty shares of the stock. With public assistance to such an amount, the president and directors of this canal calculate on individual contributions and private loans sufficient to complete the work in a short time.

The States of Maryland, Delaware, and Pennsylvania, which are most immediately interested in this public improvement, having given their consent and co-operation to the work, your committee, in behalf of the National Legislature, beg leave to report a bill for bestowing the aid required of the United States.

13th Congress.] No. 353. [2d Session.

CONTESTED ELECTION OF THOMAS K. HARRIS, A REPRESENTATIVE FROM TENNESSEE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 3, 1814.

The Committee of Elections have, according to order, had under consideration the petition of William Kelly, contesting the election of Thomas K. Harris, and report:

That a correct statement of the poll, and the law of Tennessee governing said election, will be found in the report of the Committee of Elections made in this case at the last session of Congress; from which it appears that the inspectors of the election in the county of Warren returned two more votes for Mr. Harris than were given for him, which gave to him a majority of one vote over Mr. Kelly; that, deducting those two votes from Mr. Harris's poll, leaves Mr. Kelly a majority of one. Mr. Harris now produces evidence which raises a strong presumption that the deputy sheriff, who conducted the election in the county of Rhea, in said district, improperly added three or more votes to Mr. Kelly, and destroyed a like number given to a Mr. Rodgers, who was also a candidate, and to show that Pleasant Bean and Daniel Obarr, who voted for Mr. Kelly, were not entitled to vote. A decision on the charge against the deputy sheriff not being likely to affect the result of the election, the committee pass it with no other remark than that the evidence leaves a strong impression that he conducted very imprudently. The affidavits of Bean and his father prove that the son was but eighteen years of age at the time of the election, and, therefore, not entitled to vote. By the testimony of Obarr, he had not a freehold in the district, nor had he been living more than three months in the same at the time of the election. By the third article of the constitution of Tennessee, it is provided that "every freeman of the age of twenty-one years and upwards, possessing a freehold in the county wherein he may vote, and being an inhabitant of this State, and every freeman being an inhabitant of any one county in the State six months immediately preceding the day of election, shall be entitled to vote for members of the General Assembly for the county in which he shall reside."

The committee are of the opinion that that branch of this article which prescribes the second qualification of the voter, restricts him to vote in the county wherein he has been an inhabitant six months immediately preceding the day of the election, and permits him to vote no where else; and, therefore, Daniel Obarr had not a right to vote in this election; that deducting from the poll of Mr. Kelly the two votes given by Bean and Obarr, leaves to Mr. Harris a majority of one, and entitles him to a seat in this House. The committee, therefore, respectfully submit the following resolution:

Resolved, That William Kelly has not supported his petition, and that Thomas K. Harris is entitled to a seat in this House.

[See report, No. 340.]

13th Congress.] No. 354. [2d Session.

APPLICATION TO AMEND THE ACT CONTINUING CERTAIN PATENT RIGHTS TO OLIVER EVANS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 6, 1814.

Mr. Ingersoll, from the committee to whom was referred the memorial of sundry inhabitants of Maryland, on the subject of the patent granted to Oliver Evans, for his improvements in machinery employed in the manufacturing of flour, made the following report:

That the memorialists complain that, by virtue of the act passed on the 21st January, 1808, entitled "An act for the relief of Oliver Evans," the said Oliver Evans claims the benefit of certain improvements in the machinery employed in the manufacture of flour, of which he is not the original inventor; that he exacts large and unreasonable sums for the use of those improvements; and that those are compelled to pay, who have established their improvements before the passing of the said act.

Your committee conceive it not only repugnant to the principles of a Government organized like ours, to permit a question of a character such as the first objection presents, to be litigated before the Legislature; but it is impossible that a fair decision can be made, when it is indispensable, in order to render impartial justice, that the parties should be permitted to go into evidence respecting the facts in controversy. A court of justice is the proper tribunal where such questions ought to be tried, and your committee are informed that this very question has already been settled in that way, by the circuit court of the United States for the Maryland district, favorable to the pretensions of the said Evans.

The second subject of complaint seems to your committee equally an improper subject for the interference of the Legislature. The patentee, by law, has an exclusive privilege to use his invention as he pleases. No person has a right to complain if the proprietor of an invention demands a sum deemed exorbitant, more than if such a demand had been made for any other species of property; it must rest with the purchaser whether his interest will permit him to yield to it.

The third ground of complaint is equally untenable in the opinion of your committee. The Legislature had the power (and it seems in this case they have exercised it) to subject those who should *use* the improvements mentioned, *in future*, to the claim of the said Oliver Evans. The patent originally granted to him had previously been declared void by a judicial decision. The case, therefore, stood as if no exclusive right had ever been granted, and it is certainly not necessary to prove that a person who uses a new improvement before a patent is granted, is subject to the restrictions which follow the grant. Your committee, therefore, submit the following resolution:

Resolved, That the prayer of the memorial ought not to be granted.

To the Senate and House of Representatives of the United States of America:

Your memorialists humbly beg leave to represent, that your honorable body, on the 21st day of January, 1808, passed an act authorizing the Secretary of State, on application, in writing, by Oliver Evans, to cause letters patent to be made out in the manner and form prescribed by the act entitled "An act to promote the progress of useful arts, and to repeal the act heretofore made for that purpose;" thereby granting to the said Oliver Evans, his heirs, executors, administrators, and assigns, for a term not exceeding fourteen years, the full and exclusive right and liberty of making, constructing, using, and vending to be used, his invention, discovery, and improvements in the art of manufacturing flour and meal, and in the several machines which he has discovered, invented, improved, and applied to that purpose. That letters patent did accordingly issue, which are now in full operation; and that, by means of them, the patentee is exercising a most grievous oppression over the citizens of the United States, and more especially over those who are immediately engaged in the manufacture of flour.

Your memorialists, in any ordinary case, would be the last to remonstrate against benefits which the Legislature of their country might think proper to confer upon any individual; but believing, as they do, that your honorable body, when you consented to pass the act of January, 1808, in favor of Mr. Evans, were deceived by artful representations of merit; and knowing, also, that Mr. Evans has used his patent for purposes in which it could never have been intended to give him aid, your memorialists feel confidently assured that Congress will not hesitate to reconsider the ground of their former grant, and to do impartial justice between Mr. Evans and the rest of his fellow-citizens.

Your memorialists have understood, and they have no doubt of the fact, that, when Congress undertook to renew Mr. Evans's monopoly, they were industriously made to believe that he was the inventor of all the machines for which he solicited and obtained his patent. In this, your honorable body were most grossly deceived. Many of your memorialists have just witnessed the progress of several trials that took place at the last term of the circuit court of the United States at Baltimore, in actions instituted by Mr. Evans for infringements on his patent rights. Although the result of these trials were such as must give alarm to every man who has dared to think of opposing this exorbitant monopolist, yet did they prove most incontrovertibly, by the investigations to which they led, that Mr. Evans was not the original inventor of any one of his patented machines. Your memorialists entreat the patience of your honorable body, while they briefly detail the testimony relating to this question, such as it appeared before the circuit court, and such as it can again be exhibited, whenever your honorable body may think proper to require it.

The machines which form the subject of Mr. Evans's patent are the conveyer, the elevator, the hopperboy, and the drill. For greater perspicuity, we will state the testimony, as applied to each machine, in successive order.

1st. The conveyer. It was proved that Jonathan Ellicott, of Baltimore county, was the first inventor of this machine. He had erected it in his mill some time before the year 1786, and applied it to all its present uses. He showed it to Oliver Evans, who was highly pleased with its operation. He said it was all that was necessary to complete his machinery; that he had long desired to have such a machine, but could not devise one; and, finally, in consideration that Jonathan Ellicott would permit him to attach it to his elevator and hopperboy, Oliver Evans gave him a perpetual license to use these last.

2d. The elevator. This machine has been invented nearly a century and a half. There are books, a hundred years old, that exhibit it, (applied to hydraulic purposes,) the same in principle, form, dimensions, and materials, with the elevator now claimed by Oliver Evans as his original invention.

3d. The hopperboy. A machine upon the same principle with Oliver Evans's alleged hopperboy, worked by the same power, acting in the same manner upon the meal, and producing the same effect, although not as bene-

ficially, was invented by ——— Marshall, of Delaware, and set to work in his mill, before the time of Oliver Evans's supposed discovery. Mr. Evans lived in the neighborhood of this invention.

4th. The drill. The invention of this machine did not come in question before the circuit court; but it is susceptible of undeniable proof, that Jonathan Ellicott, before referred to, was the inventor of it, as well as of the conveyer.

Thus it appears that Mr. Evans's merit, as an inventor, in no respect corresponds with the artful and imposing representations by which your honorable body were induced to grant him your protection for a *second term of fourteen years.* So far from having invented *all* these machines, he was not the original inventor of any one of them. Your memorialists, therefore, might here rest their petition; but they think it proper to notice the other grounds of Mr. Evans's pretensions. These are, first, that he has invented useful improvements in the structure of the several machines secured by his patent; and, secondly, that he was the first who applied to their new use in mills those machines.

The conveyer and hopperboy are the only machines in which Mr. Evans will now attempt to show that he has made any improvement; in the elevator and drill he has not made even an alteration. First, then, of the conveyer: The *transverse flights* form the alteration which he claims to have made in this machine. Even if Mr. Evans was the inventor of this alteration, its utility in the manufacture of flour is extremely questionable. Several most intelligent millers, who were examined upon this subject in the trials at Baltimore, were so much at a loss to discover the beneficial effect of this alteration, that they preferred the spiral conveyer. The great utility of this alteration is rendered still more questionable by the fact, that a large portion of the millers, even those who have paid Oliver Evans for the license of his patented machines, do not make use of the transverse flights. But your memorialists are convinced that Mr. Evans was not the author of this alteration. They will be able to show your honorable body that this improvement, like most of the improvements which Mr. Evans claims, was discovered by other persons, from whom he adopted it.

Secondly. Of the hopperboy. Mr. Evans, as has been before stated, was not the original inventor of this machine. Your memorialists admit that he was the first who added the ropes leading the horizontal arms around, and that this addition facilitates the operation of the machine. But, surely, it will not be contended that upon this alteration Congress bottomed their grant. This improvement may have been sufficient to entitle Mr. Evans, under the general law, to a patent for the improvement, but for nothing else. It could not have entitled him to a patent for other machines, which he neither invented nor improved; much less can it entitle him to an *extension* of his exclusive privilege beyond the usual term.

Your memorialists come now to the last ground of Mr. Evans's pretensions, "that he has the merit of having first applied these machines to their present use in mills." This ground was much narrowed by the trials before referred to in the circuit court at Baltimore. It was there shown that the conveyer, the hopperboy, and the drill, were applied by their original inventors to all the purposes for which they are now used. The elevator is the only machine about which there can be the least doubt; and, to the minds of your memorialists, there are conclusive reasons for believing that Oliver Evans was not the person who first discovered the application of this machine to its present office—the raising wheat and flour. Oliver Evans first exhibited his elevator, and first informed the world that he had invented one in the year 1787. Twelve or eighteen months before this time James Strode, of the State of Delaware, had erected a perfect elevator in his mill.

Mr. Strode, in the circuit court at Baltimore, related the history of his invention. Standing in his mill, contemplating the machinery that he then had in it, he observed that, as the leather strap turning the *fan* performed its revolutions, the buckle, by which it was fastened, would catch up a few grains of wheat below, carry them up with it, and empty them out at the top. The thought immediately occurred to him, that a machine revolving like this strap, with buckets upon it, would completely perform the office of raising his wheat and flour. He constructed it accordingly, and found it perfect. This machine is what is now called "Evans's elevator." Your memorialists admit, that a brother of Oliver Evans declared in the circuit court at Baltimore, that Oliver Evans had several years before this period invented precisely the same machine; and that, although he did not show it to the world by using it in his mill, yet he had it, and the model of it was locked up in a chest, and continued so locked up for several years. When this testimony comes before your honorable body it will, no doubt, receive whatever credit, under all its circumstances, it may be entitled to. But your memorialists hope *they* will be pardoned for believing that there was some mistake in the matter.

Your memorialists have thus candidly detailed the testimony relating to Mr. Evans's patent. They feel assured that your honorable body will discover in it abundant cause to take this subject again into consideration. Your memorialists, however, will take the liberty of suggesting other motives of greater weight.

When Congress consented to renew Mr. Evans's exclusive privileges, in 1808, they could not have intended to give their law an *ex post facto* operation; yet such has been the construction which our circuit courts have felt themselves constrained to give to the act of January, 1808. In the circuit court of Philadelphia it has been decided, by Judges Washington and Peters, that even those who erected their machinery in the interval between the expiration of Mr. Evans's first patent in 1804, and its renewal in 1808, cannot continue to use them without a license under the second patent. The hardship of this construction is extreme. The United States abound with mills, in which the machinery was erected during that interval when no law existed to prohibit it; when no man was aware of any right still remaining in Mr. Evans; and when the public thought they were enjoying a property for which they had already paid the price. But, since this construction, persons, who erected their machinery under those circumstances, must either pull it down, or subject themselves to actions for *treble damages;* or they must consent to pay whatever price the patentee may choose to demand for a license. As it regards his charges, your memorialists humbly state, that the act of renewal has imposed no limitation on Mr. Evans, an omission of which he is availing himself most oppressively. During his first patent, while he was looking forward to his intended application for a renewal, Mr. Evans observed a very becoming moderation in his demands; thirty-three dollars was originally the price of his license to use his machinery in application to one water-wheel; but, as soon as the act of 1808 had put the community in his power, he began to advance, from exaction to exaction, until he now demands about twenty times the amount of his former charge, and threatens that he will rise still higher. From one of your memorialists Mr. Evans has demanded *thirty-six hundred dollars* for his license. This fact, while it shows how oppressively this patent bears upon individuals, will enable your honorable body to form some estimate of the enormous profits which the patentee will derive from a general use of his machinery throughout the United States.

Your memorialists will not consent to believe that Congress intended to let Mr. Evans loose upon the community with so grievous, so despotic a power; they, therefore, pray that your honorable body will again take this subject into consideration; that you may examine the grounds upon which Mr. Evans's patent issued, and do whatever in your wisdom you may think fit.

And your memorialists will ever pray, &c.

WILLIAM COLE, *and others.*

BALTIMORE, *January* 1, 1813.

13th Congress.] No. 355. [2d Session.

CONTESTED ELECTION OF JOHN P. HUNGERFORD, A REPRESENTATIVE FROM VIRGINIA.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 19, 1814.

Mr. James Fisk made the following report:

The Committee of Elections have, according to order, had under consideration the petition of John Taliaferro, contesting the election of John P. Hungerford, and report:

That, at the last session of Congress a final report was made in this case, and it does not appear that the petitioner was apprized of, or expected that the parties would have been indulged with the admission of new evidence, and a further hearing at this session; yet as the House had seen proper to refer the subject again to the committee, they felt bound to receive all proper testimony which should be presented to them, and accordingly received from the sitting member a number of depositions taken in July last, in pursuance of previous notice given by him to the petitioner, which support eleven of the votes on the poll of the sitting member not found on the land list, nor supported by former testimony. Adding these to the forty-three votes supported by him at the last session, gives him a majority of twenty-two over the petitioner. For a more particular statement of the poll, in this case, the committee beg leave to refer the House to the second report made thereon at the last session.

But, after the most mature consideration the committee have been able to give this case, a majority are of the opinion that this election is void, and ought to be set aside, because it was conducted in an irregular manner, contrary to the law of Virginia prescribing the manner of conducting such elections, as is more particularly set forth in the first report made in this case by the Committee of Elections at the last session, to which your committee beg leave to refer the House, and respectfully submit the following resolutions:

Resolved, That the said election was illegal, and ought to be set aside.

Resolved, That John P. Hungerford is not entitled to a seat in this House.

[Note.—See Nos. 343 and 345.]

13th Congress.] No. 356. [2d Session.

CUMBERLAND ROAD.

COMMUNICATED TO CONGRESS, JANUARY 19, 1814.

To the Senate and House of Representatives of the United States: January 18, 1814.

I lay before Congress a report of the acting Secretary of the Treasury, containing a statement of proceedings under the act to regulate the laying out and making a road from Cumberland, in the State of Maryland, to the State of Ohio.

JAMES MADISON.

Sir: Treasury Department, *January* 14, 1814.

I have the honor to transmit the report of the superintendent of the Cumberland Road of the progress made in that work during the last year.

I am, very respectfully, sir, your most obedient servant,

W. JONES,
Acting Secretary of the Treasury.

The President of the United States.

Sir: Cumberland, *December* 31, 1813.

The first ten miles of the western road is finally completed. The banks and sideways are dressed, and the whole of the accounts settled and paid.

The second letting, eleven miles, has not been finished, as was expected and provided for by contract the 1st of November last; four miles thereof are now used by travellers, and require but little dressing to the sideways to be complete, four more are nearly so, and it is confidently expected the whole will be finished next summer.

On the third letting, about eighteen miles, there is but little done; the time fixed by contract for its completion is the 1st of November next. Judging from the little progress made, it will not be finished within that time; but as the contractors are making great exertions to procure laborers, and a number of persons, from the evident utility of the work, have become anxious for its speedy progress, and are giving their aid to procure hands, and the contractors having in view to employ slaves, it is quite possible this letting may be completed within the time.

Provisions for keeping the road in repair, and for the prevention of abuses to the work, similar to that of other turnpikes, are every day becoming more necessary.

The distance from the end of the last letting to Uniontown is about twenty-one miles. A sum of from one hundred and fifty to one hundred and sixty thousand dollars it is thought would be sufficient to make the road to the latter place.

I am respectfully, sir, your obedient servant,

DAVID SHRIVER, Jun.

The Hon. William Jones, *Acting Secretary of the Treasury.*

13th CONGRESS.] No. 357. [2d SESSION.

CUMBERLAND ROAD.

COMMUNICATED TO THE SENATE, JANUARY 24, 1814.

Mr. SMITH, from the committee to whom was referred the report of the Secretary of the Treasury, containing a statement of proceedings under the act to regulate the laying out and making a road from Cumberland, in the State of Maryland, to the State of Ohio, report:

That the act for the admission of the State of Ohio into the Union has appropriated five per cent. of the net proceeds of the land laying within that State, and sold by Congress, (from and after the 30th day of June, 1802,) to the lying out and making roads leading from the navigable waters emptying into the Atlantic, to the river Ohio, and through the said State of Ohio; and by a subsequent law, passed the 3d of March, 1803, Congress appropriated three of the said five per cent. to laying out and making roads within the State of Ohio, leaving two per cent. unexpended; which two per cent. was, by an act passed the 29th of March, 1806, appropriated to the laying out and making a road from Cumberland, in the State of Maryland, to the State of Ohio; that, under the said act, the President of the United States was authorized to appoint three commissioners to lay out the said road. It appears that commissioners were appointed, and that the road has been laid out by them agreeably to their instructions; and it also appears, by the letter of Mr. David Shriver, (the superintendent of the road,) contained in the report of the Secretary of the Treasury, that the making of the said road is progressing as fast as could reasonably be expected; that the whole of the work contracted for is thirty-nine miles, of which twenty-eight miles may be considered as nearly finished; that a stone bridge of eighty feet span over the Little Youghiogany river is nearly completed.

It also appears that the thirty-nine miles contracted for bring the road to the Big Youghiogeny; from thence to where it will intersect the old road is eleven miles, which your committee think ought to be completed.

The committee find that a turnpike road from Baltimore, extending sixty miles in a direct line towards Cumberland, has been completed, and that the banks of Maryland have, for valuable considerations, agreed to construct a turnpike road from Conecogeague creek to Cumberland; so that there is a well founded expectation that a turnpike road from Baltimore to Cumberland will be completed before the road from thence to the Ohio can be finished.

The committee find that Congress have appropriated in advance of the fund of two per cent., at different times, $287,320 25.

The committee submit the following estimate and statement, which they think may be considered tolerably correct, to wit:

The thirty-nine miles of the road contracted for will cost $7,500 per mile, - - -		$292,500 00
A stone bridge has been constructed of eighty feet span across the Little Youghiogeny, which cost - - - - - - - - - -		14,000 00
		$306,500 00
The sums paid from the Treasury, prior to the 31st day of December, 1814, amount to - - - - - -	$194,631 80	
The balance of the appropriation heretofore made, and which remained undrawn on the 1st January, 1815, was - - - -	92,688 45	
		287,320 25
So that an additional appropriation, to complete the work already contracted for, is wanted of about		19,179 75
To carry the road eleven miles beyond the Big Youghiogeny, where it will intersect the road now travelled, and which will be probably another year's work, will cost, at $7,500 per mile, -		82,500 00
		$101,679 75
To construct the bridge over the Big Youghiogeny it will require, if built of stone, a further sum of		40,000 00
		$141,679 75
If it should be determined to provide at this time for carrying the road to the western foot of Laurel Hill, seven miles further, it will require, in addition, - - - -		52,500 00
		$194,179 75
If, lastly, to Uniontown, three miles further, - - - -		22,500 00
		$216,679 75

It will appear, from the foregoing statement, that Congress have already appropriated in advance of the fund of two per cent., on the net proceeds of the sales of land within the State of Ohio, the sum of $287,320 25, and have paid, in part, the sum of - - - - - - $194,631 80

It appears from the report of the Land Office to the Treasury Department that the said fund had yielded to the Treasury, prior to the 1st day of October, 1814, the sum of - - 107,004 48

So that the amount of the advance, actually made by the Treasury, is only - - $87,627 32

From this view of the subject the committee are of opinion that the fund appropriated for the making the said road is fully adequate to the object.

The effect of an appropriation, during the present session of Congress, for any portion of this work, will be only to authorize the Treasury to make contracts during the present year for carrying it on. Very little, if any money will be drawn from the Treasury, except for completing the contracts already made, until the year 1816.

The committee are of opinion that an appropriation ought to be made to enable the Treasury to make contracts to carry the new road to where it will intersect the road now travelled on, and sufficient for the constructing of a stone bridge over the Big Youghiogeny; for which purpose they submit a bill.

13th Congress.] No. 358. [2d Session.

LIST OF PATENTEES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 31, 1814.

SIR: DEPARTMENT OF STATE, *January* 1, 1814.

In pursuance of the resolution of the House of Representatives of the United States, dated the 13th of January, 1812, I have the honor of transmitting a list of the names of persons who have invented any new or useful art or machine, manufacture, or composition of matter, or any improvement thereon, and to whom patents have been issued for the same from this office, from the 31st day of December, 1812, to the 1st day of January, 1814, with the dates and general objects of such patents; and also the residence of the patentees, as far as they could be ascertained.

JAMES MONROE.

To the Hon. the SPEAKER *of the House of Representatives of the United States.*

LIST OF PATENTEES.

Inventions.	When issued.	Names of patentees.	Residence.
	1812.		
A nurse lamp,	Dec. 31	William Howe,	Boston.
	1813.		
A pendulum mill,	Jan. 6	William Grandin,	Hector, Seneca co. N. Y.
A machine for making ship and other bread,	8	Jehosaphat Starr,	Middletown, Middlesex co. Conn.
In pitchforks,	12	Jared Byington,	Hinesborough, Chittenden co. Vermont.
In preparing colors and paints from ores, &c.	14	Henry Alexander,	Baltimore.
In the fireplace and chimney for saving fuel,	18	Samuel Morey,	Philadelphia.
In distilling,	18	Omri Carrier,	Enfield, Connecticut.
In distilling,	26	John Bates,	Hartford, Connecticut.
In making cloth and blankets from sheep's wool,	Feb. 3	Allen Barnes, Samuel Gray, and Jabez Clark,	Windham, Connecticut.
A machine for cutting fur from peltry,	4	Ephraim Cutter,	Walpole, New Hampshire.
A machine for heading wood screws,	4	Abel Stowell,	Worcester, Worcester co. Massachusetts.
Manufacturing acetate of copper or verdigris,	4	Stephen Dempsey,	New York.
In the stove and boiler,	6	Gabriel N. Phillips,	Goshen, Orange co. N. Y.
In raising water from wells, &c.	6	George Patterson,	Philadelphia.
A machine for carding cloth,	6	John Jessup,	Orange county, New York.
In the kitchen stove,	8	John Spencer,	Albany, New York.
Machine for making bread,	8	George Richards,	Manlius, Onondaga co. N. Y.
In the plough,	8	John Sietz,	Strasburg, Lancaster co. Pen.
Wheels of elastic oars for propelling boats, &c.	16	Louis Mure Latour.	
A printing press and mode of distributing ink on types,	17	William Elliot,	New York.
In the printing press,	26	Zachariah Mills,	Hartford, Connecticut.
In tassels and cords for boots,	March 1	Alfred Janes,	Hartford, Connecticut.
In stoves,	1	Alfred Janes,	Hartford, Connecticut.
Machine for planing boards and plank, and shaving shingles,	2	William Badger,	Madison county, Miss'pi T.
An ice-breaking machine,	2	John I. Williams,	Georgetown, Dist. Columbia.
In saw mills,	2	Hiram Whitcomb,	Cornwall, Litchfield co. Con.
A medicine made use of in fevers, &c.	2	Samuel Thompson,	Surry, Cheshire co. N. H.
For boiling liquors and for distillation,	3	John Morris,	New Haven, Connecticut.
The perpetual wool spinner,	3	Burgiss Allison,	Burlington, New Jersey.
For sifting meal,	8	Daniel Homan,	Brookhaven, Suffolk co. N.Y.
A refrigerator,	16	John W. Bronaugh and Jesse Talbot,	Georgetown, Dist. Columbia.
In manufacturing brass, copper, and composition nails,	17	George Whitfield Robinson,	Attleborough, Bristol county, Massachusetts.
Mode of applying heat to machines for preparing wool for worsted,	18	Joseph Bamford,	Philadelphia.
In the wheel-head,	18	Eli Church,	Homer, Cortland co. N. Y.
In fireplaces,	18	David F. Launy,	Philadelphia.
In the gas lamp,	18	David Melville,	Newport, Rhode Island.
A domestic and factory loom,	20	Walter Janes,	Ashford, Windham co. Con.
In repeating gunnery,	23	Joseph C. Chambers,	West Middletown, Washington county, Pennsylvania.
In pumps,	23	Jacob Perkins,	Newburyport, Massach'setts.
Machine for making screw shanks,	23	Jacob Perkins,	Newburyport, Massach'setts.
In the fire engine,	23	Jacob Perkins,	Newburyport, Massach'setts.
A vault lock for banks,	23	Jacob Perkins,	Newburyport, Massach'setts.
A portable or separating furnace for casting brass or other metal,	30	Joseph Share,	Baltimore.
In the boiling stoves,	30	Henry Abbott,	Philadelphia.
In stoves,	30	George Warrall,	Philadelphia.
For shaving and splitting leather,	April 5	Samuel Parker,	Billerica, Middlesex co. Mas.
In the mode of preparing magnesia,	8	William Dunn,	Boston.

LIST OF PATENTEES—Continued.

Inventions.	When issued.	Names of patentees.	Residence.
	1813.		
In steam engines,	April 10	James D. Russell,	Washington, Beaufort county, North Carolina.
A machine for cutting timber,	15	David Cram,	Clarksburg, Harrison co. Va.
A carding, spinning, and roping machine,	15	Theodore Norton and George Biddis,	Milford, Wayne co. Penn.
A spinning and roving machine,	15	Samuel Comstock and Moses Pike,	Harrisburg, Dauphin county, Pennsylvania.
Machine for cutting and heading nails, and making wrought nails,	16	Mark and Richard Reeve,	Philadelphia.
Varnish of elastic gum to render water proof, and for many other uses,	29	Jacob Fred'k Hummel,	Philadelphia.
A press for pressing hay,	29	Richard V. W. Thorn,	New York city.
In the art of drawing in perspective mechanically,	30	Simeon De Witt,	Albany, New York.
A machine for cutting screws,	May 4	Jacob Sloat,	Ramapo Cove, Rockland co. New York.
A machine for winnowing grain,	4	John James, 3d,	Plymouth, Massachusetts.
A horizontal shearing machine,	4	Thomas Blanchard,	Sutton, Worcester co. Mass.
A carriage to be moved by hand,	4	Daniel Nine, Jun.	Reading, Berks co. Penn.
In manufacturing all sorts of plane irons and scythes, &c.	6	Daniel Pettibone,	Philadelphia.
Machine for breaking flax and hemp, &c.	6	Ira Millard,	Kent, Litchfield co. Conn.
The flour worm for cooling flour,	6	John Smelzer,	Adams county, Pennsylvania.
Machine for drawing wire,	10	John I. Staples,	Flushing, Long Island, N. Y.
A liquid combustible shell grenade and serpentine rocket,	11	James Lloyd,	Adams county, Pennsylvania.
For roping and spinning wool, called the farmer's spinner,	12	John Brown,	Providence, Rhode Island.
A machine for making shot and bullets,	12	Peregrine Williamson,	Baltimore.
In the loom,	27	Shepard Briggs,	Canaan, Litchfield co. Conn.
For raising a nap on cloth,	27	James Mathes,	Barre, Jefferson county, Vt.
Apparatus for boiling and manufacturing salt,	28	John J. Cabell,	Lynchburg, Campbell co. Va.
Preparing and manufacturing different parts of the asclepias or silk weed for thread or cordage,	28	George Smith,	New York.
Machine for cutting and making files,	28	Cyrus Jackson,	Butternuts, Otsego co. N. Y.
In the bull plough,	28	Sylvanus Tousley,	Onondaga county, N. York.
In the steam engine,	29	Samuel Briggs and Andrew Steel,	Baton Rouge, Iberville co. La.
In the furnace and boilers for manufacturing salt,	29	Samuel Anthony,	Lynchburg, Campbell co. Va.
In the plough,	June 2	Matthew Patrick,	Scipio, Cayuga county, N. Y.
In heating water and tanning in cold weather,	2	Caleb Atwater,	Genoa, do.
A cartouch box,	3	Jonathan Mix,	New York.
In making shot and bullets, &c. by pressure,	4	Thomas Bruff,	Washington City.
A washing machine,	10	John F. Whipple,	Easton, Washington co. N. Y.
A composition for taking off the glaze from the face of mill stones,	10	John Noble,	Derby, New Haven co. Con.
In the cradle,	15	Samuel Pope,	Windsor, Hartford co. Con.
Machine for making wheels,	15	Melzor Hunt and Cotton White,	Sunderl'd, Franklin co. Mass. Hartford, Hampshire co. do.
Machine for breaking flax and hemp,	30	William Van Duzer,	Warwick, Orange co. N. Y.
In the yarn beam for looms,	15	Simeon Pettee,	Foxboro', Norfolk co. Mass.
In looms,	18	Alfred Ware, Jun.	Franklin, Norfolk co. Mass.
Machine for making shingles,	18	Otis Paine,	Foxboro', Norfolk co. Mass.
A washing machine,	18	Josiah Hotchkiss,	Woodbury, Litchfield county, Connecticut.
Machine for spinning cotton,	19	Luther Bissell, Justus Hinman, Luke C. Hinman, and Benoni Gains,	Hartwick, Otsego co. N. Y.
In ferry boats,	25	Thomas Cohoon,	Pittsfield, Massachusetts.
Improvement of Jacob Perkins's method of impressing all kinds of die work on steel, copper, &c. by circular dies,	25	Jacob Perkins, George Murray,	Newburyport, Massach'setts. Philadelphia.
A washing machine,	25	Silas Hitchcock,	Vernon, Oneida county, N. Y.
In the press,	25	Silas Hitchcock,	Vernon, Oneida county, N. Y.
A twisted screw gimblet,	25	Joseph Broad,	Salisbury, Litchfield co. Con.
In fireplaces and stoves,	25	Ezra Haskell,	New London, Connecticut.
In the still,	26	John James Giraud,	Baltimore.
In water mills,	26	Jacob Perkins,	Newburyport, Massach'setts.
In making spoons,	29	Jacob Perkins,	Newburyport, Massach'setts.
A copper and steel plate printing press,	29	Jacob Perkins,	Newburyport, Massach'setts.
In saw mills,	July 3	Luther Bissell,	Hartwick, Otsego co. N. Y.
In the loom,	3	Thos. Robinson Williams,	Newport, Rhode Island.
In fire places and stoves,	7	Chauncey Guernsey,	Poultney, Rutland co. Vt.
Improvement in his spinning machine, which was patented the 28th of June, 1809,	8	Nathaniel Foster,	Fleming, Kentucky.
In stills,	12	Charles F. Fisher,	York, Pennsylvania.
A cylinder heater for heating mash water, &c. for distilling,	12	Chas. Jenks and Abiel Pease,	East Windsor, Connecticut.
A floating house or bathing machine,	13	Henry Chevens,	New York.
In bleaching cotton goods by steam,	14	Alex. Milne and Daniel S. Deane,	Clinton, Dutchess co. N. Y.
Machine for finishing the heads of wood screws, or iron screws for wood work,	15	Abel Stowell,	Worcester, Massachusetts.

LIST OF PATENTEES—Continued.

Inventions.	When issued.	Names of patentees.	Residence.
	1813.		
In die work as a substitute for etching, &c.	July 15	Abel Brewster,	Frankfort, Philadelphia co. Pennsylvania.
A bark mill,	16	Caleb Churchman and Geo. Martin, Jun.	Upper Chichester, Delaware county, Pennsylvania.
A printing press,	16	Daniel Pierson,	Newburyport, Massach'setts.
In grist mills,	20	Abraham Sawyer,	Chester, Windham co. Vt.
In making cloth of hair,	23	William Shotwell and Arthur Kinder,	New York.
In the loom,	24	Elihu Robinson,	Augusta, Kennebeck co. Mas.
In the weaver's lathe,	24	John Drummond,	New York.
A tubulated cylinder shot,	Aug. 3	James M. Ludlum,	New York.
Improvement in distilling, and of wooden still,	3	John Js. Giraud,	Baltimore.
A machine for making ropes and twine,	3	John Heavin,	Montgomery C. House, Va.
In spinning wheels,	4	Daniel Hurlbut,	Aurelius, Cayuga co. N. Y.
In the construction of locks,	5	William Pie,	New York.
In pumps,	6	Thos. Nicholson and Samuel Gunn,	Genoa, Cayuga county, N.Y.
A mill for grinding and pounding, &c.	7	Alex'r Duncan Moore,	New Haven county, N. C.
A pendulum churn,	7	Silas Hitchcock,	Vernon, Oneida county, N.Y.
Improvement in the plough,	7	Matthew Murray,	Middletown, Fred'k co. Md.
In heating liquors, mash, &c. for distilling,	18	Thomas Belden,	Hartford, Connecticut.
In the preparation of the flour of mustard,	19	Samuel Hopkins,	Rashway, New Jersey.
In extracting hair from fur skins,	19	John Hollingshead and Daniel Baker,	Trenton, New Jersey.
In the machine called the cylindric polisher,	20	Ebenezer Stowell,	Middlebury, Addison co. Vt.
A twining comb machine,	20	Daniel Carrington and Ira Ives,	Litchfield, Connecticut.
Improvement in the lamp, consisting of a double reflector to one blaze,	20	William Foster, Jun. and Leonard Foster,	Boston.
In the weaver's beam,	24	Goliah Williams,	North Providence, R. Island.
In the mill gudgeon,	24	Michael Withers,	Strasburg, Lancaster co. Pen.
In constructing and navigating ships, boats, &c.	26	Benjamin Connor,	Portsmouth, New Hampshire.
In the plough,	28	Horace Pease,	Enfield, Hartford co. Conn.
A doubling, twisting, and reeling machine,	30	Halsted E. Haight and John Haight,	New York.
In setting stills, and in the furnace,	31	Abraham Gibbs,	Lancaster, Pennsylvania.
Improvement in the press patented by John Cunningham and Samuel S. Edmonston,	Sept. 1	Samuel S. Edmonston,	New York.
Machine for sawing shingles, called a shingle mill,	3	Willard Earl,	Hubbardston, Worcester co. Massachusetts.
An hydrostatic engine and steam engine,	3	Stephen H. Long and George F. A. Hauto,	Germantown, Pennsylvania.
In manufacturing paper hangings with light colored satin grounds,	8	Hezekiah Steel,	Hudson, New York.
Maching for cutting nails,	8	Henry Lutgen,	Marietta, Lancaster co.
Machine for splitting skins,	9	William Bent,	Boston.
Improvement in the nail machines patented by them on the 3d of February, 1812, 31st October, 1812, and 16th of March, 1813,	28	Mark Reeve and Richard Reeve,	Philadelphia.
A revolving weaving loom,	Oct. 2	John Hess,	Hempfield, Lancaster county, Pennsylvania.
A pump for elevating meal, grain, and other light substances,	2	John Ewing and David Dickey,	Oxford, Chester county, Pen.
A warm bathing vessel,	4	Daniel Harrington,	Centreville, Fairfax co. Va.
Machine for, and mode of preparing hemp and flax, &c.	7	Francis Hall,	Tennessee.
Manufacturing wine from cider,	8	Ezra B. Corkings,	Bristol, Ontario county, N.Y.
Improvement in the flood gate,	9	Benjamin S. Hort,	Georgetown, South Carolina.
A cylindrical boiler,	9	Philo M. Hackley,	Hudson, New York.
A spring bolt for holding up window sashes,	13	Nathaniel Briggs,	New York.
Mould for forming wool and rorams, &c. into batts for hats,	14	John Werely,	Albany, New York.
Machine for shearing cloth,	22	Silas Hills,	Hudson, New York.
In the stocking loom,	22	Ebenezer Herrick,	Stockbridge, Berkshire county, Massachusetts.
Machine for planing card boards and scaleboards,	23	William Kimball and Sam'l Willard, Jun.	Mount Vernon, Hillsborough county, New Hampshire.
Mode of propelling boats by levers and weights,	23	John T. Schenck,	New York.
In grinding and reducing ores into powder, and preparing them for various uses,	27	Henry Alexander,	Baltimore.
Improvement in his condensing tub for heating water for distillation,	27	Alexander Anderson,	Philadelphia.
Machine for sawing, polishing, and moulding stone,	Nov. 3	Simeon B. Willard,	Bloomfield, Ontario co. N.Y.
In spinning the hair of neat or black cattle,	4	William Shotwell and Arthur Kinder,	New York.
In carding the hair of neat or black cattle,	4	William Shotwell and Arthur Kinder,	New York.
In rendering leather impermeable to water,	4	Joseph Board,	New York.
In manufacturing white lead and flake white,	8	Alex'r Jas. Hamilton,	New York.
In wooden springs for carriages,	10	Luke H. Thrall,	Troy, New York.
A spiral stove,	13	Robert Roy,	Warwick, Orange co. N. Y.

LIST OF PATENTEES—Continued.

Inventions.	When issued.	Names of patentees.	Residence.
	1811.		
In the art and process of making and using elastic steel card teeth, and converting iron fish hooks, &c. into steel when formed of iron, -	Nov. 13	Ebenezer Jenks, -	Colebrook, Litchfield co. Con.
In the still and condensing tub, - -	13	James Wheatley, -	Fauquier county, Virginia.
In water boilers and steam stills, - -	Dec. 2	Tim. Soper, Jun. and Charles Reynolds,	Hartford, Connecticut.
In the loom, - - - -	2	Robert Sugden, -	Boston.
A multiplying reacting hollow cylinder, -	3	Thomas Powell, -	New York.
In manufacturing gunpowder, - -	7	Thomas Ewell, -	Georgetown, Dist. Columbia,
A mode of giving power and motion to machinery by weights, - - -	18	Peter Obert, -	New York.
A machine for cutting screws, - -	30	John Humes, -	Richmond, Virginia.
In making steel plated sleigh shoes, -	30	Salmon Hunt, -	Canaan, Litchfield co. Conn.
A machine for making screws, - -	31	Abner Burnham and Thomas S. Barnum,	Sharon, Litchfield co. Conn.
A mode of weaving millinet, muslin, lace, &c.	31	Stephen Steward, -	Cheshire, Walpole co. N. H.
In the wheel-head, - - - -	31	David Loring, -	Canandaigua, New York.
In steam engines and in applying steam, -	31	Francis B. Ogden, -	Essex county, New Jersey.
A machine for polishing and framing ciphering slates, - - - - -	31	John Coleman, -	Baltimore.
In the distilling apparatus, - -	31	Isaac Hoffman, -	Shawangunk, Ulster co. N.Y.

13th CONGRESS.] No. 359. [2d SESSION.

PROCEEDINGS OF THE HOUSE OF DELEGATES OF MARYLAND, IN RELATION TO THE WAR.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 2, 1814.

To His Excellency the President of the United States, and to the honorable the Senate and the House of Representatives of the United States, in Congress assembled:

The House of Delegates of the State of Maryland, immediately representing the interests and the feelings of the people of the State, are impelled, by urgent impressions of public duty, to address the constituted authorities of the Union on the awful condition of national affairs, and the exposed and defenceless situation in which the State of Maryland has been hitherto left by the General Government, under the impending calamities of war.

The principles on which the national compact was founded are too recent in the recollection of the American people to require the aid of illustration at this period. It is well known that the weakness and incapacity of the old confederation to afford the means of safety and protection to the several members of the confederacy, produced a prevailing sense of the necessity of some more efficient form of Government, invested with adequate powers to provide for the common defence and promote the general welfare.

As an important concern of the general welfare it was also anticipated, with confidence, that, under this form of Government, the just interests of commerce, connected as it is with the agricultural interest, and other occupations of an industrious community, would be faithfully and effectually preserved. To this reasonable hope and expectation we are chiefly to ascribe the sacrifices and concessions made by the navigating States, and more especially by our patriotic brethren of New England, in procuring the adoption of the federal constitution. The State of Maryland sincerely concurred in the ratification of that instrument; but her wise men who advocated the new system, it is presumed, would have been anxiously perplexed if they could have foreseen that this Government would prove, in its operation, no less incompetent or unavailing, for the purposes of common defence, than the confederation which preceded it; while, on the other hand, it might become, in its course of policy, the destroyer instead of the protector of commerce, the inflicter of intense suffering instead of being the benign guardian of the public security and happiness.

More than nineteen months have now elapsed since war was declared against England. There is reason to believe that a much longer period has gone by since this fatal measure was first contemplated. We would ask whether there is any portion of the Union, with the exception of Long Island, more open and liable to the ravages of a maritime foe than the State of Maryland? And situated as it is, with the seat of the National Government on its confines, so accessible to a hostile force, is there any part of the continent which it could have been supposed would more obviously attract the active operations of an enemy, designing to harass the physical strength of the country, and to distract and frustrate the views of its rulers in their avowed plan of foreign conquest? Is there, in short, any section of the common league which, from various considerations of prudence and of duty, the General Government was more peculiarly bound to guard by ample and vigilant preparations for defence?

We are next constrained to inquire, what has there then been done or provided, by the National Government, for the security of a State so peculiarly circumstanced against the visitations of a war which that Government had chosen its own time to declare, and which appears to have been familiar to its contemplation for a considerable series of years before it was actually declared?

If we do not say how little has been attempted for our protection, and in what way even that little has been rendered, it is because we wish not to publish our own humiliation to the world; and we would not betray the extent of our weakness to the enemy. It is because we are desirous of preserving a becoming measure of respect to the national authorities, while, in the exercise of a constitutional privilege, we perform a requisite duty to our con-

stituents, the freemen of Maryland, by making a frank representation of their complaints and dissatisfaction. The mere show of resistance, heretofore exhibited, having in fact rather tended to provoke than repel attack, the people on the exposed points of our shores despairing, after what has passed, of obtaining a sufficient defence from the Government, are becoming, in some parts of the country, inclined almost to regard with fear the approach of those semblances of military aid which are occasionally sent among them; because they have perceived that this casual parade, instead of giving them assistance in the hour of danger, rather invites destruction from an exasperated and unresisted foe, whose fury it is possible they might sometimes escape unnoticed. And yet, the history of the revolution will attest that, in the most trying times of the republic, the spirit of Maryland has never been surpassed in valor, fortitude, and fidelity.

If the war is to be continued, the miseries we have already endured may be tender mercies in comparison with those which are to be apprehended. A character of ferocity, unknown to the civilized usages of modern warfare, seems about to be given to this contest. The Government of the United States has distinctly announced its purpose of protecting the subjects of the enemy taken in arms while in the act of invading the territories of the Power under whose dominions they were born, and to whom their allegiance was naturally due; and this protection to British traitors is to be accomplished by a system of sanguinary retaliation which, in its consequences, may occasion the sacrifice of every American officer and soldier, the ignominious death of all our unfortunate countrymen who are now held as prisoners and hostages by the enemy.

In addition to this cause of apprehension, the example of useless barbarity displayed under the command of the general of the forces that lately abandoned Fort George, in Upper Canada, in committing to the flames the whole town of Newark, of which our army had been in the undisputed possession, may, in the course of a few months, bring upon our coasts the most direful vengeance which a powerful and enraged enemy can inflict, and may subject our towns, and villages, and farms, and habitations bordering on the water, to all the horrors of the most ferocious and extensive desolation.

We therefore earnestly entreat the national authorities to take these circumstances into immediate and serious consideration, to provide the means and munitions of defence, and to furnish a real efficient regular force, to be stationed in the State, so as to save its property and its citizens from the worst evils and ravages of unrelenting hostility. The efforts of the State itself, for its own protection, have been already exerted in a manner necessarily burdensome and vexatious to its people; and the State has been compelled, in the course of the last year, to seek resources in its own credit for defraying the expenses of defensive measures, which it might well have been hoped would have been seasonably and adequately prepared under the superintending care and providence of the Government of the Union. The aggregate amount of expenses thus incurred is not now ascertained, as the accounts are not yet all liquidated, and there are vouchers still to be procured. But we trust that provision will be made by Congress for reimbursing these expenses, and others of a similar nature which may be unavoidably incurred; and that, as soon as a proper estimate can be exhibited, the heavy advances of money which the State may have been obliged to make, for purposes specially enjoined on the General Government by the terms of the federal constitution, will be promptly and fully remunerated.

Having briefly urged these considerations, there remains an indispensable obligation on this House, in compliance with the known wishes and sentiments of their constituents, to submit an earnest petition to the President and Congress of the United States for a speedy restoration of the blessings of peace, and an essential change in that mistaken policy whose effects are now so unhappily to be seen in the privations and afflictions of the land. It might be deemed intrusive, and it would be altogether irksome, to enter now into a minute examination of the causes of the present war. It is believed to be at this time sufficiently ascertained, that the flagrant deception of the French Government, practised in relation to the pretended repeal of its predatory edicts, was chiefly instrumental in producing a state of things in this country which unfortunately led us into the existing hostilities with England. The documents before Congress, during the last and preceding sessions, it is presumed, have conclusively shown that the alleged repeal of the French edicts, by the letter of the 5th August, 1810, was only a conditional proposition, as its terms implied; and that there was no authentic form of a repeal of an earlier date than the decree of the 28th April, 1811, which is expressly bottomed on the previous compliance of our Government with one of the conditions of the letter referred to, in enforcing the non-intercourse against England, by the act of March, 1811. This act was in conformity with the tenor of the President's proclamation of the 2d November, 1810, declaring "the fact" that, on that day, the French decrees were repealed, so that they ceased to violate our neutral commerce. It has become abundantly apparent, since the date of that proclamation, that, in point of fact, the French violations of our commerce were continued after that date, as, in point of form, it has also appeared that there was no absolute repeal until nearly six months subsequent to the issuing of the proclamation; and that this formal repeal which, if timely used, might have produced the revocation of the British orders, so as to prevent the present war, was not officially announced to our Government, or to its minister at Paris, until more than a twelvemonth after the period at which it was dated. In the report of the Secretary of State, made to Congress on this subject at the last session, it is stated that the light in which this transaction was viewed by this Government was communicated to Mr. Barlow in the letter of the 14th July, 1812, with a view to the requisite explanation. The notice taken of the subject in the letter of the Secretary of State to Mr. Barlow, of the 14th July, 1812, thus cited, is to be found at the close of the letter, which concludes in these words: "On the French decree of the 28th April, 1811, I shall forbear to make many observations, which have already occurred, until all the circumstances connected with it are better understood. The President approves your effort to obtain a copy of that decree, as he does the communication of it afterwards to Mr. Russell."

It is possible that Mr. Barlow might not have understood this paragraph as an instruction, "with a view to the requisite explanation." But, as the report of the Secretary further stated that Mr. Barlow's successor had been also "instructed to demand of the French Government an explanation," the people of the United States might have been induced to expect that this important matter would be fully developed; and we have, therefore, seen, with serious concern, by the late message from the President to Congress, "that the views of the French Government have received no elucidation since the close of the last session." This concern is heightened by the recollection that, for a series of years past, an unhappy mystery has hung over the communications with that same Government, whose public outrages have violated all the rights of this nation, and have heaped upon those who administer its affairs every species of contumely and insult.

A review of these circumstances, so remarkably characteristic of French fraud, furnishes, in the opinion of this House, strong additional inducements for terminating this disastrous contest with England. As soon, indeed, as the foul artifice of the French ruler was disclosed, and more especially after the revocation of the British orders was made known, we should have deemed it fortunate, if the Government had availed itself of the propitious opportunity of reinstating the relations of peace with the power with whom we had been thus embroiled. The claim of impressment, which has been so much exaggerated, but which was never deemed of itself a substantive cause of war, has been heretofore considered susceptible of satisfactory arrangement in the judgment of both the commis-

sioners, who were selected by the President, then in office, to conduct the negotiations with the English ministry in the year 1806, and who now occupy high stations in the administration. Believing that this and all other causes of difference might be accommodated between the two countries, provided the agents on both sides are actuated by a sincere wish for a just accommodation, we cannot but feel anxious for an event which would relieve the people from the pressure of those burdens, and losses, and dangers, that are now to be encountered without the prospect of attaining a single object of national benefit.

From the progress and occurrences of the war, as far as it has been conducted, it must be obvious that the conquest of the Canadian provinces is not to be effected without an immense effusion of blood and treasure. The conquest, if effected, we should be inclined to regard as worse than a doubtful boon. We want no extension of territorial limits; and the genius of our republican constitution is not suited to offensive wars of ambition and aggrandisement.

A war of this nature is calculated to introduce doctrines and habits, and evil passions, which are inimical and dangerous to the liberties and morals of the nation. To carry it on, the nation has been subjected to various impositions, which will be more oppressive, because all the resources of trade are suppressed, and agricultural enterprise is deprived of its reward. The taxes are multiplied, while the means of payment are diminished, and the ordinary comforts and necessaries of life are greatly enhanced on the consumer. To carry on the war, it has been thought advisable entirely to cut off commerce, and the bitter tribulation of the Boston port bill, of 1774, is again to be realised on an infinitely more extended scale. Upon the poor gleanings and remnant of trade, the more precious for being all that was left, the complicated rigors of the embargo act, lately passed, will complete, with an unsparing severity, the work of destruction which British cruisers could not accomplish.

The people whom we represent are suffering severely under the operation of this baleful policy, against which we would solemnly remonstrate; but when we cast our eyes further, and look to its effects in another part of the continent; when we consider the still greater miseries of the people of New England, accustomed to live on navigation, and now deprived of the ordinary means of subsistence; when we reflect also on the aggravated causes of disgust to that invaluable people, who perceive that, by the formation of new States out of the limits of our ancient territory, they must necessarily lose all share of influence in the national councils, where other interests, as they suppose, have already obtained an injurious ascendancy; when we meditate on the possible tendency of these irritations, added to all the difficulties of the immediate and general distress, although we have full confidence in the faithful integrity of our Eastern brethren, yet, as they are men, we are free to confess, these reflections render us deeply and doubly solicitous that peace should be restored, without delay, for the relief of the people, and the salvation of the Union.

Convinced, as we have been, that the war might have been avoided, and that peace might be restored without dishonor to the country, the present conjuncture seems to us highly favorable for a reconciliation with England, if it is fairly and honestly desired. The late auspicious events on the continent of Europe have humbled the power of the proud oppressor of the earth. With the malignity of the spirit of evil, he had stood on his "bad eminence," the scourge of the world, the disseminator of bloody discord and dissension among the nations. Wherever his arms or his arts could reach, he has been the fell disturber of the tranquillity and happiness of every region. If the sceptre of the tyrant is not irreparably broken, we may at least hope that limits are permanently set to his inordinate sway. We trust that "the wicked shall now cease from troubling;" and viewing him as the atrocious author of all the wanton and dreadful strife which pervades the old and the new world, we do hope that, his tremendous capacity for mischief being terminated or restrained, no barrier will remain against a renewal of friendly intercourse between those Powers that have been opposed to each other in battle array by the violence and frauds of the arch-enemy of human liberty. We would, therefore, ardently implore the constituted authorities of this nation, that the negotiations about to be instituted may be carried on with a just and earnest intention of bringing them to an amicable result; that the evils of this unprofitable and pernicious war may not be protracted; and that peace, with all its blessings and advantages, may soon be permitted to dawn again on our shores, to cheer the gloom of disquietude that now exists, and to dispel the darker terrors of a tempest, which threatens, in its continuance, to consign the dearest hopes, the harmony, and the liberties of this united empire, to irretrievable destruction.

J. C. HERBERT,
Speaker of the House of Delegates.

UPTON S. REID, *Clerk.*

13th CONGRESS.] **No. 360.** [2d SESSION.

CONTESTED ELECTION OF THOMAS M. BAYLEY, A REPRESENTATIVE FROM VIRGINIA.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 2, 1814.

Mr. FISK made the following report:

The Committee of Elections, to whom was referred the petition of Burwell Bassett, contesting the election of Thomas M. Bayley, returned as a Representative from the State of Virginia, in the present Congress, have had the said petition under consideration, and report:

That, at the last general election in the State of Virginia for Representatives to Congress, the said Burwell Bassett and Thomas M. Bayley were opposing candidates, in the district composed of the counties of Accomack, Northampton, Middlesex, Gloucester, Mathews, James City, Warwick, Elizabeth City, York, and the city of Williamsburg. From the polls in the said election 1,072 votes appear to have been given, in the whole district, in favor of the sitting member, and 1,015 for the petitioner, giving the former a majority of 57 votes, whereupon he was returned as elected.

In canvassing the votes, objected to on both sides, which were numerous, and, in many instances, involving questions of considerable intricacy, your committee have carefully examined the evidence presented to them, consisting of the land roll of the several counties, transcripts of records, depositions taken on reasonable notice, or

admitted by consent of parties, and some parole testimony, with cases agreed, stating the points of fact relative to certain votes. On comparing these with the laws of Virginia regulating elections, your committee find sixty-four votes given to the sitting member by persons not legally qualified, and sixty-three votes given to the petitioner by persons not legally qualified; and that two votes given to the petitioner, which had been disputed, and, therefore, not counted by the officers conducting the election, were found to be legal and ought to be added to his poll.

The petitioner objected to the legality of the votes given in the county of Accomack on the second and third days of the election. On examining that subject it appears that one day only is allowed, by the law of Virginia, for holding the election, with an exception in the following words, viz: "If the electors who appear be so numerous that they cannot all be polled in one day before sunsetting, or if, by rain or rise of water-courses, many of the electors have been hindered from attending, the sheriff, or under sheriff, may, by request of any one or more of the candidates, adjourn the proceeding on the poll until the next day," &c. A subsequent law requires the poll, if once continued over to a second day agreeably to law, to be held open also for a third day. It did not appear, nor was it pretended, that any rain had fallen, or that any rise of waters had taken place. The only question was, whether the other condition had happened, on which the law authorized a continuance of the poll beyond the first day, with the effect of such continuance. It was proved that the election commenced early, and progressed very rapidly, and with no intermission, except such as appeared necessary in determining the right of disputed votes, and a small space occupied by a friend of the petitioner in addressing the people; that, toward the close of the day, voters became more rare, and, for half an hour previous to sunsetting, very few if any votes were given, insomuch that the sheriff proclaimed several times at the door of the court-house that unless other voters would come forward the election would be closed. That about sunsetting, four persons appeared, and demanded the privilege to vote; two of these were deputies of the sheriff, who were present during the day assisting in the election; it did not appear whether the remaining two had been present during the day, or had just appeared at that late moment. The sheriff continued the election over to the second day, at the request of the agent of the sitting member, though objected to at the time by the agent of the petitioner, as unauthorized and illegal. From this evidence your committee were very clearly of the opinion that the event did not happen, on which rested the authority of the sheriff to adjourn over the election; that the question whether more persons had appeared than could be polled on the first day was a mere question of fact, allowing no discretion whatever in the officer; and that the subsequent proceedings were illegal, and that the votes received on the second and third days ought to be rejected.

It appears that fifty-three votes were given on those days for the sitting member, and four votes for the petitioner. Deducting these from the respective polls, and adjusting the same, it will result that nine hundred and fifty-five legal votes were given for the sitting member and nine hundred and fifty legal votes were given for the petitioner, giving to the sitting member a majority of five votes; therefore, that the sitting member is duly elected. Your committee, therefore, respectfully submit the following resolution:

Resolved, That the sitting member is entitled to his seat.

13th Congress.] No. 361. [2d Session.

OBSTRUCTIONS TO NAVIGATION IN THE TENNESSEE RIVER.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 4, 1814.

The State of Tennessee, in General Assembly, *November* 12, 1813.

Whereas, it is the opinion of those who have been in the habit of navigating the river Tennessee, that a small sum of money, compared with the importance of the object, would be sufficient to remove the obstructions to the safe navigation of said river in the Muscle Shoals; therefore,

Resolved, That the Senators from this State, in the Congress of the United States, be instructed, and our Representatives requested to use their best endeavors to procure the passage of a law making appropriations to carry the aforesaid object into full and complete effect. And,

Resolved, That the Governor of this State be requested to transmit a copy of the above preamble and resolution to each of the Senators and Representatives from this State, in the Congress of the United States.

THOMAS CLAIBORNE,
Speaker of the House of Representatives.

ROBERT C. FOSTER,
Speaker of the Senate.

Attest:

W. ALEXANDER,
Clerk of the House of Representatives.

JAMES ROGERS,
Clerk of the Senate.

13th Congress.] No. 362. [2d Session.

APPROVAL OF THE MEASURES OF THE FEDERAL GOVERNMENT BY PENNSYLVANIA.

COMMUNICATED TO CONGRESS, FEBRUARY 14, 1814.

To the Senate and House of Representatives of the United States: FEBRUARY 14, 1814.

At the request of the Legislature of Pennsylvania, conveyed through the Governor of that State, I transmit to Congress copies of its resolutions of the 18th ultimo.

JAMES MADISON.

Considering that some of the gallant defenders of our country, who have been captured in honorable combat with the enemy, have been seized as traitors, and thrown into prison, perhaps to languish out a painful existence of privation and disease, or to receive judgment and sentence from a tribunal, where power shall take the place of justice, and vengeance usurp the seat of reason:

We, the Senate and House of Representatives of the Commonwealth of Pennsylvania, do adopt the following resolutions:

Resolved, That we view with high approbation the decisive spirit and firmness, which the national authorities have manifested in securing hostages for the safety of those defenders of the republic, who are threatened with the penalties of treason against Great Britain; and, while we are deeply anxious that a sanguinary result may be averted, and that the calamities of the war may be unimbittered by unnecessary bloodshed or cruelty, we are, nevertheless, prepared, under all circumstances, to support our Government in every measure of just retaliation, to which it may be driven by the violence of the enemy.

Resolved, That the Governor be requested to communicate a copy of the foregoing resolution to the President, with a request that he lay it before Congress.

ROBERT SMITH,
Speaker of the House of Representatives.

P. C. LANE,
Speaker of the Senate.

In the House of Representatives, January 17, 1814. Read, and adopted.

GEORGE HECKERT,
Clerk of the House of Representatives.

In the Senate, January 18, 1814. Read, and adopted.

JOSEPH A. McJIMSEY,
Clerk of the Senate.

HARRISBURG, PENNSYLVANIA, *February* 8, 1814.

I certify the foregoing to be a true copy of the original resolutions now deposited in this office.
Witness my hand and seal.

N. B. BOILEAU,
Secretary.

13th Congress.] No. 363. [2d Session.

APPROVAL OF THE MEASURES OF THE FEDERAL GOVERNMENT BY KENTUCKY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 16, 1814.

The Legislature of Kentucky, considering the present as an interesting and important crisis, in the arduous contest in which we have embarked, for the preservation of the important and essential rights of national sovereignty and independence, against the injustice, usurpations, and long continued aggressions of an imperious and inveterate enemy of that sovereignty and independence, which every citizen of our free and happy Government should at all times be prepared to lay down his life, if necessary, to maintain, feel strongly impressed with the propriety, on this occasion, of representing, as they firmly believe they do, the almost unanimous sentiments of the citizens of the State which they represent, which are embodied and expressed in the following resolutions:

1. *Resolved, by the Senate and House of Representatives of the Commonwealth of Kentucky*, That we firmly adhere to the General Government, and retain our attachment to the federal constitution, which binds us together, and with the fate of which we combine that of our own existence.

2. *Resolved*, That we possess an unabated confidence in the present administration of our National Government, now vested in the hands of an Executive competent to steer the vessel of State between the vortex of domestic faction and the menacing rocks of foreign war.

3. *Resolved*, That the overtures of peace made to the British Government by ours, since the declaration of war, and the speedy acceptance of the proffered mediation of Russia, are irrefragable evidences (if any were wanting) of a sincere desire for a restoration of the blessings of peace on the part of our own, and of a persevering determination on the part of the British Government to continue what their injustice and usurpations first began, and furnish to our own Government the most irrefragable arguments for a vigorous, energetic, and zealous prosecution of the war.

4. *Resolved*, That the restriction on our commerce, lately enforced by an embargo, is wise, expedient, and politic, and repays privation and self-denial, by preventing the supplies of the enemy from our resources. We cordially approve the adoption, and doubt the patriotism that hesitates to submit to the national sacrifice.

5. *Resolved*, That, when a member of Congress shall not possess the virtue to resist party influence; when he shall not have the independence to vote the dictates of conscious rectitude, and the will of his constituents, so far as he has evidence of such will, he becomes unworthy of the dignified station of the representative of a free and enlightened people, and is qualified only to represent a corrupt Government, where office is the price of dishonor; where the smile of the arrogant lordling compensates for deserting the interests of the people.

6. *Resolved*, That the Governor of this State be, and he is hereby, requested to transmit a copy of the foregoing resolutions to the President of the United States, and each of our Senators and Representatives in Congress.

JOS. H. HAWKINS,
Speaker of the House of Representatives.
R. HICKMAN,
Speaker of the Senate.

Approved: February 1, 1814.

ISAAC SHELBY.

By the Governor:

M. D. HARDIN, *Secretary.*

I certify the foregoing to be truly copied from the original.

Attest: M. D. HARDIN, *Secretary.*

13th CONGRESS.] No. 364. [2d SESSION.

APPLICATION OF THE MORAVIAN SOCIETY OF UNITED BRETHREN FOR INDEMNITY FOR THE DESTRUCTION OF THE INDIAN VILLAGE ON THE RIVER THAMES, BY THE AMERICAN ARMY.

COMMUNICATED TO THE SENATE, FEBRUARY 18, 1814.

BETHLEHEM, *February* 10, 1814.

To the honorable the Senate and House of Representatives of the United States, the memorial and petition of the undersigned, acting in behalf of the directors of the missionary concerns of the society of the United Brethren, commonly called Moravians, respectfully showeth:

That the protestant episcopal church of the Unitas Fratrum, or United Brethren, commonly known by the name of Moravians, derive their origin from the ancient episcopal church of the Unitas Fratrum, or United Brethren in Bohemia and Moravia, who, for three centuries and a half past, formed a society under that denomination. Having, during many years, been cruelly persecuted on account of their religious tenets, and their opposition to the prevailing errors in the church by the Roman Catholics, and being on the brink of extirpation, some of their descendants, in the beginning of the last century, emigrated from Moravia to Upper Lusatia, where, having been joined by people of different religious persuasions, they built Herrnhuth, the principal seat of the present society of the United Brethren. It may, perhaps, not be improper here to observe that our society, after the most rigorous scrutiny into their origin, doctrine, and discipline, has been recognised as an ancient protestant episcopal church by an act of the British Parliament in the year 1749.

The object of our society, as well as that of the old Bohemian and Moravian brethren, has, at all times, been, and still is, strictly to adhere to the doctrine of our dear Lord Jesus Christ and of his apostles, as laid down in the sacred records of our holy religion, and, not only by profession, but also by practice, to approve themselves the humble but faithful followers of our Divine Master, and it is not so much in the theoretical, as in the practical principles, that we differ from other protestant churches. This is evident from the single fact, that our society has embraced the confession delivered in 1530, by the friends of Luther to the diet at Augsburgh, as their own confession of faith, and may be further proved by our constant declaration, that we consider all those who adopt the pure fountain of the oracles of the New Testament for the only source of their faith in this life, and of their hopes hereafter, as our brethren in Christ. We are distinguished from the Lutherans and other religious denominations by our church discipline, transmitted to us by the ancient church of the Unitas Fratrum in Bohemia and Moravia, and by our regular and uninterrupted episcopal succession from the remotest times of christianity, as from a publication, entitled "Acta Fratrum Unitatis, in Anglia, 1749," which I beg leave, herewith, to present to Congress for their library, relation being thereunto had, more fully and at large will appear. An exposition of our doctrine, as taught in our church, has been laid before the public, in a work entitled "Idea fidei Fratrum," of which the undersigned had the honor to present a copy to your honorable body some years ago; and an account of our constitution and church discipline has been published in the German language, entitled "Ratio Disciplinæ Unitatis Fratrum," of which a translation into the English language not yet having been made, a copy of the original work is herewith presented.

From a very small beginning our society has spread through the four quarters of the globe, in about twenty settlements in different European countries; one in Asia near Astracan, and nine in this country, where we live unintermixed with persons of other religious persuasions. Besides, we have settled societies in many places, as well in Europe as in this country, where the members of our church continue to live in company with their fellow-citizens of other denominations. In obedience to the express command of our Lord to his disciples to preach the gospel to every creature, we have, from the earliest times of the re-establishment of the Unitas Fratrum, exerted ourselves in behalf of those heathen nations who had never been favored with the glad tidings of our salvation, by the all-atoning death of our blessed Redeemer. It is now nearly eighty-two years when our society first began their missionary labors among the negroes in the West India islands, which have since been extended to Green-

land, Terra Labrador, the continent of South America, and Africa. The word of the cross has proved, as it will in all instances, where it is preached in its purity, to be the power of God unto salvation to every one that believeth, and our humble efforts have been crowned by a success far beyond our most sanguine expectations. We have lived to see many thousands of the most wretched and wicked heathens turn from death to life, and from the power of satan to God, and receive forgiveness of sins and inheritance among them which are sanctified by faith that is in Christ. We have actually fourteen missionary settlements in the West Indies, where upwards of twenty thousand Christian negroes live under the superintendence of our missionaries, three among the Greenlanders, three among the Esquimaux, three among the negroes in Surinam, and two among the Hottentots.

The aborigines of this country have likewise been an early object of our society. Our first endeavors were directed to the Creeks near Savannah, in Georgia, but our missionaries having repeatedly been called upon to join the British in the prosecution of the war, which at that time was carried on by them against the Spaniards, they left that country for Pennsylvania. In the progress of time the society applied their care with more success to the Mohicans, in the then provinces of Connecticut and New York, and made several attempts to introduce the Christian doctrine to the Six Nations, who, though not disposed to receive the gospel themselves, were, nevertheless, instrumental to the promotion of christianity by granting leave to our missionaries to reside among the Indian tribes then under their protection. In later times the society has principally labored among the Delawares, in the States of Pennsylvania and Ohio, who were joined by some Mohicans, and turned their attention likewise to the Shawanese, Chippeways, and other Indian nations.

In the prosecution of this very extensive undertaking, our society has often been put to very severe trials, and has had to struggle with many difficulties. This has been more particularly the case with respect to their endeavors to be useful to the aborigines of this country. By the cession of great districts of the Indian lands to the white people, our Christian Indians were continually under the necessity to change their places of residence, to leave their much improved settlements, and to begin anew in the wilderness. By the wars, as well previous to as during the time of the revolution, they not only suffered the loss of their property, and had their lives frequently put in jeopardy, but a number of them and of their missionaries actually fell victims to their faithful adherence to a peaceable deportment.

After the destruction of the three flourishing settlements of our Indian converts on Muskingum river, they were at last compelled, by dire necessity, to take refuge in Canada, where a number of them have since remained, and formed a settlement on the river Retrench, or Thames, which, at the time of the late declaration of war against Great Britain, consisted of about one hundred and fifty inhabitants, and of near fifty houses, inclusive of the church. A grant of upwards of fifty thousand acres of land had been made to our Indians by the English Government, and they had successively cleared more than two hundred acres of it, which yielded to them a yearly crop of about two thousand bushels of corn on an average. They had begun to substitute the plough for the hoe, and had actually seven ploughs in operation: their women had been taught, by the wives of our missionaries, to spin flax, and had made such proficiency in spinning, that they had it in contemplation to send their yarn to the loom to be manufactured into linen. But all their fair prospects have at once been blasted by the total destruction of their settlement by the army of the United States, under the command of General Harrison. How far such a measure is justifiable by the rules of war adopted among civilized nations, and more especially consistent with that justice and humanity which it has always been the noble pride of the United States to exercise even in their wars, it is not for the undersigned to decide; but he feels himself compelled by every sense of duty to make to your honorable body a just representation of the distressing situation of these poor fugitive Indians, who, at the approach of winter, were deprived of shelter and sustenance, and to claim for them such indemnification as Congress in their wisdom will, on a proper examination of the case, find them to be entitled to.

And your petitioner will ever pray, &c.

JOHN G. CUNOW.

13th CONGRESS.] **No. 365.** [2d SESSION.

AMENDMENT PROPOSED TO THE ACT CONTINUING CERTAIN PATENT RIGHTS TO OLIVER EVANS.

COMMUNICATED TO THE SENATE, FEBRUARY 25, 1814.

Mr. SMITH, from the committee to whom was referred the memorial of Isaac McPherson and others, on the subject of the patent granted to Oliver Evans under the act of the 21st January, 1808, entitled "An act for the relief of Oliver Evans," reported:

That in the year 1787, Oliver Evans obtained from the States of Pennsylvania, Delaware, and Maryland, laws vesting him with the exclusive right to use, in those States, the elevator and hopperboy, being inventions or improvements claimed to have been made by him in the process of the art of manufacturing flour. That, in the year 1790, he obtained a patent under the laws of the United States for the elevator and hopperboy, and also for the screw or conductor, an additional improvement in the art, claimed also as his invention and improvement; that, for fourteen years (the term of his first patent) he continued to receive, from nearly all the persons employed in the art of manufacturing flour, from thirty to forty dollars (being the prices which he then deemed sufficient) for the use of the machinery for each water wheel.

That, about three years after the expiration of his patent, to wit: in the year 1807, a suit, pending in the court of Pennsylvania, was decided against him, "on the ground that his patent was deficient in form, and, therefore, invalid." It is, however, believed by your committee, that its invalidity was unknown until after the trial; and that nearly all engaged in the manufacturing of flour, during the term of his patent, had paid. A plea, however, was made by the said Oliver Evans, to wit: that little benefit had arisen to him from his patent, because of the deficiency in form thereof; and Congress, in consequence, passed a law, dated 21st January, 1808, "for the relief of Oliver Evans;" thereby granting to the said Evans, his "heirs, &c. for a term not exceeding fourteen years, the full and exclusive right and liberty of making, constructing, using, and vending to be used, his invention, discovery, and

improvement in the art of making flour and meal, and in the several machines which he has invented, improved, and applied to that purpose."

That, under that act, a patent issued to the said Evans, dated 22d January, 1808, for the term of fourteen years. By the authority derived therefrom, he claims that there is secured to him, not only the extensive privilege of using the machine specified therein, but a power to "prohibit the use of any other invention that shall accomplish the same effect, although the principles be ever so different." In proof whereof, the said Evans has actually instituted a suit against Jeremiah Bayley, to recover damages for using his own invention, (for which he has received a patent,) which, by the application of wind, conveys wheat or flour from one part of a mill to another.

Since the passage of the said act, he, the said Evans, has demanded and received for the use of his machinery unusual, and, in the opinion of your committee, extravagant prices, to wit: for a pair of stones of four and a half feet diameter, for which, under his first patent, he charged thirty dollars, he now demands three hundred dollars; for those of six feet, for which he formerly received forty dollars, he now charges five hundred and twenty dollars; and for a pair of seven feet stones, his demand is seven hundred and thirty-five dollars. For a mill (now building) to run five pair of stones of seven feet diameter, his demand is three thousand six hundred and seventy-five dollars, for which, under his former patent, he would only have demanded two hundred dollars.

The memorialists have produced proofs to show that the said Evans is not the original inventor of any of the machinery specified in his patent, to wit: that the principles of the elevator have been known for ages, and particularly in latter years through their use, in the well known operation of the chain pump. That the hopperboy was invented by Christian Stouffer, and used in the mills of his father, brother, and others, prior to the year 1775. That the screw or conductor was invented and used by Jonathan Ellicot, prior to the date of the first patent obtained by the said Evans in 1790. It is admitted by the said Evans that he is not the *original inventor* of any of the *principles* of the machines specified in his patent, but that he is the inventor of improvements therein, and that he has combined and applied the whole to operate their present useful effects; that is to say, that he invented the leather strap, and improved and applied the principles of the chain pump to the purposes now in use for his elevator; that he has improved the hopper machine, now called the hopperboy; and that he has made some useful improvements in the conductor, and has applied it to the purposes specified in his patent. The memorialists have submitted proof to show that the elevator, by a strap, had been in use in the year 1786, in the mill of Marshal and Stroud, near the residence of the said Evans, which had been seen by him, and that, in consequence, they, Marshal and Stroud, had been exempted from payment for the use of the elevator and hopperboy, under the acts of Pennsylvania, Delaware, and Maryland.

The committee are of opinion, that the act for the relief of Oliver Evans was an act of benevolence which Congress were under no obligation to grant, his patent having expired nearly three years; that it could not have been expected that an act of such high favor would have been used for the purpose of extortion and oppression. It must have been believed that the patentee, grateful for the extraordinary favor conferred on him, would have used the right reinstated in him with moderation and temper. It is, however, with regret that the committee are compelled to state that he has abused the power vested in him by an act intended for his relief, to the oppression of individuals, by the exaction of exorbitant sums of money for the use of the machines specified in his patent, and by his attempt to prevent the use of the inventions of others, which, although entirely different in principles, are capable of operating the same effect.

To prevent the said Evans from abusing (in future) the power vested in him, the committee submit a bill to amend the act, entitled "An act for the relief of Oliver Evans."

13th Congress.] No. 366. [2d Session.

DECLARATION OF PENNSYLVANIA TO SUPPORT THE LAWS OF THE FEDERAL GOVERNMENT.

COMMUNICATED TO CONGRESS, MARCH 23, 1814.

To the Senate and House of Representatives of the United States: MARCH 22, 1814.

At the request of the Legislature of Pennsylvania, conveyed through the Governor of that State, I transmit to Congress copies of its resolutions of the 10th instant.

JAMES MADISON.

The people of the United States, in order to form a more perfect union, establish justice, insure domestic tranquillity, provide for the common defence, to promote the general welfare and secure the blessings of liberty to themselves and to their posterity, did ordain and solemnly adopt a constitution for the United States.

"This Government, the offspring of our choice, (says Washington,) uninfluenced and unawed, adopted on full investigation and mature deliberation, completely free in its principles in the distribution of its powers, uniting security with energy, has a just claim to our confidence and support. Respect for its authority, compliance with its laws, acquiescence in its measures, are duties enjoined by the fundamental maxims of true liberty. All obstructions to the execution of the laws, all combinations and associations under whatever plausible character, with the real design to direct, control, counteract, or awe the regular deliberation and action of the constituted authorities, are destructive of this fundamental principle and of fatal tendency. And the first dawning of every attempt to alienate any portion of our country from the rest, or to enfeeble the sacred ties which now link together the various parts, merits the frown of indignity."

This constitution, the palladium of our political prosperity and safety, declares that the Congress shall have power to provide for calling forth the militia to execute the laws of the Union, suppress insurrections and repel invasions; to provide for organizing, arming, and disciplining the militia; and for governing such part of them as

may be employed in the service of the United States. The constitution also declares that "this constitution and the laws of the United States, which shall be made in pursuance thereof, shall be the supreme law of the land." It also further declares, that it is treason against the United States to levy war against them, to adhere to their enemies, or to give them aid or comfort. In pursuance of the powers thus vested in the Congress of the United States, they did pass laws providing for the calling the militia into the service of the United States, and for their government while in that service, enacting that, while employed in such service, they should be subject to the same rules and articles of war as the troops of the United States, and also imposing a penalty on those who should encourage or promote desertion among the troops in said service.

In the face of those constitutional provisions and laws enacted by Congress in pursuance thereof, the Legislature of Pennsylvania behold, with astonishment and high disapprobation, the Executive of a sister State, issuing his proclamation, ordering a detachment of the militia of that State, then in the service of the United States, to desert that service, and return to their respective homes. With no less astonishment and disapprobation do they behold a resolution laid on the table of the Legislature of another State, evidently intended to intimidate, or to prevent the Congress of the United States from directing the President to institute a legal inquiry, whether or not the constitution and laws of the United States have been violated by the aforesaid proclamation, accompanied by a threat that if such inquiry is instituted, they will aid in resisting it—a procedure calculated to add to the calamities of the war, in which the United States have been compelled to engage, in defence of their liberty and independence, the horrors of a civil war. Deprecating such an event, and feeling it as a duty which we owe to ourselves, our Government, and our country, to express our high disapprobation and abhorrence of all measures calculated to produce such disastrous consequences, and our determination to support the General Government in all constitutional and lawful measures in bringing to justice all those who violate the constitution and the laws of the United States, and who, either directly or indirectly adhere to, or afford aid or comfort, to our common enemy; therefore,

Resolved, By the Senate and House of Representatives of this Commonwealth, that they view with the utmost concern and disapprobation, every attempt to screen from just punishment any individual or individuals, however elevated by station, who may violate the constitution or laws of the United States, or who may directly or indirectly adhere to, or afford aid or comfort to the enemies of our beloved country.

Resolved, That we will, to the utmost of our power as a Legislature, or as individual members of society, support the General Government in all lawful and constitutional measures to bring to justice infractors of the laws and constitution of the United States, and all abettors and aiders of the enemies thereof.

Resolved, That the Governor be requested to transmit a copy of the foregoing preamble and resolutions to the President of the United States, with a request that he will lay the same before Congress.

JOHN ST. CLAIR,
Speaker of the House of Representatives.
P. C. LANE,
Speaker of the Senate.

In the House of Representatives, March 7, 1814, read and adopted.

GEORGE HECKERT,
Clerk of House of Representatives.

In Senate, March 10, 1814, read and adopted.

J. A. McJIMSEY, *Clerk of the Senate.*

PENNSYLVANIA, HARRISBURG, SECRETARY'S OFFICE, *March* 16, 1814.

I certify the above and foregoing to be a true copy of the original deposited among the rules in this office. Witness my hand and seal.

N. B. BOILEAU, *Secretary.*

13th CONGRESS.] No. 367. [2d SESSION.

ESCHEATS IN THE MISSISSIPPI TERRITORY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 26, 1814.

Mr. INGERSOLL, from the Committee on the Judiciary, to whom was referred a resolution for inquiring into the expediency of affording the sanction of Congress, by a legislative act, to a certain act of the Mississippi Territory, entitled "An act concerning escheats," bearing date the 13th of December, 1811, reported:

That the resolution contemplates authority to endow Jefferson college, in the Mississippi Territory, through the medium of escheated estates, to which plan the committee consider that there are strong objections in principle as well as in detail:

Wherefore, They beg leave to report that it would be inexpedient to enact any law for such purpose.

13th Congress.] No. 368. [2d Session.

COPY OF CERTAIN COMMISSIONS GRANTED IN THE RECESS OF THE SENATE.

COMMUNICATED TO THE SENATE, MARCH 29, 1814.

To the Senate of the United States: MARCH 28, 1814.

I transmit to the Senate a report of the Secretary of State, complying with their resolution of the 26th instant.

JAMES MADISON.

SIR: DEPARTMENT OF STATE, *March* 28, 1814.

In compliance with the resolution of the Senate, of the 26th instant, I have the honor to transmit, herewith, copies of the commissions heretofore granted by the President of the United States, in the recess of the Senate, to William Paca, as judge of the Maryland district; to William Nelson, as attorney of the Virginia district; to John Rutledge, as Chief Justice of the United States, and to Albert Gallatin, John Quincy Adams, and James A. Bayard, as envoys extraordinary and ministers plenipotentiary, to negotiate a treaty of peace with Great Britain.

I have the honor to be, with great respect and consideration, sir, your obedient servant,

JAS. MONROE.

The PRESIDENT OF THE UNITED STATES.

GEORGE WASHINGTON, *President of the United States of America, to all who shall see these presents, greeting:*

Whereas, the office of judge of the district court in and for Maryland district is at present vacant, know ye, that, reposing special trust and confidence in the wisdom, uprightness, and learning of William Paca, of Maryland, I do appoint him judge of the said district court, and do authorize and empower him to execute and fulfil the duties of that office, according to the constitution and laws of the said United States, and to have and to hold the said office with all the powers, privileges, and emoluments to the same, of right appertaining unto him, the said William Paca, during his good behavior, and until the end of the next session of the Senate of the United States, and no longer.

In testimony whereof, I have caused these letters to be made patent and the seal of the United States to be hereunto affixed. Given under my hand the twenty-second day of December, in the year of our [L. S.] Lord one thousand seven hundred and eighty-nine.

GEO. WASHINGTON.

GEORGE WASHINGTON, *President of the United States of America, to all who shall see these presents, greeting:*

Whereas, the office of Attorney of the United States in and for Virginia district is at present vacant, know ye, that, reposing special trust and confidence in the integrity, ability, and learning of William Nelson, of Virginia, I do appoint him Attorney of the said United States in and for the said Virginia district, and do authorize and empower him to execute and fulfil the duties of that office according to law, and to have and to hold the same together with all the powers, privileges, and emoluments thereto of right appertaining, unto him the said William Nelson, during the pleasure of the President of the United States for the time being, and until the end of the next session of the Senate of the United States, and no longer.

In testimony whereof, I have caused these letters to be made patent and the seal of the United States to be hereunto affixed. Given under my hand, at the city of New York, the twenty-eighth day of No- [L. S.] vember, in the year of our Lord one thousand seven hundred and eighty-nine.

GEO. WASHINGTON.

GEORGE WASHINGTON, *President of the United States of America, to all who shall see these presents, greeting:*

Whereas, the office of Chief Justice of the Supreme Court of the United States is at present vacant, know ye, that, reposing special trust and confidence in the wisdom, uprightness, and learning of John Rutledge, of South Carolina, I do appoint him Chief Justice of the Supreme Court of the United States, and do authorize and empower him to execute and fulfil the duties of that office according to the constitution and laws of the said United States, and to have and to hold the said office with all the powers, privileges, and emoluments to the same, of right appertaining unto him, the said John Rutledge, during his good behavior, and until the end of the next session of the Senate of the United States, and no longer.

In testimony whereof, I have caused these letters to be made patent and the seal of the United States to be hereunto affixed. Given under my hand the first day of July, in the year of our Lord one thousand [L. S.] seven hundred and ninety-five, and of the independence of the United States of America the nineteenth.

GEO. WASHINGTON.

By the President:

EDMUND RANDOLPH.

JAMES MADISON, *President of the United States of America, to all whom these presents shall concern, greeting:*

Know ye, that, for the purpose of confirming between the United States and His Britannic Majesty perfect harmony and a good correspondence, and of removing all grounds of dissatisfaction, and reposing special trust and confidence in the integrity, prudence, and abilities of Albert Gallatin, Secretary of the Treasury of the United States, John Quincy Adams, Minister Plenipotentiary of the United States at the Court of His Majesty the Emperor of all the Russias, and James A. Bayard, a Senator of the United States, I have appointed them jointly and severally Envoys Extraordinary and Ministers Plenipotentiary of the United States, with full and all manner of power and authority for and in the name of the United States, to meet at St. Petersburg, in Russia, and confer with a Minister or Ministers of His said Britannic Majesty, being furnished with the like power and authority, and with him or them to agree, treat, consult, and negotiate of and concerning the general commerce between the

United States and Great Britain, and its dominions or dependencies, and of all matters and subjects connected therewith which may be interesting to the two nations, and to conclude and sign a treaty or treaties, convention or conventions, touching the premises; transmitting the same to the President of the United States for his ratification, by and with the advice and consent of the Senate of the United States.

In testimony whereof, I have caused the seal of the United States to be hereunto affixed. Given under my [L. S.] hand at the city of Washington, on the seventeenth day of April, A. D. one thousand eight hundred and thirteen, and in the independence of the United States the thirty-seventh.

JAMES MADISON.

By the President:

JAMES MONROE, *Secretary of State.*

JAMES MADISON, *President of the United States of America, to all whom these presents shall concern, greeting:*

Know ye, that, for the purpose of confirming and improving the amicable and beneficial relations between the United States and His Imperial Majesty the Emperor of all the Russias, and reposing special trust and confidence in the integrity, prudence, and ability of John Quincy Adams, Minister Plenipotentiary at the Court of His said Imperial Majesty, of Albert Gallatin, Secretary of the Treasury of the United States, and of James A. Bayard, a Senator of the United States, I have appointed them jointly and severally Envoys Extraordinary and Ministers Plenipotentiary of the United States of America to the Court of His said Imperial Majesty, with full and all manner of power and authority, for and in the name of the United States, to meet and confer with a Minister or Ministers of His said Imperial Majesty, being furnished with the like power and authority, and with him or them to agree, treat, consult, and negotiate of and concerning the general commerce between the United States and Russia, and of all matters and subjects connected therewith which may be interesting to the two nations; and to conclude and sign a treaty or treaties, convention or conventions touching the premises; transmitting the same to the President of the United States for his ratification, by and with the advice and consent of the Senate of the United States.

In testimony whereof, I have caused the seal of the United States to be hereunto affixed. Given under my [L. S.] hand at the city of Washington, on the twenty-second day of April, in the year of our Lord one thousand eight hundred and thirteen, and of the independence of the United States the thirty-seventh.

JAMES MADISON.

By the President:

JAMES MONROE, *Secretary of State.*

JAMES MADISON, *President of the United States of America, to all whom these presents shall concern, greeting:*

Whereas, His Imperial Majesty the Emperor of all the Russias, as the common friend of the United States and Great Britain, has offered them his mediation, with a view to the restoration of peace and the establishment of permanent harmony between them; and the invitation having been accepted, on the part of the United States, in contemplation of a like acceptance on the part of Great Britain: *Now, be it known*, that, reposing special trust and confidence in the integrity, prudence, and abilities of Albert Gallatin, Secretary of the Treasury of the United States, John Quincy Adams, their Minister Plenipotentiary at the court of His Imperial Majesty, and James A. Bayard, a Senator of the United States, I have appointed them jointly and severally Envoys Extraordinary and Ministers Plenipotentiary of the United States, to repair to St. Petersburg, in Russia, with authority to meet, under the said mediation, a Minister or Ministers, having like authority from the Government of Great Britain; and with him or them to negotiate and conclude a settlement of the subsisting differences, and a lasting peace and friendship between the United States and that Power; transmitting the treaty or convention so to be concluded for the ratification of the President of the United States, by and with the advice and consent of the Senate of the United States.

In testimony whereof, I have caused the seal of the United States to be hereunto affixed. Given under my [L. S.] hand at the city of Washington, the seventeenth day of April, A. D. one thousand eight hundred and thirteen, and of the independence of the United States the thirty-seventh.

JAMES MADISON.

By the President:

JAMES MONROE, *Secretary of State.*

13th CONGRESS.] **No. 369.** [2d SESSION.

APPLICATION OF AN ALIEN FOR CITIZENSHIP AND A PATENT RIGHT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 29, 1814.

Mr. MOORE made the following report:

The committee to which was referred the memorial of Thomas Owen, having duly considered the same, beg leave to report:

That the petitioner states, that he is a manufacturer and mechanic by profession, and a native of Ireland; that he emigrated from that country, and arrived in the State of Maryland, in the year 1804, with a view of becoming a citizen of the United States; that he has ever since resided in that State, and married a woman, a native thereof, by whom he has several children; that, since his arrival in this country, he has devoted much of his time to the erection of several valuable manufactories (in which he is concerned in interest) in Baltimore county, in the State aforesaid; that he has made discoveries in manufacturing hemp and flax, which promise to be advantageous to the

nation; that, in consequence of incorrect information relative to the naturalization laws, he was under the impression that they required a residence of eight years in the United States previous to a foreigner being permitted to take any steps towards being naturalized; that, confiding in the information thus received, he never made a declaration of his intention to become a citizen of the United States, as required by law, and in consequence thereof, although he had resided in the State of Maryland nearly eight years previous to the late declaration of war against Great Britain, he is precluded from the benefit of the act of Congress of the 30th July, 1813. Under this statement of his case, (which the committee believe to be correct,) the petitioner wishes a law to be passed to naturalize him. By virtue of the provisions of the act of Congress, of the 6th July, 1798, the petitioner "is liable to be apprehended, restrained, secured, and removed, as an alien enemy;" and although Mr. Owen appears to be a man of fair and unsuspected character; yet the committee think it would be impolitic and inexpedient to exempt him from the provisions of the act of the 6th July, 1798, by passing a law for his naturalization. The committee also think there should be very strong circumstances to induce the Legislature, in any case, to pass a special act of naturalization, when there are general laws on the subject. They, therefore, are clearly of opinion that the prayer of the petitioner, so far as it asks for a special act of naturalization, ought not to be granted.

The petitioner, however, wishes, in case Congress should think it inexpedient to pass an act for his naturalization, that a law may be enacted to authorize a patent to issue to him for the discoveries he has made in the manufacturing of hemp and flax. On this point the committee should not hesitate to report favorably, if they were of opinion that there was no provision for the case by existing laws. The act of Congress of the 21st February, 1793, entitled "An act to promote the progress of useful arts, and to repeal the act heretofore made for that purpose," confines, it is true, the benefits of patents to citizens of the United States, and by this law the case of Mr. Owen is not provided for. But by the act of the 17th April, 1800, entitled "An act to extend the privilege of obtaining patents for useful discoveries and inventions to certain persons therein mentioned, and to enlarge and define the penalties for violating the rights of patentees," it is enacted, "that all and singular the rights and privileges given, intended, or provided to citizens of the United States, respecting patents for new inventions, discoveries, and improvements, by the act entitled 'An act to promote the progress of useful arts,' &c. shall be, and hereby are, extended and given to all aliens who, at the time of petitioning, in the manner prescribed by the said act, shall have resided for two years within the United States, which privileges shall be obtained and enjoyed by such persons in as full and ample manner, and under the same conditions, limitations, and restrictions as by the said act are provided and directed in the case of citizens of the United States." Under the last mentioned act of Congress, the committee are of opinion that the case of Mr. Owen is provided for, and that he can obtain a patent. They think it altogether unnecessary to pass a special law for this case. They, therefore, submit the following resolution:

Resolved, That the petitioner have leave to withdraw his petition.

13th Congress.] **No. 370.** [2d Session.

LIST OF MINISTERS AND CONSULS APPOINTED IN THE RECESS OF THE SENATE.

COMMUNICATED TO THE SENATE, APRIL 9, 1814.

To the Senate of the United States: April 9, 1814.

I transmit to the Senate a report of the Secretary of State complying with their resolution of the 2d instant.

JAMES MADISON.

Sir: Department of State, *April* 8, 1814.

In compliance with the resolution of the Senate, of the 2d instant, I have the honor to transmit lists of the ministers and consuls of the United States who have been appointed, since the adoption of the constitution, by the respective Presidents of the United States, in the recess of the Senate; distinguishing the cases in which the respective appointments had not been before filled from those which had been previously filled; and specifying, by the dates of the letters of recall, when the latter became vacant, in the case of ministers.

Although, strictly construed, the resolution did not appear to carry the research back to a period anterior to the commencement of the present Government, yet the journals of the old Congress have been carefully examined, and notice taken of appointments made under the confederation, of ministers and consuls to Governments and places, to which appointments were afterwards made under the present Government.

To these lists are added copies of the commissions granted to Albert Gallatin, John Q. Adams, and James A. Bayard, to negotiate and sign a treaty of commerce with Great Britain, and a treaty of commerce with Russia.

With great respect, I have the honor to be, sir, your obedient servant,

JAMES MONROE.

The President of the United States.

List of appointments of ministers and their secretaries, since the adoption of the constitution, made by the several Presidents of the United States, in the recess of the Senate.

Ministers plenipotentiary.	When appointed.	To what court accredited.	Original office.	Office previously filled and by whom.	Date of letters of recall of the immediate predecessors of ministers appointed in recess of the Senate.	Remarks.
John Paul Jones,	June, 1792,	Algiers. To negotiate a treaty of peace with that Power.	Not before filled.			
David Humphreys,	March 21, 1793,	Algiers. To negotiate a treaty of peace with that Power,		John Paul Jones.		
Wm. Short,	July 11, 1794,	Spain,		Wm. Carmichael,	June 5, 1794.	
Chas. C. Pinckney,	Sept. 9, 1796,	France,		Colonel Monroe,	September 9, 1796.	
John Q. Adams,	June 1, 1797,	Sweden. To negotiate a renewal of the treaty,				Mr. Franklin was appointed to negotiate a treaty with Sweden September 28, 1782.
Rufus King,	Jan. 3, 1798,	London. To negotiate an additional article to the treaty of 1794, in relation to the northern boundary of the U. States.				Mr. King was the resident minister of the United States at the time of this appointment.
William R. Davie,	June 1, 1799,	France. Jointly with Oliver Ellsworth and William Vans Murray.	To this office Pat. Henry was first appointed, with the advice of the Senate, and, he declining, Mr. Davie was appointed his successor in the recess.			
Rufus King,	Dec. 31, 1799,	London. To negotiate an explanatory article in relation to the sixth article of the treaty of 1794.				
Thomas Sumter, secretary of legation,	May 12, 1801,	France,				These were the first secretaries appointed to those places, since the adoption of the constitution, but similar appointments had been made by the old Government.
John Graham, secretary of legation,	Aug. 31, 1801,	Spain,				
Chas. Pinckney, minis.	June 6, 1801,	Spain,		Col. Humphreys,	June 6, 1801.	
Rufus King,	June 10, 1802,	London. To negotiate additional article or articles in relation to the boundaries between the United States and certain parts of the territories of His Britannic Majesty, lying eastward, northward, and northwestward of the U. States.				
James Monroe,	April 18, 1803,	London,		Rufus King,	November 3, 1802.	
John Armstrong,	June 30, 1804,	France,		R. R. Livingston,	April 18, 1803.	
James Monroe,	Oct. 14, 1804,	Spain. To treat of and concerning the boundaries of Louisiana, the cession of adjoining territories, &c.				William Carmichael and William Short were appointed, by special mission, commissioners plenipotentiary to treat and negotiate with His Catholic Majesty, of and concerning the navigation of the Mississippi, and the general commerce between the United States and Spain in the year 1792.
James Monroe, and Wm. Pinkney,	May 12, 1806,	London. On a mission extraordinary.				
Wm. Pinkney,	May 12, 1806,	London,		Colonel Monroe,	May 12, 1806.	
Wm. H. Crawford,	April 9, 1813,	France,		Joel Barlow, dec.		
Albert Gallatin, John Q. Adams, and James A. Bayard,	April 17, 1813,	St. Petersburg. To treat with Great Britain concerning peace and commerce.				
John Q. Adams, Albert Gallatin, and James A. Bayard,	April 22, 1813,	St. Petersburg. To negotiate of and concerning the general commerce between the United States and Russia.				
Levitt Harris, sec. leg.	April 22, 1813,	St. Petersburg.				
Wm. Short, minister,	Oct. 1, 1808,	St. Petersburg,				Francis Dana was appointed minister plenipotentiary to St. Petersburg in the year 1780.

List of appointments of consuls, since the adoption of the constitution, made by the several Presidents of the United States, in the recess of the Senate.

Nathaniel W. Strong, -	Mar. 16, 1813,	St. Bartholom.	-	William Israel.	
Mordecai M. Noah, -	Mar. 20, 1813,	Tunis, -	-	William Eaton.	

13th Congress.] No. 371. [3d Session.

BOOKS AND PAPERS OF THE HOUSE OF REPRESENTATIVES AND THE LIBRARY OF CONGRESS, LOST BY THE CONFLAGRATION OF THE CAPITOL IN 1814.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, SEPTEMBER 22, 1814.

SIR: CLERK'S OFFICE, HOUSE OF REPRESENTATIVES, *September* 20, 1814.

Being compelled to leave home the latter part of July, for the Springs, on account of indisposition; after leaving the clerks in charge of the office, with instructions as to their official duties, and a person in charge of the library of Congress, for the purpose of opening and airing the books, pursuant to the regulations thereof; dur ng my absence, the invasion of this city was effected by the enemy, and the destruction of public property by them, in those Departments immediately under my superintendence, ensued; and, for a more particular detail of the circumstances attending that disastrous event, I must, through you, refer a statement of facts (submitted in a letter to me from the clerks, who were left in the office after the militia marched from the district) to the House, with a request that a committee may be raised for the purpose of investigating the subject matter thereof, and report to the House accordingly; and, also, that the Committee of Accounts may be instructed to ascertain, as near as can be, the amount of money paid on account of the contingent expenses of the House, since the first day of January last, by the clerk, that he may have credit for the same at the Treasury, as the public vouchers for the expenditure of the public money since that period have all been destroyed in the conflagration of the Capitol. Without the aid of such an ascertainment, by a committee of the House, justice cannot be done to the undersigned or the public.

I am, sir, with respect, yours, &c.

PATRICK MAGRUDER.

The SPEAKER *of the House of Representatives.*

SIR: CITY OF WASHINGTON, *September* 15, 1814.

In order to correct any erroneous statements or representations which may go, or have gone out to the public, in relation to the destruction of your office, we deem it our duty to make the following statement of facts:

At the time you left the city, (which was in the latter part of the month of July,) for the springs in Virginia and Pennsylvania, for the recovery of your health, all was quiet, and we believe no fears were entertained for the safety of the seat of Government. Indeed, nothing was heard of the enemy, except his marauding parties in the Chesapeake, and what was seen in the newspapers, of troops being ordered from Europe to America.

About the middle of August it was stated that the enemy was in the bay, in great force, and, on the 19th of that month, the whole body of the militia of the District of Columbia was called out, under which call every clerk of the office was taken into the field, except Mr. Frost, and marched to meet the enemy.

On the 21st, the first of the undersigned clerks was furloughed, by Brigadier General Smith, at the request of Colonel George Magruder, for the purpose of returning to the city, to take care of, and save such part of the books and papers of the clerk's office, as he might be able to effect, in case the enemy should get possession of the place; he arrived here in the night of that day.

His orders from Colonel George Magruder were, not to begin packing up until it was ascertained that the clerks at the War Office were engaged in that business; and it was not until 12 o'clock, on Monday, the 22d, that we were informed that they had begun to move the effects of that office, although we were subsequently told that it had commenced the day before.

We immediately went to packing up, and Mr. Burch went out in search of wagons or other carriages, for the transportation of the books and papers; every wagon, and almost every cart, belonging to the city, had been previously impressed into the service of the United States, for the transportation of the baggage of the army; the few he was able to find were loaded with the private effects of individuals, who were moving without the city; those he attempted to hire, but, not succeeding, he claimed a right to impress them; but, having no legal authority, or military force to aid him, he, of course, did not succeed. He then sent off three messengers into the country, one of whom obtained from Mr. John Wilson, whose residence is six miles from the city, the use of a cart and four oxen; it did not arrive at the office, until after dark on Monday night, when it was immediately laden with the most valuable records and papers, which were taken, on the same night, nine miles, to a safe and secret place in the country. We continued to remove as many of the most valuable books and papers, having removed the manuscript records, as we were able to do with our one cart, until the morning of the day of the battle of Bladensburg, after which we were unable to take away any thing further.

Every thing belonging to the office, together with the library of Congress, we venture to say, might have been removed in time, if carriages could have been procured; but it was altogether impossible to procure them, either for hire, or by force.

The most material papers which have been lost are, the last volumes of the manuscript records of the Committees of Ways and Means, Claims and Pensions, and Revolutionary Claims; the clerks were engaged in bringing up these records previous to the alarm, and as it was not certain that the enemy would get to the city, and being desirous to have them completed, they were not packed away with the rest, but were kept out, that they might be finished by the meeting of Congress; but with the intention of taking them to a private residence, if such removal should be found nece[illegible]y. After the defeat of our troops at Bladensburg, Mr. Frost removed them to the house commonly called Ge[illegible]eral Washington's, which house being unexpectedly consumed by fire, these records were thus unfortunately lost.

The secret journal of Congress was also consumed; it was kept in a private drawer in the office, and in the hurry of removal was forgotten. Its contents, however, have been, in most cases, published by order of the House.

The manuscript papers, which have not been saved, were mostly of a private nature, consisting chiefly of petitions, and unimportant papers, presented previous to the year 1799.

We regret very much the loss of your private accounts and vouchers, amongst which, we are sorry to add, were the receipts and accounts of the expenditure of the contingent moneys of the House of Representatives; they were in the private drawer of Mr. George Magruder, which being locked, and the key not in our possession, we delayed to break it open until the last extremity, after which it escaped our recollection.

It is well known to one of us, (Mr. Burch,) that the receipts were from the first of January last, and embraced nearly the whole amount of the appropriation for the contingent expenses of the House.

A number of the printed books were also consumed, but they were all duplicates of those which have been preserved.

We have thus given you a full account of our proceedings during the troublesome scene, and we flatter ourselves you will not see in them any thing to disapprove, as we were guided solely by a zealous endeavor to discharge our duty to you, and to the public.

S. BURCH,
J. T. FROST.

To PATRICK MAGRUDER, Esq.,
Clerk to the House of Representatives.

13th CONGRESS.] No. 372. [3d SESSION.

PURCHASE OF THE LIBRARY OF THOMAS JEFFERSON.

COMMUNICATED TO THE SENATE, OCTOBER 7, 1814.

IN SENATE OF THE UNITED STATES, *October* 7, 1814.

Mr. GOLDSBOROUGH, from the joint committee on the library of Congress, reported:

That they have received, through Mr. Samuel H. Smith, an offer from Mr. Jefferson, late President of the United States, of the whole of his library for Congress, in such a mode, and upon such terms, as they consider highly advantageous to the nation, and worthy the distinguished gentleman who tenders it. But the means placed at the disposal of the committee being very limited and totally inadequate to the purchase of such a library as that now offered, the committee must have recourse to Congress, either to extend their powers, or to adopt such other plan as they may think most proper.

Should it be the sense of Congress to confide this matter to the committee, they respectfully submit the following resolution:

Resolved, by the Senate and House of Representatives of the United States of America in Congress Assembled, That the joint Library Committee of the two Houses of Congress be, and they are hereby, authorized and empowered to contract, on their part, for the purchase of the library of Mr. Jefferson, late President of the United States, for the use of both Houses of Congress.

SIR: OCTOBER 3, 1814.

I have the honor, in furtherance of the proposition contained in a letter from Mr. Jefferson to me, tendering the disposition of his library to Congress, to enclose his letters for submission to the honorable committee over which you preside, with the expression of my readiness at any time to proceed in the discharge of the agency confided to me.

I am, very respectfully, your obedient servant,

SAMUEL H. SMITH.

Hon. ROBERT H. GOLDSBOROUGH,
Chairman of the Library Committee of Congress.

DEAR SIR: MONTICELLO, *September* 21, 1814.

I learn from the newspapers that the vandalism of our enemy has triumphed at Washington over science as well as the arts, by the destruction of the public library, with the noble edifice in which it was deposited. Of this transaction, as that of Copenhagen, the world will entertain but one sentiment. They will see a nation suddenly withdrawn from a great war, full-armed and full-handed, taking advantage of another whom they had recently forced into it, unarmed, and unprepared, to indulge themselves in acts of barbarism which do not belong to a civilized age. When Van Ghent destroyed their shipping at Chatham, and De Ruyter rode triumphantly up the Thames, he might, in like manner, by the acknowledgment of their own historians, have forced all their ships up to London bridge, and there have burnt them, the tower, and city, had these examples been then set. London, when thus menaced, was near a thousand years old; Washington is but in its teens.

I presume it will be among the early objects of Congress to recommence their collection; this will be difficult while the war continues, and intercourse with Europe is attended with so much risk. You know my collection, its condition, and extent. I have been fifty years making it, and have spared no pains, opportunity, or expense, to make it what it is. While residing in Paris I devoted every afternoon I was disengaged, for a summer or two, in examining all the principal bookstores, turning over every book with my own hands, and putting by every thing which related to America, and, indeed, whatever was rare and valuable in every science; besides this, I had standing orders, during the whole time I was in Europe, in its principal book-marts, particularly Amsterdam, Frankfort, Madrid, and London, for such works relating to America, as could not be found in Paris. So that, in that Department particularly, such a collection was made as probably can never again be effected; because it is hardly probable that the same opportunities, the same time, industry, perseverance, and expense, with some knowledge of the biography of the subject, would again happen to be in concurrence. During the same period, and after my return to America, I was led to procure also whatever related to the duties of those in the high concerns of the nation. So that the collection, which I suppose is of between nine and ten thousand volumes, while it includes what is chiefly valuable in science and literature generally, extends more particularly to whatever belongs to the American statesman. In the diplomatic and parliamentary branches, it is particularly full. It is long since I have been sensible it ought not to continue private property, and had provided that, at my death, Congress should have the refusal of it at their own price; but the loss they have now incurred makes the present the proper moment for their accommodation, without regard to the small remnant of time, and the barren use of my enjoying it. I ask of your friendship, therefore, to make for me the tender of it to the Library Committee of Congress, not knowing, myself, of whom the committee consist. I enclose you the catalogue, which will enable them to judge of its contents;

nearly the whole are well bound, abundance of them elegantly, and of the choicest editions existing; they may be valued by persons named by themselves, and the payment made convenient to the public; it may be, for instance, in such annual instalments as the law of Congress has left at their disposal, or in stock of any of their late loans, or of any loan they may institute at this session, so as to spare the present calls of our country, and await its days of peace and prosperity; and they may enter, nevertheless, into immediate use of it, as eighteen or twenty wagons would place it in Washington in a single trip of a fortnight. I should be willing, indeed, to retain a few of the books to amuse the time I have yet to pass, which might be valued with the rest; but not included in the sum of valuation until they should be restored at my death, which I would carefully provide for, so that the whole library, as it stands in the catalogue at this moment, should be theirs, without any garbling. Those I should like to retain would be chiefly classical and mathematical, some few in other branches, and particularly one of the five encyclopedias in the catalogue; but this, if not acceptable, would not be urged. I must add that I have not revised the library since I came home to live, so that it is probable some of the books may be missing, except in the chapters of law and divinity, which have been revised, and stand exactly as in the catalogue. The return of the catalogue will, of course, be needed, whether the tender be accepted or not. I do not know that it contains any branch of science which Congress would wish to exclude from their collection; there is, in fact, no subject to which a member of Congress may not have occasion to refer; but such a wish would not correspond with my views of preventing its dismemberment; my desire is either to place it into their hands entire, or to preserve it so here. I am engaged in making an alphabetical index of the authors' names, to be annexed to the catalogue, in order to facilitate the finding their works in the catalogue, which I will forward to you as soon as completed. Any agreement you shall be so good as to take the trouble of entering into with the committee, I hereby confirm.

Accept the assurance of my great esteem and respect,

TH: JEFFERSON.

SAMUEL H. SMITH, Esq.

13th CONGRESS.] No. 373. [3d SESSION.

APPLICATION OF THE LEGISLATURE OF THE INDIANA TERRITORY FOR ALTERATIONS IN THE JUDICIARY SYSTEM OF THE TERRITORY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, OCTOBER 18, 1814.

To the Senate and House of Representatives of the United States in Congress assembled, the memorial of the Legislature of the Indiana Territory humbly showeth:

That, by a law of Congress, one of the judges, appointed by virtue of the ordinance for the Government of this Territory, are authorized to hold a court. Thus, one of the judges being competent to hold a court, may decide a principle, or a point of law, at one term, and, at the next term, if the other two judges are present, they may decide the same principle, or point of law different. Thus the decisions of the superior court, organized, we presume, by the General Government, finally to settle in uniformity the principles of law and fact, which may be brought before them by the suitor, may be, and frequently are, in a state of fluctuation; hence the rights of persons and property become insecure. There is another evil, growing out of the system, of one judge being competent to hold the superior court, or that court which forms the last resort of the suitor in any Government, and particularly in the Territory; for appeals are taken from all the courts of inferior jurisdiction in the Territory, to the court organized by the ordinance, which inferior courts are never constituted of less than two judges. Thus the suitor in the Territory is frequently driven to the necessity of appealing from the judgment of two men to that of one; but this dilemma only constitutes part of the solecism for the next superior court, as the other two judges may overturn the principles of the decision of their brother judge at the preceding term. Hence the want of uniformity in the decisions of the court of the last resort. Anger and warmth in the suitors, and a confusion in our system of jurisprudence, is the result.

Your memorialists beg leave further to suggest the propriety and necessity of defining, with more precision, the duties of the judges appointed by virtue of the ordinance for the government of the Territory. The ordinance says there shall be a court to consist of three judges, who shall have a common law jurisdiction. The same instrument points out the way a Legislature may be organized; but in no part does the ordinance expressly delegate to the Legislature the power of regulating when and where the superior courts are to be held, or the manner how they are to do business. This power, by a kind of common consent of the judges, the Legislature have assumed from the necessity of the case, as the ordinance creating the courts leaves it afloat, without identifying either the time when, the place where, or the manner how, this court is to exercise their jurisdiction. Again: it would be desirable that Congress would define the jurisdiction of the superior court. We presume that it is a sound rule for the construction of a constitution or a law, that it must be construed from the face of it, and not travel to the history of other times and other Governments in search of the meaning of our ordinance, or any act of Congress. We beg leave to suggest the propriety of pointing out, by law, what common law the ordinance refers to, whether the common law of England, or France, or *of the Territory* over which the ordinance is the constitution. If it should be determined that, by the expression of the ordinance, a common law jurisdiction should be located on the common law of England, it is essential to define to what extent of that common law the judges shall take cognizance; whether the whole extent of feudal and gothic customs of England; whether the customs, or unwritten law shall be taken with the statute law, and that to form the common law to govern the judges; or whether the unwritten and statute law is to be taken in contradistinction to the laws, customs, and rules of chancery; or whether it includes that *law which is common to all.* By Congress defining the powers of the court, and not leaving them at sea without compass or chart to exercise their power of judicial legislation, as circumstances may arise, or passion or interest dictate, by defining the powers of the Legislature and jurisdiction of the court, that collision and jarring which might arise between those two bodies would be harmonized.

Your memorialists, therefore, pray that you would repeal the law first herein alluded to, and make two of the judges hold the court, and define more specifically the duties of that court.

WILLIAM HENDRICKS,
Speaker of the House of Representatives.
JESSE L. HOLMAN,
President of the Council.

13th Congress.] No. 374. [3d Session.

BOOKS AND PAPERS OF THE SEVERAL EXECUTIVE DEPARTMENTS DESTROYED BY THE CONFLAGRATION IN 1814.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, OCTOBER 26, 29, NOVEMBER 1, 11, and 17, 1814.

SIR: GENERAL POST OFFICE, *October* 25, 1814.

In compliance with the resolution of the House of Representatives, on the subject of information relative to the destruction of official books and papers belonging to the General Post Office, in consequence of the late incursion of the enemy, you are informed that *no* official books or papers were lost, belonging to the Department, in consequence of the late incursion.

I have the honor to be, your obedient servant,

R. J. MEIGS, JUN., *Postmaster General.*

The honorable the SPEAKER *of the House of Representatives.*

SIR: NAVY DEPARTMENT, *October* 27, 1814.

In obedience to the resolution of the honorable House of Representatives, passed on the 24th instant, I have the honor to report:

That the whole of the official books, papers, trophies, and effects, in the office of the Secretary of the Navy, except the furniture of the office, were preserved from loss or injury by the late incursion of the enemy, and are now entire; and that all the official books and papers, in the office of the Accountant of the Navy, have been preserved, except those official papers relative to accounts settled and transmitted to the Treasury Department, referred to in the letter of which the enclosed is a copy.

I have the honor to be, very respectfully, sir, your obedient servant,

W. JONES.

The honorable the SPEAKER *of the House of Representatives.*

SIR: NAVY DEPARTMENT, ACCOUNTANT'S OFFICE, *October* 26, 1814.

In reply to your letter of this date, relative to the resolution of the House of Representatives, on the subject of the destruction of the official books and papers in the respective Departments, in consequence of the incursion of the enemy in the month of August, 1814, I have the honor to state that it is believed that all the official books and papers in *this office* were saved. I have no knowledge of the loss of a single book, or papers of consequence; but I have understood that many of our official papers, relative to accounts settled and transmitted to the Treasury Department, were destroyed. What effect the loss may have on future adjustments, it is impossible for me to say.

With great respect, I have the honor to be, your obedient servant,

THOMAS TURNER.

The honorable WILLIAM JONES.

TREASURY DEPARTMENT, *October* 31, 1814.

In obedience to the resolution of the House of Representatives, of the 24th instant, the Secretary of the Treasury respectfully reports:

That, with the exception of some old letters from the collectors of the customs and commissioners of loans, and other unimportant documents, no loss of official books or papers was sustained in his particular office by reason of the incursion of the enemy in the month of August, 1814.

That the documents herewith transmitted, and marked A, B, C, D, E, and F, contain all the information furnished by the heads of the several offices attached to this Department, in relation to the object of the said resolution, and are prayed to be received as part of this report.

All which is respectfully submitted by

A. J. DALLAS, *Secretary of the Treasury.*

A.

SIR: TREASURY DEPARTMENT, COMPTROLLER'S OFFICE, *October* 28, 1814.

To enable you to comply with a resolution of the House of Representatives, of the 24th instant, in relation to the destruction of official books and papers in the Treasury Department, I have to state, that all the official books and papers which were in this office on the 24th of August last, the day of the incursion of the enemy into this city, were packed up and removed from the Treasury, and have all since boen returned, except a box containing brief entries of accounts, and another containing part of the accounts entered on the new books of the Accountant of the War Department, for the fourth quarter of 1812, and part of the accounts entered on the old books for the three last quarters of the same year.

These boxes, it is supposed, have, by some means, become mixed with others belonging to some other of the Departments; and although diligent search has been made for them without effect, I do not yet despair of their being found.

I am, sir, with great respect, your obedient servant,

NATHAN LUFFBOROUGH, *Acting Comptroller.*

Honorable A. J. DALLAS, *Secretary of the Treasury.*

B.

SIR: TREASURY DEPARTMENT, AUDITOR'S OFFICE, *October* 27, 1814.

In compliance with your request, accompanying a resolution of the House of Representatives, of the 24th instant, I have the honor to state that of the official books and papers in the immediate charge of this office, none are known to have been destroyed or lost "in consequence of the incursion of the enemy in the month of August, 1814," excepting only a set of the printed journals and reports of the two Houses of Congress.

I have the honor to be, with great respect, sir, your obedient humble servant,

R. HARRISON.

The SECRETARY OF THE TREASURY.

C.

TREASURER'S OFFICE, *October* 27, 1814.

Information respecting the books and papers of the Treasurer's office, required by a resolution of the House of Representatives, passed October 24, 1814.

Legers, journals, remittance, bank, draft, and other books generally in use since the year 1810, have been preserved, and many from the first establishment of the Treasury, particularly all the payments and receipts on account of the Treasury, War, and Navy Departments from their commencements. All the warrants, vouchers, and unsettled accounts of every kind were preserved, except a few accounts and warrants which had been paid in July last, on account of the Privateer Pension Fund, and one on account of the seventh article of the British treaty. These can easily be replaced, the vouchers for the payments being preserved.

Many of the books and papers destroyed were brought from Philadelphia, and very few would ever have been wanted, as all the accounts of this office are adjusted at the end of every quarter, and the documents accompany the accounts to the accounting officers of the Treasury Department, and are afterwards deposited with the Register.

T. T. TUCKER, *Treasurer of the United States.*

D.

SIR: TREASURY DEPARTMENT, REVENUE OFFICE, *October* 26, 1814.

I have the honor of stating, in compliance with your request, that no official books or papers belonging to this office were destroyed in consequence of the incursion of the enemy in the month of August, 1814.

I am, with great respect,

S. SMITH, *Commissioner of the Revenue.*

Hon. SECRETARY OF THE TREASURY.

E.

TREASURY DEPARTMENT, REGISTER'S OFFICE, *October* 28, 1814.

The Register, in pursuance of the instructions from the Secretary of the Treasury, has the honor to represent, that the loss of books and papers in relation to the records of the Treasury, has, in a great degree, been limited to those of minor importance; and that, upon the late incursion of the enemy, all the essential books of the Treasury were removed to a place of safety.

That to comply more especially, by giving a description of the books and papers which were lost on that occasion, he begs leave to avail himself, by referring to certain papers herewith subjoined, being statements made by the clerks, respectively, having the charge of the principal books and records, and to which he submits the following remarks:

On the statements A and B, in relation to the principal books and records of the revenues of the United States:

The receipts and expenditures of public moneys; the accounts of individual collectors of the revenue, and of all public agents and persons accountable for moneys advanced or otherwise, *were preserved*, and that such as were lost (the very bulky and numerous settled accounts of the War and Navy Departments excepted,) were considered unimportant, compared with the books and records which were, on the emergency, removed, and which claimed the first attention of the Register with the few remaining clerks, who were not in the field in actual military service.

On the statement C in relation to the public debt:

In this branch of the public records nothing has been lost that, it is presumed, can, in the most remote degree, affect the interests of the individual creditors, or the United States.

There arise two descriptions of records from the mode adopted at the Treasury, of a quarter-yearly settlement of the legers, in which every individual creditor on the books of the Treasury is exhibited; the first of these are old legers closed, and put away as finished; the other, those which are operative, and contain the names of existing creditors, the sums due to each, and periods of interest. The journals and legers of the first description only were lost.

On the loss of the books in which were placed numerically the old cancelled loan-office certificates; the cancelled army certificates; the cancelled final settlement certificates; the Register respectfully remarks, that an official register of certificates of the aforegoing character *outstanding*, and which remained *outstanding* under each class, has been *preserved*, and that to this register of outstanding certificates reference has frequently been had in cases where petitions for payment have been presented to Congress; so that it is presumed no material inconvenience will arise from the destruction of those which have been brought in and satisfied.

On the marine records lost:

The records arising under the laws in relation to the registering, enrolling, and licensing ships and vessels of the United States, being duplicates transmitted to the Treasury by the district collectors, from the passing of those acts in the year 1792, bound up in volumes descriptive of their contents; together with the cancelled registers, enrolments, and licenses placed numerically in books for their reception; although they were destroyed, yet their loss, it is presumed, may be supplied in each port, by a reference to the corresponding records in the office of each collector, a mode which it is presumed has been resorted to, from the circumstance that, comparatively to their extent, few applications have been made for certified copies of such records at the Treasury.

Respectfully submitted by your most obedient and most humble servant,

JOSEPH NOURSE, *Register.*

ALEXANDER J. DALLAS, *Secretary of the Treasury.*

A.

Schedule of the loss sustained by the destruction of the Treasury Department, in that branch of the Register's office, where the books and accounts in relation to the impost and tonnage duties, the internal revenue, and direct tax, are kept, viz:

The legers, journals, and auxiliary books connected with the imports, tonnage, and internal revenues, from the commencement to the year 1810, inclusive.

The export books, from the commencement to the year 1803, inclusive.

The vouchers and documents relative to the settlement of the accounts of the collectors of the customs, and supervisors of the internal revenues and direct tax, from the commencement to the year 1811, inclusive.

It is to be observed, however, that the general results of the accounts of every individual collector and supervisor, throughout the Union, as settled at the Treasury, being exhibited in the annual printed statements of the public accounts, the loss above enumerated cannot be considered as essential to, or in any way likely to affect the settlement of future accounts, arising from the sources of revenue before stated; and further, that all the auditor's reports and statements of the accounts of the collectors of the customs, the internal revenue, and direct tax, from their commencement to the present period, have been saved.

JOSA. DAWSON.

B.

REGISTER'S OFFICE, *October* 26, 1814.

Of the books and papers relative to the receipts and expenditures.

The principal legers and journals, from the commencement of the present Government to the year 1798, were destroyed. The legers since that period, as well as the complete set of day books from the commencement of the Government, have been preserved.

The vouchers and reports on settled accounts, which were contained in upwards of one hundred large cases and chests in the fire-proof building, were destroyed. The Treasury statements on said accounts from the commencement of the present Government have, in general, been preserved.

Upon the whole it is conceived but little inconvenience will be incurred in the settlement of accounts from the destruction of books and papers in relation to this branch of the office.

JOS. STRETCH.

C.

REGISTER'S OFFICE, *October* 25, 1814.

Of the books and records in relation to the accounts of the public debt, the following were destroyed:

1. Several old journals and legers, the accounts in which had been closed.

Books containing receipts for certificates of funded debt delivered at the Treasury previous to the year 1800. The receipts taken since have been preserved.

2. Cancelled certificates or evidences of the revolutionary funded debt, numerically arranged and bound up in books, which were numerous and bulky; they contained,

1. Loan Office certificates.
2. Army certificates.
3. Final settlement certificates issued by the commissioners of the staff department.
4. Final settlement certificates issued by commissioners in the several States.
5. Final settlement certificates issued in the marine department.

The whole were destroyed; an official list, however, exhibiting the certificates which remain outstanding *was preserved*, by which the equity of claims for certificates of either description may be ascertained with precision.

3. Receipts for dividends of principal and interest on the funded debt paid at the several loan offices, from the commencement of the Government to the 31st December, 1812, were lost; also, receipts for dividends declared at the Treasury to the 31st December, 1810.

Dividends returned unclaimed from the loan offices for payment at the Treasury; the transcripts of these dividends, however, which were made in this office, in books prepared with columns for receipts, and which were preserved, exhibit not only the amount paid thereon, but also every sum now due to individual creditors.

Transfers or cancelled certificates of the funded debt previous to the year 1811. All the powers of attorney for transferring stock were preserved.

MICHAEL NOURSE.

F.

SIR: GENERAL LAND OFFICE, *October* 26, 1814.

All the maps of this office, and all the books and papers necessary to the settlement of accounts, were saved from destruction.

The papers destroyed were files of military warrants, which had been located and patented; files of final certificates and other papers relative to purchased lands which had been patented; a few files of monthly returns from land offices, which files had been posted into the legers; the loss of these papers will not affect the public interest.

I have the honor to be, very respectfully, sir, your obedient servant,

JOHN GARDINER, *Chief Clerk.*

The honorable A. J. DALLAS, *Secretary of the Treasury.*

SIR: WAR DEPARTMENT, *November* 9, 1814.

Conformably to a resolution of the House of Representatives, of October 24, requiring of this Department a report relative to the destruction of books and papers in consequence of the incursion of the enemy in the month of August, 1814, I have the honor to report, that all the books of record belonging to this office were saved, and that no papers of any kind were lost, except recommendations for appointments in the army, and letters received more than seven years previous; of all these, however, there is a record in the office, viz: the names of applicants, and a brief of the substance of all other letters which were not preserved.

All the standards and colors taken from the enemy during the revolution, as well as those of the present war, which had been deposited in the War Office, were also saved.

In relation to the books and papers of the several offices attached to this Department, I take the liberty to enclose the reports which have been made to me by the principal officer of each.

I have the honor to be, with great respect, your obedient servant,

JAMES MONROE.

The honorable the SPEAKER *of the House of Representatives.*

Accountant's Report.

SIR: DEPARTMENT OF WAR, ACCOUNTANT'S OFFICE, *October* 27, 1814.

In compliance with the resolution of the House of Representatives, of the 24th instant, this day transmitted to me from your office, directing the Secretaries of the several Departments, and the Postmaster General, to communicate to the House such information as may be in their power, in relation to the destruction of official books and papers in their respective Departments, in consequence of the incursion of the enemy, in the month of August, 1814, &c., I have the honor to state, that the books and papers belonging to this office were removed at the time above mentioned, and are now in a state of safety, excepting a part of the papers and army accounts appertaining to the revolutionary war, which had been saved from the flames on the burning of the house occupied by the War Department in 1800. When the books and papers of this office were removed, as before mentioned, it was not practicable to obtain conveyance for all; it was, therefore, determined to leave the old papers and army accounts, as the loss of those (if any loss should happen) would be attended with less inconvenience than that of any other papers. They were in the fire-proof room of the office at the time of the incursion of the enemy, and when that building was burnt they remained uninjured by the flames; but the room having been entered by some persons soon after the building was destroyed, the papers were deranged, and many of them undoubtedly destroyed or carried away at that time; but it is not possible to identify those which may have been thus destroyed. When the public papers were brought back to the city of Washington, the remainder of those papers (by far the larger part of the whole) were removed to the house now occupied as the Accountant's office.

It is not probable that the loss of those papers can have any effect in the adjustment of the unsettled accounts of the United States, as the claims (if any) which might arise under them have been barred by acts of limitation.

With very great respect, I have the honor to be, sir, your most obedient servant,

TOBIAS LEAR.

The honorable the SECRETARY OF WAR.

Paymaster's report.

ARMY PAY OFFICE, CITY OF WASHINGTON, *October* 29, 1814.

The paymaster of the army of the United States, in obedience to a resolution of the House of Representatives, under date of October the 24th, 1814, has the honor to report:

That, by great exertions all the books, accounts, rolls, and papers of his office, which were of any considerable importance were saved from the destructive incursion of the enemy at this place, in the month of August, 1814; but agreeably to the tenor of the resolution he proceeds to mention, as nearly as can be well ascertained, those which were not saved, and the probable effect which will result from their loss. They are as follows, namely:

Part of the copies of the statements of such recruiting and other accounts as had been adjusted and settled in this office, with old duplicate vouchers, the originals of which were sent up to the other offices of the Government to be finally deposited in the Treasury Department. No inconvenience will result to the Government from this loss; (provided the originals are preserved;) the only inconvenience which will be felt is in this office, where, instead of referring to our copies for information, we shall have to resort to the originals at the Treasury Department.

The accounts and vouchers of Lieutenant Samuel Scott, as paymaster of the twenty-fourth regiment of infantry. The instructions of the paymaster of the army to all sub-paymasters, direct them to keep duplicates of their accounts and vouchers, and Lieutenant Scott has been called on for the duplicates of his; when they are received the loss will be made good.

A small book containing a record of certain stoppages from the pay of non-commissioned officers, musicians, artificers, and privates; a book of minor importance, and as the stoppages had all been directed, and many of them actually made and done, the loss of it is considered of very little consequence.

The recruiting account and vouchers (in part) of the late Major Timothy Dix, of the 14th regiment of infantry, deceased. If the legal representative of Major Dix produces the duplicates, which it is expected are among the papers of the deceased, the loss will be retrieved.

It is possible that some few other papers might have been lost, which cannot now be recollected or ascertained. It is believed, however, that they could not have been of much magnitude or importance.

Respectfully,

R. BRENT, *Paymaster United States army.*

The honorable JAMES MONROE, *Secretary of War.*

Report of the Superintendent General of military supplies.

SIR: WASHINGTON, *October* 24, 1814.

In compliance with the resolution of the House of Representatives, of the 24th instant, I have the honor to state, that none of the books or papers belonging to the office of the Superintendent General of military supplies have been lost or otherwise destroyed, in consequence of the incursion of the enemy in the month of August last.

I am, sir, respectfully, your obedient servant,

RICHARD CUTTS, *Supt. Gen. military supplies.*

Hon. JAMES MONROE, *Secretary of War.*

Adjutant and Inspector General's report.

SIR: ADJUTANT AND INSPECTOR GENERAL'S OFFICE,
WASHINGTON, *October* 26, 1814.

In conformity to your order, and with a view to meet a resolution of the House of Representatives, of the 24th instant, calling for information relative to the destruction of official books and papers by the enemy, on the 24th of August last, I have the honor to inform you that the papers which belonged to this office, and which were destroyed by the conflagration of the enemy, were files of muster-rolls, inspection, garrison, monthly and recruiting returns, up to the year 1813, inclusive. In addition to this, several copies of Stoddard's Artillery, and a few copies of a System of Drum Beating for the use of the army, which had not been distributed, were also lost. The whole loss, however, is of no material consequence.

I have the honor, to be, very respectfully, sir, your obedient humble servant,

JOHN R. BELL, *Assistant Inspector General.*

The honorable JAMES MONROE, *Secretary of War.*

SIR: ORDNANCE OFFICE, WASHINGTON, *October* 27, 1814.

In obedience to a request from your Department, I have the honor to state that, in the late invasion and conflagration of the enemy in this city, no valuable books or papers attached or belonging to this office sustained any loss or injury. A few printed books, of considerable value, and some loose papers of no intrinsic importance, with a small quantity of furniture, stationary, &c., formed the only articles which were destroyed.

Very respectfully, I have the honor to be, sir, your obedient servant,

JOHN MORTON, *Deputy Commissary.*

Hon. SECRETARY OF WAR.

DEPARTMENT OF STATE, *November* 14, 1814.

The acting Secretary of State, in compliance with the resolution of the House of Representatives, of the 24th ult., requesting such information as may be in the power of the several Departments to afford, in relation to the destruction of the official books and papers in their Departments, respectively, in consequence of the incursion of the enemy in the month of August, 1814, has the honor to report:

That, when it became apparent from the movements of the enemy, after his debarkation at Benedict, that his destination was the seat of Government, every exertion was made, and every means employed, for the removal of the books and papers of this office, to a place of safety; and, notwithstanding the extreme difficulty in obtaining the means of conveyance, it is believed that every paper and manuscript book of the office, of any importance, including those of the old Government, and all in relation to accounts, were placed in a state of security. That it was not found practicable, however, to preserve, in like manner, the volumes of laws reserved by Congress for future disposition; many of the books belonging to the library of the Department, as well as some letters on file of minor importance from individuals on business mostly disposed of, which were unavoidably left, and shared the fate, it is presumed, of the building in which they were deposited.

All which is respectfully submitted,

JAMES MONROE.

13th CONGRESS.] No. 375. [3d SESSION.

REBUILDING THE CAPITOL, PRESIDENT'S HOUSE, AND OTHER PUBLIC BUILDINGS IN THE CITY OF WASHINGTON.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, NOVEMBER 21, 1814.

Mr. LEWIS, from the committee to whom was referred a resolution "to inquire into the expediency of rebuilding or repairing the President's house, Capitol, and public offices, and of the expense necessary for that purpose, and whether the public interest or convenience would be promoted by any change or alteration of the sites of said buildings," made the following report:

That, amongst the first steps deemed necessary in discharge of the duties assigned them, they caused the superintendent of the city to lay before them the reports of several architects and mechanics of reputed skill and character, who had, at his request, examined the remains of the public buildings, all of whom reported, as their opinion, that the walls generally had not been materially damaged, and were not rendered unsafe or insufficient to rebuild on, conformably either to the former plans, or to some variations suggested, or such as may be adopted as improvements in the rebuilding.

These reports were accompanied by estimates of various amounts, forming an average of $458,000. The whole first cost of these buildings appears to be $1,215,110 10.

With the view of better understanding the grounds, and probable accuracy of the reports and estimates, the committee attended personally at the Capitol, and examined the state of that building, where, after a conference, and making such inquiries of an architect ont he spot as were considered proper, they were induced to believe that the walls of both wings of the Capitol may be safely built on, and that the estimated expense of about $250,000 for repairing the same was as nearly accurate, and as much to be relied on as could be reasonably expected, or as circumstances either admitted or required.

With the foregoing information, the committee proceeded to a due and general consideration of the subject-matter referred to them, and readily came to the decision that it was expedient, either to repair the late buildings,

or to build others in their stead on different sites; but as it appeared that the latter could not be effected without incurring a great additional expense, so much greater (as the committee conceived) than would be counterbalanced by any "public interest or convenience," to be derived from "a change of sites," they were of opinion that it would be inexpedient to make such change. Connected with this part of the duty prescribed to the committee, it may not be improper that they should state to the House the representations of sundry individuals who allege, and offer to prove, that the designation of the present site by President Washington, who possessed full power, having been always considered by him as part of the permanent plan of the city, they purchased at very advanced prices, and improved lots, on the faith of those designations, near those sites; the supposed permanency whereof has ever since sustained the value of all adjacent and contiguous property; but that, if those sites were now to be altered or abandoned, without some equivalent public establishment being made thereon, they apprehend that this property would become comparatively valueless, during the lifetimes of the present holders at least. The committee, however, desire it to be understood that other views and considerations, having induced their decision on this member of the resolution under which their inquiries were directed, did not enter into the discussion of, or give any opinion on the force and validity of, those considerations.

From the suggestions of the architects consulted, and also from the observations of the committee, they are of opinion that parts of the walls, arches, and columns of the late buildings are in a state requiring a small expense for workmanship and materials, to preserve them from injury by the weather, and from falling down, thereby endangering the vaulting which supports some of the floors, and which, at present, is very little, if at all, weakened by the burning; but as there is no money applicable to the payment of such expense, inconsiderable as it may be, the committee beg leave to suggest the propriety of an appropriation for that object.

The committee think it not irrelative to the object of their inquiries, though it is not specifically enjoined, to state also that the several banks within the District of Columbia, desirous of facilitating an object so interesting to the district, have made a formal and binding offer in writing, to advance on loan to the Government, upon reasonable terms, the sum of $500,000, to be applied exclusively to the purpose of rebuilding or repairing the President's house, Capitol, or public offices.

Conformably to the foregoing statement the committee ask leave to report a bill.

13th CONGRESS.] No. 376. [3d SESSION.

PURCHASE OF THE LIBRARY OF THOMAS JEFFERSON.

COMMUNICATED TO THE SENATE, NOVEMBER 28, 1814.

Mr. GOLDSBOROUGH, from the Joint Library Committee of Congress, reported:

That, in pursuance of the resolution of Congress, passed on the 21st of October last, your committee have received from Mr. Samuel Harrison Smith, agent for Mr. Jefferson, precise terms of sale of his library, in which the number of volumes is stated to be six thousand four hundred and eighty-seven, and the estimated price twenty-three thousand nine hundred and fifty dollars. To these terms your committee have conditionally acceded, and they have contracted with the agent of Mr. Jefferson for the purchase of his library, according to the catalogue and number of volumes stated, at the price before mentioned, subject to the ratification of Congress.

They, therefore, present the following bill to authorize the purchase of the library of Thomas Jefferson, late President of the United States.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury be, and he is hereby, authorized and directed, to cause to be paid to the Joint Library Committee of Congress, or their order, the sum of twenty-three thousand nine hundred and fifty dollars in Treasury notes of the issue ordered by the law of the 4th of March, 1814, to be by them applied to the purchase of the library of Thomas Jefferson, late President of the United States, for the use of Congress.

13th CONGRESS.] No. 377. [3d SESSION.

BOOKS AND PAPERS OF THE HOUSE OF REPRESENTATIVES AND LIBRARIES OF CONGRESS LOST BY THE CONFLAGRATION IN 1814, AND THE STATE OF THE CONTINGENT FUND.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 12, 1814.

Mr. PEARSON, from the committee to whom were referred the communication of Patrick Magruder, clerk of the House of Representatives, relative to the destruction of the library of Congress, and records and papers appertaining to the office of the House of Representatives, made the following report:

That they have satisfactory evidence that the library of Congress, consisting of volumes agreeably to the catalogue herewith submitted was destroyed by the enemy on the 24th of August last; and, also, the manuscript records, papers, and secret journal of Congress, mentioned in the communication submitted to this committee. In

addition to the ascertainment of those facts, the committee have considered it their duty to form and express some opinion as to the degree of diligence and precaution exercised by the clerk, and those in his employ, to prevent the loss which has been sustained. In doing this they have taken into consideration the threatening aspect of the enemy in the Chesapeake, the Potomac, and the Patuxent, almost uniformly from the month of June to the period of their incursion on the city of Washington, and the apprehension which prevailed on this subject, as developed by the committee appointed to inquire into the "causes of the success of the enemy in his recent enterprises against this metropolis, &c." They have also referred to the several heads of Departments, and obtained information as to the time and manner of their removing and securing the papers and effects belonging to their offices; which information the committee herewith submit as part of their report, contained in the letters marked No. 1, 2, 3, and 4; from which it appears that measures, preparatory to a removal of the documents belonging to the several Departments, were taken as early as the 20th and 21st of August, and the removals all effected by the 22d; whereas no preparatory measures were taken to secure the library and papers appertaining to the office of the House of Representatives, or any efforts made to procure the means of transportation till the *afternoon* of the 22d of August; after which time the committee were convinced that the means of transportation were difficult to obtain, if not impracticable.

As to the absence of the clerk on account of *indisposition*, as alleged, the committee have not examined as to the particular nature and extent of that indisposition. They will only say that it was, or ought to have been, serious and alarming to have justified his absence under the circumstances which then existed. The committee are, therefore, constrained to express the opinion that due precaution and diligence were not exercised to prevent the destruction and loss which has been sustained.

In relation to the remaining subject of inquiry submitted to the committee, viz: the amount of money paid on account of the contingent expenses of the House, since the 1st of January last, for which the clerk ought to be credited, (the original vouchers having been destroyed in the conflagration of the Capitol,) the committee have no reason to disbelieve the statement of the clerk and his deputies as to the destruction of the vouchers alluded to. They have, however, experienced much difficulty, delay, and embarrassment, in their endeavors to ascertain and adjust the accounts of the clerk, so as to do justice between the public and the individual. This task was the more arduous and unpleasant from the circumstance of the clerk himself disavowing any knowledge of the pecuniary transactions of his office, and referring the committee to his chief clerk, Colonel George Magruder, who, on application, appeared equally unable or unwilling to enter into such a *specification* of the accounts and expenditures as would enable the committee to form any probable result. He presented a general statement (herewith submitted, marked M,) by which it appeared that the Clerk of the House of Representatives stood charged on the books of the Treasury with the sum of $50,863 16, and that he claimed credit for $48,000 for expenditures for contingent expenses of the House from January, 1814, to 23d August of the same year; leaving a balance due the United States, on that day, of $2,863 16. The committee considering this alleged amount of expenditure as being very great and unprecedented, for the same length of time, and presuming, as the clerk was able to state a particular sum expended, and a small amount remaining in his hands, on the day his vouchers were destroyed, he might, from the same date which produced the results stated, by the aid of his recollection, the assistance of the clerks in his office, and the officers of the House, and especially by reference to the bank or banks in which his public deposites were kept, and individuals to whom the principal payments were made, furnish such specific statements as would have enabled the committee to form a reasonable opinion as to the correctness of the general statement which had been presented, they deemed it their duty to require a statement of the principal *items* of ordinary expenditure, and the names of persons who had furnished them; this information was ultimately obtained by the admission of the chief clerk, the information of other officers of the House, and the knowledge which the committee themselves had of the most considerable objects of expenditure. All of which are stated in the account herewith presented, marked A. The clerk was then requested to ascertain from such sources as seem practicable, the sums paid on account of those several items of expenditure; some of which they know he could ascertain with certainty, and most of which with probable accuracy. In compliance with this request the committee were furnished with the statement marked B. The principal items of which are—

To paying Messrs. Way and Weightman for printing and stationary, - -	$25,600 10
To paying messengers of the House, - - - - -	2,584 50

The committee having obtained from the Treasury Department a copy of the last settlement made by the clerk on the 14th January, 1814, on account of the contingent expenses of the House of Representatives, and having examined the books of Messrs. Way & Weightman, as also the cashiers of the Bank of Washington and the Union Bank of Georgetown, are satisfied that the sum of $3,539 53 ought to be deducted from the $25,600 10, charged for printing and stationary in the account rendered by the clerks, and marked B as aforesaid. The same having, in the opinion of the committee, been already allowed, and included in the settlement with the Treasury on the 14th of January, 1814; which settlement the committee herewith submit, marked T.

The charge in the account B, for the pay of messengers for the House, is manifestly incorrect, and exceeds their proper allowance by the sum of $518 55.

The committee having allowed all other charges specified and claimed by the clerk, and having, by every means in their power ascertained the *items* with which the contingent fund is chargeable, and made the most liberal allowance for its expenditure, submit the statement, marked A, as the result of their inquiry.

From which it appears that, on settlement with the Treasury, on the 14th January, 1814, a balance remained in the hands of the clerk of the House of Representatives, due the United States, of - -	$6,574 87
That, from the 14th of January, 1814, to the 18th April, 1814, the clerk drew from the Treasury the sum of - - - - - - - - -	44,288 29
Making the sum of - - - - - - - -	$50,863 16
with which he now stands charged at the Treasury.	
That his expenditures since the above settlement, and such as the committee presume were not included in it, on account of the contingent expenses of the House, to the 19th September, 1814, amount to the sum of - - - - - - -	30,933 57½
Leaving a balance unaccounted for by the clerk, and due the United States of - -	$19,874 58

The committee recommend the following resolution:

Resolved, That Patrick Magruder, clerk of the House of Representatives, be credited at the proper office of the Treasury Department with the sum of $30,933 57½ for expenditures on account of the contingent expenses of the House of Representatives from the date of his last settlement to the 19th September, 1814.

SIR: TREASURY DEPARTMENT, *November* 5, 1814.

Upon inquiry, I find that the books and papers, appertaining to the Treasury, were packed up on Sunday, the 21st of August, 1814, and sent off in the afternoon of the following day.

It is also stated to me that much difficulty was not experienced in procuring carriages to transport the books and papers; and that, in fact, two wagons, more than were eventually found necessary, were engaged by the Department.

I have the honor to be, very respectfully, sir, your most obedient servant,

A. J. DALLAS.

JOSEPH PEARSON, Esq.

SIR: WAR DEPARTMENT, *November* 21, 1814.

I have had the honor to receive your letter of the 21st instant, inquiring at what time the papers belonging to the Department of State were removed, previous to the destruction of the public buildings in this city, and whether it was practicable for the clerk of the House of Representatives to have obtained the means of removing the library and papers belonging to that House in the Capitol of the United States, within the space of three days previous to that event.

Having left this city on the Thursday preceding the 24th of August for the neighborhood of Benedict, and having entered it afterwards, momentarily only, prior to the 24th, I have no knowledge, from personal observation, of the means which might have been obtained, by the clerk of the House of Representatives, for the removal of the library and documents of that branch of the Legislature.

Apprehending, when I left the city, that the documents belonging to the Department of State would be in danger, I gave orders that they should be packed up and in readiness to be moved on notice of the approach of the enemy. It was under this order, and on the subsequent notice, which was communicated, that they were removed to a place of safety on the 22d of August.

I have understood that the papers of the Department of War were likewise removed on the 22d of August.

I have the honor to be, with great respect, sir, your obedient servant,

JAMES MONROE.

The hon. JOSEPH PEARSON, *House of Representatives.*

SIR: NAVY DEPARTMENT, *November* 5, 1814.

In compliance with the request, contained in your note of yesterday, requiring "such information as to the time when the papers of this Department were packed up and removed, and, finally, my opinion as to the practicability of obtaining the means of conveyance, for three days, immediately preceding the destruction of the Capitol by the enemy," I have the honor to represent that, having, on Saturday, the 20th August last, directed the chief clerk of this Department to prepare for the removal of the books, papers, and effects of the Navy Department, and to procure the necessary transportation, I now enclose his statement of the facts and circumstances attending the execution of my order, as conveying more correct information, in relation to the subject of your inquiry, than that which comes within my own knowledge.

I am, respectfully, sir, your obedient servant,

A. JONES.

The hon. JOSEPH PEARSON,
Chairman of the Committee of Enquiry, &c., House of Representatives.

NAVY DEPARTMENT, *November* 5, 1814.

In obedience to the instructions from the Secretary of the Navy, to prepare for the removal and safety of the public documents and archives of the Navy Department, on Saturday the 20th day of August, 1814, and anticipating a difficulty in procuring wagons, he sanctioned the transportation by water, in boats up the Potomac river.

On Sunday three of the clerks were employed packing up in boxes and trunks, all the books of record, papers, library, maps, charts, plans, stationary, trophies, various valuable instruments, paintings, prints, &c., ready for removal on the next day; and in the evening of Sunday, the 21st of August, two river boats, with their crews, were engaged for the purpose at the ordinary pay and wages.

On Monday, the 22d August, two of the city carts were engaged, and all the boxes and articles in the Navy Department (heavy desks and furniture excepted,) were put on board a boat at the nearest wharf to the offices, and at 4 P. M. proceeded up the river, as far as Georgetown.

In the forenoon of Monday, the 22d, two large wagons with drivers presented themselves at the Department for employ, and on account of the previous arrangement, to transport by water, they were transferred to the Accountant of the Navy Department, who loaded them with the effects of his office.

On Tuesday, the 23d August, the chief clerk, with one of the clerks of the Department, proceeded up the river Potomac, and passed through the locks and canal to a place of safety.

There was no difficulty in procuring more boats and men enough to navigate them up the river above the falls.

BENJAMIN HOMANS, *Clerk.*

SIR: TREASURY DEPARTMENT, GENERAL LAND OFFICE, *November* 5, 1814.

In the absence of the commissioner I have the honor to reply to the questions in your letter of yesterday.

On the Sunday preceding the destruction of the public buildings, the records of this office were prepared for removal.

On Monday, wagons were procured in the country, loaded in the evening, and the records removed the same night.

As to the practicability of obtaining the means of conveyance on other roads than that which I travelled I cannot form an opinion, but on that road I found difficulty in procuring what I wanted for this office on that day.

I am, very respectfully,

JOHN GARDINER, *Chief Clerk.*

Hon. J. PEARSON.

United States for expenditures on account contingent fund, H. R. for 1814, *to Patrick Magruder.* Dr.

May 1,	To amount passed by the Committee of Accounts, say about* - - -	$45,000 00
	To amount of newspaper accounts, as authorized by resolution,* - - -	3,000 00
		48,000 00
	By warrant received from the Treasury, on account of contingent fund, - -	50,863 16
	Balance due the United States, - - - - - - - -	$2,863 16

Note.—The whole claims against the contingent fund of the House of Representatives have been paid, except some few newspaper accounts, which have never been exhibited, and which will not exceed two hundred dollars. And the date, 1st May, ought to be the 23d of August, 1814, when the vouchers were burned.

GEO. MAGRUDER, for
P. MAGRUDER.

* Vouchers burnt in the Capitol.

13th Congress.] No. 378. [3d Session.

EXPLANATION OF THE CLERK OF THE HOUSE OF REPRESENTATIVES RELATIVE TO THE LOSS OF BOOKS AND PAPERS OF HIS OFFICE, THE LIBRARY OF CONGRESS, AND THE VOUCHERS FOR HIS EXPENDITURES FROM THE CONTINGENT FUND.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 19, 1814.

OFFICE OF THE HOUSE OF REPRESENTATIVES U. S., *December* 17, 1814.

SIR:

The undersigned, clerk of the House of Representatives, feels himself bound, from the respect due to the House and to himself, to state the situation in which he was previous to the destruction of his office and the library of Congress. This is rendered indispensably necessary by the remarks contained in the report of the committee upon his accounts for disbursements of the contingent money of the House of Representatives.

It must be very distinctly recollected by every member of the committee, as well as by every member of the House, that I was laboring under a severe indisposition during the whole of the fall, and the greater part of the winter of 1813, and that I was unable to resume the discharge of my official duties until about the 1st of January, 1814. After the rising of Congress I was twice violently attacked with the same complaint, which assumed a serious appearance, and threatened my life. Under these circumstances my physicians advised me to visit the springs as a measure necessary to restore my health. If the House shall deem it necessary the certificates of the physicians will be procured, and laid before them.

When I left this city, I can say, without the fear of contradiction, that the enemy was not in any of the rivers leading to this place, or that their force was sufficient, either in the bay or on the coast, to justify an expectation of an attack on the seat of Government. I believe that the Heads of the Departments did not, at that time, contemplate that any movement would be made by the enemy threatening the city of Washington. Under these circumstances and facts, the clerk of the House of Representatives most respectfully asks leave to observe, that he is free from censure, because of his going to the springs to recover his health, which was worn down by a constant and assiduous attention to his official duties.

With respect to that part of the report of the committee which charges the clerk and those in his employ with not using a proper degree of diligence and precaution for the preservation of the papers appertaining to the office of the House and of the library of Congress, he begs the House to refer to a statement for information upon this subject written by two of his clerks, who are known to be gentlemen of *respectability and truth*, and laid before the House on the 22d of September, a copy of which he herewith presents, marked No. 1.

The clerk has further to observe upon this subject, that it will appear, by the certificate of Captain Burch, herewith accompanying, marked No. 2, that two of his clerks, Mr. Hamilton and Mr. Berry, were doing duty in his company of artillery from the 19th of August until after the destruction of the Capitol; that they could not leave the camp without a furlough from the colonel or general, which was never granted them; that it will appear, by the statement of Captain Bestor, No. 3, that Mr. Burch, another of his clerks, and upon whom he placed much reliance, was marched from the city, and continued under his command until the afternoon of the 21st of August, when he was furloughed by General Smith, as will be seen by his general order, No. 4. Mr. Burch did not get into the city until nightfall of that day. Another of his clerks, Colonel George Magruder, who was the commander of one of the regiments then in the service, marched with his regiment, and continued with it, as was his duty, until after the destruction of the Capitol. There was then only one clerk left, Mr. Frost, who had just before been appointed in the office, and he also would have been taken away with the military, if he had not been over the age prescribed by law for militia service. From these facts it results that, of the clerks in my employ, those in the company of Captain Burch had no power whatever to interfere in the saving of the office and library from destruction; that Mr. Burch could not do any thing for their preservation until Monday, the 22d, nor could Colonel Magruder, without deserting his duties in the field.

On the 22d, Mr. Burch and Mr. Frost did commence the removal of the office, not in the *afternoon*, as is stated in the report of the committee, but *actually in the forenoon*. The means of transportation were limited for three days previous, and on that day the committee have admitted it was almost impossible to procure it at all.

The evidence which the committee have procured from the Departments of the facility which they found in removing their papers, can have no bearing on the present case, as these Departments began to pack up on the 18th or 19th of the month, and, in fact, removed before the *afternoon* of the 22d, and, consequently, had all their means of transportation in readiness previous to the time it became so difficult to procure it.

The clerk begs leave further to observe, that the Heads of Departments, being in the confidence of the Government, had much better means of procuring *correct* information of the movements of the enemy than the clerks in his office, whose only sources of information were the common reports to be heard in the streets; and it is notorious that the public mind was in darkness and ignorance upon the subject of the strength and movements of the enemy; that the Heads of Departments gave orders to pack up their papers, as has been observed before, some on the 19th, and one even on the 18th of the month; and that, as many, if not a majority, of their clerks were over the age of forty-five years, they were not compelled to leave the offices. This accounts for their ability to pack up their papers, and, in some cases, actually to remove them, before it was in the power of my clerks to commence the business.

The clerk must, therefore, be permitted to say, and he says it with confidence, that those in his employ were not guilty of negligence, or inattention in the preservation of the office, unless, indeed, the committee will prove that they were not in the military service; that they remained during the whole time in the city; and that they took no part or interest in its preservation.

With respect to the library, he asks the House to refer to the letter of Mr. Frost, marked No. 5. This gentleman acted as under-librarian; the rest of the clerks in my office had no authority or control in that department.

In regard to the contingent expenses of the House, the vouchers for which were destroyed, the undersigned begs leave to state that the Committee of Accounts have always had the sole control of the disbursements of the funds appropriated for this object, and have sanctioned all the payments which have been made out of it. Being, from the nature of the other duties of his office, unable to attend to this branch of the business, it was confided by the clerk to Mr. George Magruder, his principal clerk. The amounts drawn at different times from the Treasury have always been so drawn under the direction of the Committee of Accounts, after they had received satisfactory

information that the funds already drawn were expended. The Committee of Accounts having always kept a record of their accounts as well as the chief clerk, and acted as a check upon him, the undersigned has had no further agency in the same than to affix his signature to them when the forms of office required it. This is not a novel practice, but is, he believes, pursued in regard to the contingent expenses of every office under the Government of any extent; the chief clerks always disbursing the contingent fund, though the principal is responsible for the same. It is not, therefore, so very extraordinary, the undersigned would respectfully suggest, that he was not able to afford to the committee of inquiry a *specification* of expenditures, of which all the accounts and vouchers were so unfortunately destroyed. He greatly regrets that the chief clerk had kept no duplicate book or memorandum of the accounts paid, which could supply the deficiency of that destroyed in consequence entirely of his absence on duty in the field of battle. Could the event of that day have been foreseen six hours before it happened, those papers had probably escaped the flames.

It must be obvious to the honorable House that, out of so large a mass of accounts of a miscellaneous character as are paid, in the course of seven months, out of the contingent fund of the House, it would be impossible for the person having paid it, to recollect more than a few items. It is true that the evidence of payment of such accounts may be collected, in a great degree, by the voluntary testimony of those to whom the money was paid, but it is no less true, that this must be a work, not of a day or a week, but of time and research. The undersigned has taken means, by a public advertisement, to accomplish this object, and will not fail to use due diligence in pursuit of it. Meanwhile, he most respectfully suggests that, to accuse him of deficiency and default in his accounts, because the particular items of disbursement are unascertained, could not enter the views of the honorable House or any member of it, because it would be unjust in itself, and would be to add cruelty to that pain which the undersigned has already suffered from the loss sustained in his office.

After these general observations, the undersigned begs the attention of the House to a few remarks on that part of the report which implies an unjust statement as to two of the very few accounts which he or his chief clerk have been able to specify as having been paid. This is due to the House from its clerk, as well as to his own conscious rectitude, and to a reputation which he hopes no man can justly impeach.

First. As to the account stated by the committee to be overcharged as paid to the messengers and servants of the House, nothing is capable of more satisfactory explanation. These persons were requested to furnish a statement of the amounts they had severally received. *They* made an error in their statement, which the honorable committee detected, but of which the chief clerk neither participated nor had information until it was reported to the House by the committee, and which neither he nor the *persons* who made it, were afforded an opportunity to amend. That circumstance is more fully explained, and the undersigned hopes in a manner which will be entirely satisfactory to the House, in the accompanying letter from Mr. George Magruder, marked No. 7, and also by a statement of the principal messenger referred to in his letter.

Secondly. As to the amount which the committee appear to have been *satisfied* was overcharged, as having been paid to the printers, the undersigned, in the absence of that documentary proof, which would have completely satisfied the House on this head, (but which was destroyed with other papers, not in *his* office, but in the Department of the Treasury,) begs leave to submit the following statement of facts, in order to refute, as publicly as it was made, the charge in this respect contained in the report of the committee. The abstract obtained from the Treasury bears date the 14th of January, 1814, as to its *settlement* at the Auditor's office. On the face of it, however, it is stated that the accounts settled at that time, were up to the *seventh* only of that month, and the probability is, they were not up to *that* by some days, as it is well known that papers are left for settlement at the Treasury frequently, and, indeed, always several days before they are acted upon. Application has been made by my order, two or three times, to ascertain the date of the *deposite* of that account at the Treasury, and have as often been answered, that the account itself, together with every accompanying voucher, is *lying in ashes* at the site of the former Treasury building. It is much to be regretted, and it is doing injustice to me, for the officers of the Treasury to be giving certificates, that means of transportation of public papers were every where to be had in abundance, when they suffered accounts and vouchers of such recent date to be burned. The papers marked Nos. 11 and 12, herewith submitted, will demonstrate, as far as evidence can be obtained, not only that these accounts were *not* included in the settlement of the 14th of January, 1814, but that the clerk ought to have credit on that head for a sum of more than two thousand dollars than he claimed. The statement of Mr. Way, and the letter of Mr. Weightman, will exhibit how liable to error all estimates must be, collected in the unusual manner in which those of the committee were.

The schedule marked A, which accompanies this report, with vouchers from No. 11 to No 17, obtained since the committee reported, will exhibit a further sum to be credited to the account of the clerk, to the amount of about seven thousand dollars.

These amounts combined, (nearly seven thousand dollars,) with cash in hand at the commencement of this session, as estimated by the chief clerk in his statement accompanying the report of the committee, will reduce the amount of expenditures, for which vouchers are not yet obtained, to about one-half of the amount of deficiency stated by your honorable committee.

Other vouchers of a like character will be daily obtained, and the undersigned does not despair, in a reasonable time, to be able to account to the satisfaction of the House for the whole amount of the expenditures from the contingent fund. All which he respectfully solicits the House to take into their consideration.

PATRICK MAGRUDER.

To the SPEAKER *of the House of Representatives.*

[No 1, is a letter from Messrs. Burch and Frost, which is omitted here.]

No. 2.

Captain Burch's certificate.

DECEMBER 15, 1814.

This is to certify, that Samuel S. Hamilton and Brook M. Berry, two of the clerks in the office of the clerk of the House of Representatives, were doing actual military duty in the company of artillery under my command, from the 19th of August, till after the destruction of the Capitol. Neither of these persons could leave the camp without the permission of the commanding officer of the brigade or regiment, which was never given.

BENJAMIN BURCH, *Captain.*

No. 3.

Captain Bestor's certificate.

This is to certify, that, in August last, upon the call for the militia of the District of Columbia to go into actual service, Samuel Burch, one of the clerks in the office of the House of Representatives, was mustered in the company under my command, and marched from this city with the troops, and continued with them until late in the day of the 21st of August, when he was furloughed or discharged, for the purpose, as I was informed, of returning to the city to take care of the public papers of the office to which he was attached. I further certify, that, on the day of the battle of Bladensburg, I met with the said Samuel Burch, completely armed and equipped on his way to join the army which had marched for Bladensburg, and as I was in command of the guard over the baggage and provisions, I thought it better that he should join the main army, and gave him directions to that effect; and I have been informed by my officers that he executed those orders. I further certify, that, previous to marching from the city on the 20th August, the said S. Burch manifested much solicitude for the safety of the papers of his office, but as the court-martial had previously determined that he was subject to militia duty, I felt myself bound to continue him in service until discharged by superior authority.

HARVEY BESTOR.

No. 4.

General Smith's order.

CAMP, HEIGHTS OF THE EASTERN BRANCH, *August* 21, 1814.

Mr. Samuel Burch, of the 2d regiment, is furloughed until he receives orders to join his company.

By order: N. W. WORTHINGTON,
Captain and Aid de Camp, 1st Col. Brig.

No. 5.

Mr. Frost's letter.

SIR: DECEMBER 17, 1814.

On examining the report of the committee appointed on the subject of your communication to the House, of the 20th of September last, I find that the committee admit that, after the 21st of August, the difficulty of procuring teams for the removal of the books, papers, &c. from your office, was so great as to justify a belief that all was done after that period, which could (with the means we possessed) have been expected. But the committee state that measures, preparatory for a removal, had not been taken. On that head I can only say that, on Monday, 22d of August last, if carriages for the conveyance of the books, &c. could have been obtained, they were in a situation to be immediately removed; the several loads which were saved, were taken from the shelves on which they were placed, and deposited in the carts by which they were taken away; they have suffered no injury, and, to have procured boxes or trunks to pack them in, if that plan had been preferred, would have been utterly impossible.

Your obedient servant,

J. T. FROST.

P. MAGRUDER, Esq.

No. 7.

Mr. G. Magruder's letter.

SIR: DECEMBER 17, 1814.

I find, from the nature of the report of the committee on the subject of your letter, it is indispensably necessary for me to make some explanation upon some points of that report:

First. As to the practicability of saving the library and the papers of the office; for my justification, after leaving the office intrusted to me in your absence at the Springs, I refer you to General Smith's letter, (No. 8,) to the letter of the two clerks already before the House; to Mr. Bowie's letter, (No. 9;) also to the certificates which accompanied Renner and Heath's petition.

Secondly. That part of the report relating to the difference between the receipts of the messengers furnished the committee by me, and the statement made by the committee, arose in this way; the committee requested me to get the receipts of those persons, who did, on application, furnish the same without any attempt on my part to get any sum, as you will see from Thomas's certificate, (No. 10;) who never heard of any error being made in their calculation until after the report of the committee was made to the House: that, when I was before the committee, I did point out to the committee the difference between their receipts and the resolution, and observed that those persons generally had accounts for extra services, which I supposed made the difference.

And lastly. To the charge of Messrs. Way and Weightman, which the committee say must have been allowed at the Treasury at the last settlement; their receipts were furnished me in the same manner that those of the messengers were, without any particular sum being asked by me, which will appear from their statement and letter, which I observe they furnished, which shows I did not get as much as ought to have been obtained, as will appear from said statement. I beg leave to state that the procuring and furnishing the above receipts were without your knowledge; and, from the circumstance stated by Mr. Way about the key of my drawer, I well recollect, and have no hesitation in saying those accounts were not charged in the last settlement, but have no positive data to go on, having all the vouchers and the book wherein the same were entered, burnt in the Capitol on the 24th August last.

I am yours, &c.

GEORGE MAGRUDER.

P. MAGRUDER, *Clerk House of Representatives, U. S.*

No. 8.

Certificate of General W. Smith.

On the 19th August last, the troops composing the first brigade of militia District of Columbia, were ordered into service. They assembled according to order, and were dismissed late in the evening, with orders to assemble early in the ensuing morning, and ready to march as might be ordered. This order was complied with. The brigade marched on the 20th from Washington, crossed the Eastern Branch, and on the following day marched to

the Wood Yard, and remained in that vicinity until the evening of the 23d, when, by orders from General Winder, it returned late at night to the city. On the ensuing day the troops marched for Bladensburg, were in the action there, returned that night to Tenley town, and on Thursday, the 25th, reached Montgomery court-house. On the 26th, marched upon Baltimore; but on the 27th, received orders and marched for Washington and Georgetown, where they arrived late in the evening of that day. In all those movements, from the commencement of service on the 19th August, to the evening of the 27th, Colonel George Magruder, commanding the first regiment of the brigade, was constantly with it, at its head, and always occupied in its requisite details and better preparation for service.

At his particular request Mr. Samuel Burch, one of the clerks to the House of Representatives, was, on Sunday the 21st August, furloughed until further orders, for the purpose of taking charge of the papers and effects of the office to which he belonged.

As witness my hand, this 16th December, 1814.

W. SMITH, *Br. Genl. 1st Col. brigade.*

Colonel GEORGE MAGRUDER.

No. 9.

Certificate of Washington Bowie.

GEORGETOWN, *December* 15, 1814.

I certify, that on the morning of the 24th of August last, Major Marsteller called upon me, as quartermaster of the 1st regiment district militia, commanded by Colonel George Magruder, to make a return of the wagons employed for the use of that regiment; that I did so, and informed him, that I had not more wagons than were absolutely necessary for the transportation of ammunition, provisions, and baggage of the officers and men; that, notwithstanding, he ordered away two of my wagons, and stated that the Secretary of War had said to him, that not more than one wagon to one hundred men should be allowed, and if they were not sufficient to take off the baggage, we must fight for it.

WASHINGTON BOWIE.

No. 10.

Certificate of George N. Thomas.

DECEMBER 15, 1814.

I certify, that Mr. George Magruder called on me to know how much money he had paid me the last session. I calculated that Congress set one hundred and seventy-two days, for which I gave him a receipt for three hundred and seventy-two dollars and fifty cents; this mistake I made myself: Mr. George Magruder made no calculation for me.

GEO. N. THOMAS.

No. 11.

A. & G. Way to Patrick Magruder.

DEAR SIR: WASHINGTON, *December* 16, 1814.

Agreeably to your request, that we should state fully and clearly the time and manner of the settlement of our printing accounts, from the 30th July to the 14th of October, 1813, we subjoin a general account embracing the whole of the printing performed by us, for the first session of the thirteenth Congress.

The business of settling and of receipting accounts is confined to A. Way of our concern. It is perfectly within his recollection, that when, in the clerk's office, about the fifth of August, 1813, he received, as stated below, a check for $2,200. Mr. G. Magruder observed that, having forgot to bring the key of his drawer containing the account, he would check for the round sum, leaving the payment of the balance and receipting the account for some future time. The account for printing, &c. during the recess, of $1,767 72, was presented in the early part of the succeeding session, and on the 15th of December, Mr. G. Magruder paid five hundred dollars on account; and, subsequently, on the 12th of January, 1814, the respective balances due on both accounts were paid, at which time it is probable the accounts were both receipted.

Respectfully yours, &c.

A. & G. WAY.

DR. *House of Representatives United States in account with A. & G. Way,* CR.

1813. May 24, to July 30, to our account for sundry printing, &c. during this period,	$2,263 31	1813. August 5, by Mr. G. Magruder's check for	$2,200 00
July 31, to October 14, to do. do. during this period,	1,767 72	December 15, by do. do.	500 00
		1814. January 12, by do. do.	1,331 03
	$4,031 03		$4,031 03

P. S. On examining the glass-house books, we find the following account for glass furnished for the south wing of the Capitol. The account was passed by the Committee of Accounts, and was paid out of the contingent fund of the House, about the 30th June, 1814.

House of Representatives United States to A. & G. Way, DR.

1813. December 13, for 23 lights glass, 18 by 27½ at $2 50,		$57 50
25 do. 17½ 24,		62 50
		$120 00

Received payment in full, about the 30th June, 1814, of Mr. G. Magruder.

A & G. WAY.

No. 12.

R. C. Weightman to P. Magruder.

DEAR SIR: DECEMBER 16, 1814.

In reply to your note requesting information as to the time and manner of the settlement of one of my printing accounts, viz: from September to December, 1813, for $1,708 50, I have to state that it appears from my books that that account was made out on the 4th December, 1813, and must have been presented on that day, or on the Monday following, which was the 6th; that, on the 6th December, at my request, I was authorized to draw on your brother, Mr. George Magruder, in favor of Messrs. Way, for the amount at thirty days, which was accepted and discounted in the Bank of Washington for my use; that, owing to some informality the notice from the bank did not, as I understand, reach Mr. George Magruder; that the amount of the draft was, in consequence, charged to my account in bank; that, when I stated the circumstance to your brother, he immediately gave me a check for the amount, which was on the 11th of January, 1814, as my bank and check books show; that I presume the account must have been receipted on that day; for, on the day I presented the account, and drew the draft in favor of Messrs. Way, there was no committee to act on my account, Congress having just assembled. These, I believe, are all the circumstances relating to this business; all, at least, that I can gather from my books and my recollection.

I had, on several occasions previous to this, been authorized to draw on you, in anticipation of my accounts, for considerable amounts, before the committee had acted on them.

Respectfully yours,

P. MAGRUDER, Esq. R. C. WEIGHTMAN.

A.

Schedule of credits claimed by the Clerk of the House of Representatives, in addition to the credits allowed by the committee.

To amount of Messrs. Way's account for printing, from 24th May to 30th July, 1813, which was not fully paid and receipted, until the 12th January, 1814; the last account rendered at the Treasury for settlement is stated, on the face of the account, to be on the 7th of that month, consequently did not include this account. See Messrs. Way's letter No. 11, - - - -	$2,263 31
To amount of Messrs. Way's account for printing from 31st July to October 14, 1813, which was also not fully paid, and is in the same situation as the charge above stated, No. 11, - -	1,767 72
To amount of Messrs. Way's account for glass, No. 11, - - - -	120 00
To amount of Mr. Weightman's account for printing from 2d August to the 6th December, 1813, which was not paid until 11th January, 1814, and was not included in account rendered at the Treasury, up to the 7th January, 1814. See Mr. Weightman's letter No. 12, - -	1,708 50
To amount of Mr. McCormick's account, No. 13, - - - -	26 00
To amount of Mr. Whetcroft's account, No. 14, - - - -	20 00
To amount of William O'Neal's account, No. 15, - - - -	479 58
To amount of Mr. Harbaugh's account, being the difference between the amount of his account and what has been allowed by the committee, No. 16, - - - -	180 00
To amount of Mr. Cross's account, No. 17, - - - - -	13 87½
	$6,578 98½

NOTE.—On the 19th of September, the day on which the committee struck the balance against the clerk, there was in bank, ready to meet the demands against the contingent fund, the sum of $2,763 16.

[See Reports, No. 377 and 380.]

13th CONGRESS.] No. 379. [3d SESSION.

CUMBERLAND ROAD.

COMMUNICATED TO CONGRESS, JANUARY 2, 1815.

To the Senate and House of Representatives of the United States: JANUARY 2, 1815.

I lay before Congress a report of the Secretary of the Treasury, containing a statement of proceedings under the "Act to regulate the laying out and making a road from Cumberland, in the State of Maryland, to the State of Ohio."

JAMES MADISON.

SIR: TREASURY DEPARTMENT, *December* 31, 1814.

I have the honor to transmit the report of the superintendent of the Cumberland road of the progress made in that work during the present year, and the state in which it now remains.

I have the honor to be, very respectfully, sir, your obedient servant,

A. J. DALLAS.

The PRESIDENT OF THE UNITED STATES.

SIR: CUMBERLAND, *December* 19, 1814.

In my last report of the progress of the Western road I informed you that the first ten miles were completed, since which the side roads, banks, &c. have been repaired.

The second letting, four sections, about eleven miles in length, is now generally used by the traveller. The pavement is complete, except from a half to three-fourths of a mile, and the side roads are much in the same state of forwardness. This part of the road would have been entirely completed early this fall but for the very uncommon rainy and wet summer we have had, which has impeded the progress of the work very considerably.

On the third letting there is nine sections about eighteen miles in length. On the two first, ninth, and tenth, containing about four and three quarter miles, little progress is made. On the 11th, about one and three quarter miles, nearly the whole of the levelling is done, and the greater part stoned. The twelfth, thirteenth, and fourteenth sections, containing about five and three quarter miles, are in a state of great forwardness, nearly the whole of the levelling done, and at least two-thirds of the paving is completed. On the remaining three sections, containing about six miles, but little is done. Taking this part of the work into view, it may be understood that about eight miles is in great forwardness and nearly completed, and on ten but little progress is made, except the mason work, which is nearly finished. Adding the whole of the work done together, it may be considered about twenty-eight miles, and eleven yet to be made, which will complete the whole of the work contracted for. The eleven miles are unequally divided between three contractors; one of them, it is expected, will complete his work early next spring; another, early in the fall, and the third may not complete his before late next season. With a view to show that some of the contractors will be thrown idle, if more work is not let early next season, I have been induced to be thus particular in stating the situation of the work at present, and the probable state it will be in early next summer.

I had nearly completed a location from the end of the work contracted for, to Uniontown, about twenty-one miles, and should have reported the work; but as the contractors did not proceed with that speed I expected, I thought it prudent to defer this report, and take time to re-examine the ground. As much time, pains, and care is necessary in fixing on the best ground, and shortest distance through this mountainous country, I will have the notes ready early next spring, when more work can be let, if thought advisable; we shall cross the present travelled road about eleven miles from the end of the present work. This distance would give us another year's work, or we might contract to the west foot of Laurel Hill, about eighteen miles; the old road, and the location, will not be more than thirty to forty perches apart at this point, and the ground quite level and firm between them.

Thirty-nine miles is the end of the work now contracted for, and places us on the east bank of the big Youghiogeny river, which must be bridged, and ought to be commenced as early next season as the weather and the water will admit. This work has been put off with a view to ascertain with what success we should succeed in building the bridge of eighty feet span across the little Youghiogeny river, which we have now so far completed, that no doubt exists as to our ability to build bridges of any size that may be thought necessary on this road. The cost of a stone bridge (which I prefer on roads much travelled) across the big Youghiogeny, will be about $40,000; of wood it may be built for the one-half of this sum; but, as it is probable all the bridges to the Monongahela will be of stone, and permanently built, I would advise building this bridge likewise of stone, unless it should be found that the necessary materials cannot be had.

As I have no knowledge of the sum appropriated, of course cannot say what additional appropriation will be necessary to complete this work to any particular point, and, therefore, recommend calculating the road at about $7,500 per mile for that done, and that yet to be made. This sum, it is expected, will include every expense on an average, when nothing but common bridging is required.

No difficulty, as yet, presented itself requiring legislative aid, except for keeping the road in repair, and to prevent abuses to the work by mischievous persons, and for which immediate provision ought to be made. On reference to a bill, forwarded on the 29th ultimo, my views, and the provisions thought necessary, will be fully explained.

All which is respectfully submitted by yours, &c.

DAVID SHRIVER, Jun.

Hon. Alexander J. Dallas, *Secretary of the Treasury.*

13th Congress.] No. 380. [3d Session.

ADJUSTMENT OF THE CONTINGENT ACCOUNT OF THE CLERK OF THE HOUSE OF REPRESENTATIVES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 16, 1815.

Mr. Pearson, from the committee to whom was referred the letter from the Clerk of the House of Representatives, of the 19th December last, and to whom was recommitted their report of December 12, 1814, on the same subject, made the following report:

That they have carefully examined the several statements in their former report, and given due consideration to the statements and suggestions of the clerk in his letter of 19th December last, from all which they are unable, materially, to vary the result of their former inquiry. As to the destruction of the library and records of the House of Representatives, the committee entertain the same opinion which they before expressed. The circumstances stated by the clerk, relative to his absence and the cause of it, as, also, the military requisition on most of the clerks in his office from the 19th, (or rather the 20th of August, the day on which they marched from the city,) had been previously submitted to the consideration of the committee; they conceive the error or negligence consisted not so much in delaying to pack up the effects of the office till the 22d of August, as the neglect to provide the means of transportation, which might have been done by the clerk who remained in the office, or any agent employed for that purpose.

The committee repeat their former statement, that no efforts were made to "secure the library and papers appertaining to the office of the House of Representatives, till the afternoon of the 22d of August."

As to the statement of the clerk, "that the enemy was not in any of the rivers leading to this place, or their force sufficient in the bay or on the coast the latter part of July, to justify the expectation of an attack on the seat of Government," the committee think differently, and beg leave to refer to the report of the committee appointed

to inquire into the causes of the invasion of the city, and particularly to the letters from General Winder to the Secretary of War, from the 9th of July, to the 1st of August, inclusive. As to the statements in the former report, derived from the heads of the Departments, the committee will only remark, that those sources of information are usual, and presumed to be correct. They were, however, induced, in some measure, to apply to them, from a representation made to them by Mr. George Magruder, that he was influenced by the conduct of those Departments in relation to the removal and securing their effects, as also appears from the letter of Mr. Burch, of 15th September, 1814. If the information from the Departments is incorrect, it may be unfortunate for the clerk, but cannot be the fault of this committee.

In regard to the expenditures of the contingent fund of the House, the committee have derived little additional information from the statement of the clerk; which appears to the committee to consist of inferences derived, in most respects, from incorrect premises, and from information given by his chief clerk, and not from any express knowledge of his own.

The statement by the clerk, "that the amounts drawn at different times from the Treasury, have always been so drawn under the direction of the Committee of Accounts, after they had received satisfactory information that the funds already drawn were expended," is not correct, as will appear from a statement herewith submitted from the Committee of Accounts, marked C.

As to the error which the committee noticed in their former report, in the account submitted by Mr. George Magruder, for expenses of messengers and servants of the House, the committee merely stated the fact, without making any remark; they now think it their duty to state, that those accounts were submitted to the committee by George Magruder, and are in his hand-writing; that two of the accounts, viz: James Claxton and Oswald Dunn, are correct; that the other five are incorrect. The committee are under the impression, that George Magruder was informed by them that the accounts were overcharged, and that he did not attempt to correct or explain them, except by observing that he presumed some extra services had been performed. The committee did not know that Thomas (whose certificate the clerk has obtained) was considered the principal messenger; on the contrary they believed Spalden was the principal messenger, and in whose account there was the greatest error; they, therefore, gave him notice of the error in his account; his reply was, "that he signed the receipt but did not make the figures;" he also stated that he believed his account was about $700, having estimated the last session of Congress one month longer than it really was.

One or two of the other messengers were spoken to on the subject; they appeared not to have a distinct recollection of the amount they had received. Whether those accounts were made out by the messengers or not, the committee deem very immaterial; they ought not to have been submitted to by the clerk, without ascertaining their correctness, as he must have been presumed to have had the means of doing so.

The accounts claimed by the clerk, in addition to the sums heretofore allowed by the committee, for payments made to the Messrs. Way and Weightman, consist of charges for printing, from the 24th May, 1813, to the 6th of December of the same year, amounting to $5,739 53. The first account of the Messrs. Way, is $2,263 31, for printing from 24th May, to 30th July, 1813. This account was passed by the Committee of Accounts, during the summer session of 1813, and is admitted to have been paid on the 5th of August, of that year, except a balance of $63 31. The second account is from the 31st of July, to the 14th October, 1813, for $1,767 72, which account was also passed by the Committee of Accounts in the early part of the last session, and on the 15th December, $500 were paid on those accounts, leaving a balance of $1,331 03. At what time those accounts were receipted, or what was the date of the check given for this balance, is not ascertained; the check was paid at the Union Bank, on the 12th of January, but at what time it was drawn does not appear, although the committee have applied to G. Magruder for this information, as will appear by the paper herewith submitted, marked M.

Mr. Weightman's account for printing from the 2d of August, to the 6th of December, 1813, amounting to $1,708 50, was rendered on the 6th of December, and credited on that day, in Mr. Weightman's books, by P. Magruder's draft, at thirty days for that sum, which was finally paid on the 11th of January, 1814, in the manner stated by Mr. Weightman, herewith submitted, marked W. But whether the account was receipted on that day, or previously, is not ascertained.

The claim of the clerk, to have those accounts allowed, as not being included in the settlement with the Treasury in January last, is founded on the presumption that the accounts settled at that time were up to the seventh only of that month; (or, what is a most extraordinary supposition, that they were not up to that date, as the Auditor's was the first office in which they were deposited for settlement.) The committee have distinctly ascertained that the date, 7th of January, 1814, neither refers to the time of settlement, or the time of depositing the accounts, but to the date of the last receipt. They have also ascertained, that many of the receipts on the accounts settled, were without date, and particularly the accounts of Messrs. Way and Weightman.

They have also ascertained from the chief clerk in the Auditor's office, that the accounts of the Clerk of the House of Representatives, which were settled in January last, were first deposited with him, and that they did not remain in his possession three days, before they were stated and passed by him, on the 14th of January, 1814. Vide Mr. Ferrall's statement, marked F.

From these facts and other circumstances which have come to the knowledge of the committee, they are satisfied that those accounts, as also those of Mr. McCormick, O'Neal, and Harbaugh, were included in the last settlement.

As the clerk was indebted at the last settlement more than $6,000, and as he had in his hands funds to a very considerable amount, from the 3d of August, 1813, the committee conceive he had every inducement to pay accounts existing previous to the settlement, and particularly small balances which were due on large accounts, (as in the case of Messrs. Way,) in order to obtain the proper vouchers, and thus reduce the balance which would have otherwise stood charged against him at the Treasury. It appears from the accounts which have been laid before the committee that greater amounts were paid between the 10th and 12th of January, inclusive, than during the three weeks preceding, or eight weeks subsequent. The committee, therefore, infer, that the numerous payments made betwen the 10th and 12th of January, were with a view to the settlement about to be made. If those vouchers were to be held over until the year 1815, it was of no moment to the clerk, whether they were paid in January, or subsequently; and it will be seen from Mr. George Magruder's answer to the interrogatories before referred to, marked M, that he was unable to point the committee to any one account paid between the 12th of January and the 12th of March, 1814.

Although the clerk states, in a note to his communication of the 19th December, that, on the 19th September, 1814, there was in bank, ready to meet the demands against the contingent fund, the sum of $2,863 16, the committee have been unable to know, from the clerk, in what bank this sum was on that day: vide G. Magruder's answer to interrogatories marked M. They presume, however, it was in the Bank of Washington; as it appears from the books of that bank, that, on the 24th August, the day on which the clerk struck that balance against himself, there was about that sum due in the name of G. Magruder, being the balance of $34,288 of the contingent fund

appropriation, which had been deposited in that bank between the 12th of March and 18th April, inclusive, in the year 1814, of which sum the committee have ascertained that more than $4,000 was applied to private uses; from which circumstance, the committee are inclined to the belief, that this balance (of only a part of the contingent fund) was the data from which the account first exhibited by the clerk to the committee was made out. Had the balance due by the clerk on his last settlement, viz: $6,574, and the warrant dated 15th January, 1814, for $10,000 been deposited in the Bank of Washington, or had the clerk accounted for the application of those sums towards defraying the contingent expenses of the House, there would have been little difficulty in settling his accounts. These two sums added to the amount drawn from the Washington bank for private use, make upwards of $20,500, an amount not varying very much from the sum which the committee think he is now deficient.

The committee, judging either from the relative expenses of former sessions of Congress, or, as they have done, from the accounts specifically examined by them, are unable to credit the clerk for more than $30,668 78, leaving a balance of $20,194 78 due from him to the United States, agreeably to the supplementary account herewith submitted, marked A. They, therefore, recommend the following resolution:

Resolved, That Patrick Magruder, Clerk of the House of Representatives, be credited at the proper office in the Treasury Department, for the sum of $30,668 78, for expenditures on account of contingent expenses of the House, since his last settlement. And that a copy of this and the former report of the same committee be filed in the Auditor's office.

C.

SIR: HOUSE OF REPRESENTATIVES, *January* 9, 1815.

In compliance with your request, the Committee of Accounts for the second session of the thirteenth Congress, offer a few words in explanation of part of a letter from the Clerk of the House of Representatives of the 19th ultimo. In said letter, page 6th, he states, "the amounts drawn at different times at the Treasury, have always been so drawn under the direction of the Committee of Accounts after they had received satisfactory information that the funds already drawn had been expended."

The committee considered it their duty to superintend and control the expenditure of the contingent funds of the House of Representatives, and to audit and settle all accounts which were charged thereon. When accounts have been audited and settled, the committee have drawn on the Treasury to enable the clerk to pay the same. It has also been considered necessary in many cases to advance money on contracts before the accounts could be audited and settled. That the clerk might have funds not only to pay accounts audited and settled, but also to make advances on contracts, the committee have from time to time drawn in his favor, on the Treasury, without requiring proof that the funds previously drawn had been expended. The books of the committee showed what accounts had been audited and settled, and the amount; but they had no evidence of what had been advanced.

WILLIAM BARNETT.

Hon. JOSEPH PEARSON, *Chairman, &c.*

M.

SIR: DECEMBER 28, 1814.

Will you be kind enough to inform the committee in which bank the balance of $2,863 16 remained as stated in the note annexed to schedule A, accompanying the last communication from Mr. P. Magruder? Also, if you can ascertain the fact, when the money, drawn on the warrant issued the 15th January, 1814, was deposited or used for discharging contingent expenses of the House? And, further, how the money drawn from Washington Bank out of the money belonging to the contingent fund, and applied to your private use, was reimbursed?

You will also oblige the committee by laying before them two checks, drawn in January, 1814, on the Union Bank, one in favor of A. & G. Way, for $1,331 03; the other in favor of O'Neale, for $478 or thereabouts.

The committee would wish to be furnished with the different sums you can recollect, paid on account of the contingent expenses, between the 14th January, 1814, and the 12th March, the same year.

Sir, your obedient servant,

JO. PEARSON.

Mr. G. MAGRUDER.

P. S. You will be good enough to put your answer on this sheet.

SIR:

In reply to the annexed note, I am ready to account for the $2,863 16, or to meet the orders of the Committee of Accounts in the Bank of Washington, or any other bank at sight.

2d. I cannot, at this moment, charge my memory in what bank I deposited any particular warrant.

3d. When did I reimburse the money drawn for my private use? Whenever I drew any money from that bank, if it was not drawn to pay the expenses of the House directly, it was to replace money drawn from elsewhere of my own, and paid for contingent expenses; never having been directed by the Committee of Accounts, or the clerk, where or how this money should be kept, it was, unfortunately for me, blended with my private accounts. If I could have ever contemplated that the Capitol was to have been destroyed in the manner it was, more care would have been observed.

The committee must be aware of the difficulty attending this business, from the contradictory statements made by persons who did receive public money from me. The committee will allow any sum they may deem right. The check given to O'Neale is enclosed; the other I have not been able to lay my hands on, but will endeavor so to do. I ask the return of the check. Yours,

GEO. MAGRUDER.

W.

Mr. Weightman's statement.

That, on the 6th December, 1813, Mr. Magruder gave him a note for $1,708 50, which was paid in the Bank of Washington on the 11th January, 1814. Mr. Weightman is certain, from his custom, that he did not give a receipt for the sum of $1,708 50, at the time the note was given, nor does he recollect that a receipt was given on the 11th January, when it was paid; but if on that day it had been required, a receipt would, and might have been given, and probably was given.

R. C. WEIGHTMAN.

N. B. My impression is, that I have not, in any instance, dated the receipt to any of the accounts against the House of Representatives, without I have been required to do so, and I do not recollect having ever been required.

R. C. W.

F.

Mr. Ferrall's testimony taken on the 28th December, 1814.

Question. What does the date 7th January refer to?
Answer. The last date to a receipt.
Question. Are the receipts always dated?
Answer. They are not.
Question. How long do you think the vouchers on settlement in January, 1814, remained in your hands?
Answer. I am confident they did not remain three days.

P. FERRALL.

A.

A supplementary statement, being a continuation of Patrick Magruder's account, accompanying report made the 12th December, 1814, *on the same subject.*

Dr.		
To balance brought from statement A, accompanying report made the 12th Dec. 1814,	$19,874 58½	
To 22 cords of wood, at ten dollars per cord, furnished library, improperly charged to contingent expenses of the House in former statement, - - -	220	
To that part of Mr. Sprigg's account for his services rendered the first session of the thirteenth Congress, which account was passed the same session by Committee of Accounts, and paid July 27, 1813; he was credited for this sum too much in the former statement, - - - - - - -	166 67	
To James Corcoran's account for carpeting; this was receipted on the 10th of January, 1814, prior to depositing the vouchers in the office of the Auditor for last settlement, and was again credited in the statement accompanying former report, -	166	
		$20,427 25½
Cr.		
By paying Messrs. Way's account for glass, - - - - -	120	
By paying Mr. Whetcroft for writing in clerk's office, - - - -	20	
By paying Mr. Cross for mason's work, - - - - -	13 87½

1814, Sept. 19. Balance due from clerk, - - - - -	-	$20,194 38

13th Congress.] No. 381. [3d Session.

CUMBERLAND ROAD.

COMMUNICATED TO THE SENATE, JANUARY 24, 1815.

Mr. Smith, from the committee to whom was referred the report of the Secretary of the Treasury, containing a statement of proceedings under the act to regulate the laying out and making a road from Cumberland, in the State of Maryland, to the State of Ohio, reported:

That the act for the admission of the State of Ohio into the Union has appropriated five per cent. of the nett proceeds of the land laying within that State, and sold by Congress, (from and after the 30th day of June, 1802,) to the laying out and making roads leading from the navigable waters emptying into the Atlantic, to the river Ohio, and through the said State of Ohio; and by a subsequent law, passed the 3d of March, 1803, Congress appropriated three of the said five per cent. to laying out and making roads within the State of Ohio, leaving two per cent. unexpended; which two per cent. was, by an act passed the 29th of March, 1806, appropriated to the laying out and making a road from Cumberland, in the State of Maryland, to the State of Ohio; that under the said act the President of the United States was authorized to appoint three commissioners to lay out the said road. It appears that commissioners were appointed, and that the road has been laid out by them agreeably to their instructions; and it also appears by a letter of Mr. David Shriver, (the superintendent of the road) contained in the report of the Secretary of the Treasury, that the making of the said road is progressing as fast as could reasonably be expected; that the whole of the work contracted for is thirty-nine miles, of which twenty-eight may be considered as nearly finished; that a stone bridge of eighty feet span over the Little Youghiogeny river is nearly completed.

It also appears that the thirty-nine miles contracted for, being the road to the Big Youghiogeny, from thence to where it will intersect the old road is eleven miles, which your committee think ought to be completed.

The committee find that a turnpike road from Baltimore, extending sixty miles in a direct line towards Cumberland has been completed, and that the banks of Maryland have, for valuable considerations, agreed to construct a turnpike road from Conecocheague creek to Cumberland; so that there is a well founded expectation that a turnpike road from Baltimore to Cumberland will be completed before the road from thence to the Ohio can be finished.

The committee find that Congress have appropriated in advance of the fund of two per cent. at different times, $287,320 25.

The committee submit the following estimate and statement, which they think may be considered tolerably correct, to wit:

The thirty-nine miles of road contracted for will cost $7,500 per mile, - -	$292,500
A stone bridge has been constructed of eighty feet span across the Little Youghiogeny, which cost	14,000
	$306,500

The sums paid from the Treasury prior to the 31st of December, 1814, amount to	194,631 80	
The balance of the appropriation heretofore made, and which remained undrawn on the 1st January, 1815, was - - - -	92,688 45	
		287,320 25
So that an additional appropriation, to complete the work already contracted for, is wanted of about - - - - - - - -		19,179 75
To carry the road eleven miles beyond the Big Youghiogeny, where it will intersect the road now travelled, and which will be probably another year's work, will cost, $7,500 per mile,		82,500 00
		$101,679 75
To construct the bridge over the Big Youghiogeny, it will require, if built of stone, a further sum of - - - - - - - -		40,000 00
		$141,679 75
If it should be determined to provide at this time for carrying the road to the western foot of Laurel Hill, seven miles further, it will require, in addition, - - -		52,500 00
		$194,179 75
If, lastly, to Uniontown, three miles further, - - - -		22,500 00
		$216,679 75

It will appear, from the foregoing statement, that Congress have already appropriated in advance of the fund of two per cent. on the nett proceeds of the sales of land within the State of Ohio, the sum of $287,320 25, and have paid in part the sum of - - - - - - $194,631 80

It appears from the report of the Land Office to the Treasury Department, that the said fund had yielded to the Treasury, prior to the 1st day of October, 1814, the sum of - - 107,004 48

So that the amount of the advance actually made by the Treasury, is only - - $87,627 32

From this view of the subject the committee are of opinion that the fund appropriated for the making the said road is fully adequate to the object.

The effect of an appropriation during the present session of Congress, for any portion of this work, will be only to authorize the Treasury to make contracts during the present year for carrying it on. Very little, if any, money will be drawn from the Treasury, except for completing the contracts already made, until the year 1816.

The committee are of opinion that an appropriation ought to be made to enable the Treasury to make contracts to carry the new road to where it will intersect the road now travelled on, and sufficient for the constructing of a stone bridge over the Big Youghiogeny; for which purpose they submit a bill.

13th Congress.] No. 382. [3d Session.

RESIGNATION OF THE CLERK OF THE HOUSE OF REPRESENTATIVES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 28, 1815.

SIR: CLERK'S OFFICE, *January* 28, 1815.

It is with reluctance I cannot well express that I find it necessary again to throw myself on your politeness, as the medium of communication to the House on a subject no less painful to me than it must be to them. This is imposed upon me as a duty, as well by the arguments derived by those inimical to me, (as I learn,) from silence in regard to the last report of the committee appointed at my request, to investigate the situation of the office under my charge, as by the indications afforded by the recent vote of the House. In regard to the accounts of my office, the correctness of which has been arraigned by a committee of the House, I have nothing to add to what I have said on a former occasion on this subject, except to reassert my entire innocence and ignorance of any misapplication of the public moneys, and to express my conscientious belief that the public money has been faithfully disbursed by my principal clerk, to whom it was confided, and that he will be able to account for it at the Treasury, and would have been able to do so at this day, had not the unfortunate conflagration of the Capitol destroyed his accounts, and subjected his conduct to a scrutiny, in which the fact of a deficiency of the vouchers destroyed has been adduced as evidence against him.

Could I presume so far, it might be an easy task to exhibit errors of great importance in that part of the report of the committee on my conduct which relates to the account of the contingent fund. It is my belief, demonstrable, that its errors are not limited to hundreds, or to any moderate number of thousands of dollars; still easier would it be to dissipate almost every argument used in debate on that report, tending, by assertion or implication, to prejudice the House against me personally. But, sir, he who is put upon his trial without opportunity to defend himself from accusations adduced against him, can expect no benefit from an after appeal to those who have already pronounced judgment against him. Little, sir, did I ever expect to have to answer to this House on charges affecting my character at this advanced period of my life. Since I passed the age of eighteen years I have been in public life: by those who knew me best I have been selected to fill various public stations, judicial as well as legislative, under both State and General Governments, and no man has ever before appeared to impute to me malfeasance in the duties of my station. In every situation in which it has pleased my country to place me, I have endeavored to sustain a character more dear to me than wealth; and the attempt to rob me of a jewel more precious than life; to deprive me of that honest fame, which I had acquired by a long course of public service, however it may temporarily succeed in this body, cannot eventually depress my character or standing in the eyes of the American people.

Truth is great, and will prevail. I court its light, and shrink not from its test. The office of Clerk of this House, arduous and trying as are the duties to be performed during the session of Congress, has never been considered by me, in a pecuniary point of view, an object. Two years since I should have resigned it but for the dissuasions of my friends. I was too proud of the honor conferred by the flattering suffrage I had received from the honorable House. I retained my seat, and how cruelly I am treated for that determination, let recent events decide.

But, sir, it is not my intention to weary you or the House by reiterating those unavailable regrets which force themselves on my bosom. It is probable, sir, that I might, by resorting to humiliating solicitation, reinstate myself in my former footing in the House; but there is implanted within my bosom a principle much more powerful than the love of popularity or of office—it is the sense of honor which forbids solicitation from, or even association with, those who entertain a suspicion derogatory to my fair fame. That there are such among those whom I have once been proud to call my political friends, the motion now pending in the House, and the manner in which it has been supported, sufficiently indicates. After a struggle between contending feelings, I have, therefore, determined to resign the office I now hold, to permit those by whom I am persecuted to attain, with greater ease, an object to which they have been willing to sacrifice not only my family but my reputation. I beg the Speaker and the House to accept of this as my resignation of the office of Clerk of the House of Representatives. I take this last opportunity to offer to yourself and the House the homage of my unfeigned respect; and to those who have stood forth to befriend an injured man, and resisted the accusations against me, the assurances of my eternal gratitude. My successor in office, let him be whom he may, I wish him an easier and happier time in the discharge of his duties than I have had.

I am, sir, with respect,

PATRICK MAGRUDER.

To the Hon. SPEAKER *of the House of Representatives.*

13th CONGRESS.] No. 383. [3d SESSION.

LIST OF PATENTEES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 30, 1815.

SIR: DEPARTMENT OF STATE, *January* 1, 1815.

In pursuance of the resolution of the House of Representatives of the United States, dated January 13, 1812, I have the honor of transmitting a list of persons who have invented any new or useful art or machine, manufacture, or composition of matter, or any improvement thereon, and to whom patents have been issued for the same from this office, from the 31st day of December, 1813, to the 1st day of January, 1815, with the dates and general objects of such patents; and also the residence of the patentees, as far as they could be ascertained.

JAMES MONROE.

To the Hon. the SPEAKER *of the House of Representatives.*

List of the names of persons to whom patents have been issued for new and useful arts, &c.

Inventions.	When issued.	Names of patentees.	Residence.
	1814.		
In the churn,	Jan. 5	William Humphrey,	Ohio.
In steelyards and scales,	6	Zena Phinney,	Green county, New York.
In the loom,	7	John M. Morel Guiramond,	Baltimore.
Rheumatic pills,	13	Ezra Deane,	Biddeford, Suffolk co., Mass.
A machine for cutting nails,	13	Richard Moore,	Lycoming county, Penn.
The rapid boat,	14	Frederick Wm. Geissenhainer,	New York.
A hopper filler for bolting flour, &c.	15	Abraham Hershe,	Lancaster, Lancaster co., Penn.
A throstle for spinning wool, cotton, flax, and hemp,	21	Stephen Shallcross,	New York.
A zigzag shearing machine,	21	Edmund Durrin,	Weathersfield, Windsor co., Vt.
A portable warm and hot bath,	21	Samuel K. Jennings,	Lynchburg, Virginia.
A mode of manufacturing felt hats from a mixture of clothiers' flocks with sheeps' wool,	21	Jedediah Carleton,	Salem, Rockingham co., N. H.
In water mills,	25	John Owings,	Baltimore.
An impressed roller for making knives, spoons, &c.	25	John Owings,	Baltimore.
A machine for heading nails,	26	Samuel Rogers,	Bridgewater, Plymouth co., Mas.
In chimney fire-places, air-flues, and ventilators, on the principle of dense air seeking, like water, its level,	28	John C. Brush,	Washington city.
A loom for warping, or mounting the warp on the yarn beam,	Feb. 1	Calvin Whitney,	Dedham, Norfolk co., Mass.
In manufacturing salt,	1	William J. Lewis.	
A bathing machine,	1	William Merritt,	New York.
In steamboats,	2	Daniel Dod,	Mendham, New Jersey.
A washing machine,	4	John Gray,	Eaton, Madison county, N. Y.
Lee's New London bilious pills,	8	Samuel H. P. Lee,	New London, Connecticut.

LIST OF PATENTEES—Continued.

Inventions.	When issued.	Names of patentees.	Residence.
	1814.		
In mills,	Feb. 8	Ebenezer Bryant,	New London, Connecticut.
In propelling boats by animal power,	9	Moses Rogers,	New York.
In manufacturing iron ore into paint,	10	Borden Wilbor,	Whitestown, Oneida co., N. Y.
In boring guns, pistols, &c. by an auger, called a pistol groove or twisted screw auger,	12	Daniel Pettibone,	Philadelphia.
In looms,	18	John Heavin,	Montgomery county, Virginia.
Machine for mowing grass, &c.	19	Peter Baker,	Long Island, New York.
In looms,	19	Daniel Briggs,	Canaan, Litchfield, Conn.
A cylindrical brad, sprig, and nail machine,	21	Robert Turner,	Boston.
An ardent spirit proof,	21	Benjamin Miller,	North Salem, Westchester co., New York.
In rasping and grinding dyewoods, &c.	March 1	Joseph Broad,	Springfield, Massachusetts.
A machine for grinding potatoes,	1	Jesse King,	Florida, Berkshire co., N. Y.
In the bar-share plough,	1	John Butler & Joshua Butler.	John Butler, Brandywine, and Jos. Butler, Chester co., Pa.
In making bad butter good, and in making family butter with lard,	4	Zena Phinney,	Green county, New York.
An eleven plate stove, for boiling, baking, and warming rooms,	7	Charles Postley,	New York city.
In using pelts for manufacturing paper,	7	John McThorndike.	
For cutting files,	7	Charles Platt & Daniel Platt,	Sharon, Litchfield co., Conn.
For cutting, heading, filing, turning, sawing the head, and cutting the thread of screws,	7	James Gleason,	Philadelphia.
For smoothing card boards,	10	Daniel Stearns,	Brattleborough, Windham co., [Vt.
An air furnace for melting oars, refining and heating iron with stone coal,	16	Thomas Gregg,	Connellsville, Fayette co., Pa.
The expeditious sawyer,	18	John H. Morison,	Boscowen, Hillsboro' co., N.H.
A ball-proof vessel, to be propelled by steam applied under water,	19	Thomas Gregg,	Connellsville, Fayette co., Pa.
A water loom,	21	Brightberry Brown,	Albemarle, Virginia.
A family billy and jenny for spinning, &c.	23	Ebenezer Smith,	Paris, Oneida county, N. Y.
A perpetual steam still,	24	John James Giraud,	Baltimore.
In matchlights and boxes,	26	Richard Allison and Nl. Stout Allison,	Burlington, New Jersey.
A spinning wheel,	26	Harvey Wright and Orlestus Roberts,	Bristol, Hartford county, Conn.
A composition for making black lead pencils,	26	Christopher Osgood,	Salem, Essex county, Mass.
A machine for shearing cloths,	26	Isaac Sanford,	Providence, Rhode Island.
A substitute for teasels and cards for raising the nap of cloths,	26	Isaac Sanford,	Providence, Rhode Island.
For cutting combs at a single operation,	26	Jos. Heartwell Derby,	Leominster.
A medicine called canker drops,	28	David Holbrook,	Onondaga county, New York.
A machine for raising water,	31	Jacob Hartman,	Lampeter, Lancaster co., Pa.
A machine for hulling cotton seed,	31	John Lineback,	Salem, Stoke county, N. C.
A mode of putting leather together by wooden or metal pegs,	April 2	Sidney B. Browne,	Westchester county, N. Y.
In augers,	2	Martin Howe,	New York.
A vibrating nail cutting machine,	2	Ebenezer A. Lester,	Herkimer, New York.
A steam tow-boat and warping windlass,	2	John L. Sullivan,	Boston.
For heading cut nails,	7	Jacob Davey,	Fair Haven, Rutland co., Vt.
For cutting brads, nails, and spikes, of all sizes,	8	Stephen Belknap,	Washington city.
For manufacturing salt,	8	Thomas Hord,	Caroline county, Virginia.
In stills,	9	Ezra Talmage,	Richmond, Virginia.
A machine for planting corn,	12	John Blocher,	Lancaster, Pennsylvania.
A water engine,	13	Joel M. Dupuy,	Woodford, Kentucky.
In the torpedo,	14	Ebenezer Ford,	Baltimore.
In making lead pipes for conveying water,	18	Alpheus Todd,	Oxford, Grafton county, N. H.
For grinding paints,	18	Peter Breasted,	Green county, New York.
In wheels for spinning with heads, to be used for spinning and quilling,	18	Emery Russell,	Long Meadow, Hamden c., Mas.
In looms,	18	John Coulter and Stephen Gano,	Berkley county, Virginia.
In bark mills,	18	Jared Olds,	Meriden, New Haven co., Ct.
In wheel heads,	18	Emery Russell,	Long Meadow, Hamden c., Mas.
In distillation,	19	John W. Alder,	Pennsboro', Lycoming co., Pa.
In carriage springs,	22	Richard Humphries & Israel C. Humphries,	[Del. Cantwell's bridge, Newcastle,
A salt water evaporator,	23	William M. Hawkins,	King and Queen county, Va.
In steam engines and steamboats,	23	John Dowers, Jun.	Philadelphia.
The atmospherical house warmer and smoke driver,	27	Robert Annesly,	Philadelphia.
In the loom,	27	Jacob Spinkle,	Wythe C. H., Wythe co., Va.
In lamps,	27	Edward Clark,	Philadelphia.
A furnace for melting and refining of metals,	May 4	Thos. Barnhurst, Jos. Barnhurst, and William Walker,	Philadelphia.
In making white lead,	5	Elisha De Butts,	Baltimore.
In distilling,	6	Wm. M. B. Wollias, and Hiram P. Barlow,	Oneida county, New York.
In making tin plates,	9	David Noble,	Philadelphia.
A machine for cutting shoes, &c.	9	Benjamin Miller,	Philadelphia.
For cutting files,	11	Silas Hawes,	Bennington, Bennington c., Vt.

LIST OF PATENTEES—Continued.

Inventions.	When issued.	Names of patentees.	Residence.
	1814.		
Improvement on Farnham's horizontal water wheel,	May 12	David Cooper,	Jericho, Chenango co., N. Y.
In the still and condenser,	13	Benjamin Hall,	New Haven, Connecticut.
In the baking, boiling, and steaming stove,	13	Eliphalet B. Coleman,	New Haven, Connecticut.
In inkstands,	13	Oliver Barber,	Hartford, Connecticut.
A family stove,	17	Joseph Tuley,	Frederick county, Virginia.
In andirons,	17	Willaby Dexter,	Winchester, Litchfield co., Ct.
In moulds for casting printing types,	17	Archibald Binney,	Philadelphia.
A fire-proof ceiling,	17	Benjamin Jas. Harris,	Richmond, Virginia.
A guage to be attached to the anvil of a trip hammer for plating out scythes,	17	Benjamin Richardson,	Western, Worcester co., Mass.
For pressing bricks and tiles,	18	Benjamin Porter,	Salem, Massachusetts.
For carding wool,	18	Lewis French,	New Haven, Connecticut.
In casting iron hinges,	18	Cyrus Alger,	Boston.
For splitting and shearing horn for lantern lights, combs, &c.	24	John Pulsifer,	Newbury, Essex co., Mass.
A washing machine,	24	Eliphalet Jaques,	Newburyport, Massachusetts.
An apparatus for making salt,	26	William Hawkins and John D. Hawkins,	Raleigh, North Carolina.
For melting all kinds of ores and metals,	27	Daniel Walworth,	Middletown, Middlesex co.,Ct.
A cheese press,	27	Joseph Goulding,	Worcester, Worcester c.,Mass.
A mode of balancing wheels,	27	John Andrews,	Litchfield, Herkimer c., N. Y.
In manufacturing scythes,	27	Luther Dudley,	Sutton, Worcester co., Mass.
An apparatus for manufacturing salt, boring wells, and pumping water,	28	Richard Deering.	
In making cornices of brick for buildings,	28	Thomas K. Beale,	Alexandria, D. C.
In the German flute,	June 6	William Schaffer,	New York.
A buff or polishing wheel,	6	Aaron Broad,	Litchfield, Connecticut.
In manufacturing screws, ramrods, knives, and forks, &c.	6	Aaron Broad,	Litchfield, Connecticut.
For cutting dye-stuffs, barks, &c.	9	Aaron Broad,	Litchfield, Connecticut.
In manufacturing salt,	10	John I. Cabell,	Lynchburg, Campbell co., Va.
In the bayonet socket,	11	Andrew Wilson,	New York.
The metallic Columbian cup and saucer,	14	John Love,	Baltimore.
For shaving woods for various purposes,	14	Benjamin Hoadley,	Waterbury, Connecticut.
A holdfast for buttons while polishing,	18	Ira Ives,	New Haven, Connecticut.
In machinery for horse boats,	28	David Dunham,	New York.
A bridge and ferry stairs,	28	David Dunham,	New York.
In saddle-trees,	28	Chauncey Stiles, Jun.	Philadelphia.
In boilers,	28	Gabriel N. Philips,	Goshen, New York.
A portable spinning machine,	28	Burgis Allison,	Burlington, New Jersey.
A moveable kitchen,	July 1	George Youle,	New York.
In mould and dipped candles,	1	James Zwisler,	New York.
A machine for shearing cloths,	1	Beriah Swift,	Washington,Dutchess co.,N.Y.
In stove chimneys,	1	Charles Varle,	Fredericktown, Maryland.
In ploughs,	1	Jethro Wood,	Scipio, Cayuga county, N. Y.
In imitating brandy of domestic materials,	2	Henry Moore,	Aurora, New York.
In dies of metals,	2	Benjamin Mead and Giles Richards,	Boston, Massachusetts.
In distilling from grain, &c.	5	Simeon Shirtliff,	Oneida county, New York.
In ploughs,	5	Jonathan Swan,	Scipio, Cayuga county, N. Y.
For pounding rice and other substances,	5	Asa Nourse,	St. Lukes, Beaufort dist. S. C.
In distilling by steam,	5	David Dewey,	Sullivan, Madison co., N. Y.
In carriages,	5	Benjamin Peck,	Philadelphia.
In the stopcock,	5	Daniel Sharman,	Warren, Herkimer co., N. Y.
A machine for weeding corn, and other crops in which the hand hoe is generally used,	7	Charles Hill,	Essex county, Virginia.
In looms,	9	Thomas Siddall,	Bristol township, Philadelphia county, Pennsylvania.
In the head block of the carriage of the saw mill,	9	Joseph Briggs,	Schoharie, New York.
A machine for breaking and dressing flax, hemp, &c.	12	G. H. Rickets & John Kinney, Jun.	Mount Pleasant, Morris county, N. J.
In steam engines,	23	Charles Reynolds,	East Windsor, Hartford, Conn.
An application of various cements for the walls, ceilings, and floors of houses, for the manufacture of sulphuric acid,	Aug. 15	Andrew Scott,	Newbern, North Carolina.
In manufacturing white lead,	15	James Welsh & Thomas Evens,	Philadelphia.
A machine for cleaning clover seed,	16	Henry Spickard,	Fincastle, Botetourt co., Va.
For turning and slitting pinions for wooden clocks.	22	Harris Bronson and Joel Curtis.	H. B. Waterbury, Ct. J. Curtis, of Cairo, Green co., N. Y.
In the time part of the common wooden clock,	22	James Harrison,	Boston.
A machine for pointing wire for clocks, and other purposes,	22	Anson Sperry,	Waterbury, Connecticut.
A mode of boring clock plates,	22	Joel Curtis,	Cairo, Green county, N. Y.
An engine for cutting and pointing the teeth of wheels and pinions for clocks.	22	Joel Curtis and Dimon Bradley.	J. Curtis, Cairo, Green co., N. Y., D. Bradley, Connecticut.
A machine, or engine, for cutting wheels for wooden clocks, and other purposes,	22	Asa Hopkins,	Litchfield, Connecticut.
A machine for making pins used in clothes from the wire at one operation,	22	Moses L. Morse,	Boston.
In chimneys and fire-places,	Sept. 22	Adam Spohn,	Comrio, Berks county, Penn.

LIST OF PATENTEES—Continued.

Inventions.	When issued.	Names of patentees.	Residence.
	1814.		
In making spoons,	Sept. 22	James Ridgway,	Groton, Middlesex co., Mass.
In manufacturing salt,	27	Peter Sarchet, Sen.	Cincinnati, Ohio.
An improvement in Alkana Cobb's machine for making blankets, &c.	30	Jacob Getzendannar,	Frederick county, Maryland.
A wheel mill for grinding tanner's bark,	30	David Pelton,	Lyme, Grafton county, N. H.
In the plough,	Oct. 11	Jedediah Morgan and John B. Harris,	Scipio, Cayuga county, N. Y.
A family loom,	11	Charles Hathaway,	Walton, Delaware co., N. Y.
A machine for shearing cloth,	11	C. Henry Orth and Frederick Strohn,	Steubenville, Jefferson co., Ohio.
For cutting and finishing harness buckles,	12	James Carman,	Hudson, New York.
A composition to be used instead of jostick,	12	Frederick Eckstein & James M'Ilhenney,	Philadelphia.
In the loom,	12	William Wright,	Brookline, N. H.
A machine for making pins and needles,	15	William F. Hill,	New York.
A machine for shaving tanner's bark,	16	Wm. Goodwin & Jonathan Goodwin, Jun.	W. Goodwin, of Lebanon, & J. Goodwin, Jun. Mansfield, Ct.
In suspenders,	17	Martin Nelson,	Philadelphia.
In dyeing silks,	18	Thomas Harrison and Robert Pierpoint,	New York.
For winding spools and bobbins,	18	Augustus C. Sherwood.	
In looms,	18	Seth Craige,	Philadelphia.
In cutting and heading nails,	21	Samuel Rogers,	Bridgewater, Plymouth c., Mas.
In mockasins and socks, called the Tuscarora socks,	21	William Bolton,	Northampton, Massachusetts.
A horn splitting, and comb stamp twining machine.	21	Samuel Hills & Moses Emery, Jun.	Newburyport, Massachusetts.
In cutting, griping, and heading nails,	22	Jesse Reed,	Hanover, Plymouth co., Mass.
In preserving animal and vegetable substances,	24	David Cooley,	New York.
A machine for dressing hemp and flax,	24	G. H. Rickets & John Kinney, Jun.	Morristown, New Jersey.
In the stocking loom,	28	John Bazier, Jun.	Canton, Norfolk county, Mass.
For napping cloth,	28	Daniel Merwin, Jun. and Horace Killogg,	Hudson, New York.
In fanning mills,	29	Samuel Fitch,	Homer, Courtland co., N. Y.
In distilling,	29	Naphtali Hart,	Easton, Northampton co., Pa.
In boilers for, and in making salt,	Nov. 5	Isaac W. Averill,	Salina, Onondago co., N. Y.
In spinning hemp and flax,	8	John Francis Chappins,	New York.
A composition for softening cast or crude iron,	8	Abell Scott, Jun. and Alonzo Selden,	Winchester, Cheshire c., N. H.
A crane, screw, and bale, for raising millstones,	8	Thomas Reynolds,	West Fallowfield, Chester c., Pa.
In the table for the use of ships,	8	George Patrick,	Wilkesbarre, Luzerne c., Pa.
In the bull plough,	9	Rosewell Tousley and Jonathan Swan.	
A machine for sawing shingles,	14	Salmon Fuller,	Indiana Territory.
A heater and condenser for manufacturing spirituous liquors,	18	Thomas Shurley,	Near Madison C. H., Madison county, Virginia.
In cultivating and improving the earth, and raising the largest crops with the greatest facility and celerity,	19	James Hall.	
In temples for looms,	24	Benjamin Rogers,	Beaver creek, Green co., Ohio.
In preparing flax and hemp to be spun into thread,	25	Pinder Antrim,	Philadelphia.
In wheel carriages,	25	HoratioGates Spafford,	Albany, New York.
In looms,	25	Salmon Bronson,	Kent, Litchfield county, Conn.
A magnetic cylinder, called the magnetic separating machine,	25	Samuel Browning,	Franconia, Grafton co., N. H.
A pivot gun carriage,	29	Luke M. Laighton,	Portsmouth, Rockingham co.,
In propelling boats, &c. by steam,	Dec. 1	Nicholas I. Roosevelt,	New Jersey. [N. H.
The farmer's carriage scythe,	2	Theophilus Eaton,	Albany, New York.
In manufacturing cotton wadding,	3	James Beaumont,	Canton, Massachusetts.
A fanning mill,	3	Joel Soper,	Windsor, Hartford co., Conn.
A circular scythe,	6	John Rhodes & Adam Rhodes,	Union township, New York.
A vibrating shearing machine,	7	David Dewey,	Poultney, Rutland county, Vt.
A steam or stove still,	8	John Stone, Jun.	Worthington, Massachusetts.
In the linen wheel head,	8	Brown Smith & Chas. Stewart,	Truxton, Clinton co., N. Y.
A horizontal water wheel for mills,	15	William Cornwell,	Onancock, Accomack co., Va.
In the wheel lathe,	16	Benjamin Hoadley,	New Haven, Connecticut.
A machine for cleaning chimneys,	16	John Bruff,	Baltimore.
In cutting and heading nails,	16	Jesse Reed,	Hanover, Plymouth co., Mass.
In a fishing vessel and nets,	17	James Wills, Jun.	Galloway, Gloucester co., N. J.
In the plough,	17	Henry Shultz,	Lancaster, Pennsylvania.
An alarm bell, to be fixed to a clock or watch,	22	Benj. E. Freymuth,	Philadelphia.
An application of steam to flutter or paddle wheels on the sides of a boat or vessel, as a propelling power,	23	William Thornton,	Washington city, D. C.
In making permanent colors for calicoes,	24	Augustus Boulu,	Philadelphia.
In wooden springs for carriages,	30	Levin Birckhead,	Philadelphia.

13th Congress.] No. 384. [3d Session.

CUMBERLAND ROAD.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 2, 1815.

SIR: TREASURY DEPARTMENT, *January* 26, 1815.

In answer to your letter of the 24th instant, on the subject of the Cumberland road, I have the honor to state—

1st. That the total amount of appropriations made for this object, from the beginning to the year 1814, inclusive, is - - - - - - - $329,861 75

Of which there has been at sundry times carried to the surplus fund, the same not having been actually expended within the time limited by law, sums amounting to - - 42,541 50

$287,320 25

2d. There has been actually paid from the Treasury, as stated in the letter to you from this Department, of February 5, 1814, to the end of the year 1813, sums amounting to $124,307 23

There was paid during the year 1814, - - - 70,324 57

Total amount of payments from the Treasury, - - - - 194,631 80

And there was left, at the end of the year 1814, an unexpended balance of appropriations, of $92,688 45

The contracts which have been already made, and which will carry the road thirty-nine miles from Cumberland to the Big Youghiogeny river, are estimated to require for their completion nearly twenty thousand dollars in addition to the above unexpended balance. This deficiency of appropriation for the contracts already made, arises from the sum of $22,679 75 having been carried to the surplus fund at the end of the year 1813, the expenditures prior to that time not having been as rapid as was expected, and this sum having then remained appropriated and unexpended more than two years. As the contracts now in a state of execution will, perhaps, be completed in the course of the present year, an appropriation of the sum of twenty thousand dollars will be necessary to enable the Treasury to make the payments already stipulated.

It is not probable that any actual expenditures beyond these sums will be required during the year 1815; but as it will be necessary, if the work is to be prosecuted next year, that the contracts for that purpose should be made in the course of the present year; and as those contracts cannot be made unless there be an appropriation to warrant them, it will rest with Congress to decide, by making a further appropriation or not, whether the work shall be prosecuted or abandoned.

If it shall be decided that the work is to go on, the extent to which it is the intention of Congress to authorize it now to be undertaken, or contracted for, will be determined by the amount of the appropriation which shall be made.

For the bridge across the Big Youghiogeny river, if built of wood, twenty thousand dollars would be sufficient; but from the character of permanency and durability which it has been hitherto endeavored to give the whole of this work, and probably from considerations of real economy in the end, one of stone would be preferable, and may be estimated to cost - - - - - - $40,000 00

To carry the road eleven miles beyond the Big Youghiogeny, where it will intersect the road now travelled, and will, if hereafter found necessary, be, from that circumstance, a convenient resting place, and which will, moreover, be probably a year's work, unless more hands are employed than heretofore, will require, at the rate stated by Mr. Shriver of $7,500 a mile to cover all expenses, a further appropriation of - - - - - 82,500 00

And to complete the contracts already made, as above stated, - - - 20,000 00

Total amount to be appropriated under this view of the subject, - $142,500 00

To carry the road seven miles further, to the western foot of Laurel hill, will, at the same rate, require $52,500; and to carry it to Union town, three miles beyond the foot of Laurel hill, would require a further sum of $22,500.

The "provisions necessary for keeping the road in repair, and to prevent abuses to the work by mischievous persons," are such as it is believed Congress are not authorized to make. They can only proceed from the Legislatures of the States through which the road passes; and consist of an authority for the erection of toll-gates, and the collection of a toll sufficient to defray the expenses of repairs, and the infliction of penalties upon persons who shall cut, break up, or otherwise destroy or injure the road. That part of the road already completed is within the State of Maryland. The attempts hitherto made to obtain the requisite provisions upon these points from the Legislature of that State, have not succeeded; but they will be repeated, with the hope of ultimately proving successful.

I have the honor to be, very respectfully, sir, your most obedient servant,

A. J. DALLAS.

Hon. JOHN G. JACKSON, *Chairman of the Committee on the Cumberland road.*

13th Congress.] No. 385. [3d Session.

ROADS FROM NASHVILLE TO NATCHEZ, AND FROM FORT HAWKINS TO ST. STEPHEN'S.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 9, 1815.

Mr. Lattimore, from the committee appointed on the 18th ultimo to inquire into the expediency of repairing, and keeping in repair, the road from Nashville to Natchez, as also the road from Fort Hawkins, in Georgia, to St. Stephen's, in the Mississippi Territory, made the following report:

It appears, by a treaty concluded with the Chickasaws on the 24th of October, 1801, and another with the Choctaws on the 17th of December in the same year, that the consent of these Indians was obtained to the opening of a wagon road through their respective lands; and, by an act of Congress of the 21st of April, 1806, that six thousand dollars was appropriated to this purpose; which was effected, as provided by those treaties and this act, under the direction of the President of the United States. It appears also by a treaty with the Creek Indians, concluded on the 14th of November, 1805, that the United States have a right to a horse path through their lands; and, by the act above mentioned, that six thousand dollars was appropriated for the purpose of opening a road from the frontier of Georgia, on the route from Athens to New Orleans, as far as the thirty-first degree of north latitude; which was likewise effected, as provided, under the direction of the President of the United States.

Although the country through which these roads respectively pass is, naturally, as convenient for the purposes of transportation and intercourse as any other parts of the United States, yet, considering its great extent, it is not presumed that the appropriations heretofore made could have been considered as adequate to any other object than that of merely opening the roads. The necessary bridges over the streams, and the necessary causeways through the swamps on these extensive routes, would, in the opinion of your committee, require, of themselves, larger sums than those mentioned above.

Your committee deem it wholly unnecessary to offer any general remarks to show the great national advantages of an easy and certain intercourse between distant parts of the United States. The sense of Congress on this subject is already well ascertained, from the large and liberal appropriations bestowed on the great western road from the Potomac to the Ohio river. Without entering into comparisons as to which parts of the Union most require the provident attention of Government in relation to this subject, it appears to your committee that the improvement of the roads in question, under the direction and at the expense of the National Government, is at all times recommended by a consideration of the importance of the country to which they lead, as well as the want of both authority and means to make it in the territory through which they pass. At this time the subject is rendered unusually interesting, from the efforts of the enemy to seize upon the emporium of an immense country, as well as other positions in the same quarter of less, though great, importance to the United States. So long as the war continues, New Orleans and other adjacent parts will be liable to invasion, and will, of course, require no inconsiderable force for their defence. During such a state of things, it is highly desirable, indeed necessary, that good roads should facilitate the transmission of intelligence, as well as the march of troops, and the transportation of supplies, when a passage by water may be too tardy or wholly impracticable.

The improvement of these roads being deemed expedient by your committee, the next inquiry is, in what way can this end be best obtained? How far it might be proper to effect this purpose by the incorporation of a turnpike company, your committee are not prepared to say. Several objections have presented themselves in considering such a plan; but whether, under other circumstances, it would be advisable or not, its slow execution would necessarily defer the advantages which, in the present state of affairs, it is desirable promptly to enjoy. As the immediate interest of the public is the particular consideration which induces your committee to recommend the improvement of these roads, and as they believe that it cannot be so well promoted in any other way as by a special appropriation, they have prepared a bill for the purpose of improving the road from Nashville to Natchez, which they ask leave to report.

13th Congress.] No. 386. [3d Session.

NATIONAL OBSERVATORY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 18, 1815.

Mr. Nelson, from the committee to whom were referred, during the present session, a memorial of William Lambert, accompanied with astronomical rules and calculations; also, the reports of two select committees of this House, and a report of the Secretary of State, relative to the establishment of a first meridian for the United States at the city of Washington, made the following report:

That the reasons detailed in the said reports appearing to be well founded, your committee have no hesitation in declaring their full assent to them. It is also the opinion of the committee that the plan proposed by the memorialist ought to be carried into complete effect, whenever attention to objects of a pressing nature and more immediate importance to the welfare of our country will permit, by the erection of a national observatory, and providing suitable instruments and apparatus at the public expense, to enable skilful persons to determine the places of the moon, planets, and other heavenly bodies with sufficient accuracy, by repeated and careful observations of the times of their transit over the meridian of the place.

It further appears that the memorialist has made calculations, in addition to those presented to this House in the month of December, 1809, from data afforded by the occultations of two fixed stars by the moon, which happened in January, 1793, and January, 1813; also from the external and internal contacts of the sun and moon, in an annular solar eclipse on the 17th September, 1811, which have all been referred to the Capitol, in the city of Washington; and that the mean result of the longitude is found to be nearly 76° 55′ 45″, or five hours seven minutes and forty-three seconds in time west of Greenwich observatory, in England.

It has been represented that astronomical calculations subsequent to the close of the year 1812 can be depended upon with greater assurance of the accuracy of their results than before that period, in consequence of the publication and introduction into use of improved solar and lunar tables, constructed by M. de Lambre, of Paris, in France, and M. Burg, of Vienna, in Germany. This circumstance will suggest the propriety of authorizing additional experiments to be made, by approved methods of computation, to test the accuracy of the result found by William Lambert. Under this impression, the committee submit to the House the following resolution:

Resolved, That the President of the United States be requested to cause such further observations to be made by competent persons residing at the seat of the National Government as may be deemed most proper to determine the longitude of the Capitol, in the city of Washington, with the greatest practicable degree of exactness, and that the data, with abstracts of the calculations, and the results founded thereon, be laid before Congress at their next session.

[NOTE.—For the reports, &c. referred to in this report, see Nos. 277, 328, 332.]

13th CONGRESS.] No. 387. [3d SESSION.

LIBRARY OF CONGRESS.

COMMUNICATED TO THE SENATE, FEBRUARY 20, 1815.

Mr. GOLDSBOROUGH, from the Library Committee, reported:

That, in pursuance of the act of Congress passed at the present session, they have lodged an order with the Secretary of the Treasury, in favor of Thomas Jefferson, esquire, late President of the United States, for the sum of $23,950 in treasury notes, as the purchase money for his library for the use of Congress.

As the authority of the committee, under the act of December, 1811, by which they are created, does not extend beyond the expenditure of the annual fund of $1,000, and such balances as may have remained on hand, for the purpose of making additions to the library, they respectfully submit to Congress the propriety of providing a library room, and of transporting the library lately purchased to the city of Washington. With this view, they beg leave to present a bill.

13th CONGRESS.] No. 388. [3d SESSION.

ADMISSION OF THE MISSISSIPPI TERRITORY INTO THE UNION AS A STATE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 23, 1815.

Mr. LATTIMORE, from the committee to whom was referred, on the 21st ultimo, a memorial of the Legislative Council and House of Representatives of the Mississippi Territory, praying that the people of the said Territory may be authorized to elect a convention, with power to form a constitution as preparatory to its admission into the Union as a State, made the following report:

By the articles of cession and agreement between the United States and the State of Georgia, it is provided that the Territory aforesaid shall form a State, and be admitted as such into the Union, as soon as it shall contain sixty thousand free inhabitants, or at an earlier period, if Congress shall think it expedient. Agreeably to the last general census, the population of this Territory, of all descriptions, amounted to forty thousand three hundred and fifty-two souls. Since this was taken, the amount has considerably increased by the annexation of that part of West Florida which lies east of Pearl river, and also, as your committee are informed, by emigrations to the eastern settlements of the Territory from several of the States.

Your committee are in possession of no data from which they can form an estimate of the number to which these accessions of population may amount; but they deem it not an unreasonable presumption that the return of peace, by renewing inducements to emigration, may produce an increase to the amount required by the agreement with Georgia, by the time the usual preparatory steps can be taken towards the actual admission of the Territory into the Union as a State. It would seem, therefore, as if what is now solicited would be obtained, of course, in a few years at most.

The question, then, is, is it expedient to provide for the adoption of this Territory into the Union as a favor, or wait its admission of right?

The expediency of anticipating the admission of this community to the rights of an independent State involves in its consideration as well the particular interest of the Territory as the general interest of the United States. In relation to the former, it is to be presumed that the people themselves, who are best acquainted with their own local condition, can best judge of their ability to bear the additional expense of self-government, and weigh other consequences which may ensue from the change. As it respects the latter, your committee possess no facts which would add to the information, and can offer no reasons which would influence the opinion of the House on this point. Their mere opinion is all they have to submit; and it is, that there would be no impropriety in principle, and no injury in effect, to the interest of the nation, in providing, without further delay, for the admission of the Territory in question into the union of the States.

This Territory has been, as your committee believe, a longer time under the restraints of political minority than any other Territory of the United States; and they can perceive no good reason why its enlargement should still be deferred, merely on account of its present deficiency of numbers, since a like deficiency did not prevent others, or one other at least, from the enjoyment of a similar boon.

Hitherto your committee have considered this subject as though the admission solicited were desired by all the inhabitants of the Territory without delay, but they cannot undertake to state that such is the fact. Whilst it is true that it has been prayed for and urged with much interest and zeal at several successive sessions, it is also true that at the last one at which the subject was brought before Congress there were counter-petitions, praying that it

might be postponed. How far a union of sentiment and wishes may be inferred from the absence of any counter-petition at the present session, when it was known that the memorial under consideration had been forwarded, your committee are not prepared to say. They can, however, judge and act from only what is before them; and it is to be presumed that the representatives of the people express the will of their constituents, unless the contrary appears. To which consideration it may be added, that the extinguishment of the Yazoo claims having removed what was perhaps the most general objection to admission, it is probable that many who were opposed to it are now in favor of it; and, since peace is restored, it is probable, also, that many others will desire to exchange the restrictions of a Territory for the rights of a State. If, however, from local considerations, other than those suggested, a difference of opinion in relation to the expediency of this object should still exist, your committee conceive that the question cannot be more fairly settled than by a convention, which should first decide whether it should form a constitution or not, and which might be chosen with a reference to the respective sentiments of the members on this particular point.

Believing it expedient, therefore, that the people of the Mississippi Territory should be authorized to elect a convention, with powers to form a constitution, as prayed for by the memorialists, your committee have prepared a bill for this purpose, which they ask leave to report.

14th Congress.] No. 389. [1st Session.

CONTESTED ELECTION OF WILLIAM S. SMITH, A REPRESENTATIVE FROM NEW YORK.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 11, 1815.

Mr. Taylor, of New York, made the following report:

The Committee of Elections, to whom was referred the memorial of Westel Willoughby, jun., contesting the election of William S. Smith, who is returned as one of the representatives of the State of New York in the present Congress, and praying to be admitted to a seat in his stead, have had the same under consideration, and report:

That the seventeenth congressional district of the State of New York is composed of the counties of Madison and Herkimer; that the whole number of votes given in the said district at the last congressional election was 5,292, of which 2,510 were returned as having been given for William S. Smith, 2,466 for Westel Willoughby, jun., 309 for Westel Willoughby, and 7 scattering votes. On the 23d day of February last, Westel Willoughby, jun. caused notice in writing to be given to William S. Smith of his intention to claim his seat in the present Congress as the representative duly elected in the said district, and appointing a time and place for taking testimony relative thereto. From the affidavit of Thomas Paine, Flavel Clark, and George Fox, inspectors of the said election in the town of German Flats, in the said county of Herkimer, and of Matthew Keith, Benjamin Wood, Stephen Dow, and James Smith, inspectors of the said election in the town of Litchfield, in the same county, taken pursuant to the said notice, it appears that in the said towns of German Flats and Litchfield 299 votes were, through the mistake of the said inspectors, returned for Westel Willoughby, which, in truth and fact, were given for Westel Willoughby, jun., and ought to have been so returned; and that, in the said towns, no votes were given at the said election for Westel Willoughby, without having the word *junior* added thereto.

The 299 votes above mentioned, added to the poll of Westel Willoughby, jun., give him a majority of 255 votes over William S. Smith.

The committee therefore respectfully submit the following resolutions:

Resolved, That William S. Smith is not entitled to a seat in this House.

Resolved, That Westel Willoughby, jun. is entitled to a seat in this House.

14th Congress.] No. 390. [1st Session.

CONTESTED ELECTION OF JOHN ADAMS, A REPRESENTATIVE FROM NEW YORK.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 26, 1815.

Mr. Taylor, of New York, made the following report:

The Committee of Elections, to whom was referred the memorial of Erastus Root, contesting the election of John Adams, who is returned as one of the representatives of the State of New York in the present Congress, and praying admission to a seat in his stead, have had the same under consideration, and report:

That the eighth congressional district of the State of New York is composed of the counties of Delaware and Greene; that 4,182 votes were given in the said district at the last congressional election, of which 2,214 were given (and by the inspectors returned to the offices of the clerks of the said counties) for Erastus Root, and 1,968 were given and returned as aforesaid for John Adams. From the certificate of James Bill, late clerk of the said county of Greene, verified by oath, and admitted to be correct by the said John Adams, it appears that an error was committed in the office of the said James Bill, by his deputy clerk, in making transcripts of the returns from the towns of Catskill, New Baltimore, Coxsackie, Durham, and Greenville, in the county of Greene, for the office of the Secretary of State, by writing the name *Rott* instead of *Root*, when, in truth and fact, in the original returns on file in the office of the said clerk, the said name was written *Root*. Five hundred and seventy-six votes were in those towns given to, and returned for, Erastus Root, and ought to have been so certified by the clerk to the Secretary of State. These votes, added to the poll of Erastus Root, give him a majority of 246 votes over John Adams. The committee, therefore, respectfully submit the following resolutions:

Resolved, That John Adams is not entitled to a seat in this House.

Resolved, That Erastus Root is entitled to a seat in this House.

14th Congress.] No. 391. [1st Session.

ADMISSION OF MISSISSIPPI INTO THE UNION.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 29, 1815.

Mr. Lattimore made the following report:

The committee, to whom were referred, on the 6th instant, the memorial of the Legislative Council and House of Representatives of the Mississippi Territory, praying for the admission of said Territory into the Union as a State, and, on the 14th instant, the petitions of sundry inhabitants east of Pearl river, in the same Territory, praying that provision may be made for taking a census of its citizens previous to such admission, respectfully submit the following report:

By the articles of agreement and cession between the United States and the State of Georgia, it is provided "that the Territory thus ceded [now Mississippi Territory] shall form a State, and be admitted as such into the Union, as soon as it shall contain sixty thousand free inhabitants, or at an earlier period, if Congress shall think it expedient, on the same conditions and restrictions, with the same privileges, and in the same manner, as is provided in the ordinance of Congress of the 13th of July, 1787, for the government of the Western Territory of the United States; which ordinance shall, in all its parts, extend to the territory contained in the present act of cession, that article only excepted which forbids slavery."

The memorialists, after stating the number of persons taken under the last general census, which was forty thousand three hundred and fifty-two of all descriptions, and adverting to the accession of population produced by the annexation of a part of West Florida, and by subsequent emigrations, conclude that the Territory contained at that time (December, 1814) the number required by the agreement referred to above to entitle it to admission on an equal footing with the original States. As this, however, was a matter of conjecture and uncertainty, they solicit admission as an act of courtesy on the part of the United States.

Your committee possess no means of forming any thing like a satisfactory estimate of the present population of the Territory in question; but they conceive that, unless it be the determination of Congress to defer its admission until it can be claimed in strict conformity to the compact with Georgia, there is no good reason for a further delay on the score of a deficiency of numbers, as such deficiency, if not now questionable, will not probably much longer exist. Without taking into consideration the recent settlers, who are subject to the late proclamation under the "act to prevent settlement being made," &c., the presumption is not unreasonable that, if any considerable part of the lands obtained from the Creeks be prepared for a legal settlement within the time contemplated, the Territory will contain more than the number required before it can be finally erected into a State.

It is known to your committee that the consent of Georgia to a division of this Territory has been asked, and obtained; and, should it be divided before it is admitted, the admission of either part would, from a want of numbers, be subject to additional objection and further delay. But doubts may be entertained whether the Territory can, with strict propriety, be divided without the consent of its inhabitants, as well as that of Georgia and of the United States. Although the people of the Territory had no agency in the agreement above granted, they were the object of it, and as such became a third party to it, and vested by it of a right which is explicitly defined. This agreement provides "that the Territory thus ceded shall form a State, [not one or more States,] and shall be admitted as such into the Union, *as soon as it shall contain sixty thousand free inhabitants.*" If, then, admission shall be deferred in consequence of division, the expectation of the inhabitants will be disappointed, and their right impaired. It is chiefly to avoid such a result that your committee have declined recommending a division of the Territory, which otherwise might be expedient to lessen the inconveniences which, with or without division, the local Government will, for a long time at least, have to sustain.

In relation to the simple question of admission, as presented by the memorialists, precedents are not wanting, either to encourage their application or to grant their request. The State of Ohio was admitted before it possessed the number which the ordinance required, and Louisiana did not come in, as to time or numbers, in virtue of a strict and insuperable claim. It is not improbable that the Mississippi Territory may contain at this time a greater population than either of these States did when they were admitted; and it is believed that its state of political minority and probation has been of longer duration than that of any of the adopted States. If, then, after fifteen years of restraint, the people of this country should evince even an impatient desire for enlargement, it is but just to ascribe it to that sense of independence which is common to the nation, and which should be rather encouraged than depressed. It is a policy worthy of a Government which is constituted and maintained by the public will to foster throughout the Union those feelings which give energy to the national character, and to extend to every portion of it those rights which conduce to the general good. Nor could a period more propitious to these ends be selected than the present, when all American citizens have new cause to approve of their principles, to confide in their institutions, and to be proud of their name.

So far your committee have considered this subject as though an immediate admission of the Territory were desired by all of its inhabitants; but they are not prepared to say that such is the fact. Whilst it is true that such admission has been repeatedly solicited for a succession of years, it is also true that, about four years ago, a small minority of the representative branch of the Territorial Legislature protested against it, and that, about a year thereafter, a considerable number of the people themselves petitioned that all proceedings in Congress on the subject might be postponed. It was on these two occasions only, as your committee believe, that any indisposition to a State Government has been expressed to the National Legislature by any of the people of the Territory, or of their representatives in their behalf. Nor is it understood or believed that the reluctance manifested by a portion of these people arose from a want of a due and equal appreciation of the rights and advantages of an independent State. The causes of opposition, so far as any opposition has been shown, seem to have been, in part, an unwillingness to incur additional expense in supporting a State Government whilst under a peculiar pressure from the war; but chiefly an apprehension that a State Government, with its inseparable appendage a federal district court, would be immediately followed by a great number of expensive and dangerous, if not ruinous, lawsuits for lands, which would grow out of (what are called) the Yazoo and British claims. The war, however, is now at an end, and the Yazoo claims may be considered as quieted; but the British claims still exist, and constitute the subject of several petitions now before Congress, on which it is not the province of your committee to speak.

The petitions of sundry inhabitants east of Pearl river, in the same Territory, which also have been referred to your committee as having relation to the question which has been considered, state that the eastern parts of said Territory have not an equal share of representation with the western in the Territorial Legislature; suggest an appre-

hension that such inequality may continue under a State Government; and pray that provision may be made for taking a census of the people of the Territory, for the purpose of securing to all a representation according to numbers and equal rights. If the interposition of Congress be necessary to effect what the petitioners seem to have principally in view, namely, a fair representation in the convention which will be elected to form a constitution, some general provision to this end will properly belong to the act authorizing the convention to be chosen; and should it nevertheless afterwards appear to the satisfaction of Congress that any part of the Territory has not had its due proportion of representation in such convention, they will no doubt use the corrective which they possess, in rejecting the constitution which may be formed.

Upon a full view of the whole subject which has been referred to the consideration of your committee, they are of opinion that it is expedient to admit the Mississippi Territory into the Union as prayed for by the memorialists, and have prepared a bill for this purpose, which they ask leave to report.

14th CONGRESS.] No. 392. [1st SESSION.

ADMISSION OF INDIANA INTO THE UNION.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, ON THE 5TH JANUARY, 1816.

Mr. JENNINGS, from the committee to whom was referred, on the 28th ultimo, the memorial of the Legislative Council and House of Representatives of the Indiana Territory, praying admission into the Union as an independent State, on the same footing with the original States, reported:

That the said Territory is bounded on the east by the State of Ohio; on the south by the State of Kentucky; on the west by the river Wabash, from its mouth to a point opposite the town of Vincennes, and from thence by a due north line until it intersects a due east and west line which shall touch the southern extreme of Lake Michigan; and on the north by the line last described; that the said Territory is a portion of the Territory northwest of the river Ohio, which, by the ordinance for the government thereof, was ordained to constitute not less than three nor more than five States; that the ordinance aforesaid, whenever the Territory of Indiana shall possess sixty thousand free inhabitants, guaranties to those inhabitants the benefit of being admitted into the Union upon an equal footing with the original States; that the ordinance aforesaid having not declared under what authority the population of the said Territory should be ascertained, to complete their title to an admission into the Union, the Legislature thereof, after having, by actual census, ascertained that the Territory of Indiana possesses a population of upwards of sixty thousand free inhabitants, have deemed it the most prudent and respectful to submit to Congress the result of that census, and ask the passage of a law to enable the people of said Territory to form a constitution and State Government.

Your committee, believing the said Territory to possess a population of sixty thousand free inhabitants, at least, deem it unnecessary to offer any further reasons in support of the expediency of granting the principal prayer of the memorialists; and therefore beg leave to report a bill to enable the people of the Territory of Indiana to form a constitution and State Government on conditions not less advantageous and similar to those heretofore granted to other Territories of the United States.

DEAR SIR: CORYDON, *February* 24, 1816.

Agreeably to your request, I embrace the first moment within my power to send you a certified statement of the census of the Indiana Territory, taken from the official returns of the listers, certified by the clerks of the various counties, and forwarded to the House of Representatives of the said Territory, at their session which commenced on the 4th day of December, 1815, to wit:

	White males of 21 and upwards.	Total No.
In the county of Wayne,	1,225	6,407
Franklin,	1,430	7,370
Dearborn,	902	4,424
Switzerland,	377	1,832
Jefferson,	873	4,270
Clark,	1,387	7,150
Washington,	1,420	7,317
Harrison,	1,056	6,975
Knox,	1,391	8,068
Gibson,	1,100	5,330
Posey,	320	1,619
Warrick,	280	1,415
Perry,	350	1,720*
		63,897

* From the county of Perry, no lister's book had been received from the clerk, but the representative of that county says he had the number above stated from good authority.

I, William Hendricks, Clerk of the House of Representatives, do hereby certify that the within statement is correct. Given under my hand the day above written.

W. HENDRICKS, *Clerk of the House of Representatives.*

14th Congress.] No. 393. [1st Session.

EXTENSION OF A PATENT RIGHT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 9, 1816.

Mr. Marsh, from the select committee to whom was referred the petition of Benjamin Tyler, jun. and John Tyler, by a resolution of the House of Representatives passed on the 19th of December, 1815, reported:

That the petitioners represent that, prior to the year 1800, one Benjamin Tyler had invented a new and useful improvement in the construction of flour and other mills; that on that day he obtained a patent, according to law, for the exclusive right of using the said improvement for the term of fourteen years from that date; that afterwards he made an assignment of the said patent to the petitioners in due form. They further represent that several persons interfered with and invaded the right of using the said improvement thus secured to them by the said patent and assignment, by introducing the same into mills without their license; that, in the year 1804, they instituted a suit against one of the persons thus intrenching on their exclusive right to the said improvement; that the defendant in said suit, by means of combinations of various interested individuals, protracted the pendency of said suit until the year 1810; that the court then arrested the verdict found in the said cause for the plaintiffs, on account of some supposed defect in the declaration; that the petitioners, in the prosecution of the said suit, were put to great expense and trouble, and though by the said verdict they established their right to the exclusive use of the said improvement, yet they lost the benefit of the damages and cost awarded to them by the said verdict; and that, by means of the pendency of the said suit during the space of six years, their said improvement was brought into discredit, and they deprived of the benefit and profit of selling the right to others of using the said improvement, while the time for which the same had been patented to them had in some measure expired.

They pray Congress to pass an act granting to them the exclusive right of using, and vending to others to be used, the said improvement for another term of fourteen years after the expiration of their said patent.

The committee report that they find the facts stated in the said petition supported by sufficient testimony, and that the said invention is a new and useful improvement in the construction of mills, and that the prayer of the petitioner ought, in part, to be granted. They recommend to Congress the following resolution:

Resolved, That the prayer of the petitioners ought to be granted; and that the exclusive right of using the said improvement be extended to the said petitioners for the term of seven years from this time.

14th Congress.] No. 394. [1st Session.

LOTTERIES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 15, 1816.

Mr. Tucker, from the Committee for the District of Columbia, to whom was referred the petition of the members of a masonic society in the town of Alexandria, under the name of Washington Lodge, No. 22, made the following report:

That, however meritorious the objects which the petitioners have ultimately in view, and however disposed the committee may be to wish for the prosperity of an institution whose dispositions are charitable, they cannot give their assent to the *means* which are proposed for carrying the objects of the society into effect. The aid asked from Congress is the passage of a law authorizing a sum of money to be raised by way of lottery. Opposed in principle to the existence of lotteries, believing that they should be prohibited rather than encouraged, and that the spirit which gives rise to it should rather be restrained than promoted, your committee cannot, however praiseworthy the object, venture to recommend a mean which, in their estimation, is always prejudicial in its operation upon society. They therefore recommend the following resolution for adoption:

Resolved, That it is inexpedient to grant the petition of the members of the masonic society in the town of Alexandria, under the name and style of the Alexandria Washington Lodge, No. 22, and that the same be accordingly rejected.

14th Congress.] No. 395. [1st Session.

COLONIZATION OF FREE PERSONS OF COLOR WITHIN THE UNITED STATES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 18, 1816.

Mr. Roberts, from the Committee on the Public Lands, to whom was referred the petition of the Kentucky Abolition Society, reported:

That, according to the petition, great numbers of slaves have been emancipated in different parts of the United States; that the number may be expected to increase daily; that they are not allowed the privileges of free citizens when they are emancipated, and are prohibited by law from emigrating to many of the other States and Territories:

in consequence of all this, and, to use the words of the petition, as they are suffering many privations for the want of room and opportunities for the expansion of genius and encouragement to industry, they pray that a suitable territory may be laid off as an asylum for all negroes and mulattoes emancipated or to be emancipated within the United States; and that such donations, allowances, encouragement, and assistance be afforded them as may be necessary for conveying them thither, and settling them therein. The committee beg leave to observe that the Government is not in the habit of granting such advantages to white citizens, nor can they well perceive why they should be expected in favor of those of any other color. The public lands of the United States are sold or earned by services rendered to the country; and all those who wish to reside on them have heretofore (as most probably they must continue to do) paid their own travelling expenses. The committee, too, cannot but believe that there is no part of our highly favored country where industry and economy will not insure to those who practise them an easy and independent support. The committee can see no cause for the interference of the Government on this subject; they have consequently prepared a resolution, which is respectfully submitted:

Resolved, That the prayer of the petition ought not to be granted.

The honorable the Speaker and Representatives of the United States of America in Congress assembled: The petition of the Kentucky Abolition Society, at their annual meeting, holden in Franklin county, near Frankfort, Kentucky, October 18 *and* 19, 1815, *respectfully showeth:*

That, whereas great numbers of slaves have been emancipated in different parts of these United States, and it may be expected, from the genius of our Government, and from a spirit of benevolence that seems to be taking place among all classes of citizens, that the number will be daily increasing: and whereas they are not allowed the privileges of free citizens where they are emancipated, and most of the States and Territories have passed laws to prevent this class of human beings from emigrating to them, and, from their poor and degraded situation where they at present reside, they are suffering many privations for the want of room and opportunities for the expansion of genius and encouragement to industry: and whereas there are vast tracts of unappropriated lands within the boundaries of the United States, and as we now enjoy a time of peace and prosperity, opening the way and inviting Government to so benevolent a project, we do therefore (and we make no doubt but we substantially speak the language of thousands of our fellow-citizens) most earnestly petition your honorable body that you cause a suitable territory of lands to be laid off as an asylum for all those negroes and mulattoes who have been, and those who may hereafter be, emancipated within the United States; and that such donations, allowances, encouragement, and assistance be afforded them as may be necessary for conveying them thither and settling them therein; and that they be under such regulations and government in all respects as your wisdom shall dictate.

The friendly attention of your honorable body to this our humble address will ever be remembered with gratitude by your petitioners.

Signed by order of the society in annual meeting, as above written.

DAVID BARROW, *President.*

Attest: MOSES MARTIN, *Secretary.*

14th CONGRESS.] No. 396. [1st SESSION.

LIBRARY OF CONGRESS AND THE LIBRARIAN.

COMMUNICATED TO THE SENATE, JANUARY 26, 1816.

Mr. FROMENTIN, from the Joint Library Committee, made the following report:

The first care of the Joint Library Committee, immediately after their appointment, was to inquire into the possibility of removing the library from where it now is to a place more convenient to the members of Congress; but they were not able to accomplish this most desirable object. The Capitol does not afford any room which could in its present state be deemed a safe place of deposite for the library. The room which had been selected for placing the library in the building now occupied by Congress did not appear to your committee to offer the advantages or to promise that security which by your committee was deemed indispensably requisite before they would submit to you a resolution recommending the removal of the library to that room. The efforts of your committee to procure rooms or a house which might have been used temporarily for the library in the neighborhood of the house where Congress now assemble proved likewise unavailing. A sum not less than $1,000 per annum was asked for the rent of the only house which might have answered the object; and, taking into consideration not only the expense of the rent, but the expense of fitting out for temporary purposes only the necessary rooms for the library, the expenses attending this temporary removal, the portion of the session already elapsed, the length of time which would be consumed in the removal, during which, instead of a rather difficult, under present circumstances, no access at all could be had to the library; considering, further, that nothing is more injurious to books than these frequent removals, and considering, likewise, that the library is perfectly safe where it is now, and that within a few weeks, at a period probably not much more distant than that at which the library could again be opened, if it should now be attempted to be removed on Capitol hill, the greatest inconveniences now arising from the distance at which the library is placed will disappear with the season of the year which has created them, your committee are of opinion that the library ought not to be removed this winter, and that their attention should be wholly directed in securing a permanent place in the Capitol for receiving the library, which place ought to be ready before the next session of Congress; and with that view they have inserted a section, which to them appears calculated to obtain the object, in the bill which accompanies this report.

Your committee have received from the librarian several accounts of expenditures, amounting together to the sum of $3,165 67½ exclusive of a sum of $912 37½, paid for packing and transporting the library, and of the sum

of $1,520 77 for fitting up the room where the library is now kept; which several sums were appropriated by the act of the 3d of March, 1815, entitled "An act to provide a library room, and for transporting the library lately purchased." Both the letters received from the Comptroller of the Treasury, as far as respects the expenses of packing and transporting the library, and from the Superintendent of Public Buildings in Washington, so far as respects the expenses for fitting up the room where the library is now kept, and the accounts exhibited by the librarian, are submitted with, and your committee pray that they may be considered as a part of, this their report.

With respect to the account of expenditures delivered to your committee by the librarian, your committee observe that, except the annual appropriation of $800 which has been received by the librarian, there has been no appropriation made by Congress, nor, as far as your committee could ascertain, any authorization given by any person to the librarian. This unauthorized expenditure leaves a deficit to be provided for of $2,365 67½. Your committee submit it to Congress whether the peculiar circumstances in which the librarian was placed justified, in part or in totality, the expenditures incurred by him? They cannot, however, help observing that some of the charges appear to them exorbitant; and, therefore, in the bill which they have reported, they have recommended that an authorization be given to the committee, before payment be made, to have a due investigation made of the several items of the accounts, advising at the same time an appropriation for the whole sum claimed, provided that, if a surplus should be unexpended in consequence of the investigation, it may be added to the annual library fund of $1,000 for this year, to be expended for the purchase of books, under the direction of the Joint Library Committee.

It is enough to cast a rapid glance over the catalogue of the library of Congress to be immediately sensible of the immense *hiatus* which some of the departments of arts and sciences exhibit. Some of the branches of the arts and sciences are swelled to a prodigious size, which, at the same time that it is by no means a certain proof of a greater degree of health in these parasite branches, manifests every symptom of threatening decay in the tree itself. This was observable likewise in the old library of Congress, although in a less degree. This result is not to be wondered at, if we consider that the inconsiderable sums put from time to time at the disposal of the Joint Library Committee precluded the possibility of their availing themselves of the many opportunities which for twenty-five years past were daily offering in Europe of purchasing large collections of very valuable books on reasonable terms. Those opportunities are not yet all gone by; and your committee think that the convulsions of the eastern might, in a literary point of view, be made conducive to the interests of the western world. The present library of Congress is a good foundation; and one-half of the sum which it has cost, judiciously employed under the direction of the Joint Library Committee, would place within the reach of every member of Congress all the most valuable books in every department of arts and sciences, of which there is now such a lamentable deficiency. With that view, your committee propose an appropriation of $10,000 for the purchase of books and maps, independent of the annual appropriation of $1,000 for the same purpose, which they submit to Congress to make perpetual.

The Joint Library Committee have taken into their consideration a resolution referred to them by the House of Representatives on the 15th December last, and, upon the most serious consideration given to the subject, your committee do not deem it necessary to recommend the allowing any additional compensation to the librarian for services performed since the last session of Congress. The librarian has received from the treasury the sum of $480, which (according to the law as it was at the time of his appointment, and as it is yet, by which he is entitled to $2 per day for every day's attendance at the library, computing the number of days during which he was bound to attend at the rate of three days every week during the recess of Congress, and six days every week during the session) exceeds the sum to which he should be entitled by law for his services to this day. By the accounts of expenditures exhibited, it appears that the mechanical part of the duties required by law to be performed by the librarian has been actually performed by people hired by him, and for whose compensation you are now called upon to make an appropriation. The manner in which the scientific part of the duties devolving upon the librarian has been fulfilled do not, in the opinion of your committee, warrant the allowing of an additional compensation, which your committee suppose must be interpreted as conveying on the part of Congress something like an approbation for past conduct. The only evidence of the literary services of the librarian within the knowledge of your committee is, the publication of the catalogue with which we were presented at the beginning of the session; and the merit of this work is altogether due to Mr. Jefferson, and not to the librarian of Congress. Your committee are persuaded that, however ingenious, scientific, philosophical, and useful such a catalogue may be in the possession of a gentleman who (as was the case with the former proprietor of this, now the library of Congress) has classed his books himself, who alone has access to them, and has become, from long habit and experience, as perfectly familiar with every book in his library as a man who has long lived in a city is familiar with every street, square, lane, and alley in it, still this form of catalogue is much less useful in the present state of our library, consisting chiefly of miscellanies not always to be classed correctly under any particular head, than a plain catalogue in the form which had been adopted for the formation of the catalogue of the old library, which probably might not have cost more than $100 (if that much) whilst the catalogue with which we were presented, including three copies of it bound, calf gilt, costs the United States $1,360 50, one-third more than the annual appropriation made heretofore by Congress for the additional increase of the library, and more than one-twentieth of the actual cost of our whole library.

The committee have no hesitation in recommending to Congress to increase the sum appropriated for the salary of the librarian of Congress, and in the bill which they have the honor to submit is to be found a section to that effect.

In looking over the several acts concerning the library of Congress, your committee have observed, not without astonishment, that, by an act passed the 26th January, 1802, the librarian of Congress was to be appointed by the President of the United States solely. It is difficult to conceive why an officer of both Houses of Congress, as much so as the Clerk of the House of Representatives and the Secretary of the Senate are officers of their respective Houses, should not be appointed by the authority to which he ought to be amenable. The case might happen that a librarian should neglect his duties; are the members of Congress, in that case, to complain to the President of the United States? Such a thing need merely being mentioned to demonstrate the impropriety of vesting the President with the sole right of making so inconsiderable an appointment. Accordingly your committee have deemed it their duty to propose in the bill which accompanies this report the repeal of so much of the act concerning the library of Congress, passed January 26, 1802, as provides that the librarian shall be appointed by the President of the United States solely, and to vest in future the appointment of the librarian in the Joint Library Committee, provided that neither the Secretary of the Senate, nor the Clerk of the House of Representatives, nor any of the clerks employed in their offices, or any other officer of either House of Congress, be eligible to the office of librarian.

No. 1.

List of the debts and expenditures of the Library of the United States for 1815.

EXPENDITURES.

1815.		
December 1.	Paid G. Watterston for his services as librarian, commencing the 21st March and ending 31st December, 1815, at $2 per diem, (Sundays excepted,)	$480 00
" "	Paid for five months' hire of negro boy,	20 00
" "	Paid for two months' hire of negro man,	52 00
November 15.	Paid William Elliot, in part, for printing,	190 00
July 14.	Paid Mr. Ferril for wood,	57 75
July 27.	Paid A. Ferril for putting away wood,	3 00
July 20.	Paid J. Bowen for hauling wood,	4 12½
November 8.	Paid Michael Larner for labelling, in part,	2 28
September 14.	Paid E. Shanly for brass fender,	5 00
November 1.	Paid for broom,	0 20
August 1.	Paid Ingle & Co. for shears,	0 25
August 18.	Paid Mr. Weightman for ink,	0 37½
		814 98
	By appropriation,	800 00
	Due me,	14 98

DEBTS.

Due Mr. Rapine for stationary,	4 81¾
Due Mr. Ott for candles, &c.	11 00
Due Mr. Larner for labelling, (balance,)	33 00
Due Mr. Milligan for stationary,	1 12½
Balance due,	$64 92¼

I certify the above to be a true copy.

GEORGE WATTERSTON, *Librarian.*

SIR: TREASURY DEPARTMENT, COMPTROLLER'S OFFICE, *January* 24, 1816.

In reply to your letter of yesterday's date, I have the honor to state that the sum of $584 37 was paid on the 10th, and the sum of $388 on the 30th of May last, to Joseph Milligan, for the expenses of packing, transporting, &c. the library purchased of Thomas Jefferson, Esq.

The fitting up the library room was done under the direction of Thomas Munroe, Esq., superintendent of public buildings, of the expense of which no account has as yet been rendered to this Department.

With great respect,

The Hon. ELIGIUS FROMENTIN, JOSEPH ANDERSON.
Chairman of the Library Committee.

No. 6.

SIR: SUPERINTENDENT'S OFFICE, WASHINGTON, *January* 25, 1816.

In reply to your letter of yesterday, I have the honor to state that the moneys expended in fitting up and furnishing the congressional library room, in the building now occupied by the Post Office Department, including the expense of finishing the staircase and passage in the third story leading thereto, amount to the sum of $1,520 77, that is to say, for materials, principally lumber and lime, $465 29; carpenters, bricklayers, and painters' work, $742 36; furniture, including upholsterers' work, $313 12.

It will of course be understood that these disbursements are such only as I have had an agency in. The expenses attending the transportation of the books from Mr. Jefferson's residence to the city have been adjusted at the Treasury; and there may have been other expenditures under the sanction of the President, or other authority, of which I have no knowledge.

I have the honor to be, with the highest respect, sir, your most obedient servant,

THOMAS MUNROE.

P. S. No part of the amount disbursed by me has been drawn from the treasury under the appropriation for the purpose, as I had other public money remaining in my hands sufficient.

The Hon. ELIGIUS FROMENTIN, *Senate U. S.*

14th CONGRESS.] No. 397. [1st SESSION.

AMENDMENTS TO THE CONSTITUTION OF THE UNITED STATES PROPOSED BY MASSACHUSETTS AND CONNECTICUT, AND REJECTED BY OHIO.

COMMUNICATED TO THE SENATE, JANUARY 30, 1816.

SIR: EXECUTIVE OFFICE OF OHIO, CHILICOTHE, *January* 20, 1816.

I have the honor to transmit to you a copy of resolutions passed by the Legislature of Ohio.

Very respectfully,

T. WORTHINGTON.

The PRESIDENT *of the Senate of the United States.*

GENERAL ASSEMBLY OF OHIO, *January* 17, 1816.

Whereas the Legislatures of the States of Massachusetts and Connecticut have proposed the following amendments to the constitution of the United States:

"First. Representatives and direct taxes shall be apportioned among the several States which may be included within this Union according to their respective numbers of free persons, including those bound to serve for a term of years, and excluding Indians not taxed, and all other persons.

"Second. No new State shall be admitted into the Union by Congress, by virtue of the power granted by the constitution, without the concurrence of two-thirds of both Houses.

"Third. Congress shall not have power to lay any embargo on ships or vessels of the citizens of the United States, in the ports or harbors thereof, for more than sixty days.

"Fourth. Congress shall not have power, without the concurrence of two-thirds of both Houses, to interdict the commercial intercourse between the United States and any foreign nation, or the dependencies thereof.

"Fifth. Congress shall not make or declare war, or authorize acts of hostility against any foreign nation, without the concurrence of two-thirds of both Houses, except such acts of hostility be in defence of the territories of the United States when actually invaded.

"Sixth. No person who shall hereafter be naturalized shall be eligible as a member of the Senate or House of Representatives of the United States, nor capable of holding any civil office under the authority of the United States.

"Seventh. The same person shall not be elected President of the United States a second time, nor shall the President be elected from the same State two terms in succession."

Resolved, unanimously, by the General Assembly of the State of Ohio, That it is inconsistent with good policy to adopt the said amendments, and that this General Assembly do not concur therein.

Resolved, That the Governor of this State be requested to transmit a copy of the foregoing preamble and of these resolutions to the President of the Senate, and a copy to the Speaker of the House of Representatives of the Congress of the United States, and a copy to the Governor of each State in the Union, with a request that the same be laid before the Legislature thereof.

MATTHIAS CORWIN,
Speaker of the House of Representatives.

Attest: WM. DOHERTY, *Clerk H. R.*

PETER HITCHCOCK,
Speaker of the Senate.

Attest: C. A. NORTON, *Clerk Senate.*

STATE OF OHIO, SECRETARY OF STATE'S OFFICE,
CHILICOTHE, *January* 18, 1816.

I certify the foregoing preamble and resolutions to be truly copied from the original on file in my office.
JER. McLENE, *Secretary of State.*

14th CONGRESS.] No. 398. [1st SESSION.

ROADS AND CANALS.

COMMUNICATED TO THE SENATE, FEBRUARY 6, 1816.

Mr. MORROW, from the select committee appointed on so much of the President's message as relates to roads and canals, reported:

That a view of the extent of territory, the number and magnitude of navigable lakes, rivers, and bays, the variety of climate, and consequent diversity of productions, embraced by the United States, cannot fail to impose the conviction that a capacity exists in this country to maintain an extensive internal commerce. The variety of productions peculiar to the several parts invites to the prosecution of a commerce of the most interesting kind. A commerce internal, subject solely to the regulations of the country, not dependant on, or materially affected by, the vicissitudes of foreign competition or collisions, the profits on which will rest in the country, and make an addition to the wealth of the nation—such a commerce will, in its natural tendency, create interests and feelings consonant with the great interests of the community. Any practicable scheme, therefore, for the improvement of roads and inland navigation, having for its object the encouragement and extension of a commerce so beneficial, has strong claims to the attention and aid of a Government constituted to promote the general welfare.

Such improvements, executed on an extensive scale, would unquestionably contribute to the general interest and increase of wealth in the nation; for whatever tends to accelerate the progress of industry in its various and particular branches, or to remove the obstacles to its full exertion, must in the result produce that effect. The contemplated improvements in roads and canals, by extending the communication for commercial and personal intercourse to the interior and distant parts of the Union, would bestow common benefits, and give an enlarged facility to the great branches of national industry, whether agricultural, commercial, or manufacturing.

The agricultural products, which at present, from inconvenient distance, their weight, or bulk, are unportable, could then be carried to a distant market; the reduction on the charge for transportation would become an addition to the price, and a ready market and increased price enhance the value, of the lands from which the products were drawn. The general commerce of the country would thereby receive a proportional advantage from the increase of the quantity of articles for exportation, the facility and extension to the vending of imported commodities, as also from a more general consumption arising from an increased ability in the community to purchase such com-

modities. To manufacturers, a reduction on the charge for transportation of the raw material and wrought commodity would be highly beneficial. The beneficial effects on individual interests and the general wealth in society, arising from a system of cheap conveyance by artificial roads and canals, do not rest on speculative opinion or abstract reasonings for confirmation; all doubts as to the advantages have been removed by the test of experience in every country where such improvements have been executed on a liberal scale. To insure to the pursuits of useful industry in a nation a state of the greatest prosperity, it is only necessary to protect their interests from foreign aggression, to leave them unrestrained by artificial provisions, and to remove or meliorate the natural obstacles to their exertion by public works, rendering conveyance practicable and cheap.

Such public works, while they are calculated to subserve the pecuniary interests of every industrious class of the community, are highly important in a political point of view. The citizens in the most remote parts would be brought into closer connexion by a facility to commercial and personal intercourse; the common interests and identity of feelings thence arising would, as a cement to the parts, bind together the whole with the strong bond of interest and affection, giving stability and perpetuity to the Union, and, as a means of security, tend to increase our capacity for resistance to foreign aggression, by rendering less expensive and more effective our military operations. The disadvantages experienced and heavy charges incurred during the late war, for want of inland navigation along the seacoast, connecting the great points of defence, are of too recent date and decisive a character to require any other demonstration that a facility in inland communication constitutes a principal means of national defence.

It is believed that improvements so important to the political and general interest of society stand strongly recommended to the attention of the National Legislature. The General Government alone possess the means and resources to give a direction to works calculated for general advantage, and to insure their complete execution. The particular objects of this kind, to which public aid should be given, the means to be employed, and the mode of applying the public moneys, remain to be considered.

The objects are, such artificial roads and canals as are practicable of execution, and which promise a general or extensive advantage to the community; others, of minor importance, that are local in their nature, and will produce only local benefits, will more properly be left for execution to the means and enterprise of individuals, or to the exertions of particular States. It is, indeed, a political maxim, well attested by experience, that wherever private interests are competent to the provision and application of their own instruments and means, such provision and means should be left to themselves. The great works which are calculated for national advantage, either in a military or commercial view, their execution must depend (at least for aid) on the General Government. Wherever great obstacles are to be overcome, great power and means must be employed. To such works the means of associated individuals are incompetent, and the particular States may not have a sufficient interest in the execution of works of the most essential advantage to other parts of the community. In other cases, where interest might be sufficiently operative, the means or the power may not be possessed, their territorial jurisdiction being limited short of the whole extent of the work.

Among many other objects of improvements in inland navigation and roads, coming within the above description, the following appear to be recommended by their importance to the attention of Congress: 1st. Canals opening an inland navigation along the Atlantic seacoast; 2d. A great turnpike road from north to south; 3d. Turnpike roads forming communications between the Atlantic and the western rivers; 4th. Military roads communicating with the frontier posts; and, 5th. A canal around the falls of Ohio, or opening the bed of the river at that place.

The present state of the national finances, and the effect which engaging in many expensive works at the same time would produce in raising the price of labor, seem to point out the policy of applying the public means to one, or only a few of these objects, in the first instance. The difficulty and delicacy of selecting a particular object from among many others of acknowledged importance and great interest is sensibly felt. In making the decision, general interests must be kept in view, and held superior to local considerations. It appears proper that when the Government authorize the expenditure and application of public moneys to one of these objects, they should at the same time adopt a system calculated to insure in due time the execution of other works requiring their aid.

After due consideration, and that examination which the committee have been able to give to the subject, they respectfully recommend to the first attention of Congress "the Chesapeake and Delaware canal," being in their opinion of the first importance, and requiring the aid of the General Government. It forms the central link in that great chain of inland navigation along the seacoast proposed to be opened. It is believed, from the best evidence, to be practicable of execution, and of itself, unconnected with other improvements, will afford the most extensive advantages. On this the committee will make a special report.

Of the different modes which might be devised of applying public moneys to objects of internal improvements, that of authorizing subscriptions for a limited number of shares of the stock of companies incorporated for the purpose, appears on every consideration to be the most eligible. By limiting the number of shares to be subscribed to a third, or less than one-half of the whole stock, there is more security that the Government shall not become engaged in impracticable projects for improvements, and also for the economical expenditure of the funds, than would be on the plan of a direct application by Government of the public moneys.

The committee, in order to ascertain what funds may be made applicable to the objects of internal improvement, with due regard to the state of the finances and demands on the treasury, requested information from the Treasury Department. The information obtained accompanies this report. It will be observed that the surplus revenue applicable to these objects is hypothetically stated in the Secretary's letter, as necessarily it must be in the present state of the revenue laws. It appears, however, under any contemplated change in the existing system, that the revenue would be sufficient to supply after the present year, and during a state of peace, an annual appropriation of $600,000 for the purpose of internal improvements. That sum would constitute a fund capable of effecting many valuable objects of that kind; and, under prosperous circumstances, the fund might be gradually augmented in the proportion of the decrease of the public debt. But if it shall enter into the policy of Government to authorize expenditures in execution of works calculated for public advantage and general convenience, the same policy will direct to the provision of the means; for it cannot be doubted that the resources of the nation are amply sufficient, when brought in aid of private means, to effect every object of improvement on roads and canals that is of an extensive nature and of national concern.

The committee respectfully propose that an annual appropriation be made to constitute a fund for making roads and opening canals; that the fund shall be put under the direction of the Secretary of the Treasury, who shall, whenever authorized by Congress, subscribe for shares in the stock of companies incorporated for making artificial roads or opening canals, and shall pay out of the aforesaid fund the instalments as they become due on such shares; and that any dividends thence arising, when any work shall be completed, shall be paid into, and become a part of, said fund; and the Secretary shall report, at each session, to Congress, all expenditures, and the general state of the fund, as well as the state of the works, in which the Government are concerned.

The committee have directed a bill to be reported embracing the above provisions.

SIR: TREASURY DEPARTMENT, *January* 20, 1816.

In your letter of the 27th ultimo information is requested upon the two following points: 1. In case the revenue laws should be modified according to the plan proposed by the Secretary of the Treasury, whether the surplus revenue arising from permanent sources would authorize a standing appropriation of moneys, annually, applicable to the construction of roads and canals, and to what amount? 2. In case the creation of stock should be authorized, redeemable at a future period, to be employed in the purchase of shares in the companies formed for making roads and opening canals, what particular branches of the existing revenue would it be most proper to charge, and to what amount, with the redemption of such stock?

In answer to the first inquiry, I have the honor to state that if the revenue were permanently established upon the footing proposed in the report from this Department of the 6th of December last, and if the public expenditures should not exceed the annual amount therein stated, there would be an annual surplus of revenue, which might be estimated during the continuance of the peace at about $4,000,000. Whether the facts assumed, by which this result is produced, will actually exist, can only be ascertained when the intentions of Congress upon these points shall have been developed.

As to the second inquiry, it may be observed that there are no branches of the existing revenue which are not already pledged, either specially or in a general manner, for expenditures already authorized, excepting certain duties which will expire on the 17th of February next, and which, if continued by Congress after that time, will probably be substituted in lieu of other duties which are now pledged, and which will be diminished or entirely abolished. If stock should be issued under any modifications for the purpose of internal improvements, there is therefore no branch of the revenue which could be exclusively charged with its redemption without violating prior appropriations and pledges. But as the aggregate mass of the revenue is estimated after the year 1816 to exceed the aggregate amount of the charges upon it, this surplus, if Congress should think proper, might be applied either directly to the defraying of the expenses of internal improvements, or, if stock should be issued, as a fund for its redemption. No necessity is perceived for issuing stock for this purpose, unless it shall be determined to commence the expenditures before the termination of the present year; during which year there will be no surplus of revenue. After its expiration, when there shall be a surplus, there can be no reason for constituting stock, or, in other words, for borrowing money. The money in hand derived from the surplus revenue can be applied directly to the purposes proposed.

I have the honor to be, very respectfully, sir, your most obedient servant,

A. J. DALLAS.

The Hon. JEREMIAH MORROW,
Chairman of the Committee of the Senate on Roads and Canals.

14th CONGRESS.] **No. 399.** [1st SESSION.

CHESAPEAKE AND DELAWARE CANAL.

COMMUNICATED TO THE SENATE, FEBRUARY 6, 1816.

Mr. MORROW made the following report:

The committee, to whom was referred so much of the President's message as relates to roads and canals, having, in their general report, recommended to Congress the Chesapeake and Delaware canal as an object of first importance requiring the aid of the General Government, beg leave to make a separate report concerning the same.

The Chesapeake and Delaware canal, as an object of high national importance, has for many years claimed the attention of Congress. It was first presented to their consideration in the year 1806, by a memorial of the president and directors, dated the 1st of December, 1805; and, by a report subsequently made, on the 21st of March, 1806, it appears that an enlightened committee of the Senate recommended that aid should be granted to the memorialists. The report of this committee was finally adopted, and one or more bills passed the Senate authorizing a grant of land to the company not exceeding two hundred thousand acres, to be exchanged for the stock of the company. These bills, however, were postponed by the House of Representatives, owing, it is believed, to the peculiar embarrassments of the country at the periods they were sent for concurrence.

In June, 1813, the subject of the Chesapeake and Delaware canal was again brought forward before the Senate, and, on the 12th of July, a committee reported that it would not be expedient to act upon the subject at so late a period of the session, but at the same time earnestly recommended it to the early and attentive consideration of the Senate at the next meeting of Congress. [See No. 348, page 215.] But then, unfortunately, the war and the financial embarrassments of the country forbade an attempt to revive the subject. Now, however, all the pre-existing obstacles would seem to be happily removed, and the present moment appears to your committee highly auspicious for Congress to interpose, and to grant its prompt and efficient aid to the company.

For a full and able exposition of the history of the Chesapeake and Delaware canal, of its utility, of its practicable and easy execution, of the progress and state of the work, of the probable expense, and of the causes which compelled the company to suspend their operations, your committee beg leave to refer the Senate to the said memorial of the president and directors, with their observations accompanying the same; to the report of the Senate, made thereupon, of the 21st of March, 1806, [See vol. i, No. 209, page 454;] and also to the report of the Secretary of the Treasury on roads and canals, made in pursuance of a resolution of the Senate of the 2d of March, 1807; and pray that the same may be taken as a part of this their report.

After this general reference, your committee deem it unnecessary to go into a full discussion of the merits and utility of the Chesapeake and Delaware canal. They will, however, glance at one or two of the most important considerations.

The Chesapeake and Delaware canal may with justice be considered as of first-rate importance in the great proposed line of inland navigation along the Atlantic seaboard from north to south, and its execution as insuring the opening of that great communication at no very distant period.

It embraces within itself a wide extended range of interests from North Carolina, including all the towns and landings on the rivers and waters of that State, emptying into the Albemarle and Pamlico sounds, as well as of the numerous rivers of Virginia and Maryland, which empty into the Chesapeake bay, for a distance of six hundred miles, to Trenton, on the Delaware.

But this is not the most interesting view of this subject. The Chesapeake and Delaware canal is especially calculated to subserve and promote the great interests of the nation. As a military work, it offers facilities of the highest importance.

From the extent and exposure of the Atlantic States to an enemy possessed of a naval superiority, how important is it to have an interior navigation along and near the frontier which will admit of the transportation of an army, with its artillery, &c., in safety, from point to point, with a celerity of movement equal to that of the enemy.

During the revolutionary war it is stated that General Washington often lamented the want of a navigable canal from the Chesapeake to the Delaware. His supplies for the most part were drawn from the Chesapeake, and the difficulties he experienced in procuring the means for transporting them across the isthmus are said to have been inconceivably great.

But what he most lamented was the dangerous and vexatious detention to which he was inevitably subjected, when he arrived at the isthmus on his march to the south, for the want of wagons to transport his stores and heavy artillery from one bay to the other. This detention, at a juncture so critical, under circumstances less favorable, might have proved fatal to him and to his army.

The inconveniences felt and incalculable expense incurred by individuals as well as the public, during the late war, in the vast and heavy transportations across the isthmus, must be fresh in the recollection of every one. So great was the carriage, during this period, of goods, tobacco, flour, cotton, and other bulky articles across the peninsula, that it became necessary to use four distinct lines of transportation from different points of the Chesapeake to corresponding points of the Delaware, at an expense of wagonage estimated for one year at not less than four hundred and fourteen thousand dollars, nearly one-half of the estimated cost of the canal.

The committee further remark that, if it is at any time to enter into the liberal policy of Congress to aid the Chesapeake and Delaware canal, there are reasons in reference to the particular state of the work itself why that aid should be speedily afforded.

For the want of funds the operations of the company have stood suspended for ten years and upwards; and that important and difficult part of the work, the feeder, (nearly completed,) with its several embankments, culverts, and bridges, is exposed to daily injury, and in danger of great dilapidation, if not ruin. Besides, the company not having been able to comply with certain contracts for lands and water rights for the use of the canal, suits have been brought and judgments obtained by the proprietors against them; so that the lands and water rights so purchased are in danger of being sold, and the money actually paid in part for said lands and water rights, amounting to large sums, is in danger of being actually lost.

One other remark the committee have deemed worthy of notice. The Chesapeake and Delaware canal necessarily passes through the extremities of two States, without being so central to either as to command the general interests of either Government. Its peculiar local situation would, therefore, seem to recommend it to the aid and patronage of the General Government, especially in connexion with its acknowledged local and general utility.

The whole expense of the canal is estimated at - - - - -		$850,000
Of which has been paid by the stockholders, and expended on the work, - - -		100,000
Yet wanted to complete the canal, - - - -		750,000
To raise this sum, the committee propose that Congress should authorize a subscription for		
2,000 shares of the stock of the company, at $200 per share, making - -	$400,000	
There remains to be paid in on the stock subscribed and not forfeited, - -	100,000	
		500,000
Leaving a deficit of - - - - - -		$250,000

which it is presumed will be made up by additional individual and other subscriptions.

In fixing upon the sum of $400,000, the committee have had regard to the embarrassments of the company, the magnitude of the work, and the disposition heretofore manifested by the Senate to grant lands to the company equal in value to the sum now proposed.

Upon due consideration, the committee are of opinion that the sum of $400,000 ought to be appropriated, to be applied by way of subscription for the stock of the Chesapeake and Delaware Canal Company, and have accordingly submitted a bill with this report for that purpose.

Observations respecting the Chesapeake and Delaware Canal.

The committee of the president and directors of the Chesapeake and Delaware Canal Company, appointed to present their memorial, and solicit the aid and patronage of Congress, beg leave respectfully to offer to the members of the Senate and House of Representatives the following *facts* and *observations* relative to the said canal, as the ground and reasons for their application:

The utility of canals in every country where they have been introduced is proved by the example of so many great nations, both ancient and modern, that at this period it seems almost unnecessary to enter into an investigation of their general utility, or of their history. In order, however, to show their application to the United States with more force, and to prove the greatness of their importance, a short sketch of their introduction, and subsequent improvement among many distinguished nations, may revive the recollection of the members to numerous facts and principles which must have occurred to them in their general studies.

At a very early period of society, the Egyptians bestowed immense advantages on their country by the canals they executed along the river Nile, and from the Mediterranean to the Red sea, through the isthmus of Suez, by which means the commerce of India and all the maritime parts of Asia was opened to Europe and the countries communicating with the Mediterranean, and was the source of all their great improvements in the arts and power. The accounts of several modern travellers, and particularly the researches of the French and British, who lately visited that country, afford ample testimony of the existence, operation, and advantages of these canals.

From sources no less authentic, and particularly from the late embassy of Lord Macartney, we learn the immense extent and utility of the canals of China, which bring the products of that vast empire from its most distant provinces, interchange those of one region and climate with another, and establish a profound system of political economy through the country.

The Greeks and Romans attempted to intersect the isthmus of Corinth and several other important passes; but, partly from their ignorance of lock navigation, and partly from their genius being less devoted to commerce and manufactures than to war and the luxury of the fine arts, few works of this kind remain in the countries they governed.

No sooner, however, had the spirit of commerce revived, after the barbarous ages, than the nations of Europe began extensive works of this kind; since which, the improvement of those works has continually increased with the civilization of the countries which have adopted them, and has been the chief means of introducing and nourishing their commerce, their manufactures, and those useful arts which have changed the condition of mankind, and promoted the happiness of the people more than all other circumstances.

Some of the first modern canals were undertaken and executed by the free republics of Italy, where lock navigation, which forms an important era in the history of canals, was first used.

France, under her ancient kings, early engaged in enterprises of so much value to the nation: Henry IV. constructed the canal of Briare, and designed many others, which have since been executed. Louis XIV. began and completed the great canal of Languedoc, which, extending from the Mediterranean to Toulouse, opened the communication from that sea to the Bay of Biscay, and has at once furnished incalculable advantages, by saving a circuit of near 2,000 miles of sea navigation, and established a monument of his greatness more durable than all the other transactions of his reign; succeeding kings, in the same manner, added numerous works of the kind; and the nation, both while a republic and under its present emperor, amidst all the wars and calamities it has suffered, has unceasingly devoted itself to the construction of canals.

In Holland and Flanders, still more attention has been bestowed to this important subject. The former nation may indeed be said to owe its political origin and existence to canals, since they not only drain the country, but intersect it so much in every direction as to form the universal means of communication.

In Flanders, so numerous are canals that few of its cities are without them; and the admirable agriculture and manufactures of those provinces have been formed and brought to maturity by the aid which water conveyance affords them.

But the island of Great Britain furnishes a proof of the advantages of canals beyond any other country. That nation has now become the maritime rival, and almost the controller, of every commercial people; her superiority has arisen from her unbounded commerce, and the vast wealth it has introduced, the basis of which wealth is her immense manufactures, which supply the wants of a large portion of the earth: the foundation of these manufactures has again been formed by her internal improvements, and particularly her canals, which, since their introduction by the Duke of Bridgewater, scarce fifty years ago, have been so rapidly extended as to traverse the kingdom in every direction. By these means her mines of coal, iron, limestone, and every other raw material have been opened and dispersed for the purpose of manufacture; while the products of agriculture have been conveyed from province to province, and the demands of one place supplied the resources of another; hence, by her immense inland navigation, universal industry and employment have been everywhere diffused, first, to supply her own wants, and, secondly, to furnish a vast supply for export, to obtain the wealth of other countries.

The United States, both from their present political and natural situation, demand from their Government every aid it can furnish, which renders it dubious whether there is any object which can more highly merit the attention of their rulers. Their soil and the industry of the people have, in a few years, carried their agriculture to an immense extent; and their enterprise has created, with the means it furnishes, a commerce which now vies with the oldest nations of Europe.

But her rapid increase in prosperity has already drawn upon her the envy, the jealousy, and the hostility of other nations, which alone can be counteracted by improving her internal strength, supplying her wants as far as possible by her own produce and manufactures, and extending her agriculture so as to gain from its surplus the wealth of other nations, and furnish her own Government with the support it may require in every exigency.

For all these purposes, her want of population, and the allurements held out by her unsettled territory, form the only obstacle. The price of labor retards her agricultural improvements, and prevents the more rapid increase of her manufactures; and the difficulty of communication from one part of her territory to another adds immensely to these disadvantages. It must be obvious, therefore, that whatever mechanical or other arts can lessen or supply the want of manual labor, or whatever improvements can accelerate internal communication, are of infinitely more importance in the present situation of the country than at a future one, and form at this moment the fairest objects for private exertion and public encouragement.

It is only necessary to examine the produce of the different States, to be convinced how much that produce may be so disposed as to form an incalculable increase of internal resource and foreign wealth.

The southern States furnish abundance of materials, which, if cheaply conveyed to the middle and northern States, would encourage manufactures. Coal, which is the basis of almost every manufacture, abounds on the navigable waters of James river, in Virginia, and is wanted not only in the maritime cities, and along the whole seacoast, but in those interior situations where means exist for forming mills and waterworks; wheat, flour, and corn are produced in the middle States, and wanted both to the southward and eastward; tobacco is the growth only of a few States, and is wanted in the rest; fish, oil, lumber, and a variety of other articles, are produced to the northward, and are all in demand to the southward: in the interior of all the States, there are vast quantities of limestone, iron, copper, lead, and other materials, which are accessible to navigation, and will not bear a carriage by land, but which may be universally diffused by means of interior canals, uniting with a general one through the Union.

The advantages, and indeed the necessity of canals, may be proved by a few simple facts. A ton of goods by weight or measurement (of forty cubic feet) is frequently brought from Europe, a distance of 3,000 miles, for forty shillings sterling, or about nine dollars; this rate admits of salt, coal, stone, lumber, and the most bulky articles being imported from beyond the seas cheaper than they can be conveyed for a very short distance by land, since a ton of goods cannot be carried on good roads for the same price more than thirty miles. Hence the charges of conveyance through the United States are very great, even for fine and valuable articles; but on the bulky products of agriculture, and on mineral productions, they operate as a total exclusion. In England, wherever coal is discovered, it immediately becomes the basis of manufactures, as the materials to be worked into use, such as iron, copper, clay for earthenware, glass, &c., are either conveyed to it, or the coal itself is brought to the places where these articles abound; this can only be effected by canals. A coal mine may therefore exist in the United States not more than ten miles from valuable ores of iron and other materials, and both of them be useless until a canal is established between them, as the price of land carriage is too great to be borne by either.

Nor does the conveyance of produce coastwise by sea lessen the expense in any manner proportioned to that of canals, or even of foreign vessels, for which the following reasons may be assigned: first, the coasting trade is chiefly carried on in vessels which take their produce from, and deliver it into, small ports; these vessels are therefore generally small, and are navigated at a far greater expense in proportion than large vessels: secondly, the danger of coasting voyages is greater, which proportionably increases the risk and prices of insurance: thirdly, the delays of delivery, accident, &c., port charges, repairs, and other expenses, are accumulated on small vessels. Hence goods are frequently brought from Europe nearly as low as they can be conveyed by sea from Baltimore to Philadelphia—cities which by land are not more than 100 miles from each other. This is remarkably the case with respect to coal, which is brought into most of our maritime cities from Liverpool, and sold as cheap as it can be brought to them from James river, which is not one-sixth of the distance.

But canals obviate all these inconveniences; they avoid the risk of a stormy coasting navigation, and render the charge of insurance little or nothing; they reduce the number of hands employed in conveyance, as upon the canals themselves one horse saves the labor of many men; and where river navigation is connected with them, their superior safety and ease require in no degree the expense of coasting vessels: the navigation also is never impeded by winds or tides, but vessels pass on at all times with entire certainty, except from frosts alone; and the arrival of produce to a market may be calculated on with a great degree of exactness: all which circumstances far overbalance the tolls which are paid upon them. By proceeding through the country, also, they open a variety of markets, both for the sale of their produce, and to obtain some other in return. A vessel, for instance, loaded with produce in the Chesapeake bay, would have the advantage of calling at Baltimore, or of proceeding directly on through Delaware to Philadelphia, and from thence to New York, Albany, or Boston, in a direct course, with a choice of all these markets, and the certainty of providing, at some of these, articles in return—a kind of voyage which it would be nearly impossible to perform coastwise.

Upon a survey of any map of the United States, it will appear that the distance from the head of Chesapeake bay, round by sea, to Philadelphia, is nearly 500 miles, which is saved by a canal of 21 miles; the distance again, from Trenton, on the Delaware, to New York, or Brunswick, on the Raritan, is near 300 miles, and will be saved by a canal of 27 miles: such is the saving in point of distance. With respect to time, it may be reckoned as follows:

From New York to Brunswick is a customary passage of one tide, - - -	7 hours.
From Brunswick to Trenton, by a canal, at the rate of 4 miles an hour, is -	7 "
From Trenton to Philadelphia, is - - - - - -	10 "
	24 hours.

This voyage is performed in this time nearly with certainty, whereas coastwise it requires a week, and often longer.

The passage from Philadelphia to the mouth of the intended canal, near Wilmington, is	12 hours.
From thence to the end of the canal, - - - - -	5 "
From the end of the canal, on Elk river, according to the usual time of the packet-boats, to Baltimore, - - - - - - -	9 "
	26 hours.

This voyage requires, on an average, from a week to ten days by sea; indeed, the inconvenience is so great that it is rarely attempted.

Other calculations might be adduced to prove still further advantages; for instance, from Newport, in Rhode Island, and from Albany to New York, is nearly an equal distance of about 180 miles, and the passage from either is made to New York in about 36 hours; so that, adding them to the distance from New York to Baltimore, a passage would be made of 358 miles, nearly with certainty, in about 90 hours.

The Chesapeake and Delaware canal is intended to be made of the depth of 7 feet 6 inches, which will accommodate all the vessels usually plying on the Chesapeake and Delaware, and is such as all vessels employed in the whole interior navigation of the United States may be easily conformed to. When that canal is opened, the communication will be complete from Norfolk or the Capes of Virginia, and from all the towns and landings on the Chesapeake and its numerous waters, for a distance of near 400 miles, to Trenton, on the Delaware; and should the Jersey canal be opened, this distance will be extended 250 miles farther, if to Albany, and nearly 300, if to Newport and Providence.

It is easy, however, to see, by examining any map of the United States, that this extent may be carried much farther. To the southward, the canal through the Dismal Swamp, now in execution, will open the communication to the waters of Albemarle Sound, and from thence, through the inlets, to South Carolina and Georgia. To the northward a communication is now nearly opened from Albany, up the Mohawk river, to Lake Ontario and all the upper lakes; if a similar one be made from the Hudson river to Lake Champlain, it will extend the navigation to Quebec; and to the eastward, if the pass from Buzzard's to Boston bay be opened, which has been contemplated, it will in like manner extend it to Boston and all the coasts of Massachusetts.

Thus, with opening only a few short passes, of which the Chesapeake and Delaware canal is the great and preliminary one, a communication may be made nearly free from all the dangers of the ocean along the whole coast of the United States.

This communication will derive immense advantages, and in turn impart them to the local situations through which it passes in the several States; its general course, particularly from the Chesapeake to New York, will be nearly northeast and southwest, by which the navigation will be aided by the most prevailing winds, especially through the spring and summer; it will either intersect or be blended with all the rivers which lead into the interior of the several States; hence, its shores will form an immediate deposite for all their produce; it will also visit numberless smaller streams on which manufactories are or may be established, supply them with materials, and in turn carry from them their produce.

Such are the advantages of this communication, at all times, whether in peace or war; but, in the latter state, which the country has already, and may again experience, these advantages are increased to an incalculable degree. The principal advantage which the British derived in the revolutionary war arose from the command they possessed of the sea and of our coast by their navy; this advantage may be again obtained for some time, and forms the chief means by which an enemy can injure us, as it requires a considerable navy to guard our extensive coast. The consequences of these advantages were, first, in blocking up our harbors and seizing our seaports, the trade of which being destroyed, the sufferings of all those districts which depended on them for a market and supply of foreign articles became very great; secondly, our trade abroad being destroyed, supplies, though often

obtained in abundance at various parts of our extensive seacoast, in defiance of the vigilance of an enemy, were but very partially dispersed through the country; and, thirdly, by the rapidity with which a naval force could move along our seacoast, their armies were easily conveyed from one port to another, to attack us in numerous points at once, to make incursions, and do great injury before our armies could move against them by land with the necessary baggage, artillery, and stores. Hence, several armies became necessary, and, even with these, the difficulty of communication rendered it by no means easy to form an adequate defence of our extensive country.

But if the communication in question be formed, our defence becomes comparatively easy. In the course of the late war, even in Europe, canals were an immense advantage to the armies who possessed them. In France, Flanders, and Holland, they formed a great and powerful aid; and one instance in Ireland will show the advantages derived from them there. In one of the invasions of that country, when the French had landed in the western counties, upon the intelligence reaching Dublin, an army of 10,000 men, completely equipped, with all their artillery and baggage, embarked on the canal, and, by attaching the cavalry horses to the boats, the whole was conveyed, ready for action, sixty miles in ten hours—a distance which would otherwise have required three or four days, with all the disadvantages arising from the fatigues of a march.

By these means, if an army were stationed in the vicinity of either of the canals in Delaware or Jersey, both of which are central to the United States, they might be conveyed from the Chesapeake to New York, or still further eastward or southward, with as much expedition as an enemy could sail along the coast.

Our late excellent President and commander-in-chief, General Washington, was known often to have expressed and lamented the disadvantages which he sustained for want of such a communication, especially from the Delaware to the Chesapeake; as not only by far the greatest proportion of the supplies for the army at all times were drawn from the Chesapeake, to such an extent as to require four hundred wagons nearly in constant employ, but, in his march to the southward, the baggage, stores, and heavy artillery were conveyed by water, and upwards of one hundred river craft employed for the purpose, from Philadelphia to Christiana bridge, and again on the Chesapeake. Yet such was the difficulty of procuring wagons to convey them across the isthmus that he experienced inconceivable delay in going to the southern army; and if the enemy had embarked again for New York or Jersey, those countries must have been completely invested before he could have returned to their assistance.

As a military work, a canal is in itself of that nature that, while it affords the utmost advantage to an army of the country, it can be of no use to an invading enemy, being a deep ditch; especially when of the size intended to be constructed from the Chesapeake to the Delaware, it presents a strong front against attack, capable of being defended by batteries, and passable only with the same difficulties as rivers and streams, the possession of which is always an object of consequence in defence. If an enemy be likely to gain possession of it, the withdrawing the boats, and letting off the water, which are easily to be accomplished in a retreat, would render it useless to them; while all the injury they could do it could be easily repaired, when it became again in possession of the country. This fact was verified in the attack made by the British army upon Ostend, in 1798, expressly for the purpose of destroying one of the finest canals in Flanders, which had been of great use to the French army in defence of that country; but though they landed and succeeded in destroying the basin and principal works at the entrance of the canal, yet, having no boats to pass into the interior, that army was soon overcome, and the canal in a few weeks completely restored to use.

So sensible are the English nation of the immense benefit of canals as works of defence, that, in addition to the numbers they now possess, they have devoted part of their army to form another, expressly as a protection against invasion. This canal is intended to extend from London to the coast of Kent, near Romney, by which means troops from the metropolis and all the interior of the country may be immediately conveyed to that part of the coast most favorable to the landing of an enemy, while, by strengthening the banks of the canal with forts, a succession of posts would be kept up to annoy and retard the march of any army which should land, and to secure the retreat of their own.

In this view, the situation of the Chesapeake and Delaware canal is one of the most admirable that occurs in the United States, or could be desired in any country. It is placed at a great distance from the ocean. The river Delaware may be easily made defensible below the mouth of the canal by batteries, a small navy, and other means which have already formed an admirable defence of that river. The Chesapeake bay could also be defended by a naval force far less than would be adequate to protect the coast; but if an enemy should force its passage up either bay, or land below, and march to possess themselves of the canal, time would be given to prepare for defence; the facility of communication in the interior would concentrate the forces of the country, and the position of the neighboring grounds would enable them to make a bold and successful stand.

This position is indeed at once so strong and so central that it is highly probable that, in any future attack of the country, it would be selected as the station of an army of defence for the middle States. Along the northwest line of the canal the eminences of Iron hill and Gray's hill form high, bold, insulated points, capable of being fortified against any attack, commanding the whole course of the canal within sight, and but a few miles distant from both the Chesapeake and Delaware bays; while in their rear they have the interior of the upper part of Maryland, Delaware, and Pennsylvania, for drawing supplies, and affording one of the strongest countries for retreat.

The distance of this position is also nearly equal from the State of New York and from Virginia; to either of which an army could be conveyed in a few hours, by the means already pointed out, should an attack be made against them.

The practicability of forming canals is at this period no longer a matter of doubt or speculation. In Europe, every obstacle of nature has been overcome in order to accomplish them; where mountains or hills interpose, they are either ascended and descended again by locks, or they are perforated, and the canals carried through them, often for many miles; valleys are crossed by embankments or by aqueducts; streams and rivers by bridges of masonry, differing from common ones only in their superior strength; morasses are drained or filled up; and, in short, the execution of the numerous works which have been made, or are now making, furnishes at once proofs and models of every kind of work which can occur in effecting canal navigation; so that, at this moment, they do not remain an object of invention, but simply of imitation and perseverance.

The communication over the isthmus of the Chesapeake and Delaware is of that nature to have invited the attention of all men who had just ideas of the important objects of canal navigation, from the earliest settlement of the country. No sooner had the genius of the Duke of Bridgewater planned his great improvements in England, than the spirit and enterprise of the country, even when so young in the arts and feeble in its means, was excited to imitate them. So long ago as the years 1769 and 1770, a committee of the Philosophical Society, consisting of Dr. Franklin, Mr. Rittenhouse, Mr. Hollingsworth, Mr. Thomas Gilpin, and several others, were appointed to survey this country, and they ascertained, in the fullest manner, not only the ease, but the practicability of a canal. The ability of the country, however, was at that period inadequate to undertake it; and, the war occurring soon after, the task of performing it was reserved for the present age, with the immense advantages it possesses in means, and in the numerous examples furnished by other nations.

The operations and surveys which have been made by the company now formed, within the last three years, will appear by the reports they have published, (which will be presented herewith,) and will furnish the fullest confirmation of those formerly made, with a variety of other facts, which the superior knowledge and ability of engineers at the present period enable them to make.

The course of the canal, as now marked out and decided upon, from Welch Point, on Elk river, where vessels of any size may approach it, to bold navigable water on the Christiana, near the Delaware, is twenty-one miles. All this course is over a country wholly unimpeded by hills, rocks, morasses, or any material difficulty whatever. The canal is intended to be supplied by water from Elk river and White Clay creek, taken at positions on each of them sufficient to give the necessary elevation, and conducted by feeders, or canals of supply, to the main canal itself. These feeders are constructed on a smaller scale than the main canal, but are also made sufficient for barge navigation, and promise to afford a considerable augmentation to the profits of the work, as they extend northward nearly to the boundaries of Maryland and Delaware with Pennsylvania—countries affording stone, lime, timber, and many mineral productions in great demand in the southern States, and numerous mill-seats which may be converted into manufactories by the aid the canal will give them.

As the supply of the canal with water was the basis of its navigation, when completed, and afforded great advantages to all the operations of the work itself, by furnishing water carriage for removing the earth, stone, and other necessary materials, the company have been engaged, thus far, in completing the canal of supply from Elk river, which was found to furnish sufficient water for opening the canal, and for navigation upon it. The ground through which this feeder has been constructed presented many difficulties not occurring in the main canal itself, as, in passing upwards to the course of the feeder, it enters a hilly country abounding with ridges of stone, deep valleys, and many other objects of labor; none, however, of more difficulty than yielded to a moderate degree of perseverance; and the board feel a great degree of satisfaction that, in nearly completing it, as they have done, they have had time and opportunity to form and mature a system for their operations, to gain considerable experience, to collect a body of excellent workmen, and, by encountering their greatest difficulties in their outset, to be prepared to enter upon the work of the main canal itself with superior confidence and advantage. The course of the feeder which has already been opened is about five miles, which is completed, except a few short spaces, and the construction of the necessary bridges and other masonry. The work of a few months, therefore, will render this part of the undertaking complete, and confine the future operations of the company to the main canal itself.

As some estimate of the expense of this undertaking may be required, the committee have only to mention that, in all works, whether of a public or private nature, and even in those of the most simple and customary construction, difficulties occur in forming just estimates, and still more in confining the expenditure to them when made. This observation, they are sensible, must forcibly apply to a work nearly new in its kind in these States, and of a nature more complicated than usual; but, in the present instance, the board possess the advantage of considerable experience, which they trust they can apply, with some confidence, to an estimate of their future work; they therefore, with as much certainty as can be expected in an undertaking of the kind, calculate that the completion of the main canal will not exceed $25,000 per mile, or $550,000 altogether.

In the commencement of this undertaking, the private subscriptions amounted to near $400,000, of which about one-fourth has been received and expended in purchases of the water rights and land, and in the preparations necessary to collect and accommodate a large body of workmen, and to supply them with tools and materials, and in the operations of the feeder. From the subscriptions, also, some deduction must be made for losses by bankruptcy, deceased persons, and those casualties which attend the collection of money. After all these are deducted, there remains a large sum of efficient funds for the purpose of continuing the work.

The chief difficulty, however, which the board have experienced, which offers itself as the obstacle to their progress, and forms the basis of their application to Congress, is the despondency of the private subscribers, many of whom are persons of small or moderate fortunes, to whom the amount of their subscriptions is of considerable consequence, and who, therefore, are actuated by fears, and feel the deprivation of capital and interest, for a few years, until the canal can be completed, more forcibly than the just and reasonable hopes that, when completed, the canal, in addition to its great public utility, will afford a large private emolument.

The calculations which have been formed upon this head have been founded upon the knowledge obtained by the board of the vast trade at all times carried on across the peninsula, even under the great inconvenience of carriage by land, a just appreciation of the increase of this trade, and the numerous advantages otherwise offered by the canal.

It therefore appears essentially necessary to the completion of this work that the patronage and support of it should be taken up by the public, and that the hopes of individuals should rest upon something beyond private exertion. In the present moment, it may be considered as one of those children of the public which is struggling for existence, and demanding that aid which may confirm its strength and enable it to advance to maturity. If deprived of this support, it will probably perish, and not only become an object of great public injury and regret, in itself, but, in its example, protract the undertaking of all great works, or load them with despondency if begun. The aid of the Legislature of the United States would completely revive the spirit and hopes of the subscribers, bring forth their exertions, and give to the company that confidence which would enable them to draw resources from their own means, as the subscriptions of the individuals would be immediately obtained whenever a small degree of public protection and support is given them.

Of the advantage of this protection and support, the history of the political economy of all countries furnishes the most ample proof. Every nation has found it necessary, in its first attempts to establish manufactures, roads, canals, and even commerce itself, whether foreign or internal, absolutely to begin them at the public expense, or to cherish the efforts which the enterprise and public spirit of individuals prompt them to make. The states of Holland and of the Low Countries first made, and have ever since supported, their canals with the public money. Henry IV. constructed the canal of Briare, and several others, by the same means. Louis XIV. not only introduced the manufactures of France by his own institutions, but paid the expense of the canal of Languedoc, and afterwards gave it to Mr. Riquet, the engineer, forever: and the whole history of the English nation, and of every session of its Parliament, is replete with donations and acts for granting the public aid and protection to every work which is calculated to promote the general system of political economy; from whence has arisen that enterprise in individuals which attempts every improvement, from the confidence created by so many successful examples, and by the certainty that the Government will, in some way, lend its support where private means are not sufficient.

The Chesapeake and Delaware canal, though so admirable in its natural situation, and of such immense importance, has some difficulties of a political nature to encounter, which particularly places it under the protection of Congress. It passes through the extremities of two States, viz. Delaware and Maryland, and near to that of another, (Pennsylvania,) without being so central to either as to command the general interests of either Government, especially as both Maryland and Pennsylvania have so many objects of a similar kind in the interior of their own

States; and Delaware is possessed of means too limited to give the necessary encouragement. Hence, though the advantages to all those States are undoubtedly great, its importance as a national work, and as an undertaking which one State relies on the other to attempt, prevents its receiving the full support of either, and compels it to look to Congress for aid and protection as a national work.

Of what nature or in what way it may appear expedient for the Federal Legislature to grant its aid to this undertaking, it is by no means proper, or within the province or abilities of the committee to point out: whether in subscribing to a number of shares, or in a specific grant, such as has been given to harbors, roads, light-houses, and works of a similar nature, or in any other manner, must be left wholly to the superior knowledge and discretion of the Legislature. All that the committee wish to impress on the members to whom they respectfully offer these observations is, the immense importance of the undertaking itself; the necessity of public support to insure its progress or save it from ruin; and the certainty that even a very moderate aid will increase its private support, and insure the execution of a work, great, indeed, in its own importance, but still greater as the basis and example of all others which the improvement of our country may require, or the genius and enterprise of its citizens undertake for the general benefit of the Union, detached from the objects of particular States, of which the wisdom of Congress will always form the best judgment and discrimination.

KENSEY JOHNS,
JOSHUA GILPIN,
ROBERT H. GOLDSBOROUGH.

DECEMBER 1, 1805.

14th CONGRESS.] No. 400. [1st SESSION.

CONTESTED ELECTION OF WILLIAM McCOY, A REPRESENTATIVE FROM VIRGINIA.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 19, 1816.

Mr. TAYLOR, of New York, made the following report:

The Committee of Elections, to whom was referred the petition of Robert Porterfield, contesting the election of William McCoy, who is returned as one of the representatives of the Commonwealth of Virginia in the present Congress, and praying to be admitted to a seat in his stead, have had the same under consideration, and report:

That, at the last election in Virginia, the petitioner and sitting member were opposing candidates in the congressional district composed of the counties of Augusta, Rockingham, Pendleton, and Bath. The whole number of votes given in the district was 2,378, of which 1,213 were returned for the sitting member, and 1,165 for the petitioner. One of the votes given for the sitting member was, by mistake, set down and returned for the petitioner; and three votes offered to be given for the sitting member were improperly rejected by the sheriff, and have been added to his poll by the committee. From these facts, it appears that the sitting member's majority amounts to 53 votes. But, of the votes given at the said election, 745 were objected against as illegal; of which, 390 were given for the petitioner, and 355 for the sitting member. The committee have carefully investigated the titles upon which the said votes were given, and find that there are upon the polls of the petitioner 171, and of the sitting member 149 illegal votes. The difference between these numbers, being added to the 53 votes above mentioned, gives to the sitting member a majority of 75 over the petitioner.

The election in the said district commenced in the county of Pendleton, on the 4th, and closed in the county of Augusta, on the 24th day of April last. On the next day, the petitioner caused a notice, in writing, to be served on the sitting member, communicating the intention of contesting his election.

On the 22d day of May, the petitioner served on the sitting member a list of the votes to the legality of which he objected. On the 9th of June, the sitting member served a similar list on the petitioner, and invited him to a speedy commencement of the investigation. On the 22d of August, the petitioner notified the sitting member of his intention to commence the investigation on the 4th of September then next, at the court-house in the county of Augusta, and to proceed, with as little delay as circumstances would admit, to the other counties in the district. On the last-mentioned day, the sitting member caused to be delivered to the petitioner a protest, in writing, against the legality of his proceedings, and declined attending accordingly. The petitioner proceeded to take testimony in support of his votes, pursuant to the notice. Upon these facts, the sitting member contended that the committee ought not to receive the testimony so taken: 1st. Because it had not been taken within the period limited for that purpose in contested elections for members of the General Assembly of the Commonwealth of Virginia; and, 2d. Because the delay of the petitioner in commencing the investigation for more than four months was unreasonable, and ought not to be allowed.

The committee overruled these objections, and admitted the evidence.

Upon proceeding to a scrutiny of the votes in the county of Rockingham, the petitioner contended that the whole poll ought to be rejected: 1st. Because the election commenced in his absence. 2d. Because the four clerks or writers appointed by the sheriff to keep the poll were not sworn, previous to the commencement of the voting, "*that they would take the poll fairly and impartially;*" but, on the next day after the election, examined and subscribed the poll, and made affidavit thereon "*that the same did contain a just and true account of all the votes taken at the said election, to the best of their knowledge and belief.*" 3d. Because the names of the voters were not written under the names of the candidates, in separate columns, but in the same column, and the votes carried forward and marked under the names of the candidates for whom they respectively voted; and, 4th. Because great noise and confusion prevailed at the election, without any effectual attempt by the sheriff to prevent it.

The first and fourth of these objections were not supported by evidence. The second and third were overruled by the committee. In regard to the second objection, it was proved, by the affidavits of two of the clerks who kept the poll, "that, although they were not sworn before the voting commenced, yet they conducted their poll-book under the impression that they would be sworn after the polls were closed; and that this had been the most usual custom in the county of Rockingham." In regard to the third objection, it not only was proved that it had been usual to keep the poll in that manner in the county of Rockingham, but that the poll in the county of Pen-

dleton, where the election commenced, and in which the petitioner had a majority of the votes, was kept in the same manner, and was not impeached by either party. The errors specified in these objections, in the judgment of the committee, relate more to form than substance. It was not alleged or pretended that the final result had been in anywise varied in consequence of a deviation in these particulars from the letter of the law regulating elections.

In the course of the investigation, the sitting member applied to the committee for permission to avail himself of an agreement entered into between him and the petitioner, at the election in the county of Pendleton, to the following effect: that votes should be admitted on title-bonds for a sufficient quantity of land, accompanied with a possession of six months; that persons having a right to vote in one county, but *happening* to be at an election in another county of the same district, might vote in such other county; and that votes of persons residing out of the district should not be admitted. The petitioner admitted such agreement to have been made, but contended that he was absolved from its obligations, because the sitting member had admitted the votes of two or more persons not residing within the limits of the congressional district to be entered on his poll, and counted among his votes. This allegation was denied by the sitting member.

The committee, being of opinion that the agreement of the parties could not either diminish or enlarge the elective franchise as secured to the freeholders of the district by the laws of the commonwealth, decided: 1st. That the votes of freeholders residing out of the district, but having competent estate and possessions within it, be held legal; 2d. That all votes not given in the county where the land upon which they were respectively given was situate, be rejected; and, 3d. That all votes given by virtue of title-bonds not conveying a legal freehold estate be rejected.

The committee further decided: 1st. That all votes recorded on the poll-lists should be presumed good, unless impeached by evidence; 2d. That certified copies of the commissioners' books or land-lists should be read in evidence, and deemed satisfactory as to the qualification or disqualification of voters, unless corrected by other evidence; and, 3d. That the affidavit of a voter, taken before competent authority, in pursuance of regular and sufficient notice, should be read in evidence to prove his title to vote.

The committee deem it proper to report to the House these decisions, by which it has been regulated in conducting the investigation, and respectfully to submit the following resolution:

Resolved, That William McCoy is entitled to a seat in this House.

14th Congress.] **No. 401.** [1st Session.

EXTENSION OF A PATENT RIGHT.

COMMUNICATED TO THE SENATE, FEBRUARY 27, 1816.

To the honorable the Congress of the United States: The petition of Harriet Fulton, widow and executrix of the late Robert Fulton, humbly represents:

That the said Robert Fulton, on the 11th day of February, 1809, and on the 9th day of February, 1811, obtained two patents from the President of the United States, as the inventor of a method of navigating vessels by the agency of fire and steam; and departed this life on the 23d day of February last, leaving your petitioner and four young children dependant on his said invention for support, and a large debt, which arose from his unwearied and expensive efforts in prosecuting and perfecting this great improvement.

That notwithstanding various attempts have been made to propel vessels by the power of steam, yet he was the first person who established its practical effects in navigation. It is unnecessary to expatiate on the advantages of this important discovery; they are particularly felt and acknowledged in all parts of the civilized world. America, peculiarly favored in the number, magnitude, extent, and importance of her navigable waters, must look for her highest prosperity in her internal communication and trade; and it is now undeniably established that steam-vessels can surmount difficulties heretofore considered insuperable; that neither tide, nor wind, nor current can arrest their course; and that for velocity of progress, economy of transportation, and facility of communication, they are superior to all competition.

It is well known to your honorable body that all great improvements in human affairs are the result of patient investigation and elaborate industry; that, in their origin, their progress, and final perfection, application must be associated with genius; and, particularly in those beneficial inventions which are connected with combinations of mechanical powers, not only extraordinary faculties are required, but heavy expenses must be incurred, great risks must be sustained, and much time must be consumed, before they are brought to any perfection. The greatest benefactors of the human race have generally done but little for themselves; and, after having devoted their lives with indefatigable labor and with disinterested zeal to the general good, they have left no legacy to their posterity but an illustrious reputation.

Your petitioner is fully sensible of the delicacy of her situation; she is conscious that she may expose herself to the imputation of vanity; but surely the partiality of a wife will be pardoned, and the tender affections of a parent consulting the welfare of her children will be an apology. In order to support their cause, it is necessary to speak of their father, and, alas! all her recollections of his worth are imbittered by affliction for her loss.

After the husband of your petitioner had obtained a patent for his invention, several years necessarily elapsed before he derived any revenue from it, and in the intervening time he was exposed to enormous expense. He, in consequence, left a debt exceeding $150,000, which was incurred to raise the capital required for this complicated and expensive operation; neither was he, in his lifetime, able to derive any profit from the sale of his patent right, but incurred great expense in defending it against charges and imputations that the same had not been regularly obtained, or that some formal requisite had been omitted; when, without his enthusiasm, industry, and talents, this great improvement would, probably, have been lost to the world.

If the patronage of Government ought to be in proportion to the benefits diffused, then your petitioner can, without arrogance, appear before you, and solicit, in behalf of herself and her children, a liberal extension of his patent; for, without this indulgence, it will be impossible to derive any essential benefit from it.

It has been the policy of enlightened Governments in modern times to encourage the efforts of genius, and to hasten the progress of discovery, by exclusive privileges for definite periods; a limitation of time is, of course, prescribed as a rule of general application, during which it is presumed that the patentee will obtain a sufficient remuneration for his expenses, and for the benefits he has rendered to society; but, on extraordinary occasions, justice and expediency unite in favor of extending the time of the grant, and cases have frequently occurred where this indulgence has been obtained.

In Great Britain a patent for fourteen years was granted to James Watt for a newly invented method of lessening the consumption of steam and fuel in fire engines; an act of Parliament was, six years thereafter, passed, extending the privileges given by the patent to twenty-five years. Thus Mr. Watt, for an improvement in steam engines, received from the munificence of the British Government exclusive privileges for thirty-one years. The case of Oliver Evans is well known; he obtained a patent for an improvement in the machinery of mills, and Congress afterwards passed a law extending the patent seven years; and, notwithstanding the acknowledged utility of those inventions, no one will contend that they ought to be placed on an equal footing with steam vessels.

But your petitioner's husband did not confine his views to this subject alone. The public defence occupied his utmost attention, and engaged his most anxious solicitude. During the late war he devised a steam frigate for the better protection of our cities and harbors. While superintending the execution of this impregnable fortress, he laid the foundation of the disease which terminated his life in a short period. And ought not the widow and the offspring of the man who has planned the means of protecting his country against its enemies to be placed above the pressure of embarrassment and the humiliation of dependance? For such services he never sought, or intended to receive, any remuneration from the Government.

Your petitioner thus confidently appeals to the justice and the bounty of your honorable body in behalf of the children of a man who died while zealously employed in the service of his country, and who has conferred the most extensive benefits upon the world. Let not the widow and the orphan plead to you in vain.

And your petitioner will ever pray, &c.

HARRIET FULTON.

NEW YORK, *January*, 1816.

DEAR SIR: SENATE CHAMBER, *March* 14, 1816.

An application has been made to Congress, in behalf of the widow and children of the late Mr. Fulton, for an extension of his patents for steamboats. As a popular opinion has existed that Mr. Fulton, before his death, had derived great profits from the privileges secured to him by these patents, and that his family will be likely to derive therefrom further and great emolument during the unexpired term of the patents, I am directed by a committee of the Senate to which the petition from Mr. Fulton's family is referred, to obtain such information as is within our reach respecting the situation of the pecuniary affairs or estate of Mr. Fulton. If Mr. Fulton's family already possess, or are likely to acquire, during the residue of the term of the patents, a liberal remuneration for his invention, there would seem to be no sufficient reason in favor of an extension of the patents; while, on the other hand, if such remuneration has not been, or is not likely to be received, during the unexpired term of the patents, such is the very great public utility of the steamboats which have been brought into use by Mr. Fulton, that a strong motive would be found to exist for a prolonging of the patents for the benefit of Mr. Fulton's family.

As Mr. Fulton lived in New York, the city of your residence, and was well known by you, it has occurred to me that it may be in your power to give to the committee some information on this subject.

With very great respect, I have the honor to be, dear sir, your most obedient servant,

RUFUS KING.

BROCKHOLST LIVINGSTON.

DEAR SIR: WASHINGTON, *March* 14, 1816.

Your favor of this date has just been delivered to me. I have no doubt that the opinion which prevails in respect to the profits made by Mr. Fulton out of his privileges secured by the steamboat patents, however general it may have become, is incorrect; at the same time, it is not at all extraordinary that such an impression should have gone abroad, as the gross receipts of the boats in which he was concerned were very large, and well calculated to excite such a belief. But those who make these calculations are not always competent to make them, and sometimes neglect or are unwilling to take into the computation the very large expenses attending such establishments. I should not have been able to form on this subject a more accurate estimate than others, had it not been for information derived from Mr. Fulton himself a very few weeks before his death. In a conversation with him on this subject, he assured me, and with very considerable emotion, that, notwithstanding the fortune which he was supposed to have made from his concern in steamboats, he had not yet paid for his share of them, but, on the contrary, was involved in so large a debt as to be induced to dispose of a great part of his interest in these patents, although I have since understood that a contract which he had entered into for that purpose had not been carried into effect at the time of his death. This statement has since been confirmed by Captain Bunker, who commanded the steamboat Fulton, who was very well acquainted with his affairs, and who has assured me that that gentleman died insolvent, which is now the general opinion in New York.

Considering the expense of building a steamboat of any size, as well as that of running her, it is not very probable that Mrs. Fulton will derive any great emolument under the present patents, during the residue of their term. Prudent men will hardly be willing to incur so great an expense, when the privilege will so soon expire, and their profits be exposed to considerable diminution. Mrs. Fulton's friends have therefore reason to fear that, unless the extension now contemplated be obtained, but little profit will be made by her during the term yet unexpired of these patents.

With very great respect, I have the honor to be, dear sir, your most obedient servant,

B. LIVINGSTON.

The Hon. RUFUS KING.

14th Congress.] No. 402. [1st Session.

CITY OF WASHINGTON: PUBLIC EXPENDITURES, AND VALUE OF PUBLIC PROPERTY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 11, 1816.

I transmit to the House of Representatives a report of the Secretary of the Treasury, complying with their resolution of the 17th of Febru ary.

JAMES MADISON.

March 11, 1816.

The Secretary of the Treasury, to whom the President of the United States referred the resolution of the House of Representatives of the 17th of February, 1816, requesting a statement of certain expenses which have been incurred for public edifices and improvements in the city of Washington, under the authority of the United States, has the honor to report:

That the annexed schedule A, certified by the superintendent of the city, contains a general abstract of the receipts and expenditures, and of the objects of expenditure, in relation to the city of Washington, under the authority of the United States, so far as the same occurred under the agency of the board of commissioners, or of the superintendent of the city, respectively, from the year 1791 to the 1st of January, 1816.

That the annexed schedule B, certified by the Register of the Treasury, contains a statement of moneys which have been advanced by the United States, and of the objects of expenditure, in relation to the city of Washington, other than those included in the preceding schedule.

That from the schedule A it appears that the aggregate of the expenditures under the board of commissioners and the superintendent of the city, amounted, on the 1st of January, 1816, to the sum of		$1,746,014 46
Of which there was drawn from the treasury the sum of	$970,944 08	
Of which there was received upon donation from the States of Maryland and Virginia the sum of	192,000 00	
Of which there was received from the sale of lots, assigned by the original proprietors as a grant, the sum of	583,070 38	
	$1,746,014 46	
That, from the schedule B, it appears that the aggregate amount of the moneys advanced by the United States, upon specific appropriations and authorized loans, in addition to the above, amounted, on the 1st of January, 1816, to the sum of		261,325 45
The gross amount of expenditures, on the 1st of January, 1816, being the sum of		$2,007,339 91

That the value of the public property remaining on hand is estimated by the superintendent of the city, in a letter dated the 27th of February, 1816, at the sum of $1,724,000.

1. About 5,200 standard and building lots of 5,265 square feet each, which, estimated at $180 per lot, the average price of the lots heretofore sold, would amount to the sum of	$936,000 00
2. Five hundred and forty-one acres of ground in the city of Washington, reserved for the use of the United States, which, estimated at the same rate, though deemed of much greater value, would amount to the sum of	740,000 00
3. Lands and freestone quarries in Virginia, wharves and water lots in the city of Washington, and debts due for property sold, about	48,000 00
	$1,724,000 00

All which is respectfully submitted.

A. J. DALLAS, *Secretary of the Treasury.*

Treasury Department, *March* 6, 1816.

A.

General abstract.—Account of receipts and expenditures in relation to the city of Washington, under the authority of the United States, in which the late Board of Commissioners and the Superintendent of the city, their successor in office, had any agency, from the commencement, in the year 1791, *to the* 1st *of January*, 1816; *prepared in obedience to a resolution of the House of Representatives of the United States, passed on the* 17th *of February*, 1816.

Receipts.		Amount.
Donations from State of Virginia, 1791,	$120,000 00	
Donations from State of Maryland, 1791,	72,000 00	
		$192,000 00
From the Treasury of the United States, viz:		
In the year 1798,	$50,000 00	
In the year 1799,	50,000 00	
In the year 1800,	10,000 00	
In the year 1802,	49,650 93	
In the year 1803,	52,000 00	
In the year 1804,	112,423 91	
In the year 1805,	130,800 00	
In the year 1806,	132,400 00	
In the year 1807,	111,000 00	
In the year 1808,	137,196 24	
In the year 1809,	59,600 00	
In the year 1810,	37,500 00	
In the year 1811,	3,300 00	
In the year 1812,	18,573 00	
In the year 1813,	16,500 00	
		970,944 08
Sales of lots and other property within the District of Columbia, assigned to the United States by the original proprietors thereof, to be applied as a grant, agreeably to the act of Congress establishing the temporary and permanent seat of the Government of the United States,		583,070 38
		$1,746,014 46

Expenditures.	Amount.
On the Capitol, including both wings, foundation of the centre, all alterations, additions, and repairs, temporary buildings, and other works for the accommodation of Congress,	$804,343 22
On the President's house and appurtenant grounds,	334,482 19
On the public offices,	117,184 66
On the grounds in the city of Washington reserved for the use of the United States,	38,697 92
On the stone quarries on Aquia creek, in Virginia, and in the city of Washington on land purchased for and still belonging to the United States,	30,225 31
On surveying the territory and city, and marking and bounding the same, including the expense of engraving maps and plans, planting corner-stones of squares, and of preparing a general system of graduation,	67,469 76
On opening and improving streets,	33,646 82
On a stone bridge, (which fell down,) and the present wooden drawbridge and adjoining causeway at the mouth of Rock creek, deducting $9,333 33, the amount of the sale of a portion of ground on the Georgetown side of said causeway, which was ceded to the commissioners for that purpose,	12,775 40
On a wooden bridge over Tiber creek, in Seventh street west,	1,425 00
On a wooden bridge over James's creek, in N street south,	841 59
On wharves to land freestone and other building materials on, viz: one on the Eastern Branch, one on the Potomac river, and one at the mouth of Rock creek,	9,130 17
On temporary buildings for workmen and laborers, including a house used as a hospital for sick laborers hired by the year, and the expense of medicine and attendance,	4,681 23
On the canal from Tiber creek to James's creek,	5,670 61
On interests, commissions, and discounts on loans and other pecuniary transactions, including those relating to loans of $250,000, by the State of Maryland, of United States six per cent. stock in the years 1797, 1798, and 1799, repaid finally in 1808; this being the amount, after deducting nett proceeds or amount derived from said loans on the sale of the stock so borrowed, or the difference between the *nominal* amount borrowed and repaid with interest, and that *actually received* and applied,	165,533 93
On the city of Washington, embracing all other expenses incurred, and not included in any of the above-enumerated accounts, being for purposes of a general nature, such as salaries of commissioners, superintendents, clerks, and others employed as their permanent agents and assistants; office rent, fuel, stationary, and furniture; printing, drawing, authenticating and recording deeds, plats, and divisions of squares; law proceedings, and awarded valuations of buildings removed out of streets; and the various other subjects of expenditure in the preparatory arrangements and progressive operations in the affairs of the city from 1791 to 1816, not so properly chargeable to any other account,	119,906 65
	$1,746,014 46

OFFICE OF SUPERINTENDENT OF THE CITY OF WASHINGTON, *February* 27, 1816.

E. E.

THOMAS MUNROE, *Superintendent.*

TREASURY DEPARTMENT, REGISTER'S OFFICE, *March* 6, 1816.

JOSEPH NOURSE, *Register.*

14th CONGRESS.] No. 403. [1st SESSION.

CUMBERLAND ROAD.

COMMUNICATED TO THE SENATE, MARCH 13, 1816.

To the Senate and House of Representatives of the United States: MARCH 12, 1816.

I lay before Congress a report of the Secretary of the Treasury, containing a statement of proceedings under the act to regulate the laying out and making a road from Cumberland, in the State of Maryland, to the State of Ohio, with a statement of past appropriations, and an estimate of required appropriations.

JAMES MADISON.

TREASURY DEPARTMENT, *March* 1, 1816.

The Secretary of the Treasury has the honor to lay before the President of the United States the annual report of David Shriver, jun., the superintendent of the western road from Cumberland to the river Ohio.

The Secretary, having respectfully submitted to the President propositions for accelerating the completion of this great national work, deems it proper, upon the present occasion, to add the following statement and estimates of the appropriations which have been made, and which will be required for that purpose.

1. *Statement of past appropriations.*

In 1806, by the act of the 3d March, 1806,		$30,000 00
1810, by the act of the 14th February, 1810,		60,000 00
1811, by the act of the 3d March, 1811,		50,000 00
1812, by the act of the 6th May, 1812,		30,000 00
1813, by the act of the 3d March, 1813,		140,000 00
1815, by the act of the 14th February, 1815,		100,000 00
Amount of appropriations,		410,000 00
Deduct amount carried to the surplus fund, not re-appropriated,		22,679 75
		387,320 25
The sum expended upon the road prior to 1815 is	$194,631 80	
The sum expended upon the road during 1815 is	73,708 80	
The sum expended upon the road from the 31st of December, 1815, to the 27th of February, 1816, is	17,446 00	
		285,786 60
Leaving the balance of appropriations on the 27th February, 1816, at		$101,533 65

2. *Estimate of appropriations required.*

To carry the road to Uniontown, about the sum of	$117,000 00
To complete the road from Uniontown to Brownsville, about 12 miles, will require, at the rate of $7,500 per mile, according to the estimate heretofore laid before Congress, about the sum of	90,000 00
To make the road at and from Wheeling, on the Ohio, to the 113th mile marked upon the survey of the commissioners, about 12 miles, will require, at the same rate, about the sum of	90,000 00
To survey the course of the road from Brownsville to Wheeling, through Washington and Alexandria, will require about the sum of	3,000 00
	$300,000 00
Upon this general view, it is proposed that, in addition to the above-stated balance of past appropriations,	$101,533 65
There be recommended to Congress a further appropriation to the amount of	300,000 00
Making, together, the amount required for the above purposes,	$401,533 65

All which is respectfully submitted.

A. J. DALLAS, *Secretary of the Treasury.*

SIR: CUMBERLAND, *December* 30, 1816.

In my last report of the progress of the western road, I stated that twenty-eight miles had been nearly completed. At the same time, we have in a similar situation upwards of thirty-five miles, and on the remaining three miles, (which complete the distance to the Big Youghiogeny river,) the contractor is now engaged. The state of the road is substantially as follows:

The 1st, 2d, 3d, 4th, 5th, 6th, 7th, 8th, and 11th sections are *finished*, embracing a distance of twenty-three miles. The 9th, 12th, 13th, and 14th sections, about eight miles in length, are so near completion as to have admitted travellers upon it for some time past. The 10th and 15th sections (about four and a half miles) are in a state of considerable forwardness, and on the 16th and 17th sections (about three and a half miles) the work is progressing. The *mason work* upon the whole road to the end of the 17th section (Big Youghiogeny river) has been finished, the accounts adjusted and paid. The contractors on that part of the road last let out, to the end of about forty-seven miles from this place, have made considerable progress, and, from present appearances, I conclude they will be enabled to finish the work within the time specified in their contracts, by which time I confidently believe the whole of the turnpike east of the Big Youghiogeny river will be finished, if it be not sooner.

The contractors for the bridge to be built over the Big Youghiogeny river have commenced the undertaking. They have obtained a rock foundation for the west abutment, about fifteen to eighteen feet below the surface of low water, and have raised the abutment to the ordinary height of the water, in the river. This is the chief part of what has been done, except providing materials for recommencing the ensuing season.

The *repairs* made the past summer upon the first six sections (comprising about sixteen miles) have cost $1,200. These repairs have rendered the road nearly as perfect as when first made. Early next summer a considerable extent of road will be received from the contractors, when the expense of repairs will be much increased, and when it appears to me essential that some regular plan be adopted, as well with a view of keeping the road in perfect order, as to diminish the probable expenditures by the timely application of a remedy.

If this great national undertaking does not progress with a rapidity equal to the wishes of Government or the anxiety of individuals, the cause may be easily traced to their primitive sources, without involving the crimination of any one. The two most prominent of these I shall proceed to name—the inefficiency of the existing mode of letting out contracts, and the very inadequate supply of hands. To the last of these causes is mainly chargeable the tardy completion of that which is now finished, and the incomplete state of some of those sections which are of the old letting. A road thus made by contract may and must frequently get into the hands of men without adequate means, but with every disposition to fulfil their engagements; they are desirous of doing the work, underbid others, and perhaps contract for what will be an eventual loss to them. The consequences are, the retarding the work by the failure of the contractor; the hands lose their wages, and are thus deterred from labor, and in a manner driven from the road. Then, again, contractors, in order to obtain the work, are obliged to do it so low that they cannot offer any advance of price to the laborers, be the demand for them ever so pressing. Thus, men who prefer lighter labor, also prefer the labor of the farm; consequently, the work drags on heavily, and the contractors fail to perform their engagements in the specified time.

I am sensibly alive to the importance of a speedy completion of the road, but have no hope of accomplishing this object under the present system of contracting. If rapidity be desired by Government, a plan more likely to produce that effect, in my estimation, would be to abandon the mode of *separate contracts* altogether, and substitute *day labor.* In this way, rapidity of execution would be combined with faithfulness in performance. All inducements to fraud or deception would be done away; and, from my experience in very extensive *repairs* on other work, in which from two to three hundred men were employed, I do believe the work could be done *better*, certainly with more speed, and with a considerable saving of time, and perhaps of money. The effect of the organization of the whole number of laborers under one efficient head, aided and assisted by the subalterns, may readily be conceived, by making the comparison with a properly organized military force. By this organization, the vigorous and salutary hand of public authority is immediately felt in the security for the prompt payment of hands, and the certain and speedy means of supplying any want of labor by increasing the *per diem.* An increase of twenty-five cents per day, or at most fifty cents, I suppose would produce as many men as we could employ. This price, and the security of the Government for its payment, would give us a choice of all the spare labor of the adjacent country. These are mere suggestions of my own, submitted for your consideration, if the idea is properly embraced by my expression, and you approve of the alteration. If any further explanations are required, I shall attend to your request with promptitude and pleasure.

The ground between the end of the last letting (forty-seven miles from this place) and Uniontown, a distance of about thirteen miles, I have examined; but little time would be requisite to prepare the location. This part of the work might be commenced early next spring. A sum of about $90,000, it is believed, will be sufficient to complete it.

Frequent abuses take place upon the road, such as throwing down the walls, digging down the banks, felling trees, dragging —— along it, locking of wagon wheels, placing fences within the sixty-six feet, and many other improper acts are done; to prevent which some means ought to be speedily provided.

Should it be deemed advisable to make the location near the Ohio, the wish of Congress ought to be expressed. If the road is to be extended beyond the river Ohio, the ground on the other side ought to be viewed, and the bearing known, before the location on this side is made. All which is respectfully submitted by

Sir, your obedient servant,

DAVID SHRIVER, Jun.

The Hon. A. J. Dallas.

14th Congress.] **No. 404.** [1st Session.

MONUMENT TO THE MEMORY OF GENERAL WASHINGTON.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 14, 1816.

Mr. Huger made the following report:

The joint committee of both Houses, appointed under a resolution of the 16th February last, "to examine into the proceedings of a former Congress on the death of George Washington, and to take into consideration what further measures it may be expedient to adopt at the present time in relation to that solemn and interesting subject," respectfully report:

That they have carefully and attentively examined into the subject referred to them, and submit to the consideration of their respective Houses the following resolutions:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That, in pursuance of the resolution of Congress of the 24th December, 1799, a marble monument be erected by the United States to commemorate the military, political, and private virtues of George Washington.

That the receptacle for his remains be prepared in the foundation of the Capitol, and that the monument be placed over the same, and in the centre of the great hall of the Capitol.

That, on the four sides of the monument, he be represented—

As the defender of his country against the French and Indians in the war before the Revolution.

As the protector of her rights against British invasion, and the captain of her armies in the war of independence.

As the first President of the United States wisely administering the public affairs during eight years of peace, other nations being engaged in war.

As a private citizen voluntarily retired from public office, and engaged in the employments of agriculture.

And be it further resolved, That the President of the United States be, and is hereby, authorized to take measures to carry the foregoing resolution into execution.

14th Congress.] No. 405. [1st Session.

INCREASE OF THE SALARIES OF THE OFFICERS OF GOVERNMENT.

COMMUNICATED TO THE SENATE, MARCH 22, 1816.

Mr. Fromentin made the following report:

The committee appointed to inquire into the expediency of increasing the salaries of all the officers of Government beg leave to report:

That, from the most thorough investigation by them bestowed on the subject referred to them, they can have no hesitation in recommending an increase of salary to all the officers of Government mentioned in the bill which accompanies, and which they pray may be considered as part of this their report. By contrasting the prices of all the necessaries of life at the time at which the salaries of the officers of Government were first fixed with the prices now to be given for the same necessary articles, your committee are satisfied that the expenses of living have been increased in a proportion much greater than the increase contemplated in the bill now submitted to the Senate. At the same time, therefore, that they were persuaded an addition was to be made to the salaries of the officers of Government, they entertained doubts as to the amount of augmentation which it might be proper for them to recommend, having a due regard both to the necessities of the officers to be provided for, and to the principles of a wise and prudent economy. From these doubts your committee feel themselves relieved by the principle of augmentation established in the act lately passed to change the mode of compensating the members of Congress.

From the year 1789, when the Government first went into operation, to the end of the thirteenth Congress, it appears, by a reference to the journals, that Congress have been in session four thousand one hundred and forty-eight days; which number of days, divided by twenty-six, the whole number of years which have elapsed from the beginning of the first to the end of the thirteenth Congress, gives for each year an average number of one hundred and fifty-nine days and a fraction during which Congress have been in session, without making any mention of the additional number of days during which the Senate have been occasionally called upon to sit on executive business.

Had the compensation of members of Congress then been, as it now is, at the rate of $1,500 per annum, instead of six dollars per day, they would have received nine dollars and a fraction, making the increase to their salary, as fixed by the act to change the mode of compensating the members of Congress, about fifty per cent. over the sum at which it was originally fixed in the year 1790—an increase, however, still reduced somewhat below fifty per cent., as no alteration has taken place in the mileage.

Fifty per cent., then, being about the increase made by Congress to the compensation of their own members, may be fairly considered as the standard by which the salaries of the officers of Government ought to be now regulated; and the committee would have reported to you a resolution to that effect had there been no occasional increase of salary to some of the officers whose compensation was originally fixed in the year 1790, and had there not been several offices created since with rather more adequate salaries.

These circumstances preclude, on the part of the committee, the possibility of a compliance with a strict adherence to the principle of increase in every case in absolutely the same exact proportion. Your committee were further induced to sacrifice unimportant fractions to the advantage resulting from adopting a mode of compensation amounting to a round sum. With this view of the subject referred to them, and without losing altogether sight of the principle adopted by Congress in the act providing for the increase of their own compensation, your committee beg leave to add that, except in a few cases, where, from the considerations above mentioned, they have reported below the increase of fifty per cent., they have rather generally gone beyond than remained below the principle of an increase of fifty per cent. to the salaries as they were originally fixed in the year 1790.

A bill providing for the increase of the salaries of the officers of Government therein mentioned.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in lieu of the salaries formerly allowed to the officers of Government mentioned in this act, there shall be allowed to them from the 1st day of January, 1816, the following annual salaries, payable quarterly, at the Treasury of the United States, to wit:

To the Secretary of State,	$6,000
To the Secretary of the Treasury,	6,000
To the Secretary of War,	6,000
To the Secretary of the Navy,	6,000
To the Attorney General,	4,000
To the Comptroller,	4,000
To the Postmaster General,	4,000
To the Auditor,	3,500
To the Treasurer,	3,500
To the Commissioner of the General Land Office,	3,500
To the Commissioner of the Revenue,	3,500
To the Register,	3,500
To the Accountant of War,	3,000
To the Accountant of the Navy,	3,000
To the Paymaster of the Army,	3,000
To the Governors of the several Territories,	2,500
To the Secretaries of the several Territories,	1,500
To a minister plenipotentiary and envoy extraordinary to the courts of Paris, London, and St. Petersburg,	12,000
To a minister plenipotentiary and envoy extraordinary to any other court,	9,000
To a minister resident,	7,600
To a chargé des affaires,	5,500
To a secretary of legation,	2,500

To the Chief Justice of the United States,	$6,000
To the associate justices of the Supreme Court,	5,000
To the chief justice of the District of Columbia,	3,000
To the associate justices of the District of Columbia,	2,500
To the district judge for the district of Maine,	1,500
To the district judge for New Hampshire,	1,500
To the district judge for Vermont,	1,500
To the district judge for Massachusetts,	2,000
To the district judge for Rhode Island,	1,500
To the district judge for Connecticut,	1,500
To the district judges for New York, each,	2,000
To the district judge for New Jersey,	1,500
To the district judge for Pennsylvania,	2,000
To the district judge for Delaware,	1,500
To the district judge for Maryland,	2,000
To the district judge for Virginia,	2,000
To the district judge for Kentucky,	2,000
To the district judge for Tennessee,	2,000
To the district judge for Ohio,	1,500
To the district judge for North Carolina,	2,000
To the district judge for South Carolina,	2,000
To the district judge for Georgia,	2,000
To the district judge for Louisiana,	3,500
To the judges of the several Territories, each,	1,500
To the Secretary of the Senate,	2,500
To the Clerk of the House of Representatives,	2,500
To the principal clerk in the office of the Secretary of the Senate,	1,750
To each of the engrossing clerks in the office of the Secretary of the Senate,	1,500
To the principal clerk in the office of the Clerk of the House of Representatives,	1,750
To each of the engrossing clerks in the office of the Clerk of the House of Representatives,	1,500
To the chaplain to the Senate, at the rate of $1,000 per annum.	
To the chaplain to the House of Representatives, at the rate of $1,000 per annum.	

14th Congress.] No. 406. [1st Session.

CUMBERLAND ROAD.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 23, 1816.

Mr. Jackson, from the committee to whom was referred the message of the President of the United States of the 12th instant, transmitting a report of the Secretary of the Treasury containing a statement of proceedings under the act to regulate the laying out and making a road from Cumberland, in the State of Maryland, to the State of Ohio, with a statement of past appropriations, and an estimate of required appropriations, reported:

That they have attentively considered the subject confided to them, and respectively submit to the House the following facts and observations:

It appears, by an act of Congress, passed on the 1st of May, 1802, entitled "An act to enable the people of the eastern division of the Territory northwest of the river Ohio to form a constitution and State Government, and for the admission of such State into the Union on an equal footing with the original States, and for other purposes," that, on condition that the convention of the said State would provide, by an ordinance irrevocable without the consent of the United States, that each tract of land sold by Congress after the 30th June next ensuing shall be and remain exempt from any tax laid by order or under the authority of the State, whether for State, county, township, or for any other purpose whatever, for the term of five years from and after the day of sale, the United States, among other stipulations, agreed to apply one-twentieth part of the nett proceeds arising from the sales of said lands, from and after the said 30th of June, to the laying out and making public roads leading from the navigable waters emptying into the Atlantic, to the Ohio, in the said State, and through the same; such roads to be laid out under the authority of Congress, with the consent of the several States through which the same shall pass. It further appears that these conditions were accepted by the State of Ohio on the 29th of November, in the same year, subject, as regards the road fund, to a modification which provides that three per cent. of the nett proceeds arising from the sales aforesaid should be subject to the control of the Legislature of that State, and be applied to making roads within the same. It also appears, by an act passed on the 3d of March, 1803, that this modification received the sanction of Congress; and that, in pursuance of this compact, a law was passed on the 29th of March, 1806, authorizing the President of the United States to appoint commissioners to lay out a road from Cumberland, or a point within its vicinity, to the river Ohio, and on their report to pursue such measures as, in his opinion, were proper to obtain from the States through which the said road was laid out their consent to its location and completion.

It further appears to the committee that the location crossing portions of the States of Maryland, Pennsylvania, and Virginia, applications were made to their respective Legislatures, and permission was given by each, to open and establish the said road.

By the report of the Secretary of the Treasury, referred to the committee, it appears that of the appropriations heretofore made towards completing this road, and amounting in the whole to the sum of - $410,000 00

There have been expended, - - - - -	$285,786 60	
Carried to the surplus fund, - - - - -	22,679 75	
		308,466 35
Leaving a balance on the 27th of February, 1816, of - - - -		$101,533 65

applicable to that object; and that a further appropriation of $300,000 is recommended by that report to complete the road to Brownsville, on the Monongahela river; to cover the expenses of a survey from thence by Washington and Alexandria to Wheeling, and to make the road at and from Wheeling to the 113th mile tree, a distance of about twelve miles.

It also appears, by the letter of the superintendent of the road to the Secretary of the Treasury, that frequent abuses are committed on the road, such as throwing down the walls, digging away the banks, &c.; and he suggests that measures ought to be promptly adopted to prevent and to punish these outrages.

This investigation suggested to the committee two points of inquiry to which their attention has been directed: first, the necessity of protecting the work already completed against lawless violence; and, secondly, the propriety of making an ample appropriation for advancing its progress to completion, in order that the benefits it promises may soon be realized.

In considering the first point, although it appears that the Secretary of the Treasury, in his letter communicated at the last session, doubts the authority of Congress to pass any laws for punishing the offenders, the committee do not perceive any defect of jurisdiction. Without controverting the opinion that the constitution does not, in virtue of any grant of power conferred by that instrument, authorize Congress to open roads and canals in any State, it seems to be admitted by all that, if a compact be made with a State, for which the nation receives an equivalent, as in this case, whereby it is agreed that a road shall be opened by the Government of the Union, and the States through which the road passes grant the right to make it, the performance of such compact is not in contravention of that construction, as it is believed that the exercise of such power has, in no instance, been doubted, notwithstanding the repeated acts of legislation for a period of thirteen years. The permission of the States having been given, it follows, as a necessary consequence, that all the powers obviously necessary and proper to carry the grant into complete effect, and preserve it inviolable, have been conferred also. A different construction would render the consent a nullity, and exempt from punishment as well the individuals who resisted the execution of the work, as those that afterwards destroyed it.

If the right to punish these offences belongs to the National Government, it may be effected without the passage of any law, by indictment or information in the courts of the United States, or by enacting statutory provisions fixing the penalties, it being a fundamental right of the judiciary inherent in every Government to punish all offences against the laws passed in pursuance of a delegated power, independently of express legislative sanctions. Although the committee deem it proper to make this explicit assertion of a right which it may become necessary to exercise on some future occasion, in case of a peremptory refusal by a State to pass any law upon the subject, yet, as they believe that no such disposition exists in relation to the road in question, and that prosecutions under State laws may be most effectual in preventing the practices complained of, because of the distances to the places where the respective federal courts are held, they abstain from recommending at this time the passage of any law upon that subject.

In regard to the second branch of the inquiry, viz: the amount of appropriation proper to be made at the present session, it appears to the committee that, although the fund chargeable with the reimbursement of expenditures has been anticipated, it is growing more productive every year, and will be eventually adequate to defray the expenses of completing the road.

If Congress persevere with becoming spirit in this great public work, we shall soon see one of the best roads in the world over the chains of mountains which separate the western from the Atlantic waters, and which, but a few years since, were supposed to present insurmountable obstacles to a safe and easy intercourse. The committee learn with much satisfaction that the State of Maryland is engaged in extending the turnpike road that reaches from Baltimore to Boonsborough on to Fort Cumberland; and in all probability it will be completed before the national road from that point to the Ohio is finished.

It is not intended to expatiate at large upon the moral, political, and physical advantages of this road to the nation. They doubtless entered fully into the contemplation of the Congress by whom the original law was passed; time and experience have given the fullness of their sanctions to the wisdom of their decision; and it is alike a source of surprise and regret to the committee that the work has been suffered, with the ample means possessed by the Government, to linger for a period of more than nine years.

A vigorous prosecution of it now can alone, in any degree, repair the past neglect; and, in the estimation of the committee, no subject is more deserving the favor of Congress. They are aware of the opinion entertained by some that the western country already holds out sufficient lures to the inhabitants of the Atlantic States to migrate thither, and that it is impolitic to contribute to their increase, which will be the effect, as is supposed, of giving facilities to such removal. The error of this reasoning is proved by the infallible test of experience applied to the past and present population of the States and Territories west of the mountains. The emigrant removes with intention to reside for life in his new habitation; and, when he determines upon such removal, he bestows but little attention upon the inquiry whether the road on which he has to travel is a very good one, or in the condition of the principal State roads now used. This policy, therefore, although it cannot prevent him from going to the West, may, and, if persisted in, soon will, materially affect his future connexions with the eastern country in all the ramifications of a mutually profitable trade and intercourse. The natural advantages of a water over a land communication for the purposes of transporting all articles of merchandise will not be denied by any; and trade will always seek that channel which affords it the fairest prospects of realizing its legitimate profits.

Whenever, therefore, land and water communications are found to possess a fair competition with each other in any country, the improvements on both must be equal, to prevent the monopoly of either. The navigation of the Mississippi and Ohio rivers by steamboats is now in its infancy; its success is no longer doubtful, and it is increasing with a rapidity corresponding to that success. During the last years the sugar and cotton of Louisiana were brought up by water to Pittsburg, and, in consequence of the extraordinary demand, were transported from thence in wagons to the Atlantic cities, and sold at prices affording a profit to the owner. With the great advantages of steam navigation, unless the roads across the mountains be much improved, the merchants of the western country will cease to purchase goods from the importers at New York, Philadelphia, Baltimore, &c., and New Orleans will soon become the sole emporium of their trade.

This result never can be produced if a due attention be paid to the improvement of the means of internal communication. The rivers that take their rise in the mountains may be made navigable. In various sections of the

country the portage between them can be diminished to an inconsiderable distance, and roads passing over the entire route will present an option to the merchants as to the mode of transportation. Their connexions have been formed for a considerable period; these have begotten confidence and a mutuality of interests which bind the parties to a future intercourse, and which will not be changed unless for a positive and unequivocal benefit.

But the advantages of an intimate commercial connexion, though addressed to the interest of the parties, are not the most important. Good roads have an influence over physical impossibilities. By diminishing the natural impediments, they bring places and their inhabitants nearer to each other. They increase the value of lands and the fruits of the earth in remote situations, and, by enlarging the sphere of supply, prevent those sudden fluctuations of prices alike prejudicial to the grower and consumer. They promote a free intercourse among the citizens of remote places, by which unfounded prejudices and animosities are dissipated, local and sectional feelings are destroyed, and a nationality of character, so desirable to be encouraged, is universally inculcated.

The road which is the subject of the particular inquiry of the committee has additional recommendations. It leads as far as Washington in a direct line from the seat of Government to the important frontier of the United States on the upper lakes; and if, as the committee suppose, it be the true policy of the nation to have a direct military communication for the entire distance, a road can be extended from Washington, and, passing as it will through a large extent of public lands, inducements will be held out to the western settlers to purchase them, and by a rapid increase of the population, the necessity of keeping up a considerable military force in that quarter will be diminished, if not entirely superseded.

These constitute a part of the reasons which have induced the committee to recommend an appropriation of $300,000 at this time; and therefore they submit the following resolution:

Resolved, That the bill entitled "An act making appropriations for the support of Government for the year 1816" be amended in the ——— line by inserting the following paragraph:

"For making the road from Cumberland, in the State of Maryland, to the State of Ohio, to be repaid out of the five per cent. fund reserved for that purpose, $300,000."

14th Congress.] **No. 407.** [1st Session.

ALLOWANCES MADE TO ASSISTANT COUNSEL FOR THE UNITED STATES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 23, 1816.

MARCH 22, 1816.

I transmit to the House of Representatives a report from the Secretary of the Treasury, complying with their resolution of the 29th February last.

JAMES MADISON.

The Secretary of the Treasury, to whom the President of the United States referred the resolution of the 29th February, 1816, requesting that there be laid before the House of Representatives "a statement of the cases in which he has employed, or caused to be employed, counsel to assist the Attorney General prosecuting causes in the Supreme Court of the United States, stating, as nearly as may be, the amount of the property in dispute in each case, the names of the counsel so employed, the period of employing them, and the compensation granted to them in each case; also, the manner of making such compensation, and the fund out of which the same was paid," has the honor to present the following report:

That it appears to have been the practice of the Government to employ counsel to assist the Attorney General, and also the district attorneys, in cases of great importance, either as to the principle or as to the value involved in the controversy. Thus, for example, so early as February term, 1796, of the Supreme Court, Alexander Hamilton received a fee of $500 to assist the Attorney General in maintaining the affirmative upon the question respecting the constitutionality of the carriage tax, and Alexander Campbell and Jared Ingersoll, counsel maintaining the negative, received a fee of $233 33, under an agreement that, for the purpose of obtaining a final decision, the United States should pay all the expenses incident to the transfer of the cause from the circuit court to the Supreme Court.

That, on the 24th March, 1804, in obedience to a resolution of the House of Representatives of the 3d of the same month, the Secretary of the Treasury presented a statement "of all the moneys which, since the establishment of the present Government, had been paid at the Treasury of the United States as fees to assistant counsel, and for legal advice in the business of the United States, in which were distinguished the several sums, when paid, for what services, and to whom paid respectively," amounting, in the whole, to the sum of $5,022 16.

That the statement hereunto annexed, marked A, contains a like specification of all the moneys paid or payable at the Treasury of the United States, from the 24th March, 1804, until the present time, for the employment of counsel to assist or to represent the Attorney General in causes depending in the Supreme Court of the United States, amounting, in the whole, to the sum of $4,540.

That this Department does not possess the means of stating the amount of the property in dispute in each case in which assistant counsel has been employed in the Supreme Court, but it is confidently believed, from general information, that, in every such case, either the value of the property was great, or the principle of the controversy was important, or the employment of assistant counsel, in the cases of sickness or other casualties, was essential to the public interests, as will more particularly appear by the notes accompanying the statement A.

That the manner of making the compensation to the assistant counsel has uniformly been by issuing the warrants of the Secretary of the Treasury, founded upon the official settlement of the Comptroller and Auditor, and by paying the amount, either out of the appropriation annually passed by Congress "for the discharge of such miscellaneous claims against the United States not otherwise provided for as shall have been admitted in due course of settlement at the Treasury," or out of the appropriations annually made "for the discharge of such demands against the United States, on account of the civil department, not otherwise provided for, as shall have been admitted in due course of settlement at the Treasury."

All which is respectfully submitted.

A. J. DALLAS, *Secretary of the Treasury.*

TREASURY DEPARTMENT, *March* 21, 1816.

A.

March 19, 1805.—Alexander James Dallas was employed to assist the Attorney General in the Supreme Court upon the argument of the case of the United States *vs.* the assignees of Blight, a bankrupt, for which he received a compensation of - - - - - $500 00

NOTE.—In this case the claim of a general priority, for the satisfaction of debts due to the United States, occurred. The amount in dispute was considerable, but the principle involved was of much more importance. The Attorney General being indisposed, the assistant counsel argued the case alone.

January 1, 1813.—Alexander James Dallas was employed to assist the Attorney General in the case of the French Government schooner Balou, (formerly the Exchange,) and generally in the business of the United States, February 7, 1812, for which he received a compensation of - 1,200 00

NOTE.—The Balou was a public armed vessel of France, attached in the port of Philadelphia by persons claiming her as their property. The case involved the important question whether such an attachment would lie; and, on the remonstrance of the minister of France, the President directed it to be brought before the Supreme Court. Mr. Pinkney, the Attorney General, being recently appointed, requested, also, some general assistance in the business of the term, to prevent delay. Mr. Dallas argued the case of the Exchange, and ten other cases.

May 14, 1808.—Walter Jones was employed to assist the Attorney General in the Supreme Court, upon the argument of the case of the United States *vs.* the schooner Betsey and Charlotte, Wm. Yeaton claimant, for which he received a compensation of - - - - 200 00

February 7, 1814.—William Pinkney, having resigned the office of Attorney General, was employed as counsel to argue the cases of the United States depending in the Supreme Court at February term, 1814, for which he received a compensation of - - - - 1,000 00

NOTE.—Mr. Pinkney's resignation, though previously intimated, was not received until the term had commenced, and Mr. Rush, who was appointed his successor, could not take the oath of office under his commission, dated the 10th February, 1814, until the 12th of the same month. In accepting his appointment, it was explicitly understood that he did not undertake to argue the causes of the United States during the current term, as it would have been impracticable to read the records, and to make the necessary preparation. It was, therefore, an alternative either to postpone the public business until the next term, or to engage the services of Mr. Pinkney, who had a previous knowledge of the records. He was accordingly engaged, and he procured decisions in many important cases, besides giving a general attention to the interests of the United States throughout the term. Mr. Pinkney's compensation has not been paid at the Treasury, but has been credited in his account as minister at the court of London.

November 14, 1814.—John Law was employed to prepare the statements of the cases depending before the Supreme Court at February term, 1814, for which he received a compensation of - 440 00

NOTE.—Mr. Pinkney having only undertaken to discharge the duty of counsel, it was necessary to engage Mr. Law's services in the solicitor's business.

February term, 1815.—Walter Jones was employed, on account of the extreme indisposition of the Attorney General, to transact the business of the United States in the Supreme Court at February term, 1815, and a compensation has been authorized, but not yet paid, of - - 1,000 00

$4,340 00

14th CONGRESS.] No. 408. [1st SESSION.

ALTERATIONS IN THE PATENT LAWS.

COMMUNICATED TO THE SENATE, APRIL 11, 1816.

To the Senate and House of Representatives of the United States: APRIL 11, 1816.

With a view to the more convenient management of the important and growing business connected with the grant of exclusive rights to inventors and authors, I recommend the establishment of a distinct office within the Department of State, to be charged therewith, under a director, with a salary adequate to his services, and with the privilege of franking communications by the mail from and to the office. I recommend, also, that further restraints be imposed on the issue of patents to wrongful claimants, and further guards provided against fraudulent exactions of fees by persons possessed of patents.

JAMES MADISON.

14th CONGRESS.] No. 409. [1st SESSION.

COMPENSATION OF MINISTERS AND CONSULS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, APRIL 15, 1816.

SIR: DEPARTMENT OF STATE, *April* 5, 1816.

I have had the honor to receive your letter of March 28th, with a copy of a resolution of the House of Representatives, instructing the Committee of Ways and Means to inquire into the expediency of increasing the annual

allowance to the ministers of the United States in foreign countries, and of allowing salaries to the consuls of the United States in foreign ports, and requesting such information or opinion on the subject as I may be able to communicate.

Considering it my duty to communicate all the information in the possession of the Department, or within its reach, on any public subject before the House, which may be desired by the committee, I have to add that, in performing that duty, I shall always be happy to give, without reserve, such opinion as I may have formed on the subject.

On the first part of the resolution, relating to the expediency of increasing the compensation of our ministers in foreign countries, there is but one opinion among all those who have had the best opportunities of acquiring correct information, which is, that the present allowance is altogether inadequate. In this opinion, especially in respect to the principal courts, I fully concur. Representations to this effect having been made by several of our ministers, I annex a copy of their communications on the subject; well satisfied I am that great losses have been sustained by those who remained any considerable time abroad.

The members of the diplomatic corps at the several courts of Europe live much in the same style. Their household establishment, equipage, number of their servants, expenses in attending court, of intercourse with each other, and of hospitality, are, in the most material circumstances, similar. The habits and propensities of particular members of the corps may increase these expenses considerably; but no degree of economy can reduce them below a certain grade. From the nature of our Government, something may be spared to our ministers in what regards style or mere ostentatious display, but in nothing else. All the other heavy items are as applicable to them as to the ministers of other Powers.

Presuming that a view of the compensation allowed by the Powers of Europe to their representatives at foreign courts may serve to give an idea of the expense of living there in that character, I have annexed a statement of it, as far as it has come within my knowledge.

Having stated the facts which are essential in this case, it is not necessary, and might be improper, for me to communicate any opinion as to the degree of augmentation which ought to be made to the salaries of our ministers in foreign countries. With a knowledge of the facts, every member of the committee is as competent to judge of the proper augmentation as I can be. The United States constitute a distinguished member of the great community of nations. Their citizens, favored by many important circumstances, particularly by the great excellence of their Government, enjoy in the highest degree all the blessings which can be derived from the social compact. It is our duty to perpetuate these blessings, and, with that view, to fortify ourselves at every point where danger of any kind menaces. Is it necessary that the United States should be represented with foreign Powers? That has long ceased to be a question. Shall they maintain a proper station there, not assuming, but dignified, such as the general expectation and common opinion of mankind have given them? That has never been a question. The character of the country, if not its rank, is in some degree affected by that which is maintained by its ministers abroad. Their utility in all the great objects of their mission is essentially dependant on it. A minister can be useful only by filling his place with credit in the diplomatic corps, and in the corresponding circle of society in the country in which he resides, which is the best in every country. By taking the proper ground, if he possesses the necessary qualifications, and is furnished with adequate means, he will become acquainted with all that passes, and from the highest and most authentic sources. Inspiring confidence by reposing it in those who deserve it, and by an honorable deportment in other respects, he will have much influence, especially in what relates to his own country. Deprive him of the necessary means to sustain this ground, separate him from the circle to which he belongs, and he is reduced to a cipher. He may collect intelligence from adventurers and spies, but it will be of comparatively little value; and, in other respects, he had as well not be there.

On the other part of the resolution—the propriety of allowing salaries to our consuls in foreign ports—I have to state that it is deemed advisable to make such allowance, limited, in the commencement, to certain countries, and to the metropolis of each. On several of the Governments of Europe our citizens have claims to a considerable amount still to settle. In many of the ports of each Power we have, almost at all times, destitute seamen, discharged either from our own merchant vessels, or from those of other nations into which they had entered. Neither of these interests will be duly attended to without a special agent, with an adequate compensation. A consul is the fittest person to perform these duties; and, under the superintendence of the minister, whose business it is to settle principles, he may with propriety be charged with them. Our citizens have claims on Great Britain, France, Spain, Denmark, the Netherlands, Sweden, and Naples; and we have often destitute seamen in the ports of most of those countries, especially Great Britain. These duties must be executed with some department of their respective Governments near which our agents must reside. It is therefore proposed to allow salaries at this time to our consuls at London, Paris, Madrid, Amsterdam, Copenhagen, and Stockholm, at which places the fees of office and profits of trade do not afford them a support. As special reasons operate in favor of the allowance to these places, it is thought advisable to confine it to them, without deciding, at this time, on the policy of a general change of the system. That turns on other considerations, many of which are suggested in Mr. Crawford's letter. The duties which it is proposed to vest in these consuls being of a general nature, and, in regard to seamen, co-extensive with the European dominions of each Power, it may be useful to give to their consular functions a corresponding extent. Such an extension of the consular authority in an agent residing at the metropolis of the country to which he is appointed, and paid by his Government, would, it is presumed, be found advantageous to our commerce. It would certainly make them more adequate to the other duties which it is proposed to assign them. It may likewise be observed, in favor of the proposed allowance, that the experiment on this scale would afford useful light as to the policy of a general change of the system, when that subject is entered on.

I have the honor to be, with great respect, sir, your most obedient servant,

JAMES MONROE.

The Hon. WILLIAM LOWNDES,
Chairman of the Committee of Ways and Means.

Great Britain allows to an ambassador—		
At Paris,	£10,000	
A house estimated at,	1,000	£16,000
An outfit,	5,000	
At Vienna, St. Petersburg, and Madrid,	10,000	
In lieu of a house,	1,000	16,000
Outfit,	5,000	

At Constantinople and the Hague,	£9,000	
At the first a house is found.		£14,500
At the Hague, an allowance of	1,000	
Outfit, half the salary,	4,500	
At Berlin and Lisbon,	8,000	
A house,	1,000	13,000
Outfit,	4,000	
Envoy extraordinary and minister plenipotentiary to the United States of America,	6,000	
Outfit,	3,000	9,500
House,	500	
Naples the same as to the United States.		
Stockholm, Copenhagen and Munich, each,	5,000	
Outfit, half the salary,	2,500	8,000
House,	500	

At Madrid, when I was there in 1805, the compensation to the French ambassador was, I understood, a salary of 45,000 crowns; that to the Portuguese, 25,000.

It is understood that the salaries allowed by the Emperors of Russia and Austria, and by the King of Spain, are of the same grade; and that those of Prussia, Denmark, Sweden, and Holland, though lower than are given by the principal Powers, are higher than those given by the United States. A distinction is made between the salaries of ambassadors and envoys extraordinary and ministers plenipotentiary; to the principal courts ambassadors are, for the most part, sent by the great Powers, and not envoys extraordinary and ministers plenipotentiary.

SIR: WASHINGTON, *April* 5, 1816.

I have the honor to acknowledge the receipt of your letter of the 3d instant, enclosing the resolution of the House of Representatives, instructing the Committee of Ways and Means to inquire into the expediency of increasing the annual allowance of ministers of the United States at foreign courts, and of allowing annual salaries to the consuls of the United States at foreign ports. In reply to your request for the communication of such information on that subject as my late residence abroad will enable me to furnish, I have the honor to state that, from my own experience, I am convinced that a considerable increase to the present allowance to our ministers at London and Paris is highly expedient. From every circumstance which has come to my knowledge, the court of St. Petersburg ought to be embraced by the proposed measure. The enclosed extract of a letter from Mr. Erving will show the propriety of extending the measure to the court of Spain.

Annexed is a statement of the salaries of foreign ministers at the different courts of Europe as far as they have come within my knowledge.

The propriety of allowing annual salaries to the consuls of the United States presents a question of more difficult solution. At present, the inducement to seek the appointment of consul is the advantage which it confers in the prosecution of foreign trade. American consuls are generally able to enter into partnership with the most respectable mercantile houses in the ports where they reside, without bringing any thing into the firm except those advantages. It is manifest, therefore, that the strongest temptation will be presented to render their official acts subservient to the commercial interests of their foreign partners. It is more than probable that many of the abuses which were known to exist during the late European war, in relation to American papers, and which were seized as the pretext for the unprincipled spoliations committed by the principal belligerants upon American commerce, originated from this source. This view of the subject presents some inducement to allow American consuls annual salaries, and for prohibiting them from all participation in trade. But the salary must be considerable, or it will be no equivalent for the restriction which ought to be imposed upon them. The commerce of the United States is now prosecuted in almost every part of the world. The number of consuls necessary for the protection of this commerce would, with competent salaries, involve a very great annual expense. To allow salaries to none but the consuls of the capitals of each maritime state would not remove the evil, because, in many cases, the capital is not the principal trading city of the country; and even where it is, there are, in every case, other trading cities in the same state where abuses may be committed to the same extent. To reduce the number of consuls, and to compel vessels, whether American or foreign, to have their papers authenticated by them, in order to obtain admittance into an American port, would present a temptation to foreign nations to make the same regulation with regard to American ports, which might give to the ports of one state an advantage over those of another; but this regulation would be no radical remedy of the evil intended to be removed. The prosecution of commerce under surreptitious papers is carried on most securely in ports which are not much frequented. It is generally carried on between the ports of foreign states, and not between foreign ports and those of the United States. These abuses will occur more extensively in time of European wars than in peace, and will not fail to produce great embarrassments to the fair and legitimate commerce of the United States.

There is, however, some reason to believe that the appointment of a consul general to each of the principal commercial states, with a competent salary, invested with power to superintend the conduct of the other consuls, and to make general regulations for their government, subject to the sanction of the President, might be found beneficial. Residing at the capital, and carrying on an active correspondence with the different ports of the country, abuses would be more likely to be discovered and corrected than at present. If it shall be deemed expedient to give them annual salaries, a fund might be created by levying a small tonnage duty upon all American vessels which enter foreign ports. Where the duty collected in a port exceeds the salary, the surplus might be paid over to another consul in the same state, where there was a deficiency.

This mode of compensation might be adopted, whether salaries are allowed or not; and there is but little doubt that it would be received as an equivalent for the right of carrying on trade. In this case, a maximum ought to be fixed. The surplus might be applied in aid of those whose emoluments were the most below that maximum.

I have the honor to be your most obedient and very humble servant,

WM. H. CRAWFORD.

Hon. JAMES MONROE, *Secretary of State.*

Minister of France in the United States, 15,000 crowns.
The same to the third rate Powers in Europe.
To the secondary Powers in Europe, 25,000 crowns.

Ambassadors to the latter courts, 50,000 crowns.

Ministers plenipotentiary to the principal European courts, viz: London, Vienna, St. Petersburg, and Constantinople, the same as ambassadors at the secondary courts.

Under the Emperor, ambassadors at the latter courts were not limited in their expense.

English ambassadors at Paris, £10,000.

English ambassadors at Lisbon, £8,000.

Extract of a letter from George W. Erving to the Hon. William H. Crawford.

"The raising" of the salary there [St. Petersburg,] would, I presume, be very proper, whoever might go; the including London and Paris in this liberal arrangement may also be proper; but why do they exclude Madrid? It is true that nobody has made any noise about the dearness of living at Madrid, for nobody has been there for ten years but myself, and, before my time, raising salaries was never contemplated as possible. In a great many points of view, Madrid may be considered as the most important mission; it is at this time the most difficult and laborious, and has the greatest and most delicate responsibility belonging to it; ought it in that view to be placed on a footing with Holland, Naples, Sweden, and Brazil? As to expense, I would undertake to *prove* that it is at least twenty-five per cent. dearer than London or Paris. The causes of this difference are evident; almost every thing of superior excellence must be brought from France or England; no one attempts to live upon what is to be found in Spain; from the nature of society there, the *corps diplomatique* is necessarily crowded in upon itself; it makes its own society. This occasions a perpetual round of diplomatic dinners and entertainments, which are not to be avoided; for the same reason, all foreigners of distinction who arrive there are in some sort, as at Constantinople, dependant upon their ministers for society; they are regularly introduced to such member of the *corps diplomatique*, and must be as regularly invited, &c. These, to say nothing of the change of residence, augment the expenses of a minister terribly; in fine, he cannot retire—he must be always *in evidence;* and the more splendid, because he has to compete as it were with the grandees. Add to all these solid considerations, that it is a place, in every view, of *mal-aisé*, and, as I have found it heretofore, it may be again a post of personal danger. I do not write to the Secretary of State or the President on this matter, because I have made a general rule of never pressing upon them money considerations.

From the honorable H. Clay to the Secretary of State.

SIR: WASHINGTON, *April* 5, 1816.

I have the honor to acknowledge the receipt of your letter of the 3d instant.

During my residence in Europe, my place of abode was so frequently changed, and it having been, moreover, principally at provincial towns, that I am not able to furnish much useful information on the subject of your letter, derived from my own personal experience. I was in London rather more than three months, and, expensive as I had previously understood that city to be, I found it, in that respect, greatly exceeding all my anticipations; and yet I kept no house, and was certainly not extravagant in my personal expenses.

My opinion of the style in which an American minister ought to live is, that, avoiding the meanness which provokes ridicule, and the ostentation which challenges observation, it should be one of neat simplicity, regulated by the habits of society in the country where he resides, and admitting of the return of civilities and the dispensation to our respectable countrymen of expected hospitality. I believe the present salary wholly inadequate to sustain the expenses of such a style of living at most, if not all, of the foreign courts at which we have ministers.

I can communicate to you no information of the salaries allowed by other Powers to their ministers at foreign courts, nor as to the propriety of allowing salaries to our consuls.

I am, sir, with great respect, your obedient servant,

H. CLAY.

The Hon. JAMES MONROE.

Extract of a letter from Mr. Barlow to the Secretary of State, dated

PARIS, *November* 21, 1811.

I need not tell you how necessary it is to raise the salary if you do not mean either to ruin your minister or injure your affairs. A man in this situation must either spend double his salary, or keep himself excluded entirely from society and from his duty. I naturally and habitually love simplicity, and have an aversion to luxury; but my duty requires that, in this respect, I should give up my own taste. I am determined, while I stay, to do my duty; and, to do this, I must spend at least fifteen (probably eighteen) thousand dollars a year. In this way I cannot stand it long, and you cannot expect to find many men in our country who are at once willing and able to do it, and who are fit for the place.

Pardon the frankness with which I speak on a subject on which I may appear more selfish than I really am, for I feel myself impelled to it by a sense of duty, and I am not without hopes that you will likewise feel it a part of your duty to use your influence to set this matter right.

Extracts from Mr. Adams's letters to the Secretary of State.

LONDON, *July* 31, 1815.

It is needless to say to you, or to any person having been in the same capacity here, that the annual salary of an American minister is insufficient to support a man with a family—I say not in the style of high official rank, but in the decency becoming a private gentleman.

SEPTEMBER 30, 1815.

An experience of the expense of living here for upwards of four months, even under all the privations to which I have submitted, has confirmed me in the desire to be recalled as early in the spring as the President may find it convenient to replace me, if, upon the construction of the law, the Legislature should refuse an appropriation for the outfit.

JANUARY 9, 1816.

With every expedient of economy that I find possible, I am living at an expense which, at the end of two years from my arrival in this country, would more than absorb the whole salary for those two years, *even* with the allowance for the outfit.

A very few years' residence here must involve my own affairs beyond all power of redemption.

Extracts of a letter from Mr. Adams to the Secretary of State, dated

JANUARY 4, 1816.

It is very desirable that some general revision of the consular establishments should be made, and some regular system concerning them be sanctioned by law. For the port of London a provision for the compensation of the consul must be made, or the office must be given to some wealthy merchant established in the city, to whom it may be acceptable for the facilities of business which he may derive from it. Colonel Aspinwall cannot hold it long without a salary, or without forming a commercial establishment connected with it, and upon which alone he must rely for support.

In one of his late letters to me, (a copy of which has been transmitted to you,) Mr. Beasley expresses the conviction that the provision made by the laws of the United States for the relief of indigent and destitute seamen in foreign ports is liable to great abuse. The late and present excessive numbers of persons claiming the benefit of it, both at London and Liverpool, afford confirmations of that opinion; but, on the other hand, it is obvious that, with the increase of our commerce and navigation, the casualties incident to them must have proportionably multiplied. The opportunities and the chances of imposition must also be much greater, and require more caution to be guarded against in England than in any other country; and I believe it will be uniformly found, in a time of general European peace, that the duty of affording relief to the objects of this class really entitled to it, and that of discriminating between them and the impostors who would prey upon the fund allotted to this honorable purpose, will be the most arduous and important obligation of an American consul. * * * Mr. Bourne, the consul at Amsterdam, has also lately written to me on the same subject, and complains of similar charges. His claims for particular compensation to himself for his long services there, have been often made known to the Government.

The direct commerce between the United States and the port of London is comparatively small. The number of American vessels which come to it is inconsiderable. The official emoluments from year's end to year's end will not pay office rent and the wages of a single clerk. If the support and reconveyance to the United States of destitute seamen be made the duty of the consul, some provision for the payment of the necessary expenses of this service must be made.

14th CONGRESS.] **No. 410.** [2d SESSION.

REGISTER OF THE OFFICERS AND AGENTS OF THE UNITED STATES, AND THE FORCE AND CONDITION OF THE NAVY, SEPTEMBER 30, 1816.

COMMUNICATED TO CONGRESS BY THE SECRETARY OF STATE, ON THE 2D OF DECEMBER, 1816.

Resolution requiring the Secretary of State to compile and print, once in every two years, a register of all officers and agents, civil, military, and naval, in the service of the United States.

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That, once in two years, a register containing correct lists of all the officers and agents, civil, military, and naval, in the service of the United States, made up to the last day of September of each year in which a new Congress is to assemble, be compiled and printed under the direction of the Secretary for the Department of State. And, to enable him to form such register, he, for his own Department, and the heads of the other Departments, respectively, shall, in due time, cause such lists as aforesaid of all officers and agents in their respective Departments, including clerks, cadets, and midshipmen, to be made and lodged in the office of the Department of State; and the said lists shall exhibit the amount of compensation, pay, and emoluments allowed to each officer, agent, clerk, cadet, and midshipman, the state or country in which he was born, and where employed.

2. *Resolved*, That the Secretary of the Navy subjoin to the list of the persons employed in his Department the names, force, and condition of all the ships and vessels belonging to the United States, and when and where built.

3. *Resolved*, That five hundred copies of the said register be printed; and that, on the first Monday in January in each year when a new Congress shall be assembled, there be delivered to the President, the Vice President, each head of a Department, each member of the Senate and House of Representatives of the United States, one copy of such register, and to the Secretary of the Senate and Clerk of the House of Representatives, each, ten copies, for the use of the respective Houses; that twenty-five copies shall be deposited in the library of the United States at the seat of Government, to be used like other books in that library; and that the residue of the said copies be disposed of in such manner as Congress shall from time to time direct.

4. *Resolved*, That, for the information of the present Congress, such register as aforesaid be prepared and distributed as aforesaid on the first day of its next session.

Approved: April 27, 1816.

Richard Ferguson,	-	- -	Louisville.
John Andrews,	-	- -	Cincinnati, Ohio.

NOTE.—The compensation, pay, and emoluments of the officers of the custom-house department, as given above, are stated upon the authority of a report from the Comptroller's office. The principal source of their compensation is to be found in fees and commissions. In some instances they receive, in addition, certain salaries. In most of those cases where no definite sums are stated in the second column, the officers, it is believed, receive only fees and commissions.

James McGuire, do. - -	-	Maryland, -	Alexandria, D. C.

N. B. Agreeably to law, each principal assessor receives an annual salary of $200, and $3 for every hundred taxable persons contained in the tax lists delivered to the collector; besides which, the reasonable expenses incurred for books and stationary are paid; but no allowances are made to principal assessors in States which have assumed the payment of their respective quotas of the direct tax.

As the accounts of principal assessors have in but a few instances been rendered for the present year, the materials do not exist at the Treasury for stating the respective aggregate amounts payable to each officer.

SUPERINTENDENTS AND KEEPERS OF LIGHT-HOUSES.

Timothy Upham, superintendent, - -	-	New Hampshire	Portsmouth, N. Hamp.
David Duncan, keeper, - - -	$300	Massachusetts,	Do.

SIR: ADJUTANT AND INSPECTOR GENERAL'S OFFICE, *November* 8, 1816.

Agreeably to the orders of the War Department of July 23, and conformably to a resolution of Congress dated April 27, 1816, I have the honor to lay before you a corrected list of the officers of the army, arranged by departments, and corps, and lineal seniority, showing the *State or country in which each was born*, so far as I have been able to obtain reports, together with a statement of the pay and subsistence of every description of troops in the army of the United States.

I have also to state that John M. Hepburn, born in Maryland, and Brooke Williams, born in the District of Columbia, are employed as clerks in this office; the former receives $1,200, and the latter $1,100 per annum.

I have the honor to be, sir, with perfect respect, your obedient servant,

D. PARKER,
Adjutant and Inspector General.

The SECRETARY OF WAR.
